ANY MAKE—ANY SIZE—ANY JEWEL WATCH

ON CREDIT—PAY MONTHLY

No man is bigger than his watch. Pull a dollar watch from your pocket and it screams **"You are a Dollar Man."** Now, my friend, you don't belong in the dollar or cheap watch class. With my easy monthly payment plan you can own a watch that is a credit to you and does not belittle you. Pay a little each month, that's all.

SEND NO MONEY WITH YOUR ORDER.

Send no money with your order. I want you to see the watch before you pay one cent. See it first is my way of selling watches because my line of watches are the best made and I am proud of the fact that I can send out watches on approval and make sales by this method.

30 DAYS FREE TRIAL

After receiving and accepting any one of my watches, I want you to wear and test it for 30 days. If you are not delighted, pleased and satisfied at the end of 30 days, send it back at my expense.

MY PAYMENTS ARE SMALLER.

Our capital and buying power are such that I can offer you terms that local jewelers could not meet with their limited capital.

WRITE FOR BIG CATALOG.

Use the Free Coupon and write for my big catalog to-day. It's full of all the best watches, finest diamonds and exquisite jewelry.

SQUARE DEAL MILLER, Pres.
Miller-Hoefer Co.
4000 Miller Bldg. Detroit, Mich.

JOIN THE MILLER THRIFT CLUB
SAVE A DIAMOND
Pay a little each month and never miss the money

If you buy an imitation diamond the only person you Fool is Yourself.

We invite Women as well as Men to open up a Charge Account and pay Monthly. Our terms are the same for all goods.

A Personal Word From Square Deal Miller

Because every account on my books represents a real friendship established on the basis of a "Square Deal," I have become known to my customers from coast to coast as Square Deal Miller. I have taught the public the real meaning of "Dignified credit," and I have won the confidence of over a million customers by selling only the highest grades of diamonds, watches and jewelry on a Square Deal basis from start to finish.

Just the Proper Thing

If you are in doubt as to the style or size of body that will precisely fill your needs, or if you are uncertain as to the most desirable finishings or color effects for your car, let us help you reach a happy decision.

Sometimes members of one's family have different ideas and are unable to decide just what is best. Or the buyer may be too busy to plan a definite ideal for himself. In any such case we are glad to prepare special suggestions for you to consider.

Our body designers and color artists are cheerfully at your service. You are never limited to any set "standard": your need may be for a distinctly new body arrangement, or a color effect never before seen on the streets, and we are always alert to supply just the proper thing.

Two motor and chassis sizes: 33 at $2485 and 48 at $3500. Complete information on request. We submit individual body and color designs on approval.

Write to-day for catalog

The Winton Company

124 Berea Road, Cleveland, Ohio, U. S. A.

"Come and Ride With Me"

When friends accept your invitation, omit apologies for the car you drive. Apology cures no faults and wins no esteem. Happiness comes from owning a car that needs no defense, no "whitewashing".

Own an *appropriate* car. In winter that means a *closed* car. For the successful man or woman it means a closed car of *best merit.* To those accustomed to unhampered living it means a closed car of *exclusive distinction,* not a copy of any other car in town, but one of unmistakable charm and individuality—a car designed to your own personal taste in body style, finishing fabrics, color harmony and appointments. Such a car requires no apology. Instead you are every day rewarded with the approval of your friends, with the approval of every passerby who has eyes to see.

By specializing for many years on distinctive cars for private ownership, we have achieved in the Winton plant an art beyond imitation, an art that adds zest to the use of your Winton Six. That art is at your service. Closed car prices range as low as $2800.

Winton Branch Houses: Boston, 674 Commonwealth Ave.; New York, Broadway at 70th St.; Newark, N. J., 380 Central Ave.; Philadelphia, 246-248 North Broad St.; Baltimore, 1432 N. 60% of 1916 Cars

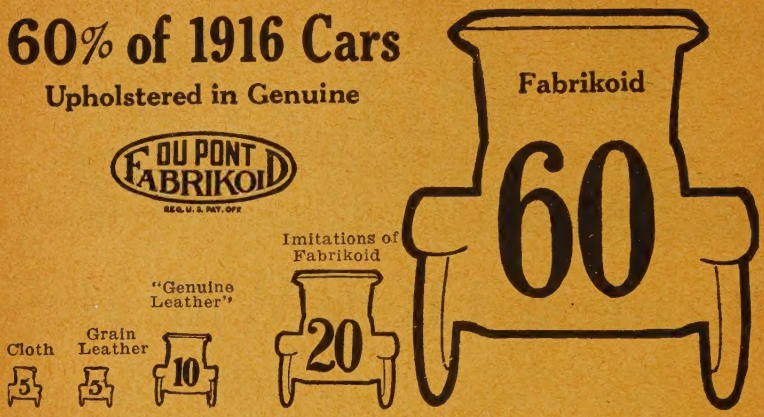
Upholstered in Genuine

DU PONT FABRIKOID

REG. U. S. PAT. OFF.



The Standardized Upholstery Material

Standardization has revolutionized the motor car industry. It has increased manufacturing efficiency and lowered selling costs. It has given the manufacturer methods and materials of definite proved quality and insured the motor car buyer maximum of value.

To this revolutionary process of standardization Du Pont Fabrikoid Motor Quality adds the final word in upholstery. It has eliminated the buying hazard, the high cost and the manufacturing wastes of leather because it has given the manufacturer an upholstery material of known quality, efficiency and cost.

To the motor car buyer it combines all the richness, all the luxurious and aristocratic appearance and texture of the finest leather with double the service, strength and satisfaction of so-called "genuine" leather.

You can now buy almost any standardized car upholstered in Du Pont Fabrikoid Motor Quality.

Craftsman Quality Fabrikoid

for furniture upholstery and home decoration is supreme—rivaling in beauty the luxurious plain grain and artistic Moorish color effects of the finest leather.

CANADIAN FACTORY AND OFFICE: TORONTO

Is Your Car Top Heavy?

WHY buy a light-weight car burdened with a heavy top? A low weight center means safer, easier riding. Unnecessary top weight means waste—increased vibration and side sway.

You pay for every additional pound with gasoline, oil, tires and general wear.

The most efficient top material can only be a waterproof layer supported by cloth, strong enough to stand the strain when up, yet flexible enough to fold without cracking.

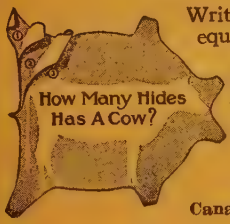
Extra layers of cloth and combiners only add weight, diminish flexibility and increase the possibilities of cracking in folding. Mohair tops absorb pounds of water during a storm and accumulate dust when dry.

DU PONT FABRIKOID

RAYNTITE

SINGLE TEXTURE TOP MATERIAL

is made of a single thickness of light, strong cloth coated with a flexible, waterproof compound that sheds water like a duck's back. It can be easily washed, always looks well, and because it is chemically inert will not oxidize, disintegrate, nor stiffen in cold weather. Guaranteed one year against leaking, but built to last the life of your car. Any top maker can replace your old, dusty or leaky top with Rayntite.



Write for samples and booklets and latest list of cars equipped with this modern top material.

SAXON MOTOR CAR CORP., DETROIT

Weis Office Equipment
Gives Satisfaction at Low Cost

A Weis Filing Desk

will save much valuable time by having correspondence, lists, records, catalogs, etc., systematically filed where same can be consulted without leaving your chair. Nine kinds of drawers enables one to select an arrangement that will care for the filing of all standard size business

papers and record cards. Solid Oak construction in Golden, Natural and Weathered finishes. Also Birch Mahogany, Roller bearing, dust protected drawers. Tops 28x52 inches. Furnished with or without center drawer and back panel. We'll be glad to assist you in arranging a desk to meet *your* filing needs.

20,000 Letters

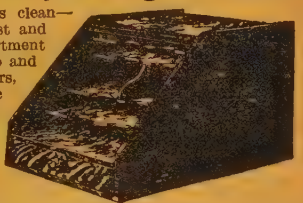
can be filed on edge for quick reference in one of these popular Weis "421" Letter Files

Practically wear-proof — made entirely of best grade, Kiln Dried Oak, put together as strong as glue, screws and interlocked joints can possibly make them. The drawers are full height—an aid in excluding dust — and operate easily on indestructible, fibre rollers. Also made in two and three drawer heights and in Legal Cap and Invoice widths. Special arrangement of drawers will accommodate most all standard size papers and cards. Golden, Natural and Weathered finishes, also Birch Mahogany. If you are considering the purchase of a file see our dealer in your town or write for catalog and complete information.

Weis Sectional Bookcases

are handsome and practical, well constructed and nicely finished—a useful ornament to home or office. Start with one section—add others as your needs demand. Plain and Quartered Oak, Birch and Solid Mahogany in most any appropriate finish. Get our Bookcase Catalog showing many styles and arrangements of sections in Receding and Sliding Door types, Standard and Mission Designs. A comparison of quality and price will convince you of the value of Weis cases.

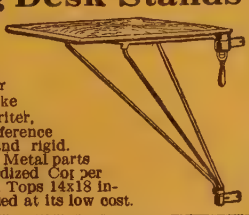
Stationery Storage Cabinets



keep contents clean—free from dust and flies. Compartment for letter, cap and note size papers, invoices, large and small envelopes and a drawer for carbon paper, eraser and other desk accessories. Made with lid which drops over front or straight, open front, beautifully Flaked Quartered Oak in Golden and Natural finishes, also Birch Mahogany, Rubber feet prevent marring desk. Once used you'll appreciate its convenience and utility.

Swinging Desk Stands

take up little room, can be attached to either side of any style desk. Handy for stenographer to take dictation or for typewriter, adding machine, reference books, etc. Strong and rigid. Locks in any position. Metal parts in Black Enamel, Oxidized Copper or Nickel Plated. Oak Tops 14x18 inches. You'll be surprised at its low cost.



NOTE: We pay Transportation Charges to points in Eastern and Central States. Prices slightly higher in So. and West.

You Need Our Catalogs

to assist you in selecting Office Equipment and Supplies. We will gladly send you one Free as well as our helpful booklet "Filing Suggestions" a clear and concise treatise on the different methods of filing.

3-in-One Makes the World run easier.

All over the World **3-in-One** is lubricating perfectly sewing machines, typewriters, bicycles, cream separators, guns, reels, locks, clocks and almost everything else 'round the home, office or farm that needs oiling.

3-in-One is the original and best anti-friction oil. It flows straight to the deepest part of a bearing, works out dust and dirt and spreads evenly over all contact surfaces.

In addition **3-in-One** never gums. It contains no grease or acid. It can't heat up under 5,000 revolutions per minute and it "wears" long.

Try 3-in-One FREE

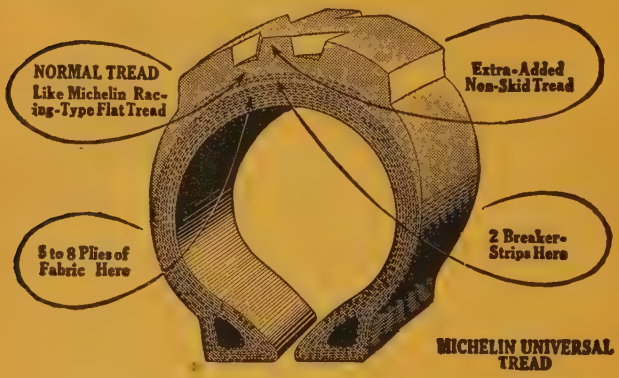
Let us send you a generous sample of **3-in-One** and Dictionary giving 79 different ways in which **3-in-One** will save you time, money and work. Both are free.

3-in-One is sold by all stores. In bottles, 10c 25c, 50c. In Handy Oil Cans, 25c.

THREE-IN-ONE OIL CO.
71 Broadway, New York

MICHELIN

12 to 15% Extra Weight



When you buy your next tire make this simple test: Have your dealer weigh a Michelin Universal in comparison with any other non-skid.

You will find the Michelin is from 12 to 15% heavier than the average.

This Extra Weight Means Extra Rubber and Fabric, Which Means Extra Mileage

TIRES

Also Extra Quality

The rubber and fabric in Michelin Tires is not only greater in *quantity,* but it is better in *quality.* This is due to two facts:

1st—All Michelin materials are the best that money can buy at any price.

2d—Michelin's experience is longer and greater than that of any other tire maker. Michelin invented the pneumatic automobile tire in 1895 and ever since has concentrated on the production of pneumatic tires only. This superior experience is bound to tell in compounding rubber and treating fabric—and more durable tires are the result.

Remember That Michelins Cost Less Than Most Tires

MICHELIN TIRE CO., MILLTOWN, N. J.

No Money In Advance

This Marvelous CAMERA ON FREE TRIAL!

Only 10,000 of these marvelous, instantaneous picture-taking and making cameras to be sent out absolutely on approval without a penny in advance just to prove that it is the most wonderful invention—the camera sensation of the age. So **you** must send for it **quick!** Just think of it—the new Mandel-ette

Takes and Makes Finished Pictures INSTANTLY!

You press the button, drop card in developer and in **one minute** take out a **perfect, finished** post card photo 2½x3½ inches in size. Camera, itself, is about 4½x5x7 inches. Loads in daylight 16 to 50 post cards at one time.

No Films—No Plates —No Dark Room

Not a bit of the muss and bother of the ordinary kodak or camera. It is instantaneous photography! Universal focus lens produces sharp pictures at all distances. Pictures develop and print automatically. Can't overdevelop. Results positively amazing.

We Trust You

No difference who you are or where you live we will send you the complete Mandel-ette outfit absolutely on approval and give you 10 days to test it. If not satisfactory return it. If you wish to keep it, simply pay $1.00 when you get the camera and $1.00 per month until our special price of only $5.00 is paid. When you see what elegant pictures it takes—so quick, so easy, with no trouble at all—you'll be surprised.

Easy Payments—No Reference

No red tape of any kind. Monthly payments so small you'll not notice them. Simply fill out and mail coupon to-day. Send no money. No references required. Lots of fun and big profits.

No Experience Required

Plain instructions and everything complete with outfit so you can begin taking pictures the moment it arrives. We guarantee that even a child can operate it. Mail coupon now. No risk or obligation to keep camera.

Chicago Ferrotype Co.
Desk 350, Ferrotype Bldg.
Chicago, Illinois

Send me at once one complete model Mandel-ette Camera outfit, including supply of post cards and instructions. I agree to pay $1.00 when I get the camera, examine and test it thoroughly and if satisfied keep it and pay you $1.00 a month until your special rate of $5.00 is paid. Otherwise I will return it at the end of 10 days.

More Than Pleased

Your camera reached me O. K. and I was surprised at the work it does. I have taken several photos and some as good as I have ever seen taken with any camera. Everybody that sees the work of the "Mandel-ette" says it is fine and I am more than pleased with it.

Vernie Boyle, Northome, Minn.

Beats All Things Yet

The "Mandel-ette" received and opened up and in 20 minutes I had a splendid picture of my wife, fully developed and ready to look at. My, this beats all things yet.

T. J. Houts, Pastor,
Methodist Episcopal Church, South, Welch, W. Va.

Takes Pictures on Dark Day

I am perfectly delighted with the "Mandel-ette." I have had very good success—never before to have handled a camera at all. I can say it will do all you claim. I have taken a picture which shows a Mt. more than 4,000 feet away and on a very dark day.

Jas. H. Hubbard, Penhook, Va.

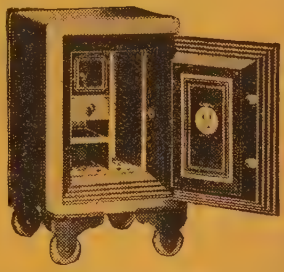
Anyone Can Use Them

Received the "Mandel-ette" and supplies Saturday evening. Sunday morning we began to take pictures and had very good luck. It is sure simple enough. Anyone can use them. We couldn't get along without ours.

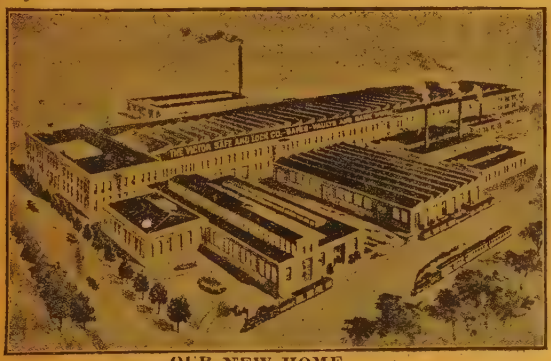
Mrs. R. U. Iddings, Mapleton, Ia.

Why Not Make $200.00 a Month—

That's $50.00 a Week, Almost $10.00 a Day



selling Victor safes and fireproof boxes to merchants, doctors, lawyers, dentists and well-to-do farmers, all of whom realize the need of a safe, but do not know how easy it is to own one. Salesmen declare our proposition one of the best clean-cut money-making opportunities ever received. Without previous experience YOU can duplicate the success of others. Our handsomely illustrated 200-page catalogue will enable you to present the subject to customers in as interesting a manner as though you were piloting them through our factory. Men appointed as salesmen receive advice and instructions for selling safes, giving convincing talking points which it is impossible for a prospective customer to deny. Why don't YOU be the first to apply from your vicinity before some one else gets the territory? We can favor only one salesman out of each locality.



OUR NEW HOME.

Wide-awake men are prompt to take advantage of our special inducement, and notwithstanding that the completion of our new factory will enable us to double our output, indications point to an ever-increasing demand which will continue to tax our facilities. We are spending many thousands of dollars enlarging our sales organization, but to learn all particulars it will cost you only the price of a postal-card. Just ask for "New Offer 85."

READI-CUT

HOUSES

Save from $200 to $800

Cut Out the Middleman's Profit

Why should you pay one thousand dollars for a home that you can buy for $700? Why should you let the builder add his $300 profit to your bill? This is plain talk—and meant to be. Middlemen are necessary only when manufacturers won't deal with consumers. You are the consumer—the home builder. We manufacture and produce the goods. WE WILL NOT SELL TO MIDDLEMEN. If we did, you would have to pay thirty cents more on every dollar's worth of our goods. Labor and profit are the biggest parts of the price you pay for any article. That's all the middleman adds to the goods—labor and profit. And you foot the bill.

Saves Waste in Lumber and Labor

The average waste of lumber in building a house is 18%, $18.00 out of every $100 of your money goes into the waste pile. You pay $100 and get $82 value. The Aladdin Readi-Cut System saves you this loss. It puts the $18 INTO THE HOUSE. It gives you a BETTER HOUSE for less money. We own and operate the largest mill in the world devoted to the manufacture of Readi-Cut Houses. We ship more complete houses than any manufacturer in the United States. We give the strongest guarantee of satisfaction ever made to the home builder.

Customer Saved $900

One of our customers wrote us as follows:

"In my Aladdin House, THE MAPLES, I have one of the best little bungalows in the whole city of Chicago, and all who have called express the same opinion. I figure that I have saved at least $900 in building by the Aladdin Readi-Cut System.

Get the beautiful Aladdin Catalog. Aladdin Houses save you four profits. You buy direct—no middlemen. Aladdin Houses eliminate waste of lumber—all lumber cut to fit. Aladdin price includes all lumber cut-to-fit, framing lumber cut-to-fit; hardware, glass, knobs, nails, paints, varnish, complete instructions and working plans. Send stamps for catalog No. 2291 to-day. See advertisement on back cover of this book.

BRISCOE $685 FULLY EQUIPPED

THE CAR WITH THE HALF MILLION DOLLAR MOTOR

This is Benjamin Briscoe's triumph of a lifetime—the car built by one of America's earliest designers, with the assistance of fourteen of the most noted French, German and Swiss engineers. This motor was perfected in Europe at a time when gasoline cost more than 50 cents a gallon—hence, of necessity, built for economy. The Briscoe Four Twenty-Four is fully equipped. You won't have to spend a cent for any extra conveniences. It's extra-roomy—with ample leg-space for the six-footer! You will be surprised at the luxury of the upholstery, seldom found in cars selling for less than $1200.

MOTOR SPECIFICATIONS
Half Million Dollar Motor—Genuine long stroke type; bore 3⅛ inch; stroke 6⅛ inch; bore and stroke ratio 1.64; cast en bloc integral with crank case; lower crank case forms oil reservoir; valves on right side; 1 7-16 inches in diameter in clear and completely enclosed; air-cooled motor head; Thermo-syphon system.

Send for Benjamin Briscoe's Absorbing Story—The "Half Million Dollar Motor." A wonderful book about a wonderful achievement.

Are You Equipped To Win Success?

How many unfamiliar names, new words, and puzzling war terms did you skip over as blank space in this morning's paper because of ignorance?

If you are asked the value of a *Yen*, the location of *Nigeria*, the capital of *Abyssinia*, or the pronunciation of *Przemysl*, do you hesitate or become embarrassed?

How many business letters have come to your attention to-day containing poor choice of words, careless punctuation, incorrect spelling?

Do technical terms in an automobile catalogue convey a meaning to you?

Do you know that the familiar word *Khaki* is derived from the Persian word meaning dust? Is *Hongkong* a city or an island? How much more interesting a *Nasturtium* appears when you remember that the name comes to us from the Latin word meaning "nose twister."

If you are seeking efficiency and advancement—

WEBSTER'S NEW INTERNATIONAL

Dictionary provides the means to Win Success. It is an all-knowing teacher, a universal question answerer, made by specialists to meet your needs. Hundreds of thousands of people in all walks of life use, enjoy, and profit from this vast fund of information.

A. V. HINMAN

R. L. HINMAN

Protected by Basic Patents

Hinman Principle Proved by 8 Years' Success

OUR first shop was on our Stockbridge, New York, farm. There, with ordinary tools, our first machine was made to work satisfactorily. 1911 found us with a well equipped machine shop in Oneida — devoting our time to the perfecting of details.

From the first we have worked on the principle of a Valve Chamber in pail cover — and to make and break air pressure by an individual pump connected to Valve Chamber by air hose. We thus did away with complications of compressed air tank and pipe line and saved over one-half the cost.

Our plant has been doubled three times. Today we are turning out 500 machines a week. This alone is evidence that the Hinman Milker is right. Our practical farming and dairy experience has enabled us to solve the milking problem. Hardly a day passes but that we receive expressions of deep regard from the dairymen who found that the

HINMAN MILKER

has made it possible and profitable for them to remain in the dairy business.

Write us your requirements and we will advise you to the best of our ability. We will not advise a larger outfit than you really need, or a smaller one than you can use to advantage.

We have an outfit at a price that we know will pay for itself in a short time. **It is simple, durable and efficient.**

Write *Today* for Our FREE Catalog

that gives valuable information and experiences of dairymen who are milking valuable and registered cows with the HINMAN MILKERS. It also gives reasons why more HINMANS are sold than any other milking machine.

152 Pages

How to Get This Book

Simply tell us what implement you are interested in and ask for Package X-53. Then we will send you this book free.

What This Book Contains:

It contains the advice of men who know how to make the farm pay.

Tells how to produce bigger crops with less labor and without reducing fertility of the soil.

Tells which style of plow to use and how to adjust it in sandy land, black land, prairie breaking, on hillsides, in vineyards and other conditions of soil.

Tells when to disc, how to plant accurately, cultivate properly and how to harvest and store the crop so that the most profit will result.

Also tells how to choose the best wagon for your purpose—in fact not only tells how to farm right, but also illustrates fully the tools required. A really valuable book for the man interested in farming. Write to-day.

Let me send you my new, fine, free book at once. I want to show you **proof** of how you can turn each acre of stump land into a double profit the first year, in extra crops and added value of land—by pulling stumps with the Hercules All-Steel Triple-Power Stump Puller—and how you can make **big money in your spare time** by pulling stumps for **your neighbors** or **by renting** your machine at a **nice, fat profit.**

My book shows **actual photographs** and prints **actual letters** from many **owners**, telling of the remarkable feats of the Hercules—how it pulls **any size stump, green tree or hedge** in less than five minutes—how it easily pulls **an acre a day.** Read how one man increased his land value from $25.00 an acre to $125.00. Read why the Hercules is the **best investment** you can make now. The

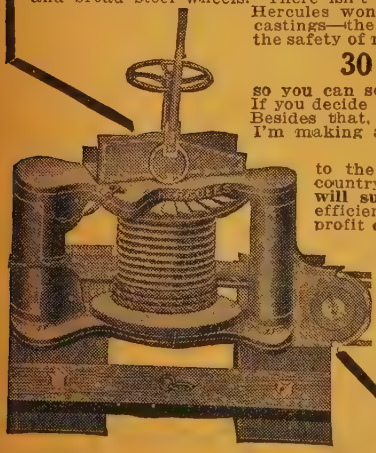
HERCULES

Triple Power Portable Stump Puller

is the puller that has the single, double and triple power features, giving you three machines in one. One man with a team can handle it and move it from place to place. No heavy lifting. The new portable is equipped with a good steel bedplate and broad steel wheels. There isn't a stump, green tree or hedge grown that the Hercules won't pull out without straining or breaking any castings—the one with double safety ratchets that insure the safety of men and team. I want to send you a Hercules on

30 DAYS' FREE TRIAL

so you can see how **powerful** it is and how **easily it works.** If you decide to keep it, a **three-year guarantee** protects you. Besides that, I want to save you big money on the cost. I'm making a



SPECIAL PRICE PROPOSITION

to the first buyer in 5,000 different parts of the country. If I get **one** Hercules in each locality, **more will surely follow,** because of Hercules quality and efficiency. So I can easily afford to sacrifice my profit on the **first** machine in each locality. Take advantage of the big profit and big saving opportunity **NOW.**

Shoot to Win

Trophies are not the greatest prizes in trap-shooting.

Every shooter is a winner of the qualities that make success anywhere.

No other sport gives the same sense of power—of ability to project your will into space to shatter an elusive flying target.

It possesses all the scientific fascination of billiards, the vigor and exhilaration of golf, and the excitement of baseball.

Every man, every woman should know how to handle a gun and use a modern smokeless powder load with skill and certainty.

Try it once and you'll stick for life. Learn how, where and when to start.

The Powders that Win: Du Pont, Ballistite and Schultze Smokeless.

Come to Detroit
The Automobile Center and
LEARN THE AUTOMOBILE BUSINESS

Detroit trained men get preference over all others and get jobs quickly. No other city, no other school can give you what Detroit offers. Factories know us, endorse our school, glad to get our graduates, offer them territory in which to sell cars and start garages.

EARN $75.00 TO $300.00 A MONTH

Our equipment is complete. Students actually build cars from start to finish, getting factory training in assembling, block testing, road testing, everything. Special complete course in Oxy-Acetylene Brazing and Welding, separate from regular course. All leading types of starting, lighting and ignition systems in operation. Six-cylinder Lozier and 8-cylinder King, Detroiter 6, and an Overland used for road instruction. We have a new Chalmers "6-30" chassis, a Willys-Knight chassis for students to work on.

DETROIT IS PLACE TO LEARN—START ANY TIME

There are 44 Auto Factories in Detroit. You can't get this advantage anywhere else. You make faster time here and get practical instructions. School open all the year. Enter classes any time, any day. Three classes daily, morning, afternoon and evening. Auto factories write and phone for men constantly to fill permanent places. Why not fit yourself for one of these good paying positions?

FOLLOW THE CROWD TO THE MICHIGAN STATE AUTO SCHOOL
COME TO DETROIT

THIS IS ONE OF OUR 1916 CLASSES.

ADDITIONAL BUILDING AND EQUIPMENT

33,000 sq. ft. of additional floor space in our new building at 687-89-91 Woodward Ave. Thousands of dollars' worth of new equipment. Plenty of room for students to work. Our school has grown by leaps and bounds; students have come from all over the world. Men have left after graduating and started in business for themselves. Others have accepted good jobs both in Detroit and over the country. Their work has proven that we trained them rightly. We are constantly adding new equipment. Our students get the best and latest things to work on. We now operate the service stations for Westinghouse, Auto-Lite and Bijur. We have installed a Sprague Electric Dynamometer for students' use. These advantages are offered by no other school. Our electrical department is thorough and complete. It is in charge of one of the most competent electrical instructors.

ACT QUICKLY—NOW—DON'T WAIT

Get full particulars. Get "Auto School News" and New Catalog. They are both absolutely free. Come to Detroit, the "Heart of the Automobile Industry," and learn right. Remember you can enter classes any time, any day. The price of our course is based on giving full value. Therefore we cannot give another course free. Graduates in the complete auto course are competent to handle farm tractors. Act quickly, now. We have no branches. Write or come direct to this school.

MONEY BACK GUARANTEE

We guarantee to qualify you in a short time for a position as chauffeur, repair man, salesman, tester, demonstrator, garage man or automobile dealer, paying from $75.00 to $300.00 monthly or refund your money. We have constantly more requests for Detroit trained men at Good salaries than we can supply.

Lowest Prices Ever Made on World's Best ROOFING Freight Paid

"Reo" Metal Cluster Shingles

"Spanish" Metal Tile

Edwards Patent "Grip Lock"

Corrugated

Brick Siding

We sell direct to you and save you all middlemen's profits. We ship everything—roofing, siding, ceiling, wall boards, etc.—freight prepaid. We cannot quote you our low factory prices here, but send for our Big Roofing Book and see for yourself that our prices are lowest ever quoted.

"Reo" Metal Shingles

cost less, yet outlast three ordinary roofs. Need no painting or repairs. Rot--fire--weather--rust-proof. Insurance cost is less—guaranteed against lightning.

Edwards Exclusive Tightcote Process

makes Edwards Metal shingles, Metal Spanish Tile, Reo Cluster Shingles, Grip-Lock Roofing and other Roofings, Ceiling, Siding, etc., absolutely rust-proof. Not a pin point of space exposed to weather.

Our Patent Interlocking Device

prevents warping, buckling or breaking. Protects nail holes—nails are driven through under layer; not exposed to weather. No special tools required. Easy to lay.

The Galvanizing Test

Take any other galvanized steel—bend it back and forth, hammer it down. Great scales of galvanizing will flake off. Apply this test to Edwards Metal Roofing—you'll find no flaking. Edwards products are **superior**—yet sell for less than other materials.

Samples FREE Send coupon for World's Greatest Roofing Book and Free Samples. Book will convince you that we can save you a lot of money on any kind of roof you need, also on ceiling, siding, wallboard, etc. Fill out coupon and mail today. Ask for Book No. 95.

The Edwards Manufacturing Company
45-95 Pike Street, Cincinnati, Ohio

Extra Special Bargain Garage $69.50 and up

The money you pay in a few months for garage rent buys an Edwards' Metal Garage. Gives you every convenience—no phoning or waiting for your car. Gives you every protection—against careless handling, mars, scratches—against fire, lightning, thieves, etc.

Write for Catalog showing all sizes, all styles—"Steelcote," "All Steel" or "Stucco-Steel," Plain Rock Faced, Brick or Stone, or Weatherboard Siding, Metal Spanish Tile or Metal Shingle Roof.

Edwards' Portable Garages pay for themselves in a few months. After that saves enough to pay upkeep of car. Find out. Write for Catalog.

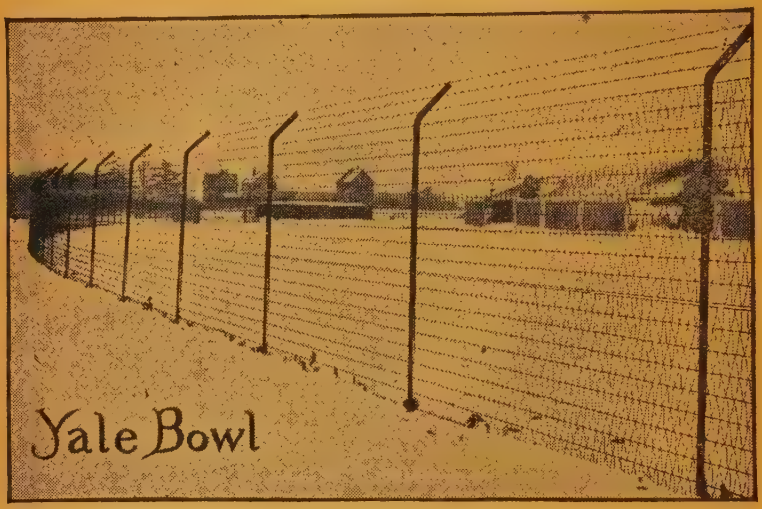
INDESTRUCTIBLE STEEL FENCE POSTS



THE accompanying photograph shows one of our Non-Climbable "RIOT" fences, erected by us with our indestructible steel fence post 8 ft. high, surrounding the Yale Bowl Field, New Haven, Conn.

This fence held in check 60,000 people that attended the Yale-Princeton Game, Nov. 13, 1915.

We have this fence and many other excellent designs. **It will be to your advantage to secure our Catalogue No. 30,** that shows many of the **best erected fences in this country;** also tells about our posts in detail; how to erect a fence; how to paint the fence wire to keep it from rusting.

Become acquainted with our fence building system. It will save you many dollars and a great deal of worry.

Fences for every purpose, with either straight or non-climbable post, tennis courts back stops, etc., erected by our trained men anywhere.

J. H. DOWNS, 39 Cortlandt St., New York City, N. Y.

AT LAST—

A Perfect Carbon Remover

80% of engine trouble is caused by carbon. That knocking sound and loss of power is due to just one thing—carbon in your cylinders. Clean them out with

JOHNSON'S CARBON REMOVER

and your car will run like it did the first 500 miles—quietly and full of "pep."

Saves Gasoline and Oil

Clean cylinders reduce the consumption of gas and oil and give you the maximum power and speed from the minimum amount of fuel. Johnson's Carbon Remover really costs you nothing, because the saving in fuel effected by its use will more than make up the price of the Carbon Remover.

You Can Do It Yourself

Why pay from $3.00 to $5.00 for having the carbon burned out of your cylinders when you can quickly do it yourself for half-a-dollar—without laying up your motor—without even soiling your hands?

Pints, 85c. Half Pints, 50c

OUR GUARANTEE

We guarantee Johnson's Carbon Remover without equivocation. No matter how much you use or how much you use it, Johnson's Carbon Remover cannot injure any part of your motor. You could soak your engine in it for days without the slightest injury.

S. C. JOHNSON & SON
RACINE, WIS.

Insist upon your accessory dealer or garage supplying you with Johnson's Carbon Remover.

PAIGE

The Standard of Value and Quality

WHEREVER there is appreciation of luxury and elegance you will find this sumptuous car—the New Series Fairfield "Six-46."

Americans of this discriminating taste have made the Fairfield the unchallenged leader of the moderate-priced "Sixes." And now they are already expressing their unstinted endorsement of what we have accomplished in this New Series Fairfield "Six-46."

What we have accomplished is to embody in this car every feature, every essential, every detail that makes for the fullest measure of motoring luxury and elegance.

We urge you to see the New Series Fairfield. Then compare it with any other motor car in the world for efficiency, beauty, convenience, comfort. Then ask yourself whether or not the New Series Fairfield is "The most completely equipped motor car that can be purchased—irrespective of price."

Are YOU Earning $5000 a Year?

Get This Book FREE

Don't Merely Think It Over —Put It Over

The huge growth of business in America has created thousands of high grade positions, paying $1,500 to $5,000 or more a year. The need is for men with executive training—men who have specialized in some important department of business. One big captain of industry recently said: "Our great difficulty is to find men who are properly trained for responsible positions."

WE TRAIN YOU BY MAIL FOR EXECUTIVE POSITIONS

"The School of Experience" alone cannot begin to supply men needed. For that reason employers are urging ambitious men to take the short cut to executive training offered by the various courses of the LaSalle Extension University. Railroads, mercantile and banking institutions are always in need of trained men to fill permanent positions at big salaries.

Earn While You Learn You can keep on drawing your present salary while we train you for an executive position. You learn in your spare time—at home. Our courses are thorough, simple, easy, and quickly mastered. The cost is small. Easy monthly payments. There is no reason in the world why you cannot advance yourself now, if you are ambitious, and are willing to invest a few dollars in brain power and self capitalization. Behind the LaSalle courses stand assets of over $2,000,000, and an organization of more than 300 business experts, professional men, text writers, instructors and assistants, including recognized authorities in all departments.

Get This Valuable Book "Ten Years' Promotion in One" FREE

Hundreds of men who have read this book say that it does more to inspire the ambitious man for big things than any other book they have ever read. A prominent Chicago business man recently said: "It would pay every ambitious person to get this book even if it cost him $5.00 for a copy." Let us send it to you FREE, with literature explaining how you can train for your chosen work without interference with your present duties.

Earn $35 to $200 a Week.

Which One of These Positions Would You Like to Fill?

Business or Office Manager This course gives you executive training necessary to manage department heads, minor executives, or a complete business organization.

Executive Accountant (C. P. A.) 500,000 firms need services of expert accountants and auditors. Only 2,000 certified public accountants in the U. S. to do the work. Our training prepares you for expert accounting work or C. P. A. examinations.

Business and Sales Correspondent Our course offers an opportunity to train quickly for a high grade position as expert sales and collection correspondent, or writer of business literature.

Traffic Manager Railroad and industrial shippers constantly need men who understand rate laws and Interstate Commerce regulations. Our course is the recognized standard of training.

Banking Course just completed by leading banking and financial experts. Trains men either with or without banking experience for positions in all departments.

Legal Counsellor or Attorney at Law Legally trained men win high positions in business and public life. Our course is of University grade. The 14 volumes of text books, supplied free, are edited and written in plain, comprehensive language by noted legal experts, judges and famous law professors. Degree of LL. B. conferred.

Act Today!

Make up your mind now to train for a position of dignity and good pay. Our corps of expert instructors will direct you step by step and give you unlimited personal guidance.

Train By Mail For Big Position

Don't be content to stay in a job that almost any man can fill. Prepare yourself for a position in a new profession—for a position that needs you—wants you.

There are 500,000 firms that need the services of Expert Accountants. There are only 2,000 certified public accountants in America. The field is unlimited; the demand many times greater than the supply; the salary far in excess of that earned in other fields.

Be an Expert Accountant

At $3,000 to $10,000 a Year

The expert accountant is one of the most important factors in the conduct of any business. His knowledge of the innermost secrets of a business makes him indespensable. He is one of the first men to be consulted in matters of management and finance, and is confidential adviser in important executive affairs. His salary is from $3,000 to $10,000 a year.

Learn at Home

Under the personal guidance of William Arthur Chase, ex-Pres. Nat. Asso. of C. P. A. Examiners, ex-Sec. Illinois State Board of Accountancy, and other experts who rank among the highest.

We provide complete and comprehensive training according to your individual needs, from the simplest bookkeeping principles to the most advanced accounting problems. We will give you whatever instruction on the subject of bookkeeping you may need—and without any extra expense to you.

We give you a written guarantee that should you fail to pass the C. P. A. examination held in any State we will give you special instruction—without additional charge—until you do pass. We further agree to refund entire amount of tuition, according to our Guarantee Bond, if dissatisfed with the course.

Small Cost—Easy Terms

In this course all needless text-book theory has been eliminated. The course covers thoroughly every phase of Practical Accountancy, Theory of Accounts, Auditing, Cost Accounting, Business Organization, Business Laws, etc. It gives you such instruction as you need, in the shortest possible time. The cost is surprisingly small, and the terms so easy that you will scarcely miss the money.

FREE Our big free book explains State examinations, State regulations, salaries paid, etc.—also gives complete information regarding the course. Take the first step toward greater success by mailing the coupon NOW—today.

LaSalle Extension University (The World's Greatest Extension University), **Dept. 316 H, Chicago, Ill.**

FREE BOOK COUPON

Law-Trained Men Rule In Business and Public Life!

Who are the best paid among all professional men? LAWYERS. Who occupy the highest positions in business life? LAW-Trained men. Who are our leading executives—Governors of States, Congressmen, Senators, Cabinet officials? Men with LEGAL training.

Then what profession offers the broadest possibilities for YOU? LAW of course. LAW has opened the way to positions of honor and profit for more men than any other profession or business. It will do the same for YOU.

EARN $3,000 TO $10,000 A YEAR

ACT! Enter this success-winning, big-income-producing profession NOW! Today, more than ever before, LAW offers the **shortest route** to the **greatest success**—and with the **least expenditure** of **time** and **money.** Don't remain in the small job, small-pay class any longer. Begin NOW to build a career of prosperity, power and independence.

We Train You By MAIL

at home, in your spare time to acquire a legal training and become a practicing lawyer, a successful business man, a prominent statesman, or to qualify as a Legal Counselor.

Our method of Home Training insures your success—first, because the LaSalle text is edited and written in plain, easy-to-understand language. Second, because it is prepared by such noted legal educators as James Parker Hall, Dean of University of Chicago Law School; James De Witt Andrews, former member faculty Northwestern University, and over 20 Law School Deans, Professors in famous resident colleges, and famous legal authorities of Bar and Bench. Third, because we guarantee to **coach free until successful** any graduate failing to pass bar examinations.

So thorough is the La Salle Home Study Course—so exceptional has been the success of La Salle students—that we issue a legal, binding guarantee to refund the entire tuition fee if, after you complete the Course, you are not perfectly satisfied. This guarantee is backed by our entire capital and resources of more than two million dollars.

Modern Law Library Included FREE

14 massive law volumes—"AMERICAN LAW AND PROCEDURE"—standard size 9½x6½ inches—bound ¾ sheep. All branches of Law are fully covered. This work cost us over $50,000.00 but is FURNISHED YOU AT ONCE on your enrollment WITHOUT ADDITIONAL COST.

FREE Complete Course in Public Speaking

Our training by mail will positively teach you the fine art of persuasive speech. Every Lawyer—every successful man—should be a forceful speaker. Our course is prepared by Frederick B. Robinson, A. B., A. M., Ph. D., Professor Public Speaking at College of City of N. Y. Write and learn how you can NOW secure this valuable course, absolutely free, if you become one of our law students.

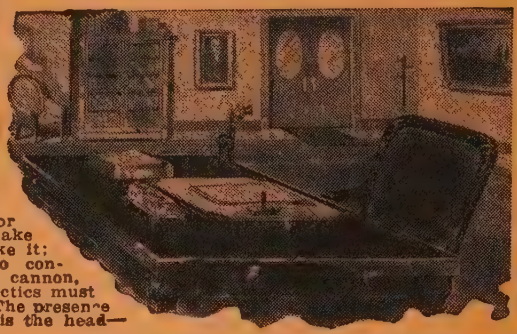
BIG MONEY

$5,000 and Upwards a Year For Business Generals



Napoleon Said:

"There is nothing in the military profession that I cannot do for myself. If there is no one to make gunpowder, I know how to make it; gun carriages—I know how to construct them; if it is founding a cannon, I know that; if the details in tactics must be taught, I can teach them. The presence of a general is necessary. He is the head—he is the all in all of an army."

In Business, Too, the Need Is for Men Who Know

The demand is for Napoleons—men who know how to organize and manage. The successful executive or manager must have a strong grip on ALL the departments of the business. He knows how to direct because he "knows how to do." Forget the idea that you must have "pull," "money," "influence," to get a position of responsibility and big pay. This has NEVER been so, and is not true now. It is knowledge, ability, and capacity that produces such men as Carnegie, Rockefeller, Vanderbilt, Hill, Ripley, Schwab, Vail, Edison, or Wanamaker. Age is no bar; Napoleon, at the age of 21, through knowledge and training, won the command of the Army of Paris. To-day we have hundreds of young business generals heading big business enterprises. How did they get there? They took the short cut to success by starting where "experience" left off.

Get Your Higher Business Training by Mail

If you want to know how you can positively qualify for a real position in one of the important departments of a business organization, if you want to know what executives and the men higher up are paid for; if you want to get into the ranks of high-salaried men; or if you contemplate an independent business career.

Get Our Valuable Book—Business Leadership—FREE

reveals some extraordinary facts and figures on the "HIGH COST OF EXPERIENCE" as compared with the LOW COST of "Knowledge" now available and which can be brought direct to the home or office of the busy business man or employe who is after big results in his business or daily work. Through our consulting service, each member may obtain immediate assistance in any problem that may come up for solution.

If your future is still before you, if you are ambitious to crown your business endeavors with success, if you are a business man with many problems, get your copy of "Business Leadership" at once. It shows that business management and administration is an exact science as open to study and acquirement as any other specialized knowledge.

"Business Leadership" points the way. Send for it today—NOW!

MARK ANTONY DELIVERING THE ORATION OVER CAESAR.

CAESAR'S name has stood through all the ages as the embodiment of imperial power. His untimely end after reaching the pinnacle of earthly glory is one of the great tragedies of history. The greatest tragedy in all human history is the great European War. All the underlying causes of this conflict, the racial antipathies, the commercial rivalries, the sting of past defeats, the vaulting ambitions for World Empire may be discerned from the pages of history. The one great history of every Empire, Kingdom, Principality and Power from the beginning of civilization to the present, is the great publication

Ridpath's History of the World

DR. RIDPATH is universally recognized as America's greatest historian. Other men have written histories of one nation or period: Gibbon of Rome, Macaulay of England, Guizot of France, but it remained for Dr. Ridpath to write a history of the entire World from the earliest civilization down to the present. We offer the latest edition, brand new, down to date, beautifully bound in half morocco.

At a Great Sacrifice in Price

WE will **name our special low price and easy terms of payment** only in direct letters. A coupon for your convenience **is** printed on the lower corner of this advertisement. **Tear off the coupon,** write your name and address plainly and **mail now. Our plan of sale** enables us to **ship direct from factory to customer** on approval and **guarantee satisfaction.** We employ no agents, nor do we sell through book stores, so there is no agents' commission to pay. Mail the coupon now before you forget it. The sample pages are free.

46-Page Booklet FREE

WE will mail you 46 free sample pages without obligation on your part to buy. These will give you some idea of the splendid illustrations and the wonderfully beautiful style in which the work is written. You can purchase this great work at the **lowest price ever offered** and pay for it in **small sums monthly.**

Six Thousand Years of History

RIDPATH takes you back to the dawn of history, long before the Pyramids of Egypt were built; down through the romantic troubled times of Chaldea's grandeur and Assyria's magnificence; of Babylonia's wealth and luxury; of Greek and Roman splendor; of Mohammedan culture and refinement, to the dawn of yesterday. He covers **every race, every nation, every time** and holds you spellbound by his wonderful eloquence. **Mail the coupon.**

Mix in One Minute with Cold Water—Ready to Apply Immediately

Alabastine is the most effective, economical and simple wall decoration on the market. It has demonstrated its superiority in thirty-five years.

A five-pound package of Alabastine is mixed with two quarts of cold water; stir for about one minute and Alabastine is ready to apply.

New and individual shades or tints can be obtained by combining regular tints.

If your wall surfaces are right, and our directions for use tell you how to make them right, an ordinary wall brush is the only tool needed to apply.

Could anything be more simple?

Think of it! No boiling, no glue added. It's one of the easiest jobs in the world to prepare and apply Alabastine, and the resulting surface, if ordinary care is taken, is solid, streakless and matlike.

Alabastine

The Most Beautiful Wall Tint

And when you consider that you obtain the most beautiful, mellow, nature colors, viz., soft buffs, delicate greens and exquisite blues or **any shade** you wish by combining shades of Alabastine, then you'll **know** why Alabastine is one of the most popular wall decorations with millions of Painters and Householders, Decorators and Womenfolk, who take a pride in their homes the wide world over.

SEND FOR ALABASTINE COLOR SCHEME DEMONSTRATOR—IT'S FREE! A new and unique way of showing color scheme possibilities with Alabastine. Gives complete idea of room effects.

We will receive thousands of requests for the demonstrator. They will be sent out in the order of receipt of requests for them, so kindly send in yours to-day. Address:

Wonderful New Way in Typewriting!

80 to 100 Words a Minute *Guaranteed*

A WONDERFUL new method of acquiring skill on the typewriter has been discovered. Almost overnight it has revolutionized the whole typewriting situation. Already thousands of stenographers and other typewriter users who never exceeded 30 to 40 words a minute are writing 80 to 100 words with half the effort and with infinitely greater accuracy than ever before.

And the wonderful thing about it is that *only 10 lessons* bring just this kind of ability to *you—to any operator.* You begin to feel results the very first day. You learn with amazing quickness, in spare time. There is never the slightest interference with your work.

Trained Fingers Earn $25 to $40 a Week

European music teachers when training their pupils for the piano, invariably give special *gymnastic* finger exercises. This is because untrained fingers are never skilful fingers. The best results simply cannot be obtained—the fingers simply cannot be used correctly and swiftly—unless the student develops and strengthens the proper muscles.

Trained fingers are even more essential to expert typewriting. The reason that so few people can write more than 30 to 40 words a minute is because their fingers are not flexible and nimble enough—have never had the proper *training* to *fit* them for typewriting work. This new, easy method overcomes this at once—develops finger strength and flexibility by gymnastic exercises *away from the machine*—trains the fingers *beforehand* for their work on the machine—and the results border on the miraculous. Yet the exercises are so easy, so simple and so fascinating, that many students write, "I can hardly wait for the next lesson."

Double or Treble Your Salary

No matter how rapid you are in shorthand, you can never expect much increase in pay until you get *speed—real speed*—and accuracy on the typewriter. It is the *lack of these* that is keeping your salary down now—that is depriving you of the pay you could otherwise be earning. Below are a few examples of how the New Way quickly results in increased pay. We will gladly send you scores and hundreds of others. What it has done for them, it will do for you.

Salary Increased 40%—Then 20% More

"I certainly know that the New Way produces accuracy and speed—the two great essentials of good typewriting. Since writing the letter you saw, telling of a 40% increase, I have had another increase of 20%."—C. E. Verrall, care Martin & Hall, Architects, Providence, R. I.

Salary Doubled—Claims Justified

"Since studying the New Way Course, I have progressed rapidly and to-day am filling the position of Chief Clerk to the Department of Parks and Public Property, in this city, my salary being exactly double what it was."—Anna S. Cubbison, 109 Hoerner St., Harrisburg, Pa.

Brought This Man Speed of 100 Words a Minute

"Formerly I never exceeded 50 words a minute, but since taking up the Tulloss Method have written as high as 100."—R. R. Mastin, Norval Bros. Law Office, Seward, Neb.

Results From First Lesson

"From the very first lesson I noticed improvement in my work, in accuracy, speed and ease of execution. At present I frequently reach 80 words a minute and my work is far easier than before."—(Miss) Alberta Way, Fergus Falls, Minn.

EASY TO LEARN—ONLY TEN LESSONS

No matter how low your present speed, no matter how labored your efforts, no matter how weak or clumsy your fingers now seem to be, no matter how little or how much experience you have had, no matter what other courses you have taken, this new method will positively bring you the desired results, as thousands of stenographers have already proven.

The New Way is entirely different from any system of the past. There has never been anything like it before. The Special Gymnastic Exercises bring results in *days* that ordinary methods will not produce in *months*. *Only 10 short, simple lessons* and the New Way is yours. Among those who have taken up this system are thousands of graduates of business colleges and special typewriting courses—hundreds were so-called touch writers—yet there has hardly been a single one who hasn't *doubled* or *trebled* his or her speed and accuracy, and their salaries have been increased in proportion.

EARN $25 TO $40 A WEEK

Thousands of New Way operators typewrite at the amazing speed of 80 to 100 words a minute, and as a result have increased their salaries to $25, $35 and even $40 a week. Anyone can easily learn this remarkable new method. Send in the coupon or a postal for the 48-page free book that explains the secrets in detail.

FREE! 48-PAGE BOOK

We have prepared a Free Book about the wonderful New Way in Typewriting, explaining the system in detail. It is a big 48-page book, brimful of eye-opening ideas and valuable information. It explains how this unique new method will quickly make your fingers *strong and dexterous*, bring them under *perfect control*, make them extremely rapid in their movements—how in a few short weeks you can transform your typewriting and make it *easy, accurate* and *amazingly speedy*—all this and much more is told in detail. No instruction book ever written, no matter what its cost, ever told so plainly the real WHY and HOW of expert typewriting.

If you are ambitious to get ahead—if you want to make your work easier—if you want to get more money in your pay envelope—don't wait a single moment before sending for this book of information and proof. This new method is bringing such marvellous results to others—is proving itself to be so sure a means of quickly increasing salaries—that you will be doing yourself a big injustice if you fail to write for it *at once*. Tear off the coupon now or write a letter or postal before you turn this page. Address

DOES THESE THINGS

WITH CARNES ARMS

World-wide recognition of the usefulness of the Carnes Arm is shown by the fact that we have sold them in every State in the U. S. A., every province of Canada, in England, France, Italy, Germany, Austria, Holland, Denmark, Belgium, Phillipine Islands, Malay Peninsula, Argentine, S. A., Africa, Australia, Cuba and New Zealand.

It is THE Artificial Arm that you do work with, without the assistance of repulsive looking Hooks and accessories. You use the fingers, bend the wrist and elbow, grasp articles, carry objects, write, use telephones, run automobiles, plow, shovel, hoe, pitch hay, husk corn, run sewing machine, crochet, do fancy work, &c.

The Carnes Arm may be made to fit any amputation, from the loss of only part of the hand to the loss of the entire arm at the shoulder.

CATALOG B 18, showing men and women with various amputations using the arm, sent on request. Full instructions for taking cast and measurements for sending in orders by mail in catalog.

"Making Money Make Money"

A Chicago business man worked out laws of financial success with which he built a fortune for himself and helped thousands on the way to similar fortunes.

He has prepared a book giving the working plans of the laws that brought him success and that are bringing success to all big moneymakers of to-day.

Are you one of these successful moneymakers? If not, be sure to read this book.

We published this book because we want every honest, earnest, sincere man in this land of great opportunities for all to read this information and learn to make more money for himself honestly and cleanly.

Learn These Secrets

This book reveals the secrets that bankers, financiers and industrial barons hide from the people—the secrets they use in building fortunes.

It shows how our big fortunes have been made, are being made and can be made now.

It shows how $100 grows quickly to $2,200 and more, $5 to $110, and so on. How you can make your dollars grow, be they few or many.

Readers of the book tell us it is worth all the way from $10 to $1,000 to them.

Build Your Fortune

If you have idle money, be it much or little, or money drawing only interest, or if you can save a little from month to month, don't do a thing with it until you have read this book, or you will do yourself financial injury.

Do you know the real earning power of money? Do you know the difference between the earning power and the rental power of money? Do you know how money multiplies when given an earning power? Do you know how to give your dollars an earning power? If not, read this book and learn these things for your profit.

Examine It Free

We know this book will interest you, please you, astound you. We believe you will want it. We want you to examine it, read it at our expense. Big book. 315 pages. Cloth, stamped in gold.

We will send you the book on approval, express paid by us. Examine it a week, read it. Then if you want it, send us $1.50 to help pay the expense of circulating it. If at the end of the week you don't want it, simply send it back at our expense. Fair enough, isn't it?

Fill out or copy the attached coupon and mail it to us—that's all.

A. J. MUNSON & CO.,
Publishers.

MAIL THIS NOW

A. J. Munson & Co.,

"Don't tell me you never had a chance!"

"Four years ago you and I worked at the same bench. We were *both* discontented. Remember the noon we saw the International Correspondence Schools' advertisement? That woke me up. I realized that to get ahead I needed special training, and I decided to let the I.C.S. help me. When I marked the coupon I asked you to sign with me. You said, 'Aw, forget it!'

"I made the most of my opportunity and have been climbing ever since. You had the same chance I had, but you turned it down. No, Jim, you can't expect more money until you've trained yourself to handle bigger work."

There are lots of "Jims" in the world—in stores, factories, offices, everywhere. Are *you* one of them? Wake up! Every time you see an I.C.S. coupon *your* chance is staring you in the face. Don't turn it down.

Right now over one hundred thousand men are preparing themselves for bigger jobs and better pay through I.C.S. Courses. You can join them and get in line for promotion.

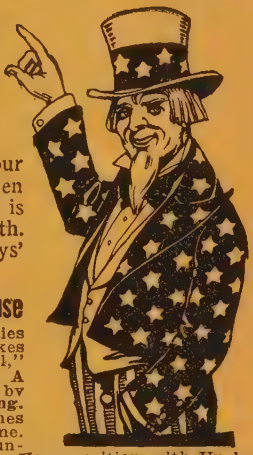
WANTED!

Men to Accept Good Positions With Gov't



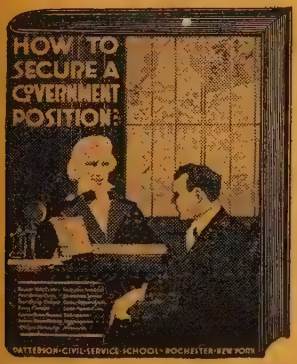
Don't look for a "job." Don't be satisfied with small pay and small prospects. Don't work where your position is uncertain. Uncle Sam employs over 400,000 men and women under Civil Service law. Work is easy. Pay is good—from $75.00 to $150.00 a month to *begin* with. Hours are short—8 hours or less a day. 15 to 30 days' vacation with full pay.

Railway Mail Post Office · R. F. D. Carrier · Custom House

and other Government branches offer splendid opportunities to American citizens, 18 or over. There are no strikes among U. S. employes, no "lay-offs," no politics, no "pull," no "straw bosses." Promotion is rapid and **worth while.** A job with Uncle Sam carries prestige—you are looked up to by your friends. And, best of all, there's **no more job hunting.** Statistics prove that the average man looks for a job 50 times during his lifetime. That means 50 interruptions in his income. Government employes are safe against the many causes of unemployment common to those who work for private interests. Your position with Uncle Sam is secure—your income is regular—you won't ever worry about next week, next month or next year.

FREE! NEW BOOK OF GOV'T POSITIONS

Send in your name now on the coupon below or on a postal card, for new book, telling about the many divisions of government service, salaries paid, kind of work offered, vacations, and full details as to requirements. Shows how you can quickly and easily qualify at home for one of these fine positions, no matter where you live.



WRITE! Let Arthur R. Patterson prepare you for examinations. Mr. Patterson was Civil Service Sec'y-Examiner for eight years and KNOWS! Jump from an uncertain job to a steady one, from small pay and hard work to GOOD pay and easy work, from a mean "boss" to the best boss in the world—Uncle Sam. Send Coupon NOW or just a postal. No obligation.

You Can Be a Banker

Edgar G. Alcorn
President, American School of Banking. Author of the Banking Course and many practical articles on banking. Contributor to "The Banker's Magazine" and leading business journals.

Learn By Mail

Our Thorough Correspondence Course Will Fit You for This Pleasant —Lucrative—Uncrowded Profession

Learn banking by mail! Without leaving your present work, simply during your spare hours, a few minutes each day, you can positively fit yourself to step into a responsible banking position. No business or profession offers greater opportunities today for trained men and women. The work is clean and wholesome, the hours short, holidays frequent, and salaries are good. Clip and mail the coupon for our interesting free book, "How to Become a Banker."

We Have Helped Many to Success In the Banking Field

—many who might otherwise be drudging away day after day, working in factories, clerking in stores, or doing other subordinate, monotonous work at insufficient wages. Just as we have helped them to success—so can we help you. The American School of Banking was founded as a result of a movement among prominent bankers to maintain the high standard of their profession by educating young men for it. The School proved a remarkable success from its first pupil. The value of men trained in the principles and practice of banking was at once realized by bankers and responsible positions have opened up the country over for our graduates.

Endorsed by Leading Bankers

By the men who know—the men who employ Not only are opportunities offered in the 30,000 banks already in existence in the United States, but new banks are being organized daily. If you are working in a bank or even if you have never been in a bank, our training will enable you to step into one of these newly organized banks, and with your acquired knowledge of higher administration to climb quickly to an executive position.

Don't Be a Drudge

Stop grinding away the best days and years of your life working under unpleasant conditions, with no leisure time, when with a few minutes' work a day, during your spare moments, you can successfully learn to be a banker. Get out of the drudgery class—give yourself a chance.

Every One Respects a Banker

Everywhere—in the small town and in the big city—the banker is "looked up" to and respected. He is the leading figure in the community—often becomes a leading element for good. He has greater opportunities for increasing his income by profitable and safe investment, by reason of his close contact with business and financial affairs. He is able to get more enjoyment out of life.

"How to Become a Banker" FREE

Clip the coupon at once and mail it for my handsome free book, "How to Become a Banker." This book tells you how our course not only qualifies the inexperienced for the banking business, but also helps the bank clerk to reach the cashier's desk. It shows how simple yet thorough the course is, and how easily it can be mastered. No matter what your present position, your age, you will find this book of great interest. A Genuine Rupture Cure Sent on Trial to Prove It

Don't Wear a Truss Any Longer

After Thirty Years' Experience I Have Produced an Appliance for Men, Women and Children That Actually Cures Rupture

The above is C. E. Brooks, inventor of the Appliance, who cured himself and who has been curing others for over 30 years. If ruptured, write him to-day at Marshall, Mich.

If you have tried most everything else, come to me. Where others fail is where I have my greatest success. Send attached coupon to-day and I will send you free my illustrated book on Rupture and its cure, showing my Appliance and giving you prices and names of many people who have tried it and were cured. It is instant relief when all others fail. Remember, I use no salves, no harness, no lies.

I send on trial to prove what I say is true. You are the judge, and once having seen my illustrated book and read it you will be as enthusiastic as my hundreds of patients whose letters you can also read. Fill out free coupon below and mail to-day. It's well worth your time whether you try my Appliance or not.

Confederate Veteran Cured

Commerce, Ga., R. F. D. No. 11.

Mr. C. E. Brooks, Dear Sir: I am glad to tell you that I am now sound and well, and can plough or do any heavy work. I can say your Appliance has effected a permanent cure. Before getting your Appliance I was in a terrible condition, and had given up all hope of ever being any better. If it hadn't been for your Appliance I would never have been cured. I am sixty-eight years old and served three years in Eckle's Artillery, Oglethorpe Co. I hope God will reward you for the good you are doing for suffering humanity. Yours sincerely. H. D. BANKS.

Others Failed, but the Appliance Cured

C. E. Brooks, Marshall, Mich.

Dear Sir: Your Appliance did all you claim for the little boy and more, for it cured him sound and well. We let him wear it for about a year in all, although it cured him 3 months after he had begun to wear it. We had tried several other remedies and got no relief, and I shall certainly recommend it to friends, for we surely owe it to you. Yours respectfully, WM. PATTERSON. No. 717 So. Main St., Akron, Ohio.

Cured at the Age of 76

Mr. C. E. Brooks, Marshall, Mich.

Dear Sir: I began using your Appliance for the cure of rupture (I had a pretty bad case), I think in May, 1905. On November 20, 1905, I quit using it. Since that time I have not needed or used it. I am well of rupture and rank myself among those cured by the Brooks Discovery, which, considering my age, 76 years, I regard as remarkable. Very sincerely yours,

Jamestown, N. C. SAM A. HOOVER.

Child Cured in Four Months

21 Jansen St., Dubuque, Iowa.

Mr. C. E. Brooks, Marshall, Mich.

Dear Sir: The baby's rupture is altogether cured, thanks to your Appliance, and we are so thankful to you. If we could only have known of it sooner our little boy would not have had to suffer near as much as he did. He wore your Appliance a little over four months, and has not worn it now for six weeks. Yours very truly,

ANDREW EGGENBERGER.

Remember

I send my Appliance on trial to prove what I say is true. You are to be the judge. Fill out free coupon below and mail to-day.

Free Information Coupon

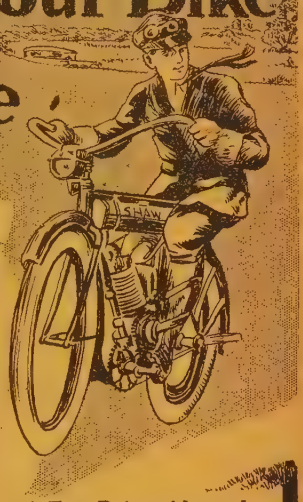
Easy to Make Your Bike a Motorcycle



Your "Foot-power" Bicycle Quickly Converted into a Speedy, Light-weight, Easy-running Motorcycle at Small Expense

Have you envied the fellow with a dependable motorcycle—the kind that gives perfect service at ALL times? Have you longed for one like his—but couldn't have one because of the high prices demanded for a really good motorcycle? Don't worry about high prices any longer—don't envy the owner of the best motorcycle made. You can make your dreams come true without further delay—and at small expense. Just attach a Shaw Motorcycle Attachment on your bicycle and ride anywhere the expensive motorcycles go. Now is the time to prepare for the fine days that you should enjoy in the great out-of-doors, without effort and with trifling expense. Plan your vacation now—with your bike transformed into a dependable motorcycle.

The SHAW Motor Fits ANY Bicycle

No brazing or changing of frame is needed. The Shaw attachment fits any model of any make. Just as simple and easy to detach as to put on—because it is portable. You can attach the Shaw motor and equipment without the aid of a mechanic or any extra expense. Anyone who can use an ordinary wrench and a common screwdriver can easily attach the outfit in a short time. Every part is complete and ready to attach to your bicycle without special tools or expert work.

Free Book

Send right now for our interesting book "CONVERT YOUR BIKE INTO A MOTORCYCLE." Tells all about the Shaw attachment and the wonderful Shaw magneto. Don't think of paying the high prices demanded for motorcycles if you have an ordinary bicycle. The Shaw attachment fitted to your bike will mean a motorcycle of the highest type. Not an experiment. Thousands of Shaw attachments are in use in the United States, Canada, and other foreign countries.

Sign and Mail Coupon TODAY

We will send you full information about this remarkable attachment, prices, etc., also a list of second-hand motorcycles.

Shaw Manufacturing Co.
Dept. 179 GALESBURG, KANS.

A Few Points About the Shaw Attachment

The Shaw motorcycle attachment consists of the famous **Shaw Motor**—2½ H. P. all finished, assembled and tested, ready to be clamped to any bicycle frame. The Shaw Motor is strongly built, air cooled, of the four-cycle type. The Shaw weighs much less than other motors.

The Shaw motor will take you up hills of 20% grade—will go through sandy roads and surprise you with its pulling power. No ordinary road is too rough for it, nor hill too steep. Every piece and every part represents the highest grade materials that can be had. That is why we do not hesitate to cover each part and each piece with our broad and liberal guarantee against any defective material and workmanship.

Sign-MAIL NOW!

Shaw Manufacturing Company, Dept. 179, Galesburg, Kans.

7 Years a Failure—Then Sudden Success

"Culture of Courage," a Work That Is Performing Miracles. Let Me Lend You a Copy

"For seven years I worked unsuccessfully on a project and had about given it up until I got a copy of 'Culture of Courage.' By applying the principles set forth in this great book, I was able to put the proposition over in less than two months, and it wasn't so hard after all."

These are the words of a man who recently became an owner of "Culture of Courage," and they reflect the experience of thousands of other men and women in all walks of life who are following the fear-destroying, success-achieving secrets laid bare for the first time in this great course—secrets which show how to win life's battles by cultivating the **courage** to succeed.

460 pp. Half Leather Gold Top Leaves

Courage Wins

The poisonous dragon of fear does more to hinder the world's progress each year than all the European war's ravages since the struggle began. Fear of things, fear of people, lack of self-confidence, and worry are the dragon's claws which pin millions of good men down when they could and should be successful in all that they undertake.

Courage is the indispensable weapon in man's fight for success. The courageous man wins because he doesn't know the failure slogans, "I dare not," "I haven't the ability." Instead, he is sure of himself—he succeeds because he never contemplates failure, and thus he often accomplishes the impossible.

"Culture of Courage"

is by Frank Channing Haddock, Ph. D.—the famous author of "Power of Will"—a scientist whose name ranks with James, Bergson and Royce. It is **not** an inspirational book which merely admonishes you to "destroy your fears" and "be courageous." Instead, it is a practical course in **how** to overcome each particular kind of human fear, physical as well as mental, to which we are all subjected. It contains actual principles, rules, methods and exercises which any one can easily follow and become ten times bigger—ten times more successful—ten times happier than you have even dared hope.

Will Help YOU

Never, we believe, has a book of more practical help been written. One man tells us how he had been out of a position for months and had absolutely lost confidence in himself until after reading "Culture of Courage" he went out and secured an excellent position the very same day.

That is only one example. Some say that it has made them self-confident and able to demand what they want, instead of whining for it, hat in hand. Others say that for the first time are they able to talk to men they had always held in awe—others that it has given them courage to take risks they dared not, and they have won out—others, that they have banished superstition and fear of things formerly beyond their control.

SENT FREE

So confident are we that once you examine this great book in your own home, you would never give it up, that we offer to send it without a cent in advance. Keep it five days—look it over carefully—then if you feel you can afford to be without it, mail it back and you owe us nothing, otherwise remit $3.00, the small price of this big 460-page leather-bound book. Remember, no money in advance. Merely mail the coupon.

Pelton Pub. Co., 83 Wilcox Blk, Meriden, Conn.

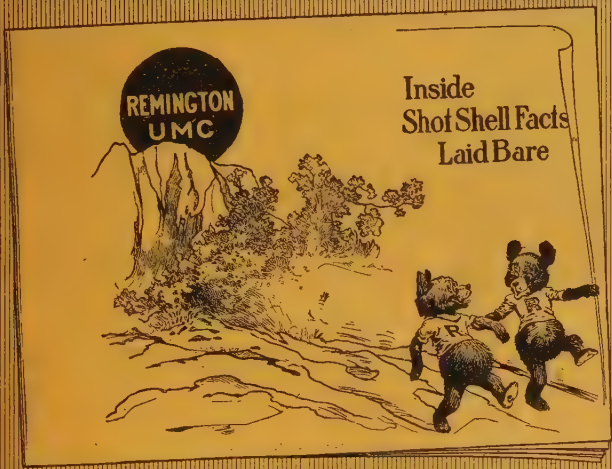
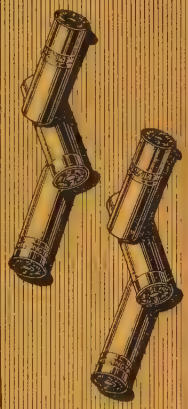
This Four Color Booklet Entitled

"Inside Shot Shell Facts Laid Bare"





THIS illustrated four-color booklet gives you a history of the development of shot shells—something that every sportsman is interested in. It tells how improvement was added to improvement; how the advent of smokeless powder necessitated the incorporation of new principles in shot shell manufacture. The booklet actually "lays bare" many inside facts of shot shell construction. These facts are not merely interesting but they are instructive—the more the sportsman knows about shot shells the better he can judge what kinds to buy for each purpose he has in mind. Don't miss this chance to obtain a free copy of "Inside Shot Shell Facts Laid Bare."

FILL IN COUPON, TEAR OFF AND MAIL

Write your name and full address plainly in the coupon at lower right hand corner of this advertisement, tear off, place in an envelope and mail to us today. You will receive free booklet post paid by return mail.

Stop Forgetting!

The average mind resembles a scrap pile.

Makes Your Mind a File— NOT A Pile

The Dickson Trained mind is as well ordered as a cross-indexed file.

Is your mind like a scrap pile—heaped up with a lot of unrelated, unclassified, unindexed facts? When you want to remember a name, place or date, must you grope uncertainly in this mixed-up pile seeking in vain to locate the desired information? And finally, in embarrassment, give it up? Summoned on any occasion to give facts and figures—does your mind become a blank? When suddenly called upon to speak—do you seek wildly to collect your thoughts—utter a few commonplace remarks—and sit down—humiliated? **Without Memory, all the knowledge in the world becomes worthless. "Stop Forgetting" makes your mind a file—not a pile.**

I Can Make Your Mind as Systematic and Forget-Proof as a Card Index File

—master of your mind's infinite ramifications—instead of a victim of its disordered details. My course of Memory Training, perfected by 20 years' experience, is universally recognized as the most thorough, practical and simplest system of its kind now before the public. My system so thoroughly trains the memory that you will be able to classify impressions, ideas, names, facts and arguments and have them ready at a moment's notice. It develops concentration—overcomes self-consciousness, bashfulness, enables you to address an audience intelligently without notes.

Dickson Memory Training Has Helped Thousands

Mail coupon or send postal for statements from students who had exceedingly poor memories and developed them to perfection and men with remarkably good memories, who made them even better. Give me 10 minutes daily, and I will make your mind an infallible classified index, from which you can instantly select facts, figures, names, faces, arguments. **Perfect your memory and you can command what salary you will.**

SPECIAL OFFER on 'How to Speak in Public'

This de luxe, handsomely illustrated, richly bound book—regularly priced at $2—free to every student who enrolls. The book will train you to think on your feet—to express yourself clearly, logically and convincingly, whether talking to one person or a thousand.

Book — FREE

Eureka Potato Planter

Send for Catalog—FREE

Profitable for the large or small grower. Plants potatoes at lowest possible cost. *One* man operates it. Opens the furrow—drops the seed any distance or depth required—puts on fertilizer (if wanted)—covers up—marks the next row. Accurate, automatic and dependable. Sold with or without Fertilizer Attachment.

Here's why you should select the Eureka Potato Planter: Furrow Opening Plow is directly under the axle—that means uniform depth at all times. The seed drops in sight of driver. Steel and malleable construction makes long life and few repairs. Made in three sizes—for one or two rows.

Eureka Mulcher and Seeder

Write for Free Catalog

A mulcher, smoothing harrow, cultivator, weeder and seeder—all in one. Forms dust mulch—a blanket of loose soil—preventing soil hardening and moisture escaping. Increases yield of corn, potatoes, oats, wheat, etc. Kills weeds. Has *flat teeth*, especially adapted to form mulch. Lever and pressure spring control depth of teeth. Sold with or without seeding boxes for grass seed, alfalfa, oats, etc. Teeth cover the seed. Adapted for a large variety of work. Three sizes, 8, 10 and 12 feet. Shipment from branch near you.

Eureka POTATO DIGGER

Gets all the potatoes

Result of 19 years' Digger experience

A companion implement of the famous Eureka Potato planter—made in same factory. Large wheels and main gears supply ample power. Largely malleable and steel, avoiding frequent breakage and lost time. High clearance under truck arch and over shovel prevents vines and weeds from bunching and dragging—rods and kickers place vines in row at side. The Eureka duplex shaker provides most agitation—potatoes are delivered clean. Rear extension elevator furnished when desired.

6 and 7 ft. sizes.

LEARN MUSIC AT HOME

Piano, Organ, Violin, Cornet, Guitar, Banjo, Mandolin, Harp, Cello, Piccolo, Clarinet, Trombone, Flute, Sight Singing

No longer need the ability to play music be shut out of your life! Now at last you can learn music at home from master musicians without coming to New York and without having a teacher at your elbow. By our wonderful home study method we have made it easy for you to play by note the Piano, Organ, Violin, Banjo, Mandolin, Guitar, Cornet, Cello, Piccolo, Clarinet, Trombone, Flute, or learn Sight Singing. And just think! You learn by note by our new, easy method in your own home, in a remarkably short time, without paying a cent for lessons. No tiresome "dry" exercises, no inconvenience, no trick music, no "numbers," yet simple, wonderful, easy for even a child.

Easy Lessons Free

We want to have one pupil in each locality AT ONCE to help advertise our wonderful easy system of teaching music. For a limited time we are therefore making a special advertising offer to teach you music in your own home FREE! The ONLY cost is for postage and sheet music, which is small. We can do this because our course makes friends—pupils recommend it to others and then we make our profit. We make this offer only on condition that you tell your friends how you learned to play and that you give them our name and address when they ask you.

Send No Money

If you came here to New York to study under the members of our faculty personally, you would have to pay $3 to $5 a lesson. Yet on our special offer, these same teachers will give you lessons in your own home through our wonderful Courses—FREE! And their home study lessons, instead of being a drudge, are so interesting, so truly fascinating that hundreds of pupils write: "I can hardly wait for the next lesson."

What People Say:

WONDERFUL SYSTEM.

"I just got home from my vacation, and the folks at home are delighted to hear me play the Organ so well. They say you have a wonderful system of teaching music."—M. F. Allard, Caraquet, N. Y.

LESSONS ARE FINE.

"Since I've been taking your lessons I've made over $60.00 with my violin. Your lessons surely are fine."—Melvin Vreeland, Macopin, N. J.

PLAYS ANYTHING.

"I finished your course of lessons on Cornet. Some time ago I intended writing to let you know how I got along. When I started them I knew nothing about the Cornet or Music, but now I can play almost any piece of music."—Kasson Swan, Denmark, Col. Co., Nova Scotia.

HEARTIEST APPROVAL.

"I want to extend the heartiest approval of your Piano Course. It has done more for me than years of other lessons. So complete in every way. I certainly can recommend it to others and will do so."—Mozie N. Lewis, 319 Jefferson, Neosha, Mo.

NOTE.—These are but a few of the thousands of enthusiastic letters sent in by pupils. Our free book contains many more. Send coupon or postal to-day. 67

Just Mail Coupon

Learning music successfully by our Home Study method is a positive, proven fact. Thousands who never knew one note from another before taking the lessons have developed into expert musicians. The average yearly enrollment for the past few years has been over 25,000 pupils. We grade you before you start and fit the instruction to your special needs. A beginner gets entirely different lessons than one who has had lessons. Let us send you our new 32-page book, which describes the secret principles of our wonderful New System of Music Teaching from beginning to end, and contains scores of letters from pupils who have become expert players as a result of the Course. Write to-day. Mail coupon or postal.

U. S. School of Music, 227 Fifth Avenue, New York

U. S. SCHOOL OF MUSIC

227 FIFTH AVE., N. Y.

Please send me your free book, "Music Lessons by Mail," explaining how I can learn to play by note. I would like to learn how to play the instrument checked:

☐ Piano ☐ Organ ☐ Guitar ☐ Violin
☐ Harp ☐ Banjo ☐ Cornet ☐ Piccolo
☐ Clarinet ☐ Trombone ☐ Flute
☐ Sight Singing ☐ Mandolin ☐ Cello

Put an X in the square before the instrument you want to play.

What 15c Will Bring You from the Nation's Capital

The little matter of 15c in stamps or coin will bring you the Pathfinder for 13 weeks on trial. The Pathfinder is an illustrated weekly published at the Nation's Center, for the Nation; a paper that prints all the news of the world and tells the truth and only the truth; now in its 23d year. This paper fills the bill without emptying the purse; it costs but $1 a year. If you want to keep posted on what is going on in the world, at the least expense of time or money, this is your means. If you want a paper in your home which is sincere, reliable, entertaining, wholesome, the Pathfinder is yours. If you would appreciate a paper which puts everything clearly, fairly, briefly—here it is. Send 15c to show that you might like such a paper, and we will send the Pathfinder on probation 13 weeks. The 15c does not repay us, but we are glad to invest in new Friends.

The Pathfinder, Box 68, Washington, D. C.

Jim Rohan
Pres.

25 Times

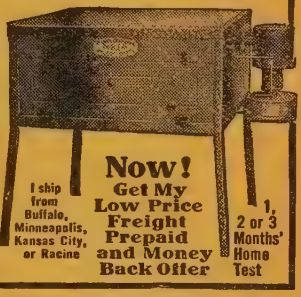
Postal brings this great book to you. Championship winners tell *in their own words* how to make most profits. Many photographs of winning hatches

"Tycos" Cup

World's Champion Belle City Incubator

"In Twenty-Five World's Greatest Matches 'World's Champion' Won With Perfect Hatches"

THESE matches were won by Belle City users in competition with users of all other makes. Besides these, 64 won with 100 per cent perfect hatches in my own 1915 hatching contest, many never having used *any* incubator before. Get all the facts—proofs—particulars. My free, valuable book "Hatching Facts" tells all. Tells how World's Champion incubators and brooders are made. Shows them in actual colors—492,000 in use—the kind used by U. S. Government, and by leading agricultural colleges—it "Incubates in all the States"—the kind that will put you in the championship class and make biggest profits for you. *Greatest book of practical hatching information ever published.* Postal brings it with my low price and 10-year personal money-back guaranty. **Write Today.** Address Jim Rohan, Pres.



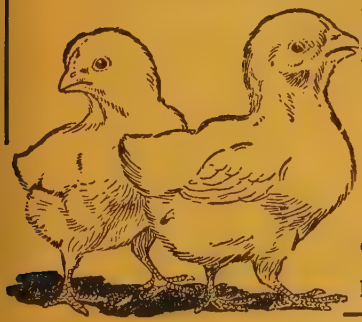
Belle City Incubator Co. Box 45 Racine, Wis.

Greatest Value in Baby Chicks

When buying chicks, send your order to the Famous Kerr Chickery and get the most for your money. We are experts in chick production, and, because of our unequalled equipment, great capacity and wide experience, can give you real bargains.

Our chicks are all pure bred—from healthy, productive, free-range, farm-bred breeding flocks—bred, hatched and shipped *right.* They will please and make money for you.

Kerr's GUARANTEED Chicks



will reach you in perfect condition; *we guarantee it.* We can usually make quick delivery, but book your order early to insure shipment at specified time. We have the following business breeds:

Barred and White Rocks,
White and Buff Leghorns,
Rhode Island Reds.

Write to-day for big, illustrated catalog with helpful advice on chick-growing—FREE.

LEARN TO REPAIR TIRES

START A BUSINESS OF YOUR OWN

There is always a GOOD JOB for a GOOD MAN

We put you next to the best places

Easiest to start—bigger opportunities than in any other branch of the Auto business. A broad claim, but easy to prove. Only stop and think!—you know it's true. Listen! Not one single Auto factory can build cars fast enough. Everybody is car crazy, and the craze is growing. 2,000,000 autos now in use. Four tires to each car. That means 8,000,000 tires to repair. **Just think of it—8,000,000 tires!** Each car wears out its cost in tires alone. Punctures and blowouts are common. Vulcanizing, patching, retreading, etc. must be done. Retreading alone—the new and better process—brings big money.

Earn $3000 to $8000 a Year

Begin now. In almost every city, town, village and cross corners, there is a fine chance to start. We know the places and put you next. Just a little money starts you in a business of your own, or we'll help you get a good paying job. **We guarantee to make an expert of you in 30 days.** Write today for **free** catalog, or why not take a run over to Detroit and investigate personally? Don't let the chance slip by. Investigate now.

Reliable Tire Repair School, 700 Reliable Bldg., Detroit, Mich.

FATHERS! **This is a great opportunity for that boy of yours. Start him in the tire repair business. You'll always be glad.**

The Reliable Guarantee

We guarantee to teach you in 30 days to repair any make of tire as well as any expert, and to fit you to fill a good paying position in any repair shop. We also guarantee that you will be qualified to start in business for yourself and that we will give you every possible aid in starting, advising you as to good locations, ways and means of getting business, how and where to buy supplies, etc. If we fail to perform our part, ask for your money back.

Try Five Cigars Before You Buy

I'm so sure these cigars will please you that I want you to smoke five on trial at my expense. You will never get this chance when buying over the counter.

I am able to do it only because the cigar—my J. R. W. "Panetela'—costs me no salesmen's salaries to distribute. When you buy them you are paying for straight tobacco-value and goodness.

This rare leaf I use in my "J. R. W." grows only in the famous Vuelta mountain district in Cuba. I found it there some years ago and had my private cigars made up from it.

2,000,000 LAST YEAR

My friends liked these smooth-burning, mild cigars so much that I was induced to import more and more of this delightful leaf each year. Now I supply 20,000 discriminating smokers throughout the country. Their taste agrees with mine in the matter of good tobacco.

To-day I import the cream of the crop from this exclusive district. Last year I sold 2,000,000 "J. R. W." cigars. I have them put up in panetela shape, as it is the most popular with smokers, and each one bears my private monogram band.

GET FIVE FREE

I want you to know these cigars are your kind of smokes before you buy them. Send me only 10 cents to cover packing, postage and revenue expenses, enclose your business card or letter head and I will send you the cigars at once. Smoke five, and when you find you like them send me a check or money order for the box. I will then replace the five you smoked. My price is $5 per hundred—$2.60 for fifty. If you find the cigars are not to your taste return the box at my expense. Write to-day.

Don't Hide Them With a Veil; Remove Them With The Othine Prescription

This prescription for the removal of freckles was written by a prominent physician and is usually so successful in removing freckles and giving a clear, beautiful complexion that it is sold by druggists under guarantee to refund the money if it fails.

Don't hide your freckles under a veil; get an ounce of othine and remove them. Even the first few applications should show a wonderful improvement, some of the lighter freckles vanishing entirely.

Be sure to ask the druggist for the double strength othine; it is this that is sold on the money-back guarantee.

Othine can be bought by the ounce from any druggist.

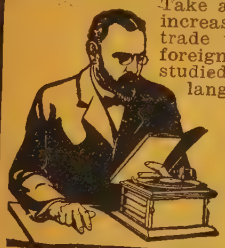
Another Language Makes Another Man!

The man who acquires a foreign language doubles his commercial value and opens up new possibilities and new fields of opportunity.

Take advantage of the war situation! Better your position and increase your salary. Extend your business. Establish export trade with South American countries. Equip yourself to read foreign books and papers. Brush up on the language you studied at college and make it of practical use. Acquire a new language, at home, for business and social purposes.



SPANISH—FRENCH—GERMAN—ITALIAN

Is Easily and Quickly Mastered by the

LANGUAGE-PHONE METHOD

and Rosenthal's Practical Linguistry

(Highest Award Panama-Pacific Exposition, 1915)

This is the natural way to learn a foreign language. The voice of a native professor pronounces each word and phrase, slowly or quickly, for minutes or for hours. Any one can learn a foreign language who hears it spoken often enough; and by this method you can hear it as often as you like.

It is a pleasant, fascinating study. All members of the family can use it. You practice during spare moments, or at convenient times, and in a surprisingly short time you speak, read and understand a new language.

Send For This Free Book

¶ Simply send us your name and address and we will mail you free "A Treatise on Language Study" and full particulars of trial offer. We will also tell you how you can use your own talking machine (our records fit all) to acquire a foreign language

Do you use Press Clippings?

If you do not, drop a postal card to

Romeike's Press Clipping Bureau

and we will show you how Press Clippings can be used to your advantage.

Press Clippings are always interesting and profitable; they are indispensable to professional and business men alike.

Authors, artists, actors, singers and society leaders are supplied with reviews and criticisms.

We collect obituary notices and bind them in scrapbooks.

Lawyers, bankers, brokers, financial institutes depend largely on quick information from the columns of the press; we supply them.

To the manufacturer we show through the Clippings new markets for his products.

The inventor, the politician, the social reformer, in fact all who attract the attention of the press, are informed and kept up to date by Press Clippings.

A postal card will bring all the Information.

The President's Official Reporter

The picture shows him reporting the President on the observation platform of a train.

Copyright by Underwood & Underwood

Mr. Charles Lee Swem first attracted the President's attention by his accuracy in reporting a public address by him.

Mr. Swem studied Gregg Shorthand in a night school. At twenty years of age he became personal stenographer and official reporter to the President of the United States—the most important stenographic position in the world.

Mr. Swem is one of the fastest shorthand writers in the world. He holds a speed certificate from the National Shorthand Reporters' Association for 268 words a minute, which he won when but nineteen years of age, defeating three world's champions. He won second place in the Fifth International Shorthand Speed Contest when but seventeen years of age.

Naturally Mr. Swem writes the best shorthand system in use—Gregg Shorthand.

INSIST on Getting GREGG SHORTHAND

Whatever school you attend, **insist** on being taught Gregg Shorthand—the system that is taught in more schools than all other systems combined. It is the "safety first" shorthand. Anybody can learn to write Gregg Shorthand because of its wonderful simplicity and legibility.

Gregg Shorthand is

—used widely in the courts and government service.

—taught in the high schools of more than 1500 American cities—more than 65% of the cities whose high schools teach shorthand, including such cities as New York, Boston, Rochester, Buffalo, Syracuse, Minneapolis, St. Paul, Los Angeles, Omaha, Seattle, Kansas City, Memphis, Oakland —taught in two of the largest universities in America—New York University and the University of California.

Gregg writers and Gregg teachers are in demand everywhere.

Send to-day for "A Little Journey to the Home of Gregg Shorthand," by Elbert Hubbard—and Sample Lesson, free.

THE GREGG PUBLISHING CO., 77 Madison Ave., New York City

Awarded Gold Medal of Honor at the Panama-Pacific International Exposition, 1915—the highest and only award to any shorthand system.

A WONDERFUL INVENTION

That Prevents OVERCOOKED FOOD OR TARDINESS

THE WIZARD OF TIME

THE DEPENDABLE CLOCK

AN INNOVATION IN ALARM CLOCKS
A PRECISIONAL REMINDER

No other clock like the WIZARD.

The WIZARD will do what no other clock can do; it will alarm with loud ring or signal with soft buzz as desired and can be relied upon to tell when to catch the train, keep an appointment, when the roast is done or the eggs are cooked, medicine to be administered and a dozen and one other things not to be forgotten during the day. Its computing bezel precisional feature alone opens up a field of usefulness for the WIZARD beyond the sphere of any other alarm clock. It will notify at any predetermined time minutes or hours away, always at the exact minute. It will set from the face instantly for any fractional interval and alarm, stop and reset automatically when computing bezel is turned for another "minute" interval.

The WIZARD is the most useful alarm clock on the market. Price **$3.50.** Sent by parcel post. Postage prepaid on receipt of price.

Tested, Approved and Guaranteed by the New York Tribune Institute

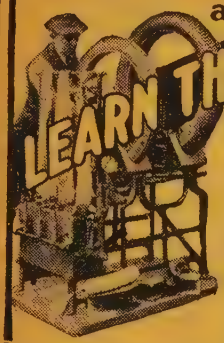
Come to Akron, Ohio
The Tire Center
and

LEARN THE TIRE REPAIR BUSINESS ©



Come to Akron, the heart of the tire industry, and learn right. No other school or method offers such possibilities. Opportunities in every town or city to open repair shops in business and residence districts. Our instructors are men who have grown up with the rubber business, and teach everything in clear, concise way. You learn how rubber is grown, gathered, shipped, compounded, and how to handle cord and fabric tire trouble quickly. You do actual work.

Earn $2500 to $7500 a Year

There are over three and a half million autos now in use. Every car has four tires with one or two extra carried in the tire rack. Repair shops crowded with work and can't get trained men. Men earn $3 00 a day and up in factories and shops. Tire factories co-operate with our graduates in getting best locations for Repair Shops. There are 65 000 Tire Dealers and only 13,000 Repair Shops. Opportunities everywhere. You finish in from 4 to 6 weeks. School open all year. Enter classes any day.

60 Leading Tire Firms Use Akron-Williams Equipment

That's why our school is completely and thoroughly equipped with Williams Foundry & Machine Co.'s Outfits. Big rubber companies not only use Akron-Williams equipment themselves in factories and service stations, but advise its use in garages. Every applicant is given a life membership. Get started. Reap your share of the big profits. Write for catalog, absolutely free, or, better still, jump on a train and come to Akron.

MONEY BACK GUARANTEE.

We guarantee to qualify our students to get into business for themselves or to hold positions paying $18.00 to $40.00 weekly or return their money.

7 DAYS PARAGON SHORTHAND

In Your Own Home

during the evenings of just one week, you can learn the famous Lichtentag Paragon Shorthand. Speed comes with use or practice. Its speed capacity is practically unlimited. Best of all—it is wonderfully easy to read.

What It Will Do for You

To work yourself up to the highest positions in the business world you want to be in the **private office** of the **head** of the business—in his constant company—where you will have the opportunity to show him your ability. **Shorthand is** the thing that will place you there. As the stenographer **you** are really the confidential clerk of the head. You learn all the details and the secrets of the business. The heads of some of the biggest corporations in this country started as stenographers. What is to prevent **your** doing as well?

So simple is this system that you can learn it in less time through our mail course than you would learn any one of the old-fashioned systems in a resident school. We have pupils all over the globe. Our graduates are now stenographers in the service of the United States Government, in the offices of the biggest corporations in this land, and in court reporting.

If you are not merely curious, but are eager to learn this valuable art, write **TODAY** and let us send you the **full proof** of these claims.

Free to the DEAF

This valuable compendium of the latest authoritative information on deafness—48 pages with illustrations.

Pages 13 to 18
"Deafness and the Care of the Ears," by Dr. Abraham Mills Fanning—things to avoid—hygienic measures to adopt—how to relieve earache.

Pages 19 to 24
"The Prevention of Deafness," by Dr. Adair Dighton—warnings against home remedies, diving, Valsalva's method, etc.

Pages 30 to 32
"The Fatigue of Deafness" by Dr. Clarence John Blake, consequences of the strain; methods of relief.

Pages 38 to 42
"Kinds of Deafness that Can Be Relieved"—what cases mechanical devices will help and what cases require electrical devices.

Pages 43 to 45
"Best types of both mechanical and electrical devices—Fair price to pay for each."

Send a postcard today for this new book if you are deaf or losing your hearing or are interested in someone who is. It costs nothing—we gathered this information together first for our own use, and now offer a limited number of copies printed on heavy paper, bound in cloth, to all whom it may help, absolutely free. This book does not raise false hopes for those who are beyond assistance, but it does show the "way out" to those who can be helped—tells what kind of deafness can be benefited by artificial aids and what kinds cannot—shows the best electrical instruments and also the newest mechanical aids to hearing.

AUDIAID $7.50

This is a marvelous little device that concentrates and magnifies the sound waves and transmits them to the ear in natural pleasing tones. Its price of $7.50 puts it within reach of all.

Every Blemish Removed

IN TEN DAYS

Get the Beauty Methods of This Beautiful Woman

I Will Tell Every Reader of This Almanac How— FREE

I only ask that you write me first. Send no money. All confidential. No one else will know. Then to you, and any reader of this Almanac, I'll give full details of my wonderful and astonishing treatment. No obligations. No risk. You be the sole judge. I offer this fairly and truthfully—FREE to you.

My great complexion beauty marvel has instantly produced a sensation. You can try it without risk and prove all I say—all that thousands of others say who know the results. Stubborn cases have been cured that baffled the physicians and beauty specialists for years. You have never in your life used or heard of anything like it. Will make muddy complexions, red spots, pimples, blackheads, eruptions vanish almost like magic.

No cream, lotion, enamel, salve, plaster, bandage, mask, massage, diet or apparatus, nothing to swallow. It doesn't matter whether or not your complexion is a "fright," whether your face is full of muddy spots; peppery blackheads, embarrassing pimples and eruptions, or whether your skin is rough and "porey," and you've tried almost everything under the sun to get rid of the blemishes. This wonderful treatment, in just ten days, positively removes every blemish and beautifies your skin in a marvellous way. You look years younger. It gives the bloom and tint of purity of a freshly blown rose. In ten days you can be the subject of the wild admiration of all your friends, no matter what your age or condition of health.

So, this minute, send me your name and address on the free coupon, or postal or letter, and by return mail I will write you full details in plain sealed envelope free. Decide **now** and **do it** for your own greater happiness.

All Methods Now Known are Cast Aside by Pearl La Sage

former actress who now offers to tell women of the most remarkable complexion treatment ever known — Nothing to Wear. Nothing to Take Internally—Absolutely Harmless and Pleasant to Use. **Your Complexion Can Look Like Hers If You Will Send Me Your Name.**

FREE COUPON

Rheumatism

A Home Cure Given by One Who Had It

In the spring of 1893 I was attacked by Muscular and Inflammatory Rheumatism. I suffered as only those who have it know, for over three years. I tried remedy after remedy, and doctor after doctor, but such relief as I received was only temporary. Finally, I found a remedy that cured me completely, and it has never returned. I have given it to a number who were terribly afflicted and even bedridden with Rheumatism, and it effected a cure in every case.

I want every sufferer from any form of rheumatic trouble to try this marvellous healing power. Don't send a cent; simply fill out the coupon below and I will send it free to try. After you have used it and it has proven itself to be that long-looked-for means of curing your Rheumatism, you may send the price of it, one dollar, but, understand, I do not want your money unless you are perfectly satisfied to send it. Isn't that fair? Why suffer any longer when positive relief is thus offered you free? Don't delay. Write to-day.

ANTI-KAMNIA TABLETS FOR ALL PAIN

"The efficiency of any drug," says Dr. C. P. Robbins, "is known to us by the results we obtain from its use. If we are able to control pain and disease by means of any preparation, we certainly are warranted in its use. One of the principal symptoms of all disease is pain, and this is what the patient most often applies to us for, i. e., something to relieve his pain. If we can arrest this promptly, the patient is most liable to trust in us for the other remedies which will effect a permanent cure. One remedy which I have used largely in my practice is Anti-Kamnia Tablets. Many and varied are their uses. I have put them to the test on many occasions, and have never been disappointed. I found them especially valuable for headaches of malarial origin, where quinine was being taken. They appear to prevent the bad after-effects of the quinine. Anti-Kamnia Tablets are also excellent for the headaches from improper digestion; also for headaches of a neuralgic origin, and especially for women subject to pains at certain times. Two Anti-Kamnia Tablets give prompt relief, and in a short time the patient is able to be about as usual." The tablets may be obtained at all druggists. Ask for A-K Tablets. They are also unexcelled for headaches, neuralgia and all pains.

YOU LIE

When you raise an ordinary cocktail and say "Here's Health!"

There is only one cocktail of which you can truthfully say "Here's Health!"

It is the NEWLIFE COCKTAIL, a non-alcoholic fermentation of fresh pineapple and grapefruit juices with the Bacillus Bulgaricus of Metchnikoff.

It has no kick in it, it is all boost.

Unless you want to be kicked send for literature. It may mean the turning point in your life.

Foreword

To be normal—that is the birthright of every man. If you have lost yourself—that self that came into the world alert with possibilities—here is a chance to find yourself, and, finding, hold yourself a man.

Let Us Help You

Free Yourself from These Nerve Racking and Body Destroying Habits

Grand prize 1914-1916, Expositions of the American Museum of Safety, "in recognition of the devotion of time, money and personal service in humanitarian achievement."

with the **Normyl Remedy,** which is now prescribed in England by over 2,000 physicians. Indorsed by the clergy and business men everywhere. Our **safe and sure**

HOME TREATMENT

consists of 24 tiny bottles of medicine (guaranteed harmless), one for each day; it does not make the patient sick and can be taken without any inconvenience or interruption to his or her usual routine, specially relieves the craving, builds up and restores the energies and will power.

OUR INSTITUTE TREATMENT

is only for extreme cases, where a person's condition is such that he needs careful supervision during every stage in the use of the remedy, which can be administered under the personal direction of his own physician. For further information call or send for our

FREE BOOKLET

which describes our remedy and treatment, contains letters of indorsement from physicians, clergymen and testimonial letters from cured patients.

Vapo-Cresolene

Established 1879.

FOR Whooping Cough, Spasmodic Croup, Asthma, Sore Throat, Coughs, Bronchitis, Colds, Catarrh.

A simple, safe and effective treatment, avoiding drugs.

Vaporized Cresolene stops the paroxysms of Whooping Cough and relieves Spasmodic Croup at once.

It is a **boon** to sufferers from Asthma.

The air carrying the antiseptic vapor, inspired with every breath, makes breathing easy, soothes the sore throat and stops the cough, assuring restful nights. It is invaluable to mothers with young children.

Cresolene relieves the bronchial complications of Scarlet Fever and Measles and is a valuable aid in the treatment of Diphtheria.

Cresolene's best recommendation is its 30 years of successful use. Send us a postal for Descriptive Booklet.

FOR SALE BY ALL DRUGGISTS

Try Cresolene Antiseptic Throat Tablets for the irritated throat, composed of slippery elm bark, licorice, sugar and Cresolene. They can't harm you. Of your druggist or from us, 10c. in stamps.

YOU HAVE A BEAUTIFUL FACE

But Your Nose?

Before

After

In this age attention to your appearance is an absolute necessity if you expect to make the most out of life. Not only should you wish to appear as attractive as possible for your own self-satisfaction, which is alone well worth your efforts, but you will find the world in general judging you greatly, if not wholly, by your "looks," therefore it pays to "look your best" at all times. **Permit no one to see you looking otherwise:** it will injure your welfare! Upon the impression you constantly make rests the failure or success of your life. Which is to be your ultimate destiny? My new nose-shaper, "Trados" (Model 22), corrects now ill-shaped noses without operation quickly, safely and permanently. Is pleasant and does not interfere with one's daily occupation, being worn at night. Write to-day for free booklet, which tells you how to correct ill-shaped noses without cost if not satisfactory.

ARNOLD COMPANY, 210 Sycamore St., Milwaukee, Wis.

Abolish the Truss Forever

Do Away With Steel and Rubber Bands That Chafe and Pinch

You know by your own experience the truss is a mere makeshift—a false prop against a collapsing wall—and that it is undermining your health. Why, then, continue to wear it? **Stuart's PLAPAO-PADS** are different from the truss, being medicine applicators made self-adhesive purposely to prevent slipping and to hold the distended muscles securely in place. No straps, buckles or springs attached; no "digging in" or grinding pressure. **Soft as Velvet—Flexible—Easy to Apply—Inexpensive.** Continuous day and night treatment at home. No delay from work. Hundreds of people have gone before an officer qualified to acknowledge oaths and **swore** that the **Plapao-Pads** cured their rupture—some of them most aggravated cases and of long standing. It is reasonable that they should do the same for you. Give them a chance.

FREE TRIAL

FREE To the RUPTURED

Trial Plapao and illustrated book on rupture. Learn how to close the hernial opening as nature intended, so the rupture **can't** come down. No charge for it, now or ever; nothing to be returned. Write to-day—**NOW.**

Plapao Co., Block 337, St. Louis, Mo.

HAWKINS LIBRARY OF ELECTRICITY

Electricity

at your fingers' ends

Here is a set of books that no man in the ELECTRICAL FIELD should do without. This is the ELECTRICAL AGE in which we live; ELECTRICITY now controls more trades, directs more men, offers more opportunities than any other power that man has yet discovered. Do you wish to know the underlying principles of **MODERN ELECTRICAL PRACTICE?**

If so, **HAWKINS ELECTRICAL GUIDES** will give you the information. In reality they are a school within themselves, containing a complete study course with QUESTIONS, ANSWERS AND ILLUSTRATIONS, written in plain everyday language so that a practical man can understand the "HOW, WHEN AND WHY" OF ELECTRICITY.

PARTIAL CONTENTS.

Magnetism—Induction—Experiments—Dynamos—Electric Machinery—Motors—Armatures—Armature Windings—Installing of Dynamos—Electrical Instrument Testing—Practical Management of Dynamos and Motors—Distribution Systems—Wiring—Wiring Diagrams—Sign Flashers—Storage Batteries—Principles of Alternating Currents and Alternators—Alternating Current Motors—Transformers—Converters—Rectifiers—Alternating Current Systems—Circuit Breakers—Measuring Instruments—Switch Boards—Wiring—Power Stations—Installing—Telephones—Telegraph—Wireless—Bells—Lighting—Railways. Also many Modern Practical Applications of Electricity and Ready Reference Index of the 10 numbers.

You can carry each separate volume about with you until you have mastered its contents. Hawkins Electrical Guides fit your pocket and your pocketbook as well. Only $1 per volume and owners of the set say there are no better electrical books at any price.

If you will fill out the following coupon, giving all the information requested, WE WILL SUBMIT THE TEN VOLUMES FOR EXAMINATION ON CONDITIONS NAMED.

—FREE EXAMINATION—

THEO. AUDEL & CO., 72 5th Ave., N. Y.

Please submit me for examination **HAWKINS ELECTRICAL GUIDES** (Price $1 each). Ship at once, prepaid, the ten numbers; if satisfactory I agree to send you $1 within seven days and to further mail you $1 each month until paid.

SEND NO MONEY The books will be sent to you for FREE examination, prepaid. After 5 days return them at our expense. If you decide to keep them, pay only $1.00 AFTER the 5 days, and the balance on easy monthly terms. The price is so low, and the books are of such amazingly high quality that everybody wonders how it can be done. Here is the secret:

We printed hundreds of thousands of books at one time, relying on the public's love for *good* books to make the venture self-sustaining. Leather-bound books of such high quality have often sold for as high as $1.00 each, yet our price is but a fraction. Because of advancing prices the supply for this offer is limited. If you send in the coupon or a letter now, you will be sure of your books, and, in addition, we will ship you the handsome Book Rack Free. Mail the coupon, without money, NOW.

If you want single copies, send 35 cents for each, in advance. Money back if you want it. If you live outside of the United States, please send $1.00 extra with coupon.

Stays New-Looking After Other Paints Have Become Dull and Faded

Ask any experienced painter: "Which paint—white lead or zinc—is whiter, more durable and holds colors added to it longer?"

He will tell you: "Zinc."

Ask him: "What makes paint glossy and means longest life to paint?"

He will tell you: "Linseed Oil."

ZINOLIN comes like lead, in paste form, but less ZINOLIN, no lead and double the linseed oil is required in mixing. This combination of ZINOLIN, which is 85 per cent zinc and double oil, revolutionizes outside painting.

ZINOLIN

"Arnold-ized" zinc paint

is more satisfactory than any other paints because it stays fresh, glossy and holds its color much longer. It is more economical than other paints because it is more durable, costs no more per gallon and covers 150 to 250 square feet more surface per gallon, while it also covers the surface better, giving a tougher and completely waterproof coat.

The extra oil required by ZINOLIN offers greater elasticity, necessary for proper expansion and contraction of paint in hot and cold weather, thus prevents cracking, peeling and chalking.

Our aim is to give every property owner better painting service. If you have not a good painter now and want one, perhaps we have a Certified Painter in your town whom we can refer to you. If you have a good painter and he does not know about ZINOLIN, give us his name and we will inform him fully, absolutely guaranteeing his job if he applies ZINOLIN according to our directions. Literature upon request.

6 Tailor-Made-To-Order MONTHS TO PAY 6

Send for FREE Style Book

This Model and Many Others Are Shown in Our De Luxe Book of New Styles. Send for Your FREE Copy Today

This is without doubt the grandest suit offer ever made. No matter where you live or what you do, we'll make you the most stylish and most handsome suit you ever saw. Cut to your measure, from cloth you select yourself, and **give you six months to pay.**

We don't ask for references or security. Your honest word is all we want. You can have a new suit at once. Wear and enjoy it while you pay us a little each month, according to our liberal terms. Thousands of our pleased customers say they wouldn't think of buying a suit of clothes from any one but us, because we show a bigger and better line, and give twice as much real value and satisfaction for the money. Take advantage of this opportunity. Let us make your new suit.

WE SAVE YOU $15 TO $25

on a real hand-tailored, made-to-your-order-suit—or about half what you would have to pay for an ordinary ready-made suit at your local dealer's. Write us quick and learn how you can get a new suit now— and pay as low as

Only $2.50 Per Month

Send coupon for De Luxe Book of Styles and full particulars of this sensational offer. When the style book comes, make your selection from the many classy models and swell fabrics. Take your own measure, according to simple directions. Send it to us. In a few days we'll ship you the swellest hand-tailored suit you ever laid eyes on, made to your order in one of the latest Metropolitan Styles—from cloth you select yourself.

We Guarantee Every Suit Perfect and Ready in 7 Days.

Your suit will be cut by men who are experienced, capable and highly paid. With shears, not by machinery, as ready-made or semi-ready garments are cut. We build your suit separately. We study your figure from the measurements and meet your individual requirements, so that you—whether tall or short—thin or stout—will be fitted perfectly—and the suit will be all completed—ready for you to wear in 7 days.

Get Our Free Book

It pictures and describes all latest fashions. These models are classiest styles ever seen, having the beauty of line, the drape and hang so much desired by the best dressers in America. With the style book we send you cloth samples of beautiful weaves and patterns. This year, same as in years past, the most popular patterns will be found in Stanley-Rogers clothing. Don't fail to have us make your new suit. Our thousands of customers come back season after season for their clothes—a sure sign they are pleased. So will you be.

$1,000 REWARD

to any one who proves that we do not make all garments to the individual measurements of each customer. Some houses try to palm off **altered** ready-mades or semi-readys, claiming them to be made-to-order. We cut right from the bolt and make up your suit right in our own shop.

Highest Grade Fabrics Absolutely Guaranteed

You get the best of everything. You get best fabrics, best French hair cloth interlinings, best serge body linings, best sateen sleeve linings, best buttons, button holes, stitching, etc. In addition to fine materials, we guarantee thorough tailoring and a perfect fit. This offer is backed by years of square dealing and a Legal Guarantee Certificate.

WATER-PROOF RAINCOATS
SPECIAL BARGAIN Per Month ONLY $1.20

While they last—Beautiful Oxford Gray Wool Cassimere Raincoats, made with new style, convertible, collar, slashed pockets, straps on sleeves—Only $8.70, **$2.70 with order**—balance $1.20 per month. Satisfaction guaranteed or money back. Write to-day for yours. Send chest measure for size.

Send This Coupon NOW

or postal or letter if you wish—but do it NOW! Get the magnificent FREE Style Book and full particulars of our sensational offer. Book gives you simple directions for taking your own measurements. Don't delay. If you write today you can get your suit just so much sooner. Our prices SAVE YOU $15 to $25. Our LIBERAL CREDIT gives you SIX MONTHS TO PAY. Send coupon for details.

Iron Is Greatest of All Strength Builders, Says Doctor

A Secret of the Great Endurance and Power of Athletes

Ordinary Nuxated Iron Will Make Delicate, Nervous, Run-Down People 200 Per Cent. Stronger in Two Weeks' Time in Many Cases.

NEW YORK, N. Y.—Most people foolishly seem to think they are going to get renewed health and strength from some stimulating medicine, secret nostrum or narcotic drug, said Dr. Sauer, a well-known Specialist who has studied widely both in this country and Europe, when, as a matter of fact, real and true strength can only come from the food you eat. But people often fail to get the strength out of their food because they haven't enough iron in their blood to enable it to change food into living matter. From their weakened, nervous condition they know something is wrong, but they can't tell what, so they generally commence doctoring for stomach, liver or kidney trouble or symptoms of some other ailment caused by the lack of iron in the blood. This thing may go on for years, while the patient suffers untold agony. If you are not strong or well, you owe it to yourself to make the following test: See how long you can work or how far you can walk without becoming tired. Next take two five-grain tablets of ordinary nuxated iron three times per day after meals for two weeks. Then test your strength again and see for yourself how much you have gained. I have seen dozens of nervous, run-down people who were ailing all the while, double their strength and endurance and entirely get rid of all symptoms of dyspepsia, liver and other troubles in from ten to fourteen days' time simply by taking iron in the proper form. And this after they had in some cases been doctoring for months without obtaining any benefit. But don't take the old forms of reduced iron, iron acetate or tincture of iron, simply to save a few cents. You must take iron in a form that can be easily absorbed and assimilated like nuxated iron if you want it to do you any good, otherwise it may prove worse than useless. Many an athlete or prize-fighter has won the day simply because he knew the secret of great strength and endurance and filled his blood with iron before he went into the affray, while many another has gone down to inglorious defeat simply for the lack of iron.

NOTE—Nuxated Iron recommended above by Dr. Sauer is not a patent medicine nor secret remedy, but one which is well known to druggists and whose iron constituents is widely prescribed by eminent physicians everywhere. Unlike the older inorganic iron products, it is easily assimilated, does not injure the teeth, make them black, nor upset the stomach; on the contrary, it is a most potent remedy, in nearly all forms of indigestion, as well as for nervous, run-down conditions. The Manufacturers have such great confidence in Nuxated Iron that they offer to forfeit $100.00 to any charitable institution if they cannot take any man or woman under 60 who lacks iron and increase their strength 200 per cent. or over in four weeks' time provided they have no serious organic trouble. They also offer to refund your money if it does not at least double your strength and endurance in ten days' time. It is dispensed in this city by all druggists.

Bush Motor Co., Bush Temple, Chicago, Ill.

It's a Whaling Good Rod!

Let "DAD Whaling" make you a casting rod! Why be satisfied with a factory made, "ground-out-by-the-thousand" rod, when for a few dollars more you can have an *individual* rod, made by hand to suit your own whims if you like, or better still, tell us what you want and leave it to "DAD Whaling." Every "Whaling" rod is personally supervised by "DAD Whaling," a fisherman of forty summers' service, and in it is concentrated the thoroughly tested angling lore of a lifetime gathering. At prices ranging from $10 up you can have a "Whaling good rod," actually hand made all the way from raw wood to last coat of varnish; perfectly balanced, true and fine, of especially selected split bamboo, bathabara dagma or greenheart. In our folder you will see illustrated hand made rods of tried and proven design which we can deliver at once, or we can make up a special rod to your own specifications. Send to-day for our folder.

And a Whaling Good Tackle Box

And here is the tackle box that "DAD Whaling" uses. "Here's a box that don't get stepped on or kicked over when you climb into a boat that's always where YOU are—and has room in it for all the baits and tackle any real angler wants." It consists of a curved box with "belt loops" to hitch onto an ordinary leather belt. It has space in the bottom for a reel and a bunch of baits, and a tray for snells and so on, and a cover.

It's a "Whaling good box" and you can get one postpaid by sending $1.50, or your dealer may have it. It's brand new, just out this season, so if your dealer hasn't it yet, address

The G. E. WHALING & SON CO.

804 Champlain Street, CLEVELAND, OHIO

(DEALERS—This tackle box is a hum-dinger. Write for prices.)

AL. FOSS PORK RIND MINNOWS

Look for This at Your Sporting Goods Dealer's Store.

Can be cast as easily as a wooden minnow or plug, and are more sportsmanlike, as they have but one hook.

Will positively catch more game fish than any other bait.

Will get them in waters that are "fished out."

Have that irresistible wiggle that makes them strike on general principles.

More weedless than the so called "weedless" baits, as the hook rides upright, passing over weeds and other obstructions.

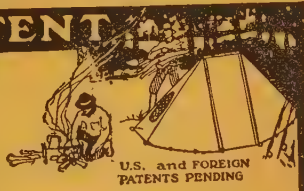
LITTLE EGYPT WIGGLER 75c.

We also put up pork rind strips especially selected from young pigs, which are thin and flexible and cut the proper shape for these baits, at 25c per bottle. Made by

AL. FOSS, 1726 to 1736 Columbus Road, Cleveland, Ohio.

GRACE *convertible* TENT

IN ALL THE WORLD THERE IS NO TENT LIKE THIS!



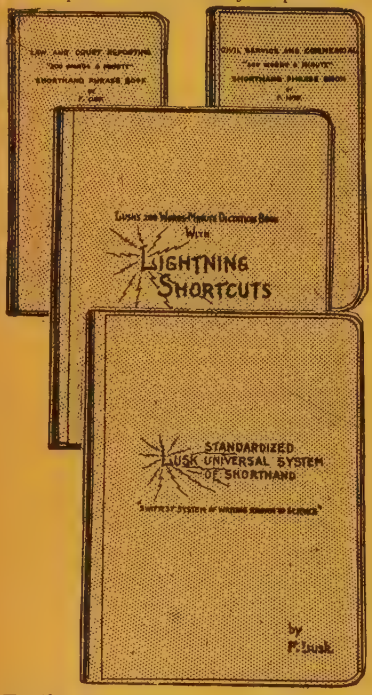
U.S. and FOREIGN PATENTS PENDING

A real tent for winter or summer. Lightest in weight, simple, durable, inexpensive. Invented by Dr. James E. Grace, physician, soldier, sportsman. Made in two sections which button together to form a complete tent. Set up with or without poles. U. S. Government standard material. Each half may be used as a hammock, porch swing, leanto, sunshade, cape, pack sack, sleeping bag, poncho, stretcher and then some. Rain, mildew, snake and insect proof. No guy ropes, no complications. Best tent ever devised for camper, hiker, sportsman, resorter, automobiling, cruising, boy scouts, military and—Oh! what's the use—we couldn't tell it all in this space anyway. Write for circular and get it right. Through dealers or direct.

GRACE TENT CO. 717 Gas Building DETROIT, MICH.

Pitmanic Shorthand

practically the only system, and the standard used for VERBATIM REPORTING throughout the English Speaking World for nearly 80 years; used by reporters in Houses of Parliament, London; House of Representatives and U. S. Senate (Chief of the Senate Reporters receiving $25,000 yearly; highest salary paid any stenographer in the world); used by every Court Reporter in New York City and by all Court Experts in every State in the Union; the high rate of speed necessary for such positions formerly required many years of practice; with the modern Lusk Method, every stenographer now, in a few months, can take even faster than the swiftest speaker can articulate.



NEW 1917 400 Word-a-Minute LUSK SHORTHAND

Pitmanic now Marvelously and Scientifically Improved by the Lusk Standardized Universal. Called "Standardized Universal" because the Standard Pitman alphabet is used, and the expedients and shortcuts are used by 99% of the reporters of the world.

Greatest Improvement made in 40 years in phrasing and arrangement of text-books. Twice as rapid as the Swiftest Pitmanic; four times as rapid as the Swiftest Non-Pitmanic ever devised.

A Lusk writer can record almost any sentence in the English language twice while a writer of the Swiftest Pitmanic is recording it once. Or FOUR TIMES while the Swiftest Non-Pitman writer is recording it ONCE.

Lusk Stenographers can pass any Civil Service examination held, and, owing to their terrific speed, command twice or thrice the salary of ordinary stenographers.

Ordinary Shorthand Systems enable only two or three out of 10,000 stenographers to take over 100 Words-Minute (simple letters). With the Lusk Method, every stenographer can take over 200 Words-Minute on technical matter.

Beginners' Courses

By the arrangement of these wonderful text books, beginners knowing absolutely nothing about shorthand are required to commence the dictation of letters at 100-words-minute in the briefest reporting style, after five lessons. By the marvelous Simplification of Pitmanic Shorthand, only one-third of the time is now required to obtain double the speed.

Post-graduate Courses for Stenographers. Pitman, Graham, Munson and all Pitmanic Writers are trained by the Lusk text-books to take 200 to 300 words-minute; 400 actually possible.

Books for Self-instruction on sale. Mail and personal courses for both beginners and advanced writers of any Standard System.

Stenographers unaware of the great improvement made in Shorthand the past year send for Demonstration and Specimens gratis.

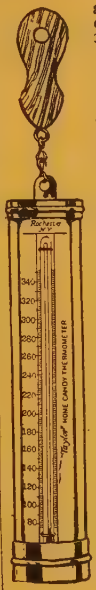
It's Easy to Make Good Candy



at Home, but you must take it off the fire at just the right moment—when it is "done." A

Taylor **Home Candy Maker Thermometer**

will tell you when your candy has cooked enough. It eliminates guesswork in candy making.

A knowledge of definite temperatures in candy making is essential, for sugar in cooking gives different results at various temperatures. The use of a ***Taylor*** Home Candy Thermometer is very necessary. It also adds an element of interest to the operation. Watching the constant changes in the sweet syrupy mass of sugar as the cooking progresses is a fascinating as well as a most profitable study.

Made with adjustable metal clip at back, for fastening to any depth cooking vessel, and with wood handle for removing without danger of burning fingers on metal parts. Copper case, convex silvered scale. Mercury filled magnifying tube. Packed with book of nearly forty recipes for favorite home made candies.

NEWTON ARMS CO., Inc. 506 Mutual Life Bldg., BUFFALO, N. Y.

Make Your Arms Smooth and Beautiful

There is no longer any need for you to blush for your arms when you wear evening gowns—and no need to wear ugly long sleeves to hide their disfigurement. Hair on your face, neck, arms or underarm is not necessary—it does not serve any purpose. Why have your attractiveness spoiled? Remove this superfluous hair quickly and safely by using X. Bazin Depilatory Powder.

Cutting the hair does no good. Ask any man who shaves. He will tell you that the hair grows twice as fast—that it comes in coarse and stiff.

The best and safest way is to use a depilatory that you can depend on—one that has been used for over three-quarters of a century—that is being used by thousands of society women to-day in Paris and New York—X. Bazin Depilatory Powder.

You spread X. Bazin Depilatory Powder on in a thin paste and remove it after a few minutes. Not a trace of hair is left. Your skin will be smooth and soft. X. Bazin Powder will not injure your skin. Use it only twice a month at first. Then gradually less frequently until the hair growth is so slight that X. Bazin is no longer necessary.

Get X. Bazin Depilatory Powder at your drug or department store to-day. If your dealer cannot supply you, send us 50c. for a bottle or, if you will send us $1.00 we will send you free, in addition to an extra large bottle holding 2½ times the quantity of the 50c. size, a spatula and glass mixer, also a large jar of SOZO Cold Cream. All this will be included in the $1.00 purchase. Address

HALL & RUCKEL,

NEW YORK SPORTING GOODS ©

336 PAGES **FREE** POSTAGE PREPAID

The 4th Edition of our Sportsman's Handbook is ready and we want to send a copy to every man or woman who loves the woods, the fields and the inland waters. It is the most complete

Sporting Goods Catalogue

we have ever issued. It not only illustrates and describes hundreds of articles for the Camper, Fisherman, Hunter and Explorer, but tells of experiences in the wilds of the United States, Canada, and Mexico. There are pictures of wild animals and game birds, and advice as to selection of duffle, pitching a tent, caring for firearms, preparing skins for the taxidermist, etc., etc. There are chapters on how, when and where to Camp, Fish and Hunt, and many "kinks" in wildcraft.

We will send this book free if you mention No. 71A.

If you are interested in Outdoor or Indoor games, Baseball, Tennis, Golf, Archery, Swimming, Basketball, Boxing, Skating, etc., let us send you Book No. **69A.**

Your Washing Done For 1c A Week

Make the Water From the Faucet in Your Own Home Do the Work

I have built a new "1900" water power washing machine. I consider this machine the most wonderful washer ever put on the market. Built of the highest quality selected material, it is as sturdy and durable as a machine can be made. Can be sold at a price within reach of all. I will guarantee that this machine will not tear clothes, break buttons or fray the edges of the most delicate fabric. It will wash everything from heavy blankets to the finest laces without damage to the goods.

This new "1900" Washing Machine can be instantly connected with any water faucet in your home, and is started and stopped by simply turning the water on and off. Even although you have a meter, it will do your washing for 1c. or less a week. It will save 50% time, money and labor every week. The outfit consists of washer and water motor, and I guarantee the perfect working of each.

I also make a full line of hand and electric power machines.

I will send my machine on 30 days' free trial. You do not need to pay a penny until you are satisfied this washer will do what I say it will. Write today for illustrated catalog. Address H. L. Barker, 1796 State St., Binghamton, N. Y., or, if you live in Canada, address Canadian "1900" Washer Company, 355 Yonge St., Toronto, Canada.

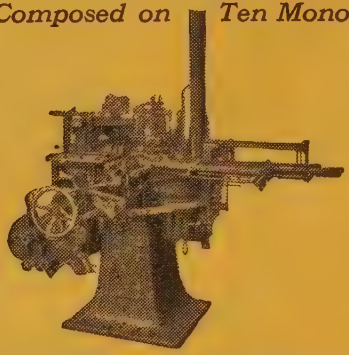
The MONOTYPE

IS THE SECRET OF PERFECT AND ATTRACTIVE ADVERTISING TYPOGRAPHY IN THE *WORLD* COMPOSING ROOM—*85 per cent. of the Advertisements that appear in the WORLD are Composed on Ten Monotypes*



WHAT THE MONOTYPES DO IN THE *WORLD* COMPOSING ROOM

IN ADDITION TO COMPOSING the bulk of the advertisements that appear in the World, the Monotypes cast all the type, leads, rules, slugs, and metal bases for cuts used by the hand men.

ALL LEADS, RULES, AND SLUGS are automatically cut at the machine as cast, in any desired measure from 6 picas to 25 inches.

FURNISH MORE ATTRACTIVE TYPOGRAPHY so that ads have greater "pulling power"—which pleases advertisers and induces them to use more space.

MEET ANY TYPE REQUIREMENT of any advertiser no matter how great this may be: He gets what he wants when he wants it.

INCREASE OUTPUT OF HAND MEN because they lose no time hunting material or picking for sorts: A compositor can't set much type from an empty case.

MAKE IT POSSIBLE to use the compositors on "Constructive" work always. No type, leads, rules, or slugs are distributed.

GIVE A NEW DRESS EVERY DAY for less than the cost of breaking-up forms and getting the type, rules, leads, slugs, and cut bases back in the cases and racks.

SAVE TIME "CLOSING-UP" because the compositor never stops to put away or distribute lines that don't fit the copy.

The Whole World Plays Cards with "Bicycles"

Go where you will, in America or abroad, the favorite of all card players everywhere is

BICYCLE
PLAYING CARDS

There are two very good reasons—quality and price. Bicycle Cards have the excellence of material, printing and finish that leaves nothing to be desired. Bicycle Cards sell at a price that places them within the means of everybody. Ivory or Air-Cushion finish. Club indexes.

Congress Playing Cards—The world's most beautiful cards. Backs in full color from famous paintings. Gold edges. Air-Cushion finish.

Send for this Book—The Official Rules of Card Games. New revised edition. Over 300 games. 250 pages. Substantially bound. 15 cents.

THE U. S. PLAYING CARD CO.

Department W. Cincinnati, U. S. A., or Toronto, Canada

The universal writing machine made to record as well as transcribe.

BYRNE STENO-TYPEWRITING is a system of typewriting that teaches how to take rapid dictation on the typewriter. It is the logical method of note-taking. The superiority of the typewriter over the pencil to record dictation is greater than its superiority over the pen in transcribing it. It takes no longer to learn typewriting and Steno-typewriting by our method than it does typewriting by any other method. Steno-typewriting outlines are printed in plain typewriter type, so full and complete that they are read backward more rapidly than shorthand is read forward. Steno-typewriting relieves mental fatigue in reporting, as does the adding machine in handling long columns of figures. Hundreds of our large schools are teaching Steno-typewriting. Steno-typewriting has a most successful two-year record back of it. Business men give it preference. It's a salary raiser. Write for descriptive circular.

THE GIANT STAPLE PULLING, WIRE STRETCHING, FENCE REPAIR TOOL

What It Will Do—Make staples; pull staples straight from bottom and center wires equally as well as from the top; drive staples straight; cut wire in four places. The wire cutter between the jaws will cut and jaws will hold the wire after cutting, without dropping the loose end. Straightens wire, splices wire, stretches wire (taking up thirty inches of slack wire). Opens boxes, and makes an *ideal tool* to carry on the farm machine or under the wagon seat. *Don't be without it!*

It Will Save wire, staples, buying a hammer, wrench, and a wire stretcher. It will also enable you to mend your fences, thus saving a new fence. Keeping your cattle and crops properly protected will save you trouble and law suits. It will save many trips back to the house to fix your farm implements, and will save you time and labor in a thousand ways.

Our Guarantee—If this tool does not perform its work according to the statements made above, to your satisfaction, we will guarantee to refund the purchase price of this tool.

BUY DIAMONDS DIRECT

From JASON WEILER & SON, Diamond Importers, Boston, Mass.,

and save 20 to 40 per cent. on retail or jewelers' prices

FOR over forty years the house of Jason Weiler & Son of Boston has been one of America's leading diamond importers selling to jewelers. However, a large business is done direct by mail with customers at importing prices! Here are several diamond offers—direct to you by mail—which clearly demonstrate our position to name prices on diamonds that should surely interest any present or prospective diamond purchaser.

¼ Carat, $19.00

This ¼ carat genuine diamond is of great brilliancy and perfectly cut. Mounted in Tiffany style, 14k. solid gold setting. Money refunded if you can duplicate it for less than $30. Our price direct to you by mail.... **$19**

⅜ Carat, $32.00

This ⅜ carat genuine diamond is of great brilliancy and perfectly cut. Mounted in 14k. solid gold Tiffany style setting. Money refunded if your dealer can duplicate it for less than $50.00. Our price **$32**

½ Carat, $43.00

This genuine ½ karat diamond is of fine brilliancy and perfectly cut. Mounted in Tiffany style, 14k. solid gold setting. Money refunded if your dealer can duplicate it for less than $60. Our price direct to you... **$43**

¾ Carat, $65.00

This ¾ carat genuine diamond of great brilliancy and perfectly cut. 14k. solid gold setting. Money refunded if your jeweler can duplicate it for less than $85. Our price..... **$65**

1 Carat, $95.00

This genuine one carat diamond is of fine brilliancy and perfectly cut. Mounted in Tiffany style, 14k. solid gold setting. Money refunded if your dealer can duplicate it for less than $125. Our price direct to you.... **$95**

2 Carats, $189.00

This genuine 2 carat diamond is of fine brilliancy and perfectly cut. Mounted in Tiffany style, 14k. solid gold setting. Money refunded if your jeweler can duplicate it for less than $240. Our price direct to you.. **$189**

1½ Carats, $139.00

This 1½ carat genuine diamond of great brilliancy and perfectly cut. 14k. solid gold Tiffany style setting. Money refunded if your jeweler can duplicate it for less than $200. Our price **$139**

MONEY REFUNDED IF NOT ENTIRELY SATISFIED.

We refer you as to our reliability to any bank or newspaper in Boston.

If desired, rings will be sent on approval to your BANK or any EXPRESS COMPANY with privilege of examination. Our diamond guarantee for full value for all time goes with every purchase.

YOU TAKE NO RISK

THIS RAZOR IS GUARANTEED FOR LIFE

This Shumate "Barber" razor is so good that we dare guarantee it to you for *life*. Here's the reason—the blade is made from Tungsten Alloy Steel, which takes a keener edge than any ordinary steel *can*—and it holds it. You can use it for years without honing. The secret of this wonderful steel is *ours alone*, and we guard it jealously.

Here's our *unqualified guarantee:* Buy a Shumate "Barber" razor and use it—not once, but as long as you like. If you say after an exacting trial that you don't like it, we'll exchange it *without a word.*

Sent postpaid, **$2.00** In remitting, mention your dealer's name, and a chamois lined, rust-proof case will be included with your razor.

State whether you want light, medium or heavy blade. Heavy blade for very strong beards.

Established 1884
Capacity 6,000 razors daily

DEAF?

"I Now Hear Clearly"

You, Too, Can Hear

Inasmuch as 260,000 users of the "ACOUSTICON" have had the same results from it as Mr. Garrett Brown, whose photo appears above, we feel perfectly safe in urging every deaf person, without a penny of expense, solely and entirely at our risk, to accept a thorough trial of the

1917 Acousticon

No Deposit **FREE** No Expense

All you need to do is to write saying that you are deaf and will try the "ACOUSTICON." The trial will not cost you one cent, for we even pay delivery charges.

WARNING!

There is no good reason why every one should not make as liberal a trial offer as we do, so do not send money for any instrument for the deaf until you have tried it.

The "ACOUSTICON" has improvements and patented features which cannot be duplicated, so no matter what you have tried in the past, send for your free trial of the "ACOUSTICON" today and convince yourself—you alone to decide. Address

Drugs Doubtful and Often Harmful
Natural Methods Positive and Permanent

I do not claim that I do the impossible, that I can cure incurable diseases; but I do claim that you have 99% in your favor if you give me a chance to treat you. I have cured many desperate, stubborn cases pronounced incurable by other physicians. The reason why I have been so successful is, I study each sufferer's case personally, diagnosing the malady, and then give the benefit of my thoughful and conscientious advice and treatment. You are not a "case" to me, but a human being suffering and asking for relief. I am a physician; I can understand and sympathize as only a practitioner of large experience knows how to do. I have the interest of suffering humanity deeply at heart. It is far more important to me to have my patients' confidence than their money. With that thought always before me, I will take only as many cases as I can handle personally. I want everyone who comes to me to be "my patient," under my special direction and care. Moreover, I will not take a case unless I can guarantee a cure—or relief in aggravated cases. And when I say "cured," I mean the eradication of the disease, not merely the dulling of the symptoms by drugs.

I Will Not Accept a Case, Regardless of Fee, Unless I Can Conscientiously Promise a Cure or Relief.

If I agree to accept you as my patient, you may know that it is because, having studied your case carefully, I am confident that I can help you—if not with a permanent cure, at least with a permanent improvement. Of this my patients are always sure. I will treat them until they are satisfied.

A WORD ABOUT MY METHOD OF TREATING

I want to lay stress on the fact that I treat all patients personally. All letters are opened by me personally and what my patients say to me in their letters is absolutely sacred. I reply individually to each patient. *My course is not in any sense of the word a simple course in Physical Culture. It is infinitely more. It is a scientific application of Natural Curative Methods of Treatment to the individual needs and requirements of every patient placing himself or herself in my care for professional treatment and attention.*

INVESTIGATE

thoroughly the course of treatment I am giving—the attention my patients receive and the results I am accomplishing before coming to any definite decision. If, after a thorough investigation, you are not convinced of the merits of my treatment and the sincerity of my claims, then I would not advise you to take my course and in fact I would prefer not to have your case. In so far as possible, **I want an unbroken record of PERMANENT CURES and satisfied patients.**

HELP WANTED

$65 to $150 Month

The United States Government wants thousands of Railway Mail Clerks, City Carriers, Postoffice Clerks, Customs, Internal Revenue Clerks, Clerks at Panama Canal and Washington, D. C.

Railway Mail Clerks Have Pleasant Work—Travelling Continually

U. S. Government positions are all Life Positions. Summer vacations with full pay are allowed. Promotion to Big Paid positions is very rapid. The position is not affected by strikes, wars or the whims of some petty boss.

Country residents and city residents stand the same chance for appointment—common education is sufficient. Pull is not required.

Write us to-day for schedules showing dates and places of the coming examinations in your locality. Don't delay. Every day you delay lessens your chance of immediate appointment.

THE HON. JAMES WILSON of Iowa, Secretary of Agriculture in the Cabinets of three Presidents, is President of the National Agricultural Society. THEODORE N. VAIL of New York is Vice-President. G. HOWARD DAVISON is Chairman of the Executive Committee.

THE HON. JAMES WILSON

The National Agricultural Society is **the first national non-partisan and non-political organization** of its kind, affording helpful, profitable co-operation.

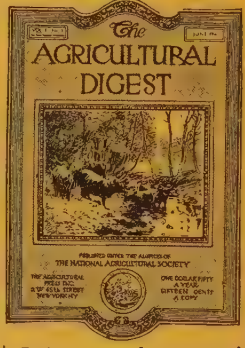
Other forms of business have had the benefit of organization, the farmer's profession has drifted along with only the help of local organizations.

This society aims to help those who help themselves. It will PAY YOU fully and well now.

Among the organizers of the National Agricultural Society were: the late **JAMES J. HILL** of St. Paul, Gov. **HENRY C. STUART** of Virginia, **Senator JAMES W. WADSWORTH** of New York, **N. H. GENTRY** of Missouri, **PETER JANSEN** of Nebraska, **FRANK O. LOWDEN** of Illinois and **A. W. FOSTER** of California.

A guarantee of character and service.

The National Agricultural Society has an advisory board, including deans of agricultural colleges, prominent farmers, Department of Agriculture men and leading editors.



Members profit and learn with the leaders of the best agricultural thought of this country.

JOIN today in this nation-wide movement. The power rests in a representative membership.

Publications valued at more than $2.

It is the great forward movement. The directors are farmers. **You can do your part.** Please cut out the blank below, now, before you forget it.

THE AGRICULTURAL DIGEST unquestionably fills **the greatest existing need in the field of agricultural publishing today. BECAUSE:**

Six hundred agricultural periodicals, agricultural bulletins, and new books are analyzed and summarized monthly.

YOU NEED IT

It is in no wise a competitor or antagonist of any other farm paper, but, instead, **reviews them all** for the common good.

All its name implies—

and more

Publications are received without further charge by members of THE NATIONAL AGRICULTURAL SOCIETY, including **two high-class** papers of a kind that are never sold at reduced prices, or given away. **You** may select **one** other from list sent to members.

***The National Agricultural Society* 6-W West 45th Street, New York**

I herewith enclose $2 for membership in THE NATIONAL AGRICULTURAL SOCIETY, with the understanding that I shall receive **The Agricultural Digest** for one year, and **other publications** issued by the Society, including one other **best farm paper.**

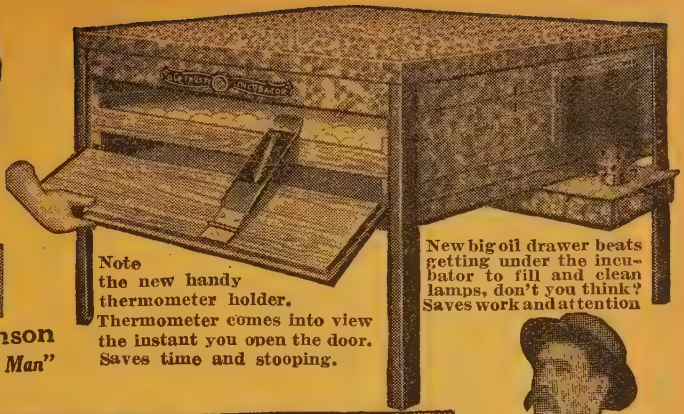
H. H. Johnson
"The Incubator Man"



Note the new handy thermometer holder. Thermometer comes into view the instant you open the door. Saves time and stooping.

New big oil drawer beats getting under the incubator to fill and clean lamps, don't you think? Saves work and attention

New Features in Old Trusty

M. M. Johnson
Inventor of Old Trusty

Make Big Hatches Easier Than Ever

To make Old Trusty a better hatcher would be out of the question. Old Trusty already leads the procession for biggest average hatches year after year, even in coldest weather.

These new features we added simply as conveniences or work savers. The big oil drawer holds five to six quarts. The thermometer is fastened right onto the inside of the door. Saves groping around over the eggs.

Mail Coupon Get Our New Book FREE

Ten years of big profit hatches for Francis A. Kressler of Walnutport, Pa., at about 20 cents each, is just one of thousands of Old Trusty's records. The fact is Old Trusty had hundreds of thousands more owners than any other incubator. About 700,000 to date. Why? Because Old Trusty was invented by a practical engineer and poultry raiser, is built by people who put their entire time to it and who are satisfied with just a 7% profit.

WE PAY THE FREIGHT

Quick shipment from factory at Clay Center, Nebraska, or warehouse at St. Joseph, Missouri, and Seattle, Washington.

Canadian Wheat to Feed the World

160 ACRE FARMS IN WESTERN CANADA FREE

The war's fearful devastation of European crops has caused an unusual demand for grain from the American Continent. The people of the world must be fed and there is an unusual demand for Canadian wheat. Canada's invitation to every industrious American is therefore especially attractive. She wants farmers to make money and happy, prosperous homes for themselves while helping her to raise immense wheat crops.

You can get a Homestead of 160 acres FREE and

Other lands can be bought at remarkably low prices. Think of the money you can make with wheat at its present high prices, where for some time it is liable to continue. During many years Canadian wheat fields have averaged 20 bushels to the acre—many yields as high as 45 bushels to the acre. Wonderful crops also of **Oats, Barley and Flax.**

Mixed farming is fully as profitable an industry as grain raising. The excellent grasses full of nutrition are the only food required either for beef or dairy purposes. Good schools, markets convenient, climate excellent.

Military service is not compulsory in Canada, but there is an extra demand for farm labor to replace the many young men who have volunteered for the war. The Government this year is urging farmers to put extra acreage into grain. Write for literature and particulars as to reduced railway rates to.

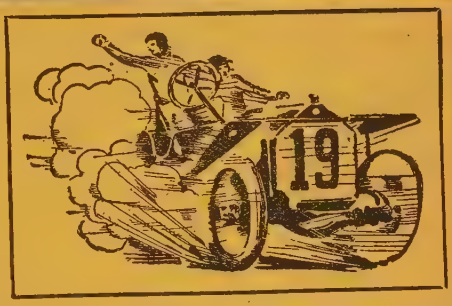
OTTAWA, CANADA

MEN WANTED

To Drive and Repair Automobiles and Tractors

Tear Off and Mail the Coupon Herewith To-day—Right Now.



It may mean to you all the difference between success and failure. Will you, by training yourself in a few short weeks, become a competent, expert automobile man? **Cash in on your time.** How would you like to have an earning capacity of $5 a day and up? How would you like to have a trade that will always insure you good wages, independence, opportunity to see the world? How would you like to be in demand? Have employers looking for you—have big opportunities for a successful career spread out before you? Now, young man, you can't do this simply by wishing. You have to take **action.** This Automobile School has over 3,000 successful graduates.

BY THE SWEENEY SYSTEM YOU CAN LEARN IN 6 WEEKS.

There's only one place in the world to learn by the Sweeney System; and that is at the School of practical experience where you learn without text books and by doing the work with your own hands; and that's the Sweeney Automobile School of Kansas City, Mo. I want every young man mechanically inclined to send to-day for my big catalog. It costs me 50 cents, and is a complete encyclopedia on the subject. It is like a moving picture, as the 223 actual photographs show men at work in every department, at every job. It explains the wonderful Sweeney System. I will send it free, to those who answer this announcement, together with a special advantageous offer. A $50 Tractor Scholarship Free. Use Coupon To-day—NOW.

EARN BIG MONEY IN THE AUTOMOBILE BUSINESS.

The Sweeney School can give you the names and addresses of over 3,000 graduates who are **now** chauffeurs, repair men, factory experts, garage owners, salesmen, etc. These men came to us untrained. They got interested by reading our advertising, just as you are reading now. They acted on the same impulse that moves you now to investigate. And then after a few weeks' instruction they went out of this school completely equipped, got employment, and to-day are **Prosperous, Happy and Respected.** You can do likewise.

SPECIAL FREE COURSES.

FREE $50 course in Tractor Engineering with each enrollment. Special **FREE** course in farm lighting and power plant operation. New Delco Farm Lighting Plant just installed. Our other equipment includes fourteen lathes, gear cutting machinery, drill press, **eight welding plants, vulcanizers,** over **FIFTY** automobiles for experimental, driving and demonstration work. All types of electric starters and generators—full instruction in **EVERY** department for **ONE FEE—NO EXTRAS.**

The United States Government sent some of their army officers to the Sweeney School to learn this business and they are now acting as instructors in the Army Service School. We train you in every detail of the work so that you are ready for **immediate** service in any branch of the business you choose to enter as soon as you leave school.

MY BIG BOOK COSTS ME 50 CENTS, BUT I SEND IT FREE

This book is almost like a visit, as it has 223 illustrations showing men at work in every department. It pictures the wonderful equipment of the Sweeney School. It shows how you are taught, shows the class of men you will associate with, portrays various phases of the automobile industry, explains how, when and where you begin to earn money, in a word is a complete encyclopedia of the subject. Simply send name and address to-day.

What Is Beer?

LAGER BEER was introduced to the American Public nearly three-quarters of a century ago. To-day it is recognized as the NATIONAL BEVERAGE. The annual output of breweries in the United States to-day approximates sixty million barrels. The value of BEER as a TEMPERANCE DRINK is recognized throughout the world.

BEER, as a TEMPERANCE DRINK, has steadily increased in popularity in the United States until to-day it is recognized as the NATIONAL BEVERAGE.

Millions of Beer drinkers in this country consume annually nearly sixty million barrels of beer. There is no so-called "soft" drink manufactured that has ever proved a satisfactory substitute for AMERICAN LAGER BEER.

Switzerland, in order to encourage BREWING and promote SOBRIETY, does NOT TAX BEER.

Denmark and Norway pursue a similar policy, in that BEER with a low percentage of alcohol is TAX FREE.

The French Government classes BEER with WINE and CIDER as "boissons hygieniques," which means hygienic beverages.

In Sweden, where the Gothenburg System restricts the use of strong alcoholic drink, BEER does NOT come within the restriction.

BEER is the CLEANEST and most WHOLESOME of BEVERAGES. Cleanliness is absolutely necessary in its manufacture. The slightest carelessness in this regard is fatal to the success of the BREW. Can this be said of all other foods and beverages?

To the exhausted workman, the overworked housewife, the tired business man, the man or woman of impoverished blood, and to all those who are compelled to call on their bodies for unusual effort, BEER is a MILD STIMULANT and TONIC that HELPS WITHOUT causing any HARMFUL reaction. The experience of centuries has proved this.

New York State Brewers' Association

SPECIAL! *To Readers of the ALMANAC*

We are proud to present to the readers and friends of The World Almanac our special offer made in the following advertisement. That our liberal offer is in good faith and will be carried out to the letter, is beyond question. We are one of the oldest and most favorably known jewelry concerns, and with our Easy Payment Plan, have helped thousands of worthy people in all parts of the country. You should write for this Catalog and tell your friends to do so.

Thin Model Sent on Approval

17-Jewel ELGIN

SPECIAL $12.50

30-DAY OFFER

Now, during this Special Sale, is the time to save a third on this high-grade 17-Jewel Genuine Elgin. Thoroughly factory tested, fully guaranteed, engraved or plain polished case with your own monogram. This watch will keep most accurate time and with ordinary care will last a life-time. Our new Catalog for 1916 and 1917 shows every new style watch made. It shows all the different style cases—the new Hexagon and Octagon. It gives you the lowest Rock-bottom prices on 19, 21 and 23-Jewel Railroad Watches—lower than any retail store can afford to sell them—and our proposition is to send any watch you select from our new catalog, subject to your own inspection and approval—

NO MONEY DOWN EASY MONTHLY PAYMENTS

We do this to prove to you that the great volume of our business in all parts of the country enables us to do better by you than any other watch or diamond house in the world—that our prices are lower and our terms easier, for you can open an account with us for **only $1 a Month!**

And we don't want you to send us one cent—not a penny—until you have first received and inspected the goods for yourself—merely give us your name and address on a postal card that we may send you our Big New

—everything is sent subject to your approval. We ask no security—no interest—no red tape—just common everyday honesty among men. We want you to write us and learn our most liberal plan of Easy Payments. You'll find that we are just the house you have been looking for. Do this now before you forget it. Send us your name and address today.

HARRIS-GOAR CO. Dept. 2077, KANSAS CITY, MO.

The House That Sells More Elgin Watches Than Any Other Firm in the World

FOR MOTHER'S COMFORT

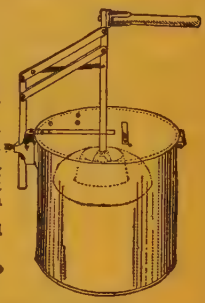
How long will you persist in injuring your health and depreciating your personal appearance? How much longer can you endure the pains of backaches and exhaustion from the drudgery of rub board washing? Don't you owe it to yourself and your family to remove the cause which impairs your health? If you are sincere in this desire, then write for free literature regarding the **Easy Vacuum Washers,** hand and power. This clothes washer differs radically from all others. It does not roll and tie the clothes up, nor grind or jerk them to shreds. It operates on the same principle as a vacuum cleaner, by sucking and forcing the water through the clothes by means of air compression and vacuum suction.

Picture to the left shows the "EASY" Model "B," adapted for the regular weekly washing. Picture to right shows the "Tiny Maid," a small washer especially designed for cleaning **BABY CLOTHES** and all small garments necessary to be washed between regular wash days.

Being all metal, it is adapted to use on kitchen range or gas plate for scalding, cleaning and **REMOVING STAINS IN BABIES' CLOTHES** and all fine washing requiring special care. It insures the most sanitary washing of babies' clothes with least possible handling.

Ideal for **DRY CLEANING** in a small quantity of gasoline.

Special proposition to Mothers who mention 1917 "World Almanac."



DODGE & ZUILL, 5093 EAST WATER STREET, SYRACUSE, N. Y.

FAT IS FATAL

Fat is Fatal to Health, Comfort, Happiness and often Fatal to Life.

Fat people need no longer despair, for there is a simple home remedy to be had that safely reduces excess fat from any part of the body. It is called the ADIPO Treatment and to prove that it does the work in a pleasant and perfectly harmless way, we will send a

50c. BOX FREE

to any person who is too fat and sends us their name and address. We want to prove that ADIPO takes off fat by restoring the normal functions of the system—without dieting, exercising or discomfort. Remember, we offer to prove this to you at our own expense. Other diseases, like Rheumatism, Asthma, Kidney or Heart troubles, that so often come with Obesity improve as you reduce.

WHAT OTHERS SAY ABOUT IT.

Miss Laura A. Fouch, McConnellsville, Ohio. says; Your ADIPO treatment took off 84 pounds 8 years ago and the reduction has been permanent.

Miss Effie Click, 1306 **Johnson St., Keokuk, Iowa, says;** ADIPO made a new woman of me. It took off 70 pounds 2 years ago and I have not regained a single pound.

Mr. John McGowan, Memramcook, N. B., Canada. says: I believe I would be in my grave to-day but for ADIPO treatment. It reduced me 105 pounds and now feel fine

What ADIPO has done for these people and hundreds of other men and women all over the country it should also do for you. At any rate it costs you nothing to try it. This offer may not be repeated, so write at once for a FREE 50c. Box of ADIPO and interesting illustrated book; they are both free.

Address THE ADIPO COMPANY, 3187 Ashland Building, New York, N. Y.

Liquor Taxes Increase Despite Spread of Prohibition

The preliminary report of the Commissioner of Internal Revenue for the fiscal year 1916 shows an increase of nearly $25,000,000 over the year 1915 in the taxes derived from distilled and fermented liquors.

When the report of the Commissioner for the fiscal year 1915 showed a falling off in the receipts from taxes on alcoholic beverages, that fact was seized upon by the prohibitionists as proof that prohibition does prohibit. Although state-wide prohibition laws went into effect on January 1st, 1916, in the States of Arkansas, Colorado, Idaho, Iowa, South Carolina and Washington, with a total population of 9,000,000, there has been a great increase in the taxes paid on distilled and fermented liquors. If the prohibition laws were the cause of the decline in the receipts from liquor taxes in 1915, was the addition of 9,000,000 population to prohibitory territory the cause of the increase in these taxes in 1916?

The prohibitionists reply that the increased consumption of liquors was due to the greater prosperity of the country during the past fiscal year. This is doubtless true, and it is equally true that the decrease in liquor taxes for the previous year was due to the business and industrial depression of 1914-1915, and not to the enactment of prohibition laws.

The increased consumption of liquors, despite the adoption by many states of prohibitory laws, shows that there is no popular demand for such legislation, and that these laws are not enforced. The net result of prohibition legislation is to substitute an illicit traffic in liquors for their regulated and restricted manufacture and sale, thus creating a contempt for law in general, by the enactment of legislation known to be incapable of enforcement, and never intended to be enforced.

From 14 cents an hour to Railroad Official

AT eighteen Frank R. Judd was a machinist's helper, earning 14 cents an hour. One day he marked the coupon of an American School advertisement. Before he had finished his course he was holding a good position in the engineering department of the Illinois Central Railroad. "Because I had the proper training," says Mr. Judd, "other advances were rapid." Today he is Engineer of Buildings for the entire 6000-mile system. **He has made his mark.**

Make Your Mark

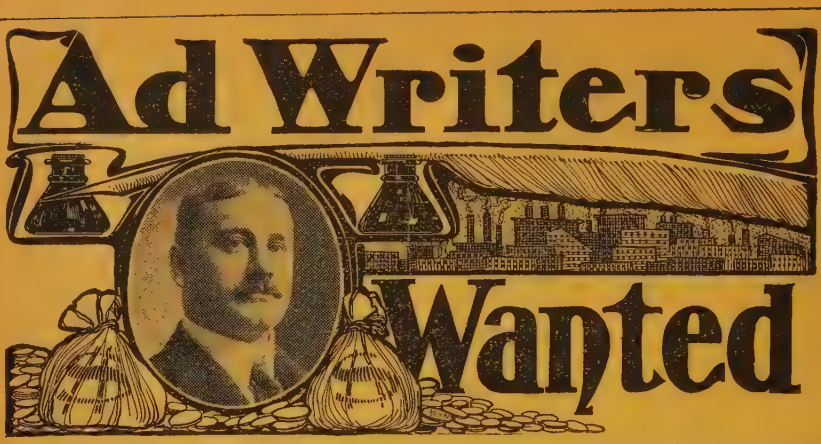
Name.....

Address.....



Demand for my graduates three times greater than in any previous year. In new Art Prospectus for free mailing, America's leading authorities give valuable advice to brainy young men and women about entering the advertising field, where large salaries and partnerships await those who secure expert training.

NEVER in advertising history has there been so large a demand for expert ad writers. Not a demand for theoretical dabblers, the product of "lecture courses," but ad men and women who have trained imagination that interests millions of periodical readers and leads to sales.

The phenomenal increase of manufacturing industries and retail stores from coast to coast is more rapid than the increase of competent advertisers to manage their publicity departments. Brainy people, with at least a common-school education, and who are attracted to advertising as a permanent vocation, should send for my beautiful Prospectus laying bare the situation and telling how to qualify by home study in spare time.

Mr. James F. McHale, Darien, Conn., on Aug. 7, 1916, wrote: "In recognition of the invaluable, practical aid of the Powell System in properly preparing me for admittance into the great field of advertising, I cannot refrain from expressing my sincere appreciation and extending my heartiest congratulations for your genius in originating and conducting such a practical, efficient Course of Instruction. Although I have not quite finished with you, yet I have secured a position with the Phelan Ad-Sales Service—*on the merits of my lesson work.*"

The Powell System is practical ad-writing experience, and has for years had the exclusive endorsement of leading experts and publishers. Hundreds of students, like Mr. McHale, have found advertising positions before completing their study on the merits of their lesson work—the most convincing proof of worth that can be given. Send to-day for my free 64-page Prospectus.

Dr. W. A. Mackenzie, Secy. and Adv. Mgr., Lake County Land Owners' Assn., Fruitland Park, Fla.

DECLINED $10,000 A YEAR

Dr. Mackenzie's three-page endorsement will be found in the new Art Prospectus. These two extracts will make you want to read his complete story: "When I enlisted as your student, it was the red-letter day of my existence. I finally declined $10,000 a year to accept a $250,000 partnership." Also: "When a young man to-day tells me there are no opportunities for success, I pity him. Any man with some education who will learn to apply himself and master the Powell System, I believe will make an unqualified success in the advertising business."

George H. Powell, 60 Temple Court, N. Y.

Poverty to $10,000.00 A Year

Coal Miner at $1.00 a Day

Adv. Manager at $10,000 a Year

(A True Story)

Ten years ago a young man with little education was working in a coal mine at a dollar a day. Now he is an advertising manager at $10,000 a year. What did it? The same thorough, practical training that we offer in our new Home-Study Course of

Advertising and Salesmanship

This course will clip off ten years' hard experience. It was organized by ten leading advertising and sales managers in conjunction with Bryant & Stratton Business Colleges, established in Chicago sixty years ago. These men realized the need of a practical, thorough training for young men and women who aspired to become advertising and sales managers. They organized this course to supply this need and are personally conducting it in our class rooms. Each of these ten instructors is a practical advertising or sales manager with years of experience. There is not a "professional" teacher among them. Their aggregate salaries exceed $100,000 a year. You'll get by mail the same instruction under the same instructors as our resident students receive.

Are You Prepared to Take This Course?

The mastery of advertising is not a thing of mystery or difficult of attainment. Nevertheless, some men are by nature better fitted for one thing than another. The men who formed this course want you to be sure, before you enroll, that you have the natural ability to carry your study to a successful end. This saves waste motion on the part of the big men behind the course and saves those not qualified money and embarrassment.

FREE Personal Analysis

To help you determine whether or not you are qualified to succeed in advertising or salesmanship, we have arranged with a well known vocational director to personally analyze you free of charge before enrollment. This valuable service will give you an unbiased estimate of your qualifications.

New Method of Instruction

This course is nine-tenths practice and one-tenth theory. You engage in actual advertising work as soon as you enroll. No useless technical work to do. Every lesson carries the "human touch" that makes you anxious for the next one. You will be trained to write copy for advertisements, booklets, mailing cards, folders and magazine articles; analyze markets; plan complete advertising and sales campaigns; edit house organs; conduct a mail order business; carry on mail order advertising service for druggists, haberdashers, furniture dealers, grocers, etc.; and to write strong, convincing "human-interest" sales letters under the direction of one of the greatest writers of this type of letters in America. In short, entrance in this course will be like going to work as an assistant to a master sales or advertising manager in a big business corporation.

SEND COUPON

For complete personal analysis chart and free book, "From Poverty to $10,000 a Year." **Write now.**

1917 World Almanac

Gentlemen: Send free book, "From Poverty to $10,000 a Year," personal analysis examination blank, and full information of Special Opportunity Offer on your course in Advertising and Salesmanship.

FREE TRIAL TREATMENT

Sent by mail, postpaid, to any sufferer.

Write to

DR. F. G. KINSMAN

8 Bank Building Augusta, Maine

Gained 32 Pounds
And Splendid Figure

Every woman can have an attractive figure, full round bust and shapely limbs. Dr. Whitney's secret has done it for thousands of others and will do it for you.

Mrs. B. W. Abbott, formerly of Boston, now of 472 Eighth Avenue, New York City, writes us: "I was very thin when I learned of your treatment four years ago. By following your course I gained 32 pounds and still keep the weight. I am the picture of health, with rosy cheeks, just as when I was a girl."

The beauty of this treatment is that you can have a free, liberal trial sent in a plain wrapper and test it yourself in the privacy of your own home. The trial treatment alone in many cases has added five pounds. You will realize that a new day has dawned for thin people, and that no one need go through life humiliated by a thin, unattractive figure or colorless complexion.

"I was one of the most disheartened women that ever lived before taking Dr. Whitney's Nerve and Flesh Builder, being 5 feet 6 inches tall, and weighing only 108 pounds. Now I weigh nearly 160 pounds." writes Mrs. Newton of Kansas. Mrs. Nicely, of West Virginia, says: "I gained 45 pounds, bust enlarged 6 inches. It did more than you said it would."

We would gladly send you the trial and book of indorsements from intelligent people everywhere. The trial will prove that you may have as attractive a figure as any one, filling out the hollow places, gain plump, perfect arms, neck and limbs and by special treatment No. 8 increase the bust measurement from 4 to 8 inches.

If you will drop a line right away to C. L. Jones Co., 50 Friend Bldg, Elmira, N. Y., enclosing ten cents to help pay packing and postage, by return mail you will receive a full five days' treatment, giving the proof that real color and better health and figure can be yours.

Please say whether you want No. 1 for increasing flesh all over the body, for both men and women, or No. 8 to develop the bust alone, as only one can be sent.

Send for a copy of our

POCKET CATALOG NO. E 28

of standard electrical supplies. Contains 248 pages and over 1,000 illustrations.

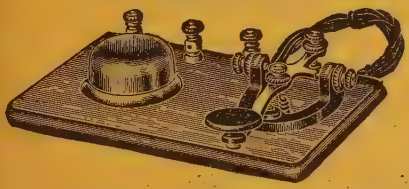
FREE

MESCOLITE

The simplest battery lantern made. It consists of a japanned metal container with cover, fibre disc with phosphor bronze battery contacts, polished metal reflector, miniature battery lamp, clear glass lens, lens cap or rim with three bayonet catches, a non-detachable bail or handle and a Red Seal Dry Battery.

No. 5343, Complete with Red Seal Dry Battery, which will give about 40 hours of intermittent service .$1.50

WIRELESS PRACTICE SET



The Practice Set comprises a regular telegraph key, without circuit breaker; a special high pitch buzzer; one cell Red Seal Dry Battery; and four feet of green silk covered flexible cord.

The main object of the set is to enable the beginner to master the wireless code, and the buzzer reproduces the sound of the signals of the most modern wireless stations perfectly.

Every beginner needs one of these sets, and as it is the equivalent of five different sets, the price is very low.

List No.		Price
342	Wireless Practice Set, with Battery and Cord	$2.07

Our New 180-Page Wireless Manual E 9

will be sent you on receipt of 10 cents. This copyrighted manual contains 45 pages devoted to diagrams, many of them published exclusively by us, as well as clear instructions for erecting, maintaining and operating wireless stations. The balance of the manual illustrates and describes the various instruments used therein, with the cost at which they can be bought.

USE THEM FOR SAFETY'S SAKE

First Aid Book—10c

What to Do in Any Emergency

We issue this book for half what it cost us to foster efficient first aid.

It was written by a famous surgeon, now a Major in charge of U. S. Army Field Hospital. It tells what to do in any form of accident or emergency—

In shocks and sickness—
In burns and bruises—
In wounds and sprains—
Hemorrhage or fainting—
Drowning or electric shock—
Any sort of poisoning.

The book contains 128 pages and over 100 illustrations. It is a complete and authentic reprint of our book that sells for 50 cents. Every home at some time has urgent need for it, when a life may be at stake.

We ask 10 cents merely as evidence of serious intent. The book costs us much more.

Be Double-Sure

This is part of our effort to prevent careless wound-dressing. And to help you fight germ infections.

Another part is to make dressings that are sterile. And enable you to keep them sterile. We are at war with half-way measures. We urge you to be double-sure.

What You Need

What you need in the house—all the time—is B&B Absorbent Cotton, B&B Bandages and Gauze, B&B Adhesive Plaster.

You need the B&B brano for the following reasons:

B&B Cotton goes through 22 processes. Our Cotton and Gauze are twice sterilized, once after being sealed.

B&B Arro Brand Cotton and Handy-Fold Gauze are both put up in germ-proof envelopes—enough for one use in each. They keep their sterility for years.

Both are also put up in handy packages. No need to remove the roll. Cut off what you need and leave the rest untouched.

B&B Adhesive

B&B Adhesive Plaster is rubber coated. It is prepared especially for surgeon's use. But it sticks to anything without heating or wetting. And it stays stuck. Every home has a hundred uses for mending rubber, glass and wood.

Our First Aid Book tells how these things are used. Also hundreds of other things—knowledge you should keep on file. We will mail it for ten cents. Address First Aid Dept. 81.

Always call the Doctor—remember First Aid is only first aid.

BAUER & BLACK, Chicago and New York
Makers of Surgical Dressings

LEARN DRESSMAKING AT HOME

Exact Cost to Make
2 yds. 40-in. silk at 85c, $1.70
½ yd. plain silk 10
1 spool silk .05
1 yd. elastic .05
Total Cost, $1.90
Retail Value, $5

SAVE ⅔ on ALL Your Other Clothes

For instance, a $35 suit for only $15, a $20 gown for only $6, a $5 simple dress for only $1 or $2, a $5 silk blouse in the style shown here or any other style for $1.90. You can be the best dressed woman in your town. Make your children's clothes for only a fraction of what you have always paid. Without any expense to you, you can learn through our wonderful, new, easy-to-learn Home-Study Dressmaking Course how to make every kind of garment. You can have clothes that are more becoming because designed especially for you and made to your exact measurement; prettier, more stylish and better quality clothes than you ever have worn before—two or three dresses for the usual cost of one. Send today for our remarkable new offer.

New, Easy Method

Our new method is entirely different from anything you ever have seen or heard of—positively so simple and clear that anyone can learn quickly. Hundreds of pictures show and explain every step. A few minutes a day is all the time required to become an expert dressmaker with our help. Every student receives personal, individual instruction. The very first lessons show you how to make many pretty garments that you need and in just a few weeks you can make and have *all* those pretty dresses, waists and lingerie garments that you have wanted but could not afford to buy or have made.

Just think of being able to make three dresses or other garments for what one costs you now and have them prettier and more stylish than any clothes you ever had. That is exactly what hundreds of our students are doing—what YOU can do.

Go in Business for Yourself—Earn $25 to $40 Weekly

This Course will prepare you for success in the Dressmaking profession. Good dressmakers have more work than they can do. Let your daughter learn this profitable profession.

We also have a wonderfully simple, practical and complete Home-Study Course in Millinery. You can save big money by making your own hats or go into business for yourself as a milliner.

SPECIAL OFFER NOW

Don't miss this great opportunity. Send the coupon for full particulars of our special low-price, easy-payment offer to those enrolling now. We will also send you, free, a handsome book which tells all about our fascinating new, easy-to-learn method and how you can dress better at less cost or prepare for a profitable profession. Send this coupon or a postal now.

You Can Do What These Women Have Done

I have learned more in the nine weeks I have taken up your study than in the whole course I took at a resident school.
Mrs. Hulda G. Reuter
Brooklyn, N. Y.

I consider this course the best thing that could come into the life of any woman or girl, single or married, in a domestic way.
Mrs. G. L. Owings

The Truth About Poultry

Get the Facts by Reading

The One-Man Poultry Plant

The Book That Gives

Successful Methods of Men on Farms or Small Acreage. Complete in twelve parts, printed in one volume.

By DR. N. W. SANBORN

REAL work, with real poultry, on a real New England farm. This is a simple story of what has been done by a man, at forty-five years of age, town bred and city educated, getting out of practice of medicine, buying a small farm in the hill country, and making a success of the venture. Not only is the rearing of chicks and the management of adult fowl completely covered, but the interesting side issues of fruit growing, grain raising and the production of milk, that cannot be escaped on a real farm. You get rugged facts—rarely found in print. The truth about poultry as found in actual life on a one-man poultry farm.

You Can Do the Same, Book Tells How

THE BOARD OF EDUCATION,
Oklahoma City, Okla., Nov. 9, 1915.

Mr. Clarence C. DePuy,
Syracuse, N. Y.

My Dear Sir:

The copy of *One-Man Poultry Plant*, by Dr. N. W. Sanborn, came to me promptly, and I have spent several pleasant evenings reading and rereading its sensible, timely suggestions. I find time to care for a profitable flock of 250 as a side line to a very busy life. I have read many works recently along the line of this book, but I have found nothing else so inspiring to a love of the real work of poultry keeping as is this little pamphlet, and thank you for directing my attention to it.

Very cordially yours,
G. V. Buchanan.

Our paper is handsomely illustrated practical, progressive and up-to-date on poultry matters. Established 1892. 44 to 132 pages monthly. 50 cents a year. 3 months' trial 10 cents. Sample copy free. Catalogue of poultry literature free.

Our Special Offer

The One-man Poultry Plant, in twelve parts (book form), and the American Poultry Advocate, one year, for only 50 cts.; book and Advocate, three years, for only $1.00, if order is sent at once.

LEARN AUTOS
Where Autos are Made

Detroit is a city of motors. Eighty-five per cent of the motor cars in the United States are said to be made here. Here are located 40 or more auto factories, hundreds of parts makers. Detroit ***makes*** automobiles, ***sees*** automobiles, ***thinks*** automobiles day and night. Detroit is the ***place*** to learn the auto industry, and the Detroit Y. M. C. A. Auto School is the ***school*** at which to learn it.

Backed by Automobile Factories

The automobile men of Detroit endorse our work without hesitation. The Studebaker, Buick, Hupp, Ford, Packard, Gray Motor, Disco, Zenith, Chalmers, and many others have contributed to our equipment their latest models and designs. Can you ask stronger proof of a school's standing than the fact that the ***men who know*** give freely their time and money to co-operate with it and aid in its growth.

Not Operated for Profit

The Y. M. C. A. Auto School is not run for profit. Our purpose is to give our students the training necessary to get and hold good paying positions in the rapidly growing automobile industry. Tuition goes to procuring the highest class of instructors and the best of equipment. The automobile business is crying for trained men—testers, chauffeurs, inspectors, salesmen, assemblers, repair men, bearing scrapers, motor mechanics of every description. Factories, dealers and garages join in the call. We fit you for these positions. Will you take advantage of this opportunity?

Tuition Includes Membership in the "Y"

Tuition at the Y. M. C. A. Auto School is low—and **includes a year's membership in the "Y."** Our big Club House is at your disposal during time off. Reading rooms, lounging rooms, gymnasium, swimming pool, billiard and pool tables, bowling alleys, with five floors of dormitories and restaurant at low rates. You are assured of not only thorough and competent instruction but good companionship and clean living conditions with the comforts of home and club life combined.

Don't Visit Detroit Without Seeing Us

You want to consieder everything carefully before you enroll for any course of instruction. Come and look us over, whatever purpose brings you to Detroit. Get all the particulars of this school, get the records of our instructors, hear what auto factories and automobile men have to say about us, see for yourself our comfortable quarters and big equipment. We will be glad to see you and show you around whether you enroll or not. Day and night classes. Start at any time. The average time required is 5 weeks for day course, and 12 weeks for night course.

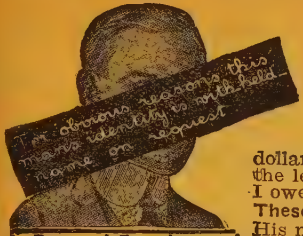
How I Jumped from $1,500 to $50,000 Yearly

"'Power of Will' Was My Guide"



"Three years ago I was making $1,500 a year and working day and night. Today I make a thousand dollars a week and have time for other things as well. To the lessons in 'Power of Will' more than any other thing do I owe this sudden rise."

These are the exact words of an owner of 'Power of Will.' His name is not published, for obvious reasons, but will be gladly given in confidence on request.

As remarkable as is his experience it might almost be called typical of what this wonderful course in Will Training is doing for thousands of men and women in every walk of life who are using "Power of Will" as the stepping stone to greater accomplishment.

The Will is the motive power of the brain. Without a highly trained inflexible will, a man has about as much chance of obtaining success in life as a railway engine has of crossing the continent without steam. The biggest ideas have no value without Power "to put them over." Yet the Will, hitherto entirely neglected, can be trained into wonderful power like the brain or memory and by the very same method, by intelligent exercise and use.

If you have your arm in a sling for two years, it would become powerless to lift a feather, from lack of use. The same is true of the will—it becomes useless from lack of practice. Because we don't use our wills—because we continually bow to circumstance, we become unable to assert ourselves. What our wills need is practice.

"Power of Will"

by Frank Channing Haddock, Ph. D., a scientist whose name ranks with such leaders of thought as James, Bergson and Royce, is the first thorough course in Will Power ever conceived. It is the result of over 20 years of research and study. Yet you will find every page in the 28 lessons written so simply that any one can understand them and put the principles, methods and rules into practice at once with noticeable results right from the very start.

Meant For YOU

There are over 100,000 people in all walks of life who own "Power of Will." Among them are such master men as Judge Ben B. Lindsey; Supreme Court Justice Parker; Wu Ting Fang, ex-U. S. Chinese Ambassador; Lieut.-Gov. McKelvie of Nebraska; Assistant Postmaster-General Britt; General Manager Christeson, of Wells-Fargo Express Company; E. St. Elmo Lewis, now Vice-Pres. Art Metal Construction Company; Gov. Ferris of Michigan, and many others of equal prominence.

SEND NO MONEY

Although "Power of Will" is a 400-page leather bound book, containing more material than many $25 correspondence courses, the price is only $3. The publishers will gladly send a copy free for five days' inspection. Send no money now, merely mail the coupon on the right, enclosing your business card or giving a reference. If you decide to keep the book, send the money. If not, mail the book back. Tear out and fill in the coupon now, before you turn the page.

Personal Experiences

800% Increase in 1 Year

"I recommended 'Power of Will,' to a young man and his salary has increased 800% within a year."—W. M. Taylor, Efficiency Expert, Willys-Overland Co.

$1,500 to $50,000 Yearly

"Three years ago I was making $1,500 a year and working day and night. Today I make $1,000 a week and have time for other things as well. To the lessons in the book 'Power of Will' do I owe this sudden rise."—(Name on request.)

Worth $3,000 to $30,000

"From what I have already seen I believe I can get $3,000 to $30,000 worth of good out of it."—C. D. Van Vechten, Gen. Agent North Western Life Ins. Co., Cedar Rapids, Ia.

From $40 to $90 Weekly

"Due to suggestions received from this book, I have increased my financial returns from $40 a week to $90 a week."—H. D. Ferguson, New Imperial Batte House, Hot Springs, Ark.

$897 Profit First Week

"Power of Will' is a compilation of mighty forces. My first week's benefit in dollars is $900—cost $3; profit $897."—(Figure what this yearly profit would be.)—J. W. Heistand, 916 Tribune Bldg., Chicago, Ill.

50% Salary Raise

"First few pages enables me to get 50% raise in salary."—Robert B. Laird, Douglas, Wyo.

Another 50% Increase

"I firmly believe that it—and it alone—has enabled me to increase my salary more than 50% in that time."—L. C. Hudgens, Principal Mayhew Consolidated Schools, Boswell, Okla.

DO YOU HANDLE FIGURES in your business? If you do you need this common sense treatment of mathematics. It makes algebra and the higher mathematics as simple as arithmetic.

MATHEMATICS FOR THE PRACTICAL MAN

By GEORGE HOWE

143 Pages. 5x7½ Inches. 42 Diagrams. Price $1.25.

This book assumes no mathematical knowledge beyond arithmetic on your part. With this knowledge of plain arithmetic as a basis, the author "begins at the beginning," and takes you, step by step, in a simple and easily understood way, to a full knowledge of the priciples and operations of higher mathematics. There are 206 problems for you to experiment with and then you can verify your results with the answers printed in the back of the book. The book is worth more than $1.25, if it shows you how to solve your problems accurately.

$40 Heats 12 Rooms

Coal Bills Cut ½ to ⅔—Guaranteed With the Underfeed

With one of the severest winters experienced in this section, I kept our house 72 to 75 degrees throughout the season commencing October 10, and my coal bill will not exceed $40 heating twelve rooms—house exposed on all sides. This being the fourth season, what better recommendation would one want?
Yours for the Underfeed,
(Signed) Henry Beuret.
446 E. Dewald St., Fort Wayne, Ind.

If you are going to burn coal this winter, by all means read carefully the letter shown at the left. Then get this great fact: you can have *your* coal bills cut ½ to ⅔—GUARANTEED with the UNDERFEED.

On top of that great saving, we further guarantee that your house will be kept warm and cozy all winter long—that you will have an easier time tending furnace—and that you will have more *healthful* heat.

The UNDERFEED saves you money by keeping it in your pocket. Burns the cheaper grades of coal as effectively as others burn the costlier grades.

Every atom of heat is utilized. Coal is fed from below. The hot, clean fire on top is always against the effective radiating surfaces. Fire is never smothered by having new coal "dumped" on—never chilled by the opening of top-feed doors.

And a boy can run it. No stooping. No hard work. Ashes fine, clean and white, and need emptying at the most but twice a week.

WILLIAMSON NEW FEED UNDERFEED Furnaces and Boilers — CUT COAL BILLS ½ to ⅔

Interesting Book Free

Explains the scientific UNDERFEED principle. Pictures and fully describes it all. Send the coupon for it now whether you heat with warm air, hot water, steam or vapor. It will save you many a coal dollar—GUARANTEED with the UNDERFEED.

Heating Contractors: Let us tell you about the Williamson UNDERFEED and our new proposition. Both are winners.

12 EAST 42d STREET

NEW YORK CITY

Mrs. Wise-
Housekeeper-
Everywhere

Dear Friend:-

Do you know why the New York World building - from cellar to its beautiful dome - is always so spick and span and free from bad odors? Well, it is because more than fifteen years ago they adopted the use of CN in every pail of scrub water throughout the building - especially in the toilets and cuspidors. And by the way - in all their toilet rooms, they have the Beau Brummell soap and the handsome tilt dispensers.

It is so refreshing to go into a building so well equipped, and many others have copied this plan of operation in this and other big Cities. All wise housekeepers too, use CN in the house and are never without it! With best wishes

Yours for health,
West Disinfecting Company

$75 to $300 A Month

In The Tractor and Automobile Business

the greatest business of all time. Here's the school that has trained thousands of ambitious men to fill big paying positions or go into business for themselves. My Original Method of Practical Automobile Training and Experience is recognized as the standard everywhere. It insures lasting success and **you can't get it elsewhere.** This is the only school authorized to teach it. Covers all branches completely and thoroughly. Remember, only real practical training and shop experience will fit you to earn big money and **that's the only training I give my students.** All kinds of good positions and money-making opportunities.

More Floor Space! More Equipment! More Successful Graduates!

I take men without previous experience and hand them a kit of tools—that's my only text book. I take you through the work in easy stages, step by step, so that you get it all right at your finger tips by **actually doing the work.** My training includes all — Ignition Systems; Self Starting; Battery and Magneto work; Forge and Lathe work; General Machine Shop Practice and experience; Babbitting; Oxy-Acetylene Welding; Brazing; Piston Ring and Cylinder work; Tire Vulcanizing and Repairing; Motor Testing; Tool Making; Traction Engineering; Stationary and Gas Engineering, Home Lighting System and Installation, Etc. Come and see the largest and most completely equipped auto training school in the world. **Three Big Buildings and Tractor Farm** —all devoted to my original method of Practical Automobile Training and Experience. **Oxy-Acetylene Welding Course Free.** I was the first to teach welding. No extra charge for this valuable training.

No Books or Printed Charts Used—No Tools to Buy.

FREE! $50 Scholarship FREE!

In order to give a number of my students a complete course in **Tractor Engineering, Power Farming, Gas and Stationary Engineering, Home Lighting Systems, etc.,** I have a limited number of **FREE Scholarships** available right now. If you act promptly—one of these scholarships is yours. Here's extra training **without cost** that means big money to you. **Write me at once.**

Send for Big FREE Catalog full of fine Copper Engravings showing men at work in big machine and repair shops —making real repairs on cars of every type, Twin-Six Motor—block mounted, Big Eight Cylinder cars for my students, Tractor Farm, Etc.

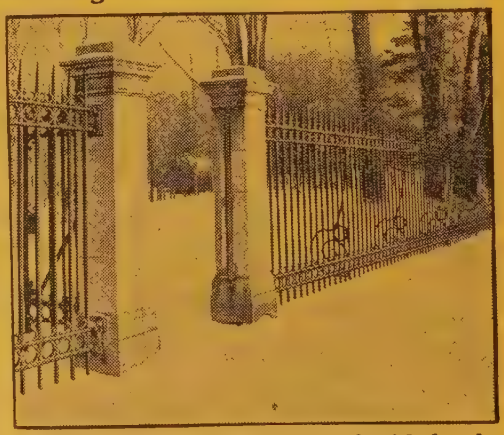
We contract for design and erection complete when desired, and will co-operate with the Architect, owner, etc., in executing unusual specifications.

Enclosures—Runs

We also make a specialty of Tennis Court Enclosures and Back Stop Poultry and Kennel Runs, and manufacture Lighting Standards, Sanitary Stable Fittings for both Horses and Cattle, Weather Vanes, Fountains, Settees, Vases, Aquaria, Ornamental Iron, Brass and Bronze.



Wrought Iron Railing and Gates furnished and erected by us for the Clarke Estate, Cooperstown, N. Y.

J. W. FISKE IRON WORKS

Established 1858 **92-94 Park Place, N. Y. City**

My Knowledge of Law Saved Our Firm Thousands

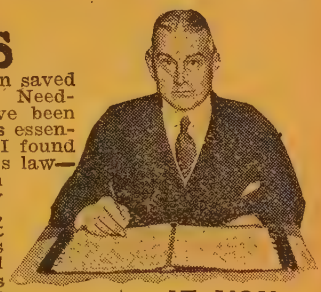
"Thousands of dollars in consultation fees have been saved because I knew when a lawyer was **not** necessary. Needless, expensive legal entanglements and suits have been avoided because I knew when a lawyer's advice was essential. And I am not a lawyer—never studied law. I found in one volume all the essential facts about business law—

ALL BUSINESS LAW

facts which every shrewd, prudent business man should have at his finger tips."

COMPLETE IN A SINGLE

thoroughly indexed 946 pg. book



PARSONS' LAWS OF BUSINESS, covers thoroughly every point concerning contracts, sales, notes, agreements, limitations, leases, partnerships, collections, bonds, deeds, mortgages. And for every business transaction there is an authoritative form—nearly 300 in all—from which you can draw up all kinds of error-proof business papers without the aid and expense of a lawyer.

Theophilus Parsons, author and accepted authority on business law, was Professor of Law at Harvard University. The book is written in plain untechnical English, understandable to every business man.

Almost 300,000 copies have been sold of former editions. And now comes the 1917 edition, more valuable than ever—greatly enlarged, revised to date, including fresh chapters on all business legislation—and selling at a lower price than heretofore.

Think how often you have secured legal advice on a trivial matter—needlessly and sometimes at great expense. Look back at the risks you have taken because you did not know a lawyer's advice was essential. In the future, save your money and secure absolute protection through the ownership of this freshly revised legal authority.

IF YOU

Make Contracts—Are an Investor—Partner—Agent—Author—Inventor—Own Property—Carry Life Insurance—Hold a Note—Give Notes—Own or Run a Car—a single reference to this book will probably save you more than its cost. If you are an employer you owe it to the future welfare of your business and to your own income to read all that Parsons says in his thorough interpretation of the Workmen's Compensation Laws in the various States.

And if you are a young man ambitious to succeed, no book could be of greater value in helping you forge ahead. No book can give you more essential business knowledge.

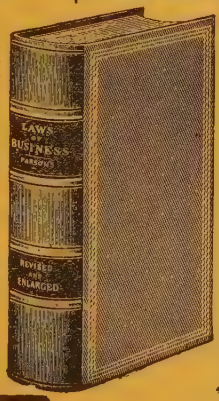
Other Owners Say:

"I expect to get a thousand per cent. on my investment." —**Prentice Winchell, Worcester, Mass.**

"Worth to every business man many times the price." —**Frederic Carroll, London, Eng., E. C.** *In my estimation, the question is not whether one can afford it, but whether one can afford to be without it."*—**Ernest Berkel, Wichita, Kansas.**

A Partial List of Contents

Contracts, Sales, Notes, Agency, Agreement, Consideration, Limitations, Leases, Partnership, Executors, Interest, Insurance, Collections, Bonds, Receipts, Patents, Deeds, Mortgages, Liens, Assignments, Minors, Married Women, Arbitration, Guardians, Will, Collection of Debts, Usury, Holidays, Days of Grace, Powers and Liabilities of Stockholders, Officers and Directors of Corporations, Trade Mark Law, Bailment, Copyright Law, Full Glossary of Law Terms.



Sent FREE

Prepaid—No Cash in Advance

Mail the coupon—no obligation or risk on your part whatever. Judge for yourself, at our expense, exactly how valuable this book is. If a legal problem confronts you now, or if you are in doubt about the legally safe procedure in any of your present business transactions, take advantage of this offer. **Use the advice and counsel of the greatest authority on business law in the United States.** If you don't want to keep the book after using it for 10 days, we will send postage for its return.

S. S. SCRANTON CO., Hartford, Conn.

SIMPLY TEAR AND MAIL

W.A.-17 **S. S. Scranton Co., Hartford, Conn.**

Send me, without expense or obligation on my part, Parsons' Laws of Business for 10 days' free examination. At the end of that time I will either send you $3.50 or notify you to send me stamps to return it.

WHEN YOU PATRONIZE THE ADVERTISERS, KINDLY MENTION THE WORLD ALMANAC

ELECTRICAL men with training are always in demand. Having trained over 2,000 young men in the past 23 years in the fundamentals of Applied Electricity, The Bliss Electrical School, with its well-equipped shops and laboratories, is peculiarly qualified to give a condensed course in Electrical

ENGINEERING

including Mathematics, Steam and Gas Engines, Mechanical Drawing, Shop Work, and Theoretical and Practical Electricity in all branches. Students construct dynamos, install wiring and test efficiency of electrical machinery. Course, with diploma, complete

IN ONE YEAR

For practical young men with limited time. 25th year opens Sept. 26, 1917. Catalogue on request. 300 Takoma Ave., Washington, D. C.

AUTO BUSINESS NEEDS *TRAINED MEN*

Over 3,900,000 automobiles in this country need **trained men** to keep them going. No other business offers such big opportunities for men who are prepared. Plan to attend the **GREER COLLEGE OF MOTORING**—a high class, master school where you get from-the-ground-up training in 18 branches of the automobile business.

We teach you the "how" and "why" of everything. Actual experience in Overhauling, Repairing and Driving, Acetylene Welding and Vulcanizing. Over 14 Starting and Lighting Systems. Practice on 8 and 12 cylinder motors. "Silent" Knight and stationary gas engines. Automobile Salesmanship and Garage Management fit you for the big jobs.

The GREER COLLEGE OF MOTORING was established in 1902 and has over 9,000 successful graduates. Our equipment is up-to-date in every department, our master system of instruction the result of over 14 years of practical experience. **Only 8 to 10 weeks required to get this practical training.**

PLAN TO ATTEND GREER COLLEGE OF MOTORING—3 REASONS WHY.

We train you by practical methods on actual machines. Experience is the best teacher.

Individual instruction—limited enrollment—no overcrowding. We take a personal interest in the success and welfare of every student.

Special employment department places students with good records in paying positions or helps them get started in business for themselves. Demand for good men greater than the supply.

"HOW TO SUCCEED IN THE AUTOMOBILE BUSINESS."
Carries a vital, success-compelling message for every ambitious man. A valuable lesson, "How to Drive an Automobile," included. Explains our system of locating engine troubles and their remedies; practical pointers for auto owners and mechanics. "Shop Notes" give 45 useful helps.
FREE Send for this book to-day and get our special offer to students.

United States 'Balanced' Tires

The Long-Sought-For 'Balanced' Tires

We have actually produced the long-sought-for 'balanced' tires.

The instant success of our popular priced 'Usco' Tread is a striking example of the automobile owners' immediate recognition of our 'balanced' tires.

There are three big, exclusive reasons why the 'balanced' tire is the 100 per cent. efficient tire.

1 Because the rubber tread is 'balanced'—that is, the tread has just the exact 'balance' between Resiliency and toughness, which produces the greatest possible efficiency in the whole tread.

2 Because the fabric carcass is 'balanced'—that is, the carcass has complete 'balance' between flexibility which gives easy riding, and strength which gives endurance.

3 Because the whole tire is 'balanced'—that is, the rubber tread and fabric carcass are in such complete 'balance' as to give equal wear—both tread and carcass are equally strong.

It is this three-fold 'balance' that sets the five United States Individualized Tires in a class apart.

Ask the nearest United States Tire Dealer for your copy of the booklet, "Judging Tires," which tells how to find the particular tire to suit your needs.

The
Germ-Killing Disinfecting White Paint

CARBOLA

A snow-white mineral paint in powdered form that is ready as soon as it is mixed with water, to apply to wood, brick, stone or cement surfaces with either a brush or a sprayer. There is no waiting, straining or bother in its preparation, and it will not blister, flake or peel off, no matter how many coats are put on. Combined with this pigment is a germicide

Twenty Times Stronger Than Pure Carbolic Acid

but it is non-caustic and non-poisonous. It is absolutely harmless to man, beast or fowl, but it instantly kills lice, mites, fly eggs, etc., and the germs of contagious diseases that affect either humans or poultry or live stock.

Used Instead of Whitewash

By the Man in the Country for —

Stables, poultry houses, hog pens, dairies, creameries, cheese factories, etc. Bright, cheerful, sanitary living quarters make healthy, better producing flocks and herds.

By the Man in Town for —

Cellars, factories, lofts, livery stables, garages, warehouses, ceilings, etc. Carbola paints health and sunshine into dark corners, reduces light bills and makes the premises clean and sweet-smelling.

The cost is little—10 cents and less per gallon—and everybody can afford to use it. Supplied by dealers everywhere.

It is used and endorsed by many agricultural colleges, experiment stations and the best known poultry, dairy and breeding plants in the United States. Send for booklet, "The Disinfectant That Paints."

CARBOLA CHEMICAL COMPANY, INC.

7 EAST 42d STREET, Dept. 33 16- A NEW YORK CITY

Steinway

The ideal of the Steinway Piano is a beautiful voice. The work of the Steinway family is to create a sensitive but permanent vehicle for its expression.

"The Steinway realization means the elevation and furtherance of the great art of music. Their field is the world and mankind is the beneficiary. Rarely have men had such inspiration and more rarely have they risen to the heights or possessed such unobscured and prophetic vision of the intellectual needs."

Style "V" Upright, Mahogany, $550
Style "M" Grand, Mahogany, $825

Sold on easy monthly payments when so desired.
Old pianos taken in exchange.
Also pianos for rent at reasonable rates for town or country.

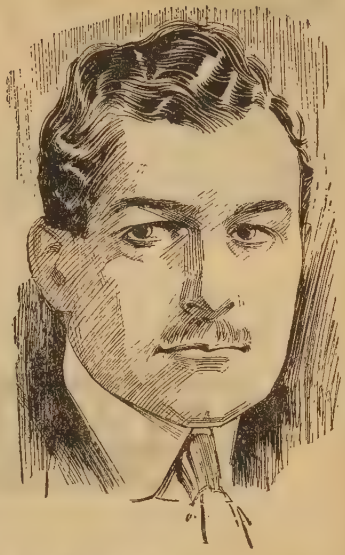
Don't Get Bald!



Here's the kind of a man who makes big money. Every inch of him tells you that. He gets what he goes after.

But supposing his hair was thin, scraggly and dead-looking, or so oily that it lay flat and greasy on his scalp! Or supposing that it was so dry that it shed Dandruff all over his shoulders! His hair would queer his whole appearance, wouldn't it?

Pompeian HAIR Massage

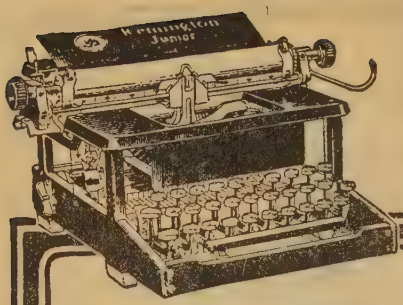
for Dandruff

Good-looking hair! Healthy, vigorous hair! Ah, there's the final touch to a good money-making appearance. Neglect of the hair brings on Dandruff and Scalp Itching. Both unsightly and dangerous. Premature baldness often results. Pompeian HAIR Massage stops Dandruff and Scalp Itching. Pompeian HAIR Massage keeps the scalp healthy, and hence the hair vigorous, clean and good looking.

Not oily, nor gummy, nor smelly. Delightful to use. Made by the reliable and experienced makers of the famous Pompeian MASSAGE Cream and Pompeian NIGHT Cream.

Look your best. Keep your hair healthy. Begin today. 25c, 50c and $1 bottles at the drug stores. Ask for Pompeian HAIR Massage by name. At your barber's, too.

THE POMPEIAN MFG. CO., Cleveland, O.



Just the Typewriter for You

SOLD ON JUST THE TERMS THAT SUIT YOU

The

REMINGTON JUNIOR

Our latest product, the latest thing in typewriters, the machine for which YOU have been waiting.

The Junior is *smaller* and *lighter* than the Standard Remington models—weighs only 17 pounds.

It is *simpler*. You can quickly learn to operate it. No lessons needed.

It has *all the Remington essentials*, standard keyboard, standard type, and writes letters of standard size—the kind with the hundred-dollar look.

It sells for $50—the first absolutely first-grade machine at a medium price.

It is sold either for cash or on easy payments—$5 down and $5 a month.

You are not asked to buy the Remington Junior until you know exactly what you are getting. We will send it on ten days' examination to any address within the first and second parcel post zones of any Remington branch office. If you decide not to keep it, return within ten days—no obligation involved. Here is your chance, your first chance, to get the typewriter you have always needed. Cut out this coupon and send it to us.

MAIL THE COUPON TODAY

Remington Typewriter Company
(Incorporated)
327 Broadway, New York

Send me a Remington Junior Typewriter, price $50, on free examination. It is understood that I may return the machine, if I choose, within ten days. If I decide to purchase it, I agree to pay for it in 10 monthly payments of $5 each.

MOST REMARKABLE

are all of the New Models of the

MULTIPLEX HAMMOND TYPEWRITER

FEATURES

Instantly Interchangeable Type

365 varieties; over 50 different languages. No bad alignment. No imperfect impressions of type as stroke is automatic. *"Just turn the knob."*

The Regular Multigraph

is the standard for executives, authors, clergymen, physicians, instructors and students.

Aluminum Multiplex

the lightest and most portable of high-grade typewriters, weighing about 11½ pounds.

Mathematical Multiplex

carrying about 150 different characters, for the writing of all algebraic equations and mathematical problems—and all other kinds of work.

Reversible Multiplex

when the writing is reversed from English, as in Hebrew, Arabic, Turkish, Persian, etc., immediately adapted to English also.

Multiplex Copy-Writer

has variable spacing of letters and many styles of type. "Your Copy is your Proof." As is the copy so will be the style of the printing.

Wide Carriage Multiplex's

writing lines from regular up to 20 inches long. All Hammonds, however, accommodate any width of paper.

Every Model

is fitted to accommodate our many styles of type and our great variety of languages. Two sets on a machine at once. "Just Turn the Knob" and presto there is one or the other. Other changes on the moment.

Beauty of Work

Is a pre-eminent feature in all of its models.

Service

to business institutions exceeds and excels any other one class of its usage.

Catalogues gladly sent for the asking
Dealerships and Agencies are highly profitable

HERE is your future charted for you, based on the actual average earnings of trained and untrained men.

Which way will ***you*** go? You'll either go *up*, through *training*, to a position that means good money and more comforts increasing as the years go by, or you'll go *down*, through *lack* of training, into the ranks of the poorly paid, and the useful, earning period of your life will close much earlier.

It rests entirely with you which way you go. You can make or break your own future. And *now* is the time to decide. Not next year, not next month, but *now*. You *can* go up if you want to.

You can *get* the training that will command a trained man's salary. The International Correspondence Schools have helped hundreds of thousands of men to qualify for advancement. Let them show *you* how *you* can prepare yourself, in your own home for the position you want in the work you like best.

At least *find out* what the I.C.S can do for you, by marking and mailing this coupon. It will be the first step upward.

Choose your future from this list, then get this coupon into the mail today.

TEAR OUT HERE

The Great Temperance Agent

Drunkenness was formerly a great evil in this country. In the Colonial days, in the Revolutionary period, and in the era which preceded the Civil War, overindulgence in drink was common in all grades of society. Many persons who are not yet willing to call themselves old, can remember a time when it was not uncommon for the leading figures in a community—lawyers, physicians, bankers, merchants, and even clergymen—to drink heavily. The evil was recognized, but there seemed to be no effective remedy. Some States took the drastic step of adopting prohibition, but finding it ineffective, one after another gave it up, until only two or three retained it.

Today no such conditions prevail. Insobriety is not tolerated in any calling of life or in any walk of society. Habitual open drunkenness has well-nigh disappeared. What has caused this revolution in social habits in half a century? There have been many circumstances which have contributed to it, but there has been one great factor—

Temperance Has Advanced Coincidentally With the Growth in Popularity of Beer

There can be no question of the fact that beer has contributed greatly to the cause of temperance. It contains so small a percentage of alcohol that it cannot properly be classed as an intoxicating beverage, which fact is recognized by many European Governments in their systems of licensing and taxation. It is wholesome, appetizing, nourishing, pure, and the best substitute for the heavy alcoholics. These are the reasons for beer's popularity and for its great success as a temperance agent.

Of recent years prohibition has again been persistently advocated in the United States. A number of States have been persuaded to adopt it, and efforts have been made to foist it upon the whole nation. The economic effects of prohibition are dire; it is a breeder of hypocrisy and law-breaking. It is in prohibition territory that "moonshine" distilleries multiply, that the "bootlegger" plies his trade, and that the "blind tiger" has its lair. No official machinery has been devised that can cope with the vendors of illicit liquor in those regions.

Prohibition Is An Obstacle in the Pathway of True Temperance

By its encouragement of the use of ardent spirits, prohibition increases the evils, which its sincere supporters look to it to cure. The harmless beverages, such as beer, are driven out, and in their place come the heavily alcoholic drinks which are readily concealed and easily transported. Nostrums purporting to be tonics and containing much alcohol are sold to innocent purchasers. The use of dangerous drugs almost always increases.

Do not be cajoled into lending aid to Prohibition!

16-O —*Advertisement.*

HATCH BY ELECTRICITY

THE MODERN METHOD

The "Lo-Glo" Incubators and Hovers are the Final Expression of the Art of Incubation. Absolute control of

Heat—Moisture—Ventilation

Insures bigger hatches of healthier, stronger chicks. Their all-metal construction makes them

Fireproof—Indestructible—Dependable

They eliminate all smoke, smell, worry, chilling and overheating, remain sweet and sanitary, making incubation a positive source of pleasure and profit.

Chicks are stronger and surer of life, because of the vitalizing influence of electrical current upon the egg germ.

Passed as "fire-proof" by The National Board of Fire Underwriters.

"LO-GLO" ELECTRIC HOVERS

Can be set indoors or out, merely a question of wire. Broods one or fifty thousand chicks better than "mother hen." All-metal construction, fireproof, sanitary and fill every possible requirement. Overcrowding impossible.

"LO-GLO" EGG TESTERS

Are wonderfully efficient, can also be used as a candling box, all-metal and fireproof. Make the egg shell practically transparent.

"LO-GLO" CHICK RUNS

All-metal, for use with our Hovers. Weather, cat and rat proof. Ideal for baby chicks.

Keep up with the times and equip with the all-metal, no-trouble, no-worry, sure-to-catch "Lo-Glo." A trial will convince and convert you. Write now for interesting free booklet.

Rupture's Worst Enemy

Get Rid of Elastic Bands, Springs and Leg-Straps. Such Harness Has Forced Thousands to Undergo Dangerous Operations

Trusses like those shown above—the belt and leg-strap, elastic and spring contraptions sold by drug stores, surgical supply houses and many self-styled "Hernia Specialists"—make life miserable for everybody who wears them.

And—even when drawn so tight you can scarcely stand to keep them on—they do no good whatever.

Instead, they often do immense harm—they squeeze the rupture, often causing strangulation—dig into the pelvic bone in front—press against the sensitive spinal column at the back.

The Plain Truth Is This

Rupture—as explained in our free book—can't be relieved or cured—can't even be kept from growing worse—unless constantly *held in place.* Just as a broken bone can't "knit" unless the parts are held securely *together.*

And—just as a bandage or splint is the only way a *broken bone* can be held—the *right kind of a truss* is the only thing in the world that can keep a *rupture* from *coming out.*

What a difference it will make when you get *that* kind of truss!

And you *can* get *exactly* that kind of truss—without risking a *cent* of your money.

It's the famous *Cluthe* Truss or *Cluthe Automatic Massager.*

Far *more* than a truss—far *more* than merely a device for holding the rupture in place.

So different from everything else for rupture that it has received 18 separate patents.

Thousands say it is as comfortable as their clothing.

No belt, elastic belt or springs around your waist, and no leg-straps. Self-regulating, self-adjusting. Can't shift or slip—the only truss in existence that is honestly *guaranteed* to hold your rupture every minute of the day.

60 Days' Trial to Prove It

We have so much faith in the Cluthe Truss—we have seen it work wonders for so many others—that we want to make one especially for your case and let you try it on the most liberal trial plan ever offered to ruptured people for their protection.

We'll give you 60 days' trial to prove that this truss will keep your rupture from coming out, when you are working and at all other times—that it will put an end to the trouble you've heretofore had with your rupture. If the trial we allow you doesn't prove it, then the truss won't cost you a cent.

How It Holds and Strengthens

In *addition* to *holding* the rupture the Cluthe Truss or Cluthe Automatic Massager is constantly giving a *strengthening massage* to the weak ruptured parts.

All automatically—the massage goes on all day long, all without any attention whatever from you.

This massage—which strengthens just as exercise strengthens a weak arm—is so remarkably *beneficial*—that nearly all feel better and stronger—get immediate relief after trying this truss.

Get World's Greatest Rupture Book

Don't go on letting your rupture get worse—don't spend a cent on account of your rupture until you get our book of advice—which two cents for a stamp—or a penny for a postal will bring you.

This remarkable book—cloth-bound, 96 pages, 21 separate articles, and 19 photographic pictures—took us over 40 years of day-after-day experience to find out all the facts we've put in it.

It explains the dangers of operations and why they don't always cure to *stay* cured. Tells why—for the protection of the public—drug stores should not be allowed to sell trusses.

Explains why belt, spring and elastic trusses can do no good. Exposes the humbug "methods," "locks," "appliances," "plasters," "systems," etc.

And tells all about the Cluthe Truss—just how it holds—how it is water-proof—how it ends constant expense—how you can get it on 60 days' trial—thus giving you plenty of time to make sure of its wonderful holding and strengthening powers—and gives names and addresses of over 5,000 people who have tried it and want you to know about it.

Write for it to-day—don't put it off—this book may be the means of adding many years to your life and of restoring you to full strength and usefulness.

Just use the coupon, or simply say in a letter or postal, "Send me the Book." In writing us please give our box number as below.

Important happenings while this latest edition of the 1917 ALMANAC was being printed, but too late for insertion in their respective pages.

484. United States Navy—Admiral George Dewey died January 16.

502. War relief funds: The Commission for Relief in Belgium, since its organization to October 31, 1916, forwarded to Belgium and northern France foodstuffs and clothing valued at $173,658,913. The People's Relief Committee for Jewish War Sufferers had up to October 1, 1916, provided $678,260. The Irish Relief Fund Committee collected in the United States a little more than $200,000 up to October 1, 1916. The American Girls' Aid had collected $35,515 and had shipped supplies valued at $800,000. The American Society for the Relief of French War Orphans, organized late in 1916, announced that it would at once undertake to raise necessary funds.

520. American Women Who Have Married Foreign Titles—Miss Catherine Britton married Prince Alfred Zuhohen Lohe-Schillingfurst, attache of the Austro-Hungarian Embassy, 1916. Princess Chimay, *nee* Clara Ward, died about December 18, 1916, in Padua, Italy.

570. Sixty-fourth Congress. Senate—Senator Willard Saulsbury, Dem., of Delaware, has been designated President *pro tempore.*

571. Sixty-fourth Congress. House of Representatives—Speaker, Champ Clark, Dem., of Missouri; Clerk, South Trimble, Dem., of Kentucky.

575. Sixty-fifth Congress, House of Representatives—On January 13 an advance list of members of the next House of Representatives, prepared by South Trimble, Clerk of the House, and made public, gives 215 Democrats, 215 Republicans, 2 Progressives, 1 Prohibitionist, 1 Socialist, and 1 Independent. The tabulation, which is unofficial, has been held up pending the otcome of close contests, and finally was issued after announcement that Representative Scully, Democrat, of New Jersey, had been re-elected.

586. Loyal Orange Institution (Orangemen)—Supreme Grand Lodge of the United States, recognized by and in affiliation with the Loyal Orange Institution throughout the world. George Stewart, Supreme Grand Master, Clinton, Mass. Rev. George T. Lemmon, Supreme Grand Secretary, Sand Lake, N. Y.

613. Military and Patriotic Societies. Pioneers of America—National headquarters, Hamilton College, Clinton, N. Y. For boys of ages nine to twelve. Preparatory to the Boy Scouts of America.

722. American College Fraternities—Delta Zeta Fraternity for Women; founded October 24, 1902. Active chapters, 13; alumnae, 6. Grand Secretary, Rennie S. Smith (office Y. W. C. A.), Hamilton, Ohio.

726. Famous Old People of 1917—The following persons have died: Brig.-Gen. Peter Joseph Osterhaus (93), retired; Admiral Dewey (79); Col. William F. Cody (70).

727. Death Roll of 1916—Dr. Walter B. Gunnison, Principal of Erasmus Hall High School, died Dec. 19; Rev. Dr. James M. Taylor, President Emeritus of Vassar College, died Dec. 19

770, 773. New York State Government and Judiciary—On January 18 Governor Whitman appointed Samuel H. Ordway of Manhattan as a Supreme Court Justice to fill the vacancy caused by the promotion of Benjamin N. Cardozo to the Court of Appeals bench as an Associate Judge. John C. Clark of Manhattan was appointed as Chairman of the State Civil Service Commission. Herbert S. Sisson has been appointed State Commissioner of Excise.

822. Republican State Committees—George A. Glynn of Syracuse succeeds Fred. C. Tanner as Chairman of New York State Republican Committee.

850. Bicycling—New York Six-Day Race in Madison Square Garden, December 18-23, 1916. Final standing: (1) Egg and Dupuy, 2,624 miles, 4 laps, 49 points; (2) Root and Madden, 2,624 miles, 3 laps, 69½ points; (3) Spears and McNamara, 2,624 miles, 3 laps, 88 points; (4) Kaiser and Cameron, 2,624 miles, 3 laps, 108 points; (5) Hill and Drobach, 2,624 miles, 3 laps, 116½ points; (6) De Baetes and Walthour, 2,624 miles, 3 laps, 120 points.

PRINCIPAL BATTLESHIPS OF NAVAL POWERS.

The table of battleships of foreign naval powers has been purposely omitted from this volume owing to the impossibility of obtaining accurate data due to war conditions. For table see 1916 ALMANAC.

THE ARMED STRENGTH OF THE WORLD—LAND FORCES.

Compiled from the latest available data, but figures applying to the armies and navies of nations at war are subject to material change because of losses in battle, usually estimated at 10 per cent. For the Army and Navy of the United States, see pages devoted thereto. [Consult Index.]

The actual numbers of the casualties of the several belligerent countries being unknown, therefore, they have not been considered. The data given includes only forces available in, and by the particular countries, without reference to colonial possessions, except as noted below.

* Militia basis or system. *a* Average annual contingent included. *b* France, colonial army 134,000 additional; part of this force in France. *c* Germany, colonial army 10,599 additional. *d* Italy, colonial army 23,000 additional. *e* Great Britain, colonial army 117,517 additional. *f* Spain, colonial army 10,920 additional. *g* Netherlands, colonial army 40,000 additional. *h* Portugal, colonial army 8,105 additional.

NOTE—The number of effectives available would be from 50 to 75 per centum of the total number of availables. The totals under "Available Unorganized" are arrived at by taking a fixed percentage of the total population, which is supposed to represent the males of military age.

MEN'S DRESS CHART.

THE following is a specification of the proper attire for men on various occasions in the Fall and Winter, 1916-17, prepared and copyrighted by *The Haberdasher*, New York.

Day Wedding, Afternoon Call and Matinee Reception.

Coat and Overcoat—Black cutaway, Chesterfield overcoat.
Waistcoat—To match coat, or white.
Trousers—Striped gray worsted.
Hat—High silk, with felt band.
Shirts and Cuffs—Stiff or pleated white.
Collar—Wing or poke.
Cravat—Pearl once-over, Ascot, or four-in-hand, to match gloves.
Gloves—Pearl suede or glace, to match cravat.
Boots—Patent leather, buttoned kid tops.
Jewelry—Pearl or moonstone links, studs and cravat pin.

Business, Lounge and Morning Wear.

Coat and Overcoat—Jacket, Chesterfield overcoat.
Waistcoat—To match jacket, or fancy fabric.
Trousers—To match jacket, or of gray striped fabric with dark jacket.
Hat—Derby or soft.
Shirts and Cuffs—Pleated or negligé fancy.
Collar—Fold or wing.
Cravat—Four-in-hand or tie.
Gloves—Tan cape or chamois.
Boots—Laced calf or russet, high or low.
Jewelry—Pearl, gold, or jewelled links, gold chain.

Motoring, Golf, Driving, Country.

Coat and Overcoat—Norfolk or jacket, belted or Chesterfield overcoat.
Waistcoat—To match jacket, or fancy.
Trousers—To match jacket or flannel knickers for field sports.
Hat—Cap, or soft hat.
Shirts and Cuffs—Negligé with soft cuffs.
Collar—Fold or soft outing collar.
Cravat—Four-in-hand or tie stock for riding.
Gloves—Tan cape or chamois.
Boots—Laced calf or russet, high or low.
Jewelry—Pearl or gold links, gold chain.

Afternoon Teas, Church and Promenade.

Coat and Overcoat—Black cutaway or Chesterfield overcoat.
Waistcoat—To match coat, or of fancy fabric.
Trousers—Gray striped worsted.
Hat—High silk or soft.
Shirts and Cuffs—Pleated white or fancy.
Collar—Wing or fold.
Cravat—Once-over or four-in-hand.
Gloves—Gray suede or reindeer.
Boots—Patent leather or dull calf, laced or buttoned kid tops.
Jewelry—Gold or jewelled links, studs and cravat pin.

Evening Wedding, Ball, Reception, Formal Dinner and Theatre.

Coat and Overcoat—Swallowtail, cape, skirted or Chesterfield overcoat.
Waistcoat—White single or double-breasted of pique, linen or silk.
Trousers—Same material as coat.
Hat—High silk, with felt band.
Shirts and Cuffs—Stiff linen or pique white.
Collar—Poke, wing, or lapfront.
Cravat—White tie of plain or figured pique or linen.
Gloves—White glace or reindeer; white cape for theatre.
Boots—Patent leather buttoned tops, patent leather pumps.
Jewelry—Pearl or moonstone links and studs, or platinum bar-chain.

Country Dance, Informal Dinner, Club, Stag, and at Home Dinner.

Coat and Overcoat—Jacket, black or Oxford, Chesterfield overcoat.
Waistcoat—Black, silk or linen, single or double-breasted.
Trousers—Same material as jacket.
Hat—Derby or soft.
Shirts and Cuffs—Pleated white of linen or pique.
Collar—Fold or wing.
Cravat—Black silk tie.
Gloves—Tan cape, chamois, or gray suede.
Boots—Dull calf, laced tops or gunmetal pumps.
Jewelry—Gold or jewelled links and studs, gold bar-chain.

BIRTHSTONES.

List as adopted by the American National Retail Jewellers' Association in convention Aug. 8, 1913.

January—Garnet.
February—Amethyst.
March—Bloodstone and aquamarine.
April—Diamond.
May—Emerald.
June—Pearl and moonstone.
July—Ruby.
August—Sardonyx and peridot.
September—Sapphire.
October—Opal and tourmaline.
November—Topaz.
December—Turquoise and lapis-lazuli.

WEDDING ANNIVERSARIES.

First—Cotton.
Second—Paper.
Third—Leather.
Fourth—Fruit and Flowers.
Fifth—Wooden.
Sixth—Sugar.
Seventh—Woollen.
Eighth—India Rubber.
Ninth—Willow.
Tenth—Tin.
Eleventh—Steel.
Twelfth—Silk and Fine Linen.
Thirteenth—Lace.
Fourteenth—Ivory.
Fifteenth—Crystal.
Twentieth—China.
Twenty-fifth—Silver.
Thirtieth—Pearl.
Fortieth—Ruby.
Fiftieth—Golden.
Seventy-fifth—Diamond.

FAMOUS WATERFALLS OF THE WORLD.

NAME AND LOCATION.	Height in feet.
Gavarnie, France	1,385
Grand, Labrador	2,000
Minnehaha, Minnesota	50
Missouri, Montana	90
Montmorenci, Quebec	265

Yosemite (middle), California	626
Yosemite (lower), California	400

The World.

JOSEPH PULITZER.

April 10, 1847 ✠ October 29, 1911.

In a year filled with events of grave responsibility for journalism, both in our own country and in the history of foreign nations, THE WORLD, dedicated May 10, 1883, by its founder, Joseph Pulitzer, to the advancement of the interests of the American people, continued to uphold in memorable achievement during the year 1916 the tradition which for more than a quarter of a century has earned for it the leadership not only of American journalism but of world journalism for all time.

Always drastically and fearlessly independent in its news policies, as well as on its editorial page, THE WORLD in 1916 gave to the American public the best and most accurate accounts that were available of the progress of the European war, which on entering its third year of bloodshed became even more bitter and ruthless than in its first two years of existence. A Presidential election, one of the most fiercely and closely fought in the history of our national politics, during which foreign influence was brought to bear that a candidate favorable to a foreign nation might be the Chief Executive of the United States, brought into international prominence the power of THE WORLD'S championship of the cause of pure Americanism.

The propaganda of the German Government to violate the neutrality of the United States in the interests of the central empires, which was exposed by THE WORLD in 1915, was further revealed in 1916 when plots involving most seriously the freedom of this country were discovered and disclosed to the public.

Documentary evidence which came into possession of THE WORLD proved that the driving force behind the Gore resolution and the McLemore resolution, whose passage would have meant the surrender of American rights on the high seas and allowed the central allies to launch anew an unrestricted submarine warfare on the shipping of all nations, was The National German-American Alliance. The clearing-house of the alliance in its Congressional campaign was the office of Alphonse G. Koelble, and one of the principal lobbyists was shown to be T. L. Marsalis, a New York real estate operator.

The programme which had been adopted by the alliance comprised three measures for immediate enforcement—

1. Refusing passports to Americans travelling on the ships of belligerents.
2. An embargo on all contraband of war from ports of the United States.
3. Prohibiting Federal Reserve Banks from subscribing to foreign war loans.

Back of these plans a programme was being prepared for the control of the Republican National Convention and the defeat of President Wilson in the interests of the German cause. The revival of the Champ Clark boom for the Democratic Presidential nomination was traced to a suggestion made by the alliance.

Among the names mentioned in the reports of the German lobbyists as being opposed to President Wilson's foreign policy we e Senator Stone of Missouri, Chairman of the Foreign Relations Committee of the Senate; Senators Thomas P. Gore, James A. O'Gorman, G. M. Hitchcock, Marcus M. Smith, John W. Kern, James H. Lewis, James E. Martine, Hoke Smith, John D. Works, Wesley M. Jones, G. E. Chamberlain, Port J. McCumber, Albert B. Cummins, William E. Borah and Moses E. Clapp, and Representatives Claude Kitchin, James R. Mann, Joseph G. Cannon, James Hay, William S. Bennet, Dan V. Stephens, Charles Bennett Smith, Henry A. Cooper, Charles H. Dillon, Isaac R. Sherwood and Charles O. Lobeck.

One week after its exposure of the German lobby in Congress, THE WORLD made public documents showing that the German Government sent to the United States, and that the German Ambassador in Washington, Count Johann von Bernstorff, directed and paid for the activities of at least one secret agent whose business it was to influence through the press American public opinion in favor of Germany.

The details of the German plot as revealed by THE WORLD showed that on August 5, the day after the Kaiser's troops invaded Belgium, the German Government sent to the United States Dr. Karl Oskar Bertling to organize a pro-German cable news service and to further the cause of Germany in every way among the American people.

While in the United States Bertling's activities were closely supervised by Count von Bernstorff, and the two were in constant communication, as shown by the letters which THE WORLD was able to print. In many of the letters which passed between the Ambassador and Bertling mention of money in payment for services is made.

The German Government instructed Bertling to send his reports to Berlin by Americans who were travelling between Germany and the United States if he found that it was impossible to get his despatches past the British censors.

Through original letters, memoranda and other documentary evidence which came into its possession, THE WORLD was able to make a third expose of German activities in the United States and prevent the carrying out of detailed plans which had been made by German-Americans to influence national elections in this country in favor of candidates who were in sympathy with the central allies.

By publication of his own letters, THE WORLD was enabled to prove that former Gov. Oscar B. Colquitt of Texas, a candidate for the United States Senate from that State, had surrendered to the German dictation and had made a direct appeal to the German organization for its support in securing his election.

The plans of the German organizations to control elections as disclosed by THE WORLD provided—

1. For the establishment of a national campaign headquarters in New York which had been put into operation before THE WORLD'S exposures.

2. That these headquarters dictate what candidates for offices under the Government of the United States shall receive the German-American vote.

3. That the candidates for these offices eligible for the German-American support must put themselves on record publicly as opposed to the foreign policies of the Administration.

4. That Bernard Ridder, Alphonse G. Koelble and Henry Weismann were active directors at the New York headquarters.

FOREIGN NEWS SERVICE.

Since the beginning of the war THE WORLD'S foreign news staff has been able to furnish the public with more first hand information from high official sources than any other paper. Its record of notable news beats was continued during 1916. From the highest German official sources THE WORLD was able to give exclusive news which aroused intense interest in this country and which was retelegraphed and printed in its entirety in Europe and there made the subject of editorial comment in the papers of every nation engaged in the war.

In an exclusive interview given by the German Imperial Chancellor, Herr von Bethmann-Hollweg, to Karl H. von Wiegand, special staff correspondent of THE WORLD, early in February, when the submarine issue between the United States and Germany was at its most acute stage, the German statesman through THE WORLD gave out Germany's position in the controversy which threatened to draw this country into the conflict.

The German Chancellor said in the interview:

"What your Government asks is an impossible humiliation. I have been and am willing to concede to America everything that Germany can concede with reason and fairness; within the principles of justice and honor.

"But I cannot concede a humiliation of Germany and the German people, or the wrenching of the submarine issue from our hands even to placate America and to insure the continuance of those cordial relations with your country which every true German values and sincerely desires except at the price of national humiliation."

More than six months before the German Government, through the offices of the United States, formally asked her enemies to consider terms of peace, the German Chancellor gave through THE WORLD'S Berlin correspondent the views of his Government on peace. At that time the Chancellor asserted that the only basis of peace could be "what the war map shows," and with the battles of the Somme and the French attack at Verdun still in the future, said:

"Only when the statesmen of the warring nations come down to a basis of real facts, when they take the war situation as every war map shows it to be; when with honest, sincere will they are prepared to terminate this terrible bloodshed and are prepared to discuss war and peace problems with one another in a practical manner—only then will we be nearing peace.

"I fear we will not come nearer to peace desired by all peoples as long as the responsible people of the Entente powers indulge in and confine themselves to observations about Prussian militarism and to pathetic declamations about their own superiority and perfection."

The statements of the German Chancellor, when relayed from America back to the press of the warring nations, not only were everywhere discussed by the people of the belligerent countries but goaded Sir Edward Grey to make a stirring reply in the House of Commons.

In addition to these two notable interviews which Mr. von Wiegand obtained exclusively for THE WORLD, he secured private statements from high officials in all departments of Germany's war machine and was the only foreign correspondent allowed to visit the Italian front at the time of the great drive which forced the Austrians to relinquish their hold on the Goritzia.

Mr. von Wiegand's interview with the German Minister of Foreign Affairs, von Jagow, when the Government at Washington was considering the submarine issue at the time Germany was reported to be seriously contemplating a ruthless resumption of her undersea warfare, was said by officials high in the confidence of the American Administration to have brought to President Wilson and his Cabinet the most direct information of Germany's attitude that they were able to obtain.

That the public might be given an unbiased and unprejudiced account of the real conditions existing within the borders of the German Empire during the third year of the war, THE WORLD sent two of its trained reporters to Germany, where they would have the opportunity of viewing at first hand the resources of the empire and the condition of its industries.

Gustav C. Roeder, who after his return from a trip to Germany in 1915 wrote a remarkable series of articles describing vividly the conditions under which the German people were living, made a second tour of the empire and wrote a second series of articles in 1916. Mr. Roeder touched on all phases of Germany's life under war conditions, and brought to the American public the latest information available as to the losses in trade suffered by Germany, the privations endured by the working classes due to the British starvation policy, and the plans being formulated by the great business interests of the empire for financial and industrial efficiency during the continuance of the war.

Later in the year Herbert B. Swope made a special trip to Germany and, after spending three months in the empire, returned with Ambassador Gerard, bringing the first authentic information as to the threatening status of the submarine issue.

In a brilliant series of daily articles Mr. Swope unfolded for the readers of THE WORLD an accurate and vivid account of the true conditions facing the German people as they entered upon the third year of the world war. Before leaving Germany, Mr. Swope was given the opportunity of visiting the battle fronts and of talking with some of the highest men in command of Germany's war organization. His series of articles covered fully all sides of the great war as it is seen from the German viewpoint, and answered many questions which were being continually asked by the people of this country. Among the subjects which Mr. Swope discussed in his series of articles were the probable length of the war, Germany's resentment against the United States in its belief that we were pro-ally in our neutrality, the liberalization of Germany at the conclusion of the war, the methods being employed to escape the British plan of starvation for the central powers, the general military situation confronting Germany and her allies, and the vigorous censorship of the military system.

The story of the Entente activities, their achievements in 1916 and their plans for the future was told in a forceful manner by the splendid corps of correspondents which THE WORLD maintains in Europe.

The picturesqueness of France's magnificent courage, the intensity of Britain's patriotism and the loyalty of their smaller allies brought from the writers for THE WORLD descriptions which will live long after the war is ended.

Lincoln Eyre was an eye-witness of the French attack at Verdun, when the poilus of "Papa" Joffre in a mighty surge thrust back the German lines which for six months had been slowly closing in on the great armored fortress of the French. His close touch with the French General Staff enabled Mr. Eyre, in a despatch sent to THE WORLD three weeks before the attack was made, to foretell of the advance which was to hurl back the Germans more than two miles in one day.

Descriptive accounts of the allies' soldiers in their fights on the western front in 1916 were sent to THE WORLD by Frederic Palmer, Arno Dosch Fleurot and Joseph W. Grigg.

The thrilling charge of the British which won for them Fricourt, Thiepval, Mametz Wood and Contalmaison, the hand-to-hand conflict of the French inside Fort Douaumont and the struggle along the banks of the Somme were given to THE WORLD in splendid pen pictures by these correspondents.

GREAT WORLD EVENTS CHRONICLED.

Exclusive articles of international interest published by THE WORLD during 1916 aroused comment in every country of the globe and were striking testimonials of THE WORLD'S leadership in presenting the news.

By arrangement with Sir Ernest Shackleton, the British Antarctic explorer, THE WORLD was enabled to give to the public its exclusive story of the personal narrative and achievement of the Shackleton expedition which endeavored to cross the Antarctic Continent.

The personal story of J. R. Stenhouse, second in command of the relief ship Aurora, which was to await the Shackleton expedition at Ross Sea after the party under the leadership of Sir Ernest Shackleton had crossed the Antarctic Continent, was told exclusively in THE WORLD on the return of the crew after their ship had been crushed in the ice.

An exclusive cable to THE WORLD was sent by Sir Ernest Shackleton from Port Stanley, Falkland Islands, the day he returned from Elephant Island, where he had left twenty-two of his crew in caves cut into the ice cliffs. His complete story of the privations of himself and his crew and the work accomplished by the expedition were given to the public exclusively by THE WORLD on the following day, when Sir Ernest Shackleton telegraphed.

A series of articles written by former President Roosevelt on "Nationalizing the United States" gave in a forceful manner that great American's attitude on the prob-

lems which, from his point of view, confronted the country in the face of a Presidential election.

Four articles by Rudyard Kipling telling the story of the greatest sea fight in all history—the clash between the British and German fleets off Jutland, May 31—was another achievement for THE WORLD in 1916 that brought it praise from papers at home and abroad.

Another exclusive series of special articles secured by THE WORLD in 1916 was the personal narrative written by Captain Paul Koenig, commander of the German merchant submarine Deutschland, who piloted his ship from Bremen to Baltimore. At the completion of his second trip across the Atlantic, Captain Koenig told of his trip by the pen of Henry Reuterdahl, the foremost naval critic in the United States, who secured an exclusive interview with the Captain for THE WORLD.

MEXICO.

The troublesome relations of this country with her southern neighbor Mexico, with its vital interest to every citizen of the United States, made the news from south of the Rio Grande of especial value. Owing to the unsettled conditions of affairs and the lack of any permanent or recognized government in Mexico, it was very difficult to secure any authentic information.

One of the most striking journalistic achievements of the year was the exclusive interview which was granted by General Carranza to THE WORLD representative at Mexico City, Robert H. Murray. This was the first authoritative interview which General Carranza had ever given to a newspaper, and was secured by Mr. Murray only after six months' untiring effort to arrange the audience.

In his statement to Mr. Murray, which he called a message to the American people, General Carranza said:

"The solution of the problem is in the retirement of the United States force. Take the United States troops out of Mexico, where they are doing no good, and have them patrol your side of the border while we protect lives on our side. We have quelled all armed opposition except in sporadic instances."

When President Wilson, in his determination to enforce respect for citizens of the United States in Mexico and punish Villa for his raids across the border into the territory of this country, despatched units of the National Guard of the various States to do patrol duty at the border, THE WORLD sent with the troops two trained correspondents, who remained at the border as long as there was serious danger of intervention on the part of this country.

With General Pershing's regular troops on their dash into Mexico in pursuit of Villa, THE WORLD sent John Kirby, a member of its Washington Bureau, who reported daily on the progress of the American forces.

PULITZER AERIAL DERBY.

A transcontinental air race for a trophy to be given annually by Ralph Pulitzer, publisher of THE WORLD, was announced by the Aero Club of America, but owing to the conditions on the Mexican border, which made it imperative to send United States troops into Mexico and mobilize all aviators for national service, the race, which had been scheduled to start September 2, was postponed for one year.

The race was planned by THE WORLD to become a national annual event—the Aerial Derby of America—a measure toward national preparedness which should interest Americans in regaining their country's prestige in the air. As an event of sportsmanship and a test of aerial engineering development the transcontinental race was heralded by all as of national importance.

High Administration officials were quick to give their approval to the idea, and said that they believed that the race would do more to accentuate interest in aviation than any movement in recent years.

THE WORLD BY AERIAL EXPRESS.

The first aerial delivery of a metropolitan newspaper at Washington was achieved when Victor Carlstrom, flying from New York with a special edition of THE WORLD, established a non-stop flight record of three hours and four minutes between New York and Washington.

The special edition of THE WORLD which was carried to Washington by Carlstrom, who had as his passenger Alan R. Hawley, President of the Aero Club of America, with a letter which was personally delivered to President Wilson, contained an appeal for aerial preparedness indorsed by a majority of the Governors of the States. The articles in THE WORLD showed that the States were prepared to furnish during the Summer 2,000 aviation recruits, and suggested that the Federal Government could train them at a cost of $2,000,000—less than one-tenth the cost of one dreadnought.

Copies of THE WORLD were delivered to each member of the Cabinet, the Senate and the House of Representatives. It brought forcefully home to the legislators the necessity for increasing through Federal encouragement the now pitifully weak air defence of the country.

Through the crystallizing of sentiment by this special aerial edition Congress was induced to provide in its appropriation bills money which insures a greatly increased aviation equipment for the army and navy.

THE NATIONAL ELECTION.

A Presidential campaign which brought out the largest number of voters who ever cast their ballots in the history of American politics, and which was characterized by fierce attacks by both the great parties, brought THE WORLD in 1916 into prominence as the champion of American rights in all lands and on all seas and as the defender of the President who, with honor to the Nation, had kept 100,000,000 of his fellow-citizens out of the world-war.

From the days early in June when the Republicans chose Charles Evans Hughes as their candidate in the effort to defeat President Woodrow Wilson for re-election THE WORLD gave to the public a forceful, clear and unbiased account of the progress of one of the most intensely fought political battles since the founding of the Republic.

The Republican National Convention, held at Chicago coincident with the meeting of the Progressive National Convention in the same city, was written for THE WORLD by men and women of national reputations, who were themselves vitally interested in the outcome of the campaign and did much to influence the ultimate results of the election in November. Among THE WORLD correspondents who reported the National Conventions were William Jennings Bryan, George W. Perkins, William Allen White, Bainbridge Colby, U. S. Senator William E. Borah and Ida M. Tarbell, in addition to the regular corps of THE WORLD'S political reporters, headed by Louis Seibold. Rollin Kirby, THE WORLD cartoonist, attended the conventions and gave first-hand impressions of the men who gathered there.

Trained political reporters accompanied the Republican candidate on his several trips about the country, writing accurate and unprejudiced accounts of his receptions and speeches. Special correspondents, experts in the field of political journalism, reported faithfully the activities of the leaders of both of the parties, enabling the readers of THE WORLD to have a truthful account of both sides of the fight.

One of the most vigorous editorial campaigns in recent American newspaper history was carried on by THE WORLD during the course of the campaign, in which it challenged all opposed to the attitude of the Administration to put forward a more practical programme of procedure than had been followed in dealing with the complicated Mexican and European problems which had confronted the Democratic leaders.

A conspicuously brilliant series of cartoons was printed by THE WORLD during the campaign, and many of them were copied by scores of papers in all parts of the country. Their scathing satire on the weaknesses of the Republican claims and the selfish ambitions of the Republican leaders was so forceful and telling that credit was given them as a very large factor in returning the Wilson Administration.

One of the notable achievements of the campaign was the exclusive interview which THE WORLD obtained with Richard Olney, Secretary of State under former President Cleveland, in which he strongly upheld the policies of President Wilson and urged his re-election at such a critical time in American history, when a false step might plunge the country into a needless and indefensible war. The interview which THE WORLD secured with Mr. Olney was extensively copied in hundreds of papers throughout the country.

One week before the election THE WORLD published its forecast of the political feeling of the country and made the prophetic statement in summarizing the results of its investigations that "Wilson may win a re-election by a victory in the Western States and without the need of New York's electoral votes."

STATUE OF LIBERTY ILLUMINATED.

The Statue of Liberty, which, since it was first dedicated thirty years ago, has stood in total darkness except for the feeble flicker of its torch, was lighted through the construction of a flood lighting system on Bedloes Island by popular subscriptions raised through the efforts of THE WORLD, which in 1886 raised a fund of $100,000 by similar means to complete the pedestal on which the statue now stands.

More than 75,000 persons gave amounts ranging from a penny to $500 in order to complete the fund of $30,000 necessary to provide for the construction of the lighting system, which was planned by the foremost illuminating experts in the country. Patriotic organizations, clubs, civic societies and business houses rallied to the support of the movement as well as the thousands of individuals who gave their mite that the light of the statue might shine forth a welcome for all and be a symbol by night as well as by day of the liberty for which our country so courageously stands.

The movement to provide for the illumination of the Statue of Liberty received the active support of Cabinet officers, who, heartily approving of the idea, gave the plans their personal attention that the lighting plant might be completed on the day set for its inauguration.

The dedication of the illumination was accompanied by an elaborate programme, the President of the United States being present at the ceremonies on his private yacht Mayflower and giving the signal for the turning on of the light for the first time. Among those who were included in the President's party on the yacht were Mayor Mitchel of New York City, Ambassador and Madame Jusserand of France, Ralph Pulitzer, Cleveland H. Dodge, and William M. Calder, United States Senator-elect from New York. A committee of 200 prominent citizens of New York City, which had been appointed by the Mayor to provide for the reception to President Wilson, witnessed the illumination of the statue from the U. S. S. San Francisco.

At the conclusion of the ceremonies at the statue the Mayflower and the San Francisco returned to the Battery, where the members of the committee and their guests were taken in motor cars through electric paths of gold to the Waldorf-Astoria, where a public dinner in honor of the President of the United States and Mrs. Wilson brought the day to a brilliant close.

The speakers at the dinner were former Senator Chauncey M. Depew, who delivered the oration at the dedication of the statue thirty years before; Ambassador Jusserand, who read a message from the President of the French Republic; Henry L. Doherty, President of the Society for Electrical Development; Ralph Pulitzer, publisher of THE WORLD, and the President of the United States.

The guests of honor were the President and Mrs. Woodrow Wilson, His Excellency the French Ambassador and Madame Jules J. Jusserand, the Secretary of the Navy and Mrs. Josephus Daniels, the Secretary of Commerce and Mrs. William C. Redfield, Mayor and Mrs. John Purroy Mitchel and Ambassador and Mrs. James W. Gerard.

President Wilson, in accepting the lighting system on behalf of the Government of the United States, delivered an address which will make ever memorable the day which witnessed the dedication of Liberty's illumination. He said in part:

"There are many moving circumstances connected with this day, connected with the things it recalls, connected with the things it suggests. I was reflecting as we saw the light stream upon that beautiful statue, that its source was outside the statue; that it did not proceed from Liberty, but proceeded from the light we are throwing on Liberty; and it occurred to me that, after all, it was a proper symbol of our life, because we can take to ourselves the dignity of Liberty only as we illustrate the fact and the true spirit of Liberty, and the only light that we can contribute to the illumination of the world is the light that will shine out of our life as a nation upon that conception and upon that image.

"There is a great responsibility in having adopted Liberty as our ideal, because we must illustrate it in what we do. I was struck by the closing phrase of Mr. Pulitzer's admirable little speech. He said that there would come a day when it was perceived that the Goddess of Liberty was also the Goddess of Peace, and throughout the last two years there has come more and more into my heart the conviction that peace is going to come to the world only with Liberty.

"With all due and sincere respect for those who represent other forms of government than our own, perhaps I may be permitted to say that peace cannot come so long as the destinies of men are determined by small groups who make selfish choices of their own.

"I wonder if we remember the sacrifices, the mutual concessions, the righteous yielding of selfish right that is signified by the word and the conception of Liberty. I wonder if we all wish to accord equal rights to all men.

"And so it is profitable that occasions like this should be frequently repeated and that we should remind ourselves of what sort of image we have promised to be, for the world is enlightened, my fellow citizens, by ideals, by ideas. The spirit of the world rises with the sacrifices of men, the spirit of the world rises as men forget to be selfish and unite to be great.

" 'This,' to repeat that beautiful phrase of Lincoln's in his Gettysburg address, 'is not a time of self-adulation, but a time of rededication.' Let us determine that the light that shines out of our lives upon the uplifted form of Liberty shall be a light pure and without reproach."

In his address, Mr. Pulitzer gave to George Williams of New York the credit of having conceived the idea of illuminating the Statue of Liberty at night by flood lighting and having brought the plans to THE WORLD for execution.

ARTIST BLAKELOCK REDISCOVERED.

It was through the efforts of THE WORLD that in 1916 Ralph A. Blakelock, considered by many critics to have been America's greatest painter, was removed from the Middletown Insane Asylum, where he had been confined for more than sixteen years, and provided with a comfortable home, where he can again take up the work he had been forced to abandon when committed to the State hospital.

By taking him away from the depressing atmosphere of the asylum, where all his artistic temperament was suppressed, it was hoped that some of the genius which had once given such a remarkable touch to his brush might be brought back again and that his appreciation and power to portray might be reawakened.

ACCURACY AND FAIR PLAY.

THE WORLD'S Bureau of Accuracy and Fair Play issued its third annual report showing that from July 1, 1913, to July 1, 1916, the bureau had dealt with 1,138 cases involving the question of accuracy and fair play in the news and editorial columns, sustaining 700 complainants and publishing 415 corrections. There were in addition 101 publications in the interest of fair play where THE WORLD was not at fault. Members of THE WORLD staff and its correspondents everywhere have almost without exception shown their hearty accord with the purposes and activities of the bureau. A limited number of correspondents who have been convicted by the records of habitual carelessness have been dismissed. There has been a material falling off in libel suits since the bureau was established, which means a corresponding increase in public confidence and good will.

While the bureau was created primarily for the purpose of promoting accuracy and fair play in the columns of THE WORLD, serious efforts have been made to spread the idea wherever newspapers are published. The system has appealed to many journalists and teachers of journalism throughout the United States who have adopted it in their newspapers and classrooms. The publications of the bureau are regularly sent to more than thirty colleges and universities where journalism is taught.

The bureau has actively co-operated with the Federal authorities, the District-Attorney's office and the Police Department in prosecuting scores of crooks and swindlers who have tried to use the advertising columns of THE WORLD and other newspapers to trap their victims. Convictions have been secured in many of these cases and in some instances the courts, before imposing sentence, have induced the persons convicted to make restitution. A number of misleading advertisements have been cut out or rejected, and some persons whose advertisements were considered to be misleading have been required to change them into plainer English.

WAITE MURDER MYSTERY CLEARED.

THE WORLD discovered Mrs. Margaret Horton, "the woman in the case," who was the studio companion of Dr. Arthur Warren Waite, convicted of the murder of his father and mother-in-law, and obtained the signed confession of Dr. Waite in which he admitted that he had administered poison to his father-in-law.

SUNDAY WORLD ATHLETICS.

More than 5,000 medals were awarded to the New York City school children who took part in the athletic contests and play-garden competitions held under the direction

of THE SUNDAY WORLD. The athletic contests brought together more than 75,000 schoolboy athletes, an increase of 10,000 over the entrants for the previous year. The walking clubs under the direction of THE SUNDAY WORLD also had a very successful year, and THE SUNDAY WORLD Baseball League broke all records for interest and numbers of teams competing.

In the educational campaign against the spread of infantile paralysis THE EVENING WORLD gave street displays for several weeks of moving pictures showing methods suggested by the Department of Health for preventing the spread of the disease.

A special lecturer accompanied the films on a daily tour of the city, and stops were made at street corners in every part of the city that the people might be taught the means of holding in check the dread disease which was killing scores of men, women and children every day.

So successful was THE EVENING WORLD campaign in New York City with its movie educational show that other communities afflicted with the disease appealed to the paper to send in the used films that similar popular street campaigns might be waged in their communities.

EVENING WORLD'S RECORD OF PUBLIC SERVICE.

In an effort to lessen the danger of the spread of the scourge of infantile paralysis, THE EVENING WORLD inaugurated a health campaign to check the epidemic. While the disease was spreading rapidly throughout all the boroughs of Greater New York, THE EVENING WORLD, with the indorsement of Arthur Woods, Police Commissioner; George H. Bell, License Commissioner, and many of the prominent physicians who had given their services in the fight against the disease, started its campaign with the following objects in view:

1. To cleanse tenement-house areaways and sidewalks in the infested districts of all dirt and refuse matter.
2. To start a neighbor to neighbor educational movement against the spread of the disease, in which the volunteers who enlisted in the work talked with their neighbors and saw that the dirt in the districts was properly taken care of.
3. To see that the law regarding the sale of fruit and vegetables from trucks which were not protected by netting was rigidly enforced.

EIGHTY-CENT GAS FIGHT WON.

The Eighty-Cent Gas Bill which was passed by the New York Legislature marked a signal victory for THE EVENING WORLD after a vigorous fight which the paper had waged for six years to obtain a uniform gas rate for the Borough of Brooklyn. The fight was begun after THE WORLD in 1906 had gained a victory by forcing through the Legislature an Eighty-Cent Gas Bill for the Borough of Manhattan.

The success of the Brooklyn bill was most marked because of the overwhelming lobby of corporation lawyers and politicians which made itself felt in the effort to confuse the bill that was championed by THE EVENING WORLD with a Senate bill which was introduced in a mix-up of technicalities.

It was also significant that not since the Public Service Commission was first appointed has it been possible to pass a mandatory rate bill of this nature until the Brooklyn Gas Bill was enacted. The Legislature has been solid against legislation that came under the jurisdiction of the commission.

The last Legislature, which passed the bill advocated for six years by THE EVENING WORLD, realized that the failure of the efforts of the people of Brooklyn to secure eighty-cent gas was so apparent as to approach a public scandal. There were only three dissenting votes in both the Senate and the Assembly, these being registered on the grounds of standing by the principle of not interfering with the Public Service Commission's rate-making powers.

When THE EVENING WORLD took up the fight for the Eighty-Cent Gas Bill, six years ago, all Assemblymen and Senators going to Albany each year were instructed to vote for the measure. Republicans and Democrats worked alike for the passage of the measure, but were never able to hold enough votes to secure its enactment. Some years the bill failed only by one or two votes. The Public Service Commission at times stepped in and fought for the bill, but it was not until the determined effort by civic workers and Assemblyman Josephs of Brooklyn was backed by the publicity of THE EVENING WORLD that the measure was finally put through.

When Governor Whitman signed the bill he declared it to be one of the greatest pleasures of his public life.

GERMANY'S COURSE INFLUENCED.

The reply of the German Government to the United States note on the submarine issue was influenced and partially moulded by an editorial which appeared in THE EVENING WORLD, according to a despatch sent by Karl von Wiegand, who has the reputation of being in closer touch with German official sources than any newspaper correspondent in Europe.

The basis for the German reply, according to Mr. von Wiegand's information, was an EVENING WORLD editorial, published under the caption "Germany's Chance." It read in part:

"If Germany were now to declare that out of regard for the American rights on the sea, and for the sake of maintaining inviolate earlier principles of international law, the Imperial Government had determined to discontinue submarine warfare as now practised, leaving it to the honor of the United States to uphold international law and the rights of commerce impartially and with an equal eye to all belligerents—if Germany were to do this promptly and without reserve she would achieve a master stroke worth more to her now and in the future than the destruction of a thousand enemy ships."

BEACHES RESTORED TO PUBLIC.

The dream of a Coney Island beach-free to the people was realized when the Court of Appeals, the highest court in the State of New York, decided that the beach at Coney Island—that is, the land between the high-water mark and the low-water mark—belongs to the State, and that the people have the right to use it. The fight to reclaim this strip of beach from private individuals, who had appropriated the land to their own uses and were making the public pay them for enjoying its advantages, was started by THE EVENING WORLD and pushed by that paper to a successful conclusion in 1916.

The case had been in the courts of the State of New York since 1913, when, at the instance of THE EVENING WORLD, Attorney-General Carmody brought a test suit against George C. Tilyou and his business associate, Mrs. Emelie Huber, to evict them from portions of the beach which they had fenced in and which the public could not reach except by paying an admission fee. In the decision which was handed down in 1913 Justice Benedict decided that the land in question belonged to the people of the State of New York, and this decision was affirmed by the Appellate Division in 1915, and by the highest court in 1916.

The decision cleared the way for the city's remodelling of the Coney Island waterfront into a great waterfront park on city property worth millions of dollars.

Inefficiency in city government was exposed by THE EVENING WORLD when it discovered that the city had been spending thousands of dollars every year for the past eighteen years making a map of the city which would be antiquated and useless when completed. The salaries for the year 1916 of the men who were engaged in making the map were estimated to amount to more than $500,000, and it was shown that the payrolls of this bureau had been padded before each election for the past six years, men being put to work temporarily before election to insure their influence on Election Day.

The first of the widows' pensions, for which THE EVENING WORLD fought a two years' campaign, were granted. One hundred and sixty-one pensions were granted under the law which had been signed by Governor Whitman in 1915 making provision for the maintenance of 500 children.

Robert Colgate Wood was forced to resign from the Public Service Commission after an investigation by THE EVENING WORLD and after testimony had been heard before a legislative committee on charges that he had demanded a fee in connection with the granting of subway contracts under the dual subway system.

In continuation of the many fights which THE EVENING WORLD waged in past years in the interests of the women and children of the poorer sections of New York City, the paper in 1916 obtained the co-operation of the municipal authorities in having more than one hundred street playgrounds established in all parts of the city, where the children might enjoy their games and recreation in safety, without fear of injury from street cars, teams or speeding automobiles.

It was estimated that more than 200,000 children in the Boroughs of Manhattan, Brooklyn and the Bronx were cared for every afternoon during the Summer months at THE EVENING WORLD'S playgrounds. At the time THE EVENING WORLD, to insure the safety of the children of the tenements whose only playground was out in the busy streets, suggested the closing of certain streets for recreation centres, there were only ten of these playgrounds in the entire city.

The most immediate need which was felt in the opening of the street playgrounds was the necessity for obtaining competent supervisors for the children's games. For this the Park and Playground Association raised by popular subscription $5,000, in order that instructors might be placed in each of the street playgrounds. The benefit of the supervisor is that the children were kept within the street closed for the purpose and away from the nearby danger zones.

Police Commissioner Arthur Woods, who gave his personal attention to the laying out of THE EVENING WORLD playgrounds, heartily commended the activities of the paper and indorsed the playground movement in the following statement:

"The opening of 100 to 150 play streets will greatly relieve the situation, especially in the tenement sections of the city, where park space is so limited. That play is necessary to the child goes without saying, and that it is a means for the prevention of crime and eliminating the gangster spirit is a recognized fact. Any money or energy spent in the direction of wholesome play for children is well spent and in line with conserving the health and rightful activities of the future citizen. I am hopeful that the next few years will see rapid strides in this direction and that practical plans may be developed."

Hundreds of New York City women from every walk of life joined THE EVENING WORLD'S Housewives' Protective League, which was indorsed by many of the most prominent society women and leaders of women's civic and social clubs in the city.

The organization of the league was prompted by the desire of THE EVENING WORLD to make living conditions as good as possible under the steadily increasing cost of all foodstuffs and the petty graft which was disclosed as existing in many of the small retail stores of the city in their attempt to meet the stringent competition of the larger business man.

The committee of representative women who joined with THE EVENING WORLD in making the league a success stated the prime objects of the association to be—

To reduce the cost of living wherever possible.
To fight high prices that were artificial.
To secure just weight and measures from all dealers.
To eliminate petty graft on common commodities.
To stand together against unwarranted strikes on the necessities of life.
To exchange opinions and views through the news columns of THE EVENING WORLD.
To set forth practical methods of household economy.

THE WORLD ALMANAC FOR 1917.

THE astronomical calculations are given in local Mean Time and were made expressly for this work by Arthur Newton.

Chronological Eras.

The year 1917 corresponds to the year 7425-26 of the Byzantine era; 5677-78 of the Jewish era, the year 5678 commencing at sunset September 16; 2670 since the foundation of Rome, according to Varro; 2693 of the Olympiads, or the first year of the 674th Olympiad, commencing July 1; 2577 of the Japanese era, and to the sixth year of the period entitled Taisho; 1335-36 of the Mohammedan era, the year 1336 beginning on October 17, 1917. The 142d year of the Independence of the United States of America begins on July 4, 1917.

GAME LAWS OF TH
CLOSE SEASON FOR GAM

THE following table shows the close season for all game in the United States, with the exceptio of mountain sheep and goat and a few unimportant species. Where no dates are given kind of gam does not exist, or close season at all times. Local laws, where operative, should be consulted.

The first date of the close season and the first date of the open season are given.

1 Elk only 4 Prairie chicken, closed season all year. 5 Rail excepted. 6 Female protected all the year. 7 Snip only. 8 Rail—Connecticut, Dec. 1–Sept. 12. 9 Deer raised in private preserves may be killed at any time. 10 Certai species. 12 Local exceptions. 13 Gobblers, June 1–Apr. 15. 19 Sundays and Mondays are also closed seasons for ducks an other waterfowl. 21 Rail, coot, mud hen, Dec. 1–Sept. 1. 23 Except June 15–Sept. 15. 27 Between Nov. 24 and Jan. 1 hunting with dog and ferret only 28 Cock pheasant may be killed Oct. 6–Oct. 1, under permit. 29 Residents of the State ma kill rabbits on their own land at any time. 31 Season varies according to latitude. 32 Open season for few days onl late in November. 33 Prairie chicken, Nov. 1–Oct. 15. 34 Open season about 4 days in late fall. Law not applicable to pos session of imported deer properly tagged. Prohibitory laws against hunting doves and robins exist in nearly all States Sale of game during close season is prohibited in most States. License fees from non-residents required in some States.

(a) Female deer and elk and deer without horns protected at all times. (b) Except deer without horns. Non-resident no permitted to kill. (d) Game animals or birds may be killed at any time for food or clothing by native Indians or Esquimaux, o by miners or explorers in need of food, but game so killed cannot be shipped or sold.

* NEW YORK. Dates for deer hunting apply to Adirondack region only; rest of State no open season. Exceptions Ulster, Orange and Sullivan Counties, Nov. 16–Nov. 1. Fawns at all times. Hunting with dogs, traps or devices of an kind prohibited.

WILD BIRDS.—Catching, killing, or the possession of live or dead, and robbing of nests prohibited at all times—excep English sparrow, hawk, crow, owl, and blackbird.

Hunting and shooting on Sunday prohibited.

Export of game or birds taken in the State is prohibited.

FISH LAWS, NEW YORK STATE, OPEN SEASON.

Trout—First Saturday in April to August 31. Minimum length, six inches. Not more than ten pounds of trout may be taken or transported by one person in one day. Trout must not be taken by any other method than angling.

SEVERAL STATES, 1917.

IN THE UNITED STATES.

Open season may be found by reversing dates. The difficulty of securing absolute accuracy in a table of this kind is very great, and absence in laws of many States of express legislation as to inclusion or exclusion of date upon which seasons open and close makes exactness almost an impossibility.

Compiled and corrected to December 1, 1916.

Lake Trout and Whitefish.—Lake trout not less than fifteen inches in length, and whitefish not less than 1¾ pounds in the round, may be taken and possessed from April 1 to September 30, both inclusive. Otsego whitefish, commonly called Otsego bass, not less than nine inches in length, may be taken and possessed from January 1 to October 31, both inclusive. A person may take by angling not to exceed ten lake trout in one day, but whenever two or more persons are angling from the same boat they may take not to exceed fifteen in one day. Whitefish may be taken in any number or quantity. Lake trout and whitefish may be taken in Lakes Erie and Ontario in any number or quantity at any time, and when so taken may be possessed.

Black Bass.—June 16 to November 30, inclusive. Minimum length, ten inches. Limit per day to one person, fifteen; to a boat, two or more persons, twenty-five; bass must not be taken by any other method than angling.

Pickerel and Pike.—May 1 to March 1, inclusive. Pike, minimum length, ten inches. Pickerel, minimum length (St. Lawrence River), twenty inches.

Pike Perch.—Not less than twelve inches in length may be taken and possessed in any number or quantity from May 30 to March 1, both inclusive.

Frogs.—Bullfrogs, green frogs and spring frogs may be taken in any manner, possessed, bought and sold from June 1 to March 31, both inclusive. They shall not be taken, possessed, bought or sold at any other time.

(Long Island, Open Season.)

Trout.—April 1 to August 31, inclusive.

Rainbow Trout.—April 16 to September 30, inclusive.

NOTE.—The State Fish and Game Laws apply where not in conflict with the Long Island provisions.

CHURCH FASTS.

THE Roman Catholic Days of fasting are the forty days of Lent, the Ember Days, the Fridays of the four weeks in Advent, and certain vigils or evenings prior to the greater feasts, while all Fridays of the year are days of abstinence from flesh meat. In the American Episcopal Church the days of fasting or abstinence to be observed, according to the Book of Common Prayer, are the forty days of Lent, the Ember Days, the three Rogation Days, and all the Fridays of the year except Christmas Day. In the Greek Church the four principal fasts are those in Lent, the week succeeding Whitsuntide, the fortnight before the Assumption, and forty days before Christmas.

EMBER AND ROGATION DAYS.

EMBER and Rogation Days are certain periods of the year devoted to prayer and fasting. Ember Days (twelve annually) about the beginning of the four seasons, and are the Wednesday, Friday, and Saturday after the first Sunday in Lent, in Spring; after the feast of Pentecost (Whit Sunday), Summer; after the festival of the Holy Cross, Autumn; and after the festival of St. Lucia, Winter. Ember Weeks are the weeks in which the Ember Days appear.

Rogation Days occur on the Feast of St. Mark, April 25, and on the three days immediately preceding Ascension Day.

DIVISIONS OF TIME.

THE interval between two consecutive transits of a fixed star over any meridian or the interval during which the earth makes one absolute revolution on its axis is called a *Sidereal* Day, and is invariable, while the interval between two consecutive transits of the Sun over any meridian is called an *Apparent* Solar Day, and its length varies from day to day by reason of the variable motion of the earth in its orbit and the inclination of this orbit to the equator on which time is measured.

A *Mean* Solar Day is the average or mean of all the apparent solar days in a year. *Mean Solar Time* is that shown by a well-regulated clock or watch, while *Apparent Solar Time* is that shown by a well-constructed sun-dial; the difference between the two at any time is the *Equation of Time*, and may amount to 16 minutes and 21 seconds. The Astronomical Day begins at noon and the Civil Day at the preceding midnight. The Sidereal and Mean Solar Days are both invariable, but one day of the latter is equal to 1 day, 3 minutes, and 56.555 seconds of the former.

The interval during which the earth makes one absolute revolution round the Sun is called a *Sidereal Year*, and consists of 365 days, 6 hours, 9 minutes, and 9.6 seconds, which is invariable.

The Tropical Year is the interval between two consecutive returns of the Sun to the Vernal Equinox. If this were a fixed point, the Sidereal and Tropical Years would be identical; but in consequence of the disturbing influence of the Moon and planets on the spheroidal figure of the earth, the Equinox has a slow, retrograde mean motion of 50″.26 annually, so that the Sun returns to the Equinox sooner every year than he otherwise would by 20 minutes 23.6 seconds; the Tropical Year, therefore, consists of 365 days, 5 hours, 48 minutes, and 46 seconds. The Tropical Year is not of uniform length; it is now slowly decreasing at the rate of .595 second per century, but this variation will not always continue.

Julius Cæsar, in B.C. 45, was the first to reform the calendar by ordering that every year whose date number is exactly divisible by 4 contain 366 days, and all other years 365 days. The intercalary day was introduced by counting the *sixth* day before the Kalends of March *twice;* hence the name bissextile, from bis, twice, and sex, six. He also changed the beginning of the year from 1st of March to the 1st of January, and also changed the name of the fifth month (Quintilis) to July, after himself. The average length of the Julian year is therefore 365¼ days, which, however, is too long by 11 minutes and 14 seconds, and this would accumulate in 400 years to about three days. The Julian Calendar continued in use until A.D. 1582, when the date of the beginning of the seasons occurred 10 days later than in B.C. 45, when this mode of reckoning time was introduced.

The Gregorian Calendar was introduced by Pope Gregory XIII. with the view of keeping the Equinox to the same day of the month. It consists of 365 days, but every year exactly divisible by 4 and the centurial years which are exactly divisible by 400 contain 366 days; and if in addition to this arbitrary arrangement the centurial years exactly divisible by 4,000 contain 366 days, the error in the Gregorian system will amount to only one day in about 200 centuries. If, however, 31 leap years were intercalated in 128 years, instead of 32 as at present, the calendar would be practically exact and the error would not amount to more than a day in 100,000 years. The length of the mean Gregorian Year may therefore be set down at 365 days, 5 hours, 49 minutes, 12 seconds. The Gregorian Calendar was introduced into England and her colonies in 1752, at which time the Equinox had retrograded 11 days since the Council of Nice in A.D. 325, when the festival of Easter was established and the Equinox occurred on March 21; hence September 3, 1752, was called September 14, and at the same time the commencement of the legal year was changed from March 25 to January 1, so that the year 1751 lost the months of January and February and the first 24 days of March. The difference between the Julian and Gregorian Calendars is now 13 days. Russia and the Greek Church still employ the Julian Calendar for civil and ecclesiastical purposes.

STANDARD TIME.

(From a statement prepared by the United States Naval Observatory, Washington, D. C.)

THE United States adopted standard time in 1883, on the initiative of the American Railway Association, and at noon of November 18, 1883, the telegraphic time signals sent out daily from the Naval Observatory at Washington were changed to the new system, according to which the meridians of 75°, 90°, 105° and 120° west from Greenwich became the time meridians of Eastern, Central, Mountain, and Pacific standard time respectively.

Theoretically, the divisions should be half way between the above meridians, but for general convenience the railroads change their time at the ends of railroad divisions, so that Eastern standard time is used from the Atlantic Coast to an irregular line through Buffalo, Salamanca, Pittsburgh, Wheeling, W. Va.; Holloway, Ohio; Huntington, W. Va.; Bristol, Tenn.; Norton, Va.; Asheville, N.C.; Atlanta, Augusta, Ga.; Columbia, S. C.; Central Junction, Ga. Some of these cities use Eastern and some Central time, while the railroads use one time in one direction and the other time in the other direction.

The same applies to the cities on the dividing lines between the Central and Mountain divisions, the line running through Bismarck, N. D., South Dakota, Nebraska, Colorado, Kansas, New Mexico, and Texas to El Paso; also to the cities on the dividing line between the Mountain and Pacific division, the line running through Montana, Idaho, Oregon, Utah, Nevada, and Arizona.

For Time Difference Table see Index.

Almost all countries throughout the world use standard time based on the meridians 15° apart from Greenwich, while some use standard time based on the longitude of their national observatories.

LEGAL HOLIDAYS IN THE VARIOUS STATES.

JANUARY 1. NEW YEAR'S DAY: In all States and District of Columbia, Porto Rico, Hawaii, and Alaska.

JANUARY 8. ANNIVERSARY OF THE BATTLE OF NEW ORLEANS: In Louisiana.

JANUARY 19. LEE'S BIRTHDAY: In Alabama, Arkansas, Florida, Georgia, North Carolina, South Carolina, and Virginia.

FEBRUARY 12. GEORGIA DAY: In Georgia.

FEBRUARY 12. LINCOLN'S BIRTHDAY: In California, Colorado, Connecticut, Delaware, Illinois, Indiana, Iowa, Kansas, Kentucky, Michigan, Minnesota, Montana, Nebraska, Nevada, New Jersey, New York, North Dakota, Oregon, Pennsylvania, South Dakota, Washington, West Virginia, and Wyoming.

FEBRUARY 14. ADMISSION DAY: In Arizona.

FEBRUARY 20. MARDI GRAS, SHROVE TUESDAY: In Alabama and Florida (in counties having a carnival); in Louisiana, in the parishes of Orleans, St. Bernard, Jefferson, St. Charles, and St. John the Baptist.

FEBRUARY 22. WASHINGTON'S BIRTHDAY: In all the States, District of Columbia, Porto Rico, Hawaii, and Alaska.

MARCH 2. ANNIVERSARY OF TEXAN INDEPENDENCE: In Texas.

MARCH 4. INAUGURATION DAY: In District of Columbia in years when a President of the United States is inaugurated.

MARCH 22. EMANCIPATION DAY: In Porto Rico.

MARCH 25. MARYLAND DAY: In Maryland.

APRIL 6. GOOD FRIDAY: In Alabama, Connecticut, Delaware, Florida, Louisiana, Maryland, Minnesota, New Jersey, Pennsylvania, Porto Rico, Tennessee.

APRIL 12. HALIFAX INDEPENDENCE RESOLUTIONS: In North Carolina.

APRIL 13. THOMAS JEFFERSON'S BIRTHDAY: In Alabama.

APRIL 19. PATRIOTS' DAY: In Maine and Massachusetts.

APRIL 21. ANNIVERSARY OF THE BATTLE OF SAN JACINTO: In Texas.

APRIL 26. CONFEDERATE MEMORIAL DAY: In Alabama, Florida, Georgia, and Mississippi.

MAY 10. CONFEDERATE MEMORIAL DAY: In North Carolina and South Carolina.

MAY (Second Friday). CONFEDERATE DAY: In Tennessee.

MAY 20. ANNIVERSARY OF THE SIGNING OF THE MECKLENBURG DECLARATION OF INDEPENDENCE: In North Carolina.

MAY 30. DECORATION DAY: In all the States and District of Columbia, Porto Rico, Hawaii, and Alaska, except Arkansas, Florida, Louisiana, Mississippi, North Carolina, South Carolina, and Texas. CONFEDERATE MEMORIAL DAY: In Virginia.

JUNE 3. JEFFERSON DAVIS'S BIRTHDAY: In Alabama, Florida, Georgia, Mississippi, South Carolina, and Texas. In Louisiana, known as "Confederate Memorial Day."

JUNE 11. KAMEHAMEHA DAY: In Hawaii.

JUNE 15. PIONEER DAY: In Idaho.

JULY 4. INDEPENDENCE DAY: In all the States, and District of Columbia, Porto Rico, Hawaii, and Alaska.

JULY 24. PIONEERS' DAY: In Utah.

JULY 25. LANDING OF AMERICAN TROOPS: Porto Rico.

AUGUST 1. COLORADO DAY: In Colorado.

AUGUST 16. BENNINGTON BATTLE DAY: In Vermont.

SEPTEMBER 3. LABOR DAY: In all the States and District of Columbia, Porto Rico, Hawaii, and Alaska.

SEPTEMBER (Third Saturday). REGATTA DAY: In Territory of Hawaii.

SEPTEMBER 9. ADMISSION DAY: In California.

SEPTEMBER 12. "DEFENDERS' DAY": In Maryland.

OCTOBER (First Monday). MISSOURI DAY (commemorative of Missouri history): In Missouri.

OCTOBER (Second Friday). FARMERS' DAY: In Florida.

OCTOBER 12. COLUMBUS DAY: In Alabama, Arizona, Arkansas, California, Colorado, Connecticut, Delaware, Idaho, Illinois, Indiana, Kansas, Kentucky, Maine, Maryland, Massachusetts, Michigan, Missouri, Montana, Nebraska, Nevada, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Pennsylvania, Porto Rico, Rhode Island, Texas, Vermont, Washington, West Virginia.

OCTOBER 18. ALASKA DAY: In Alaska.

OCTOBER 31. ADMISSION DAY: In Nevada.

NOVEMBER 1. ALL SAINTS' DAY: In Louisiana.

NOVEMBER 6. GENERAL ELECTION DAY: In Arizona, Arkansas, California, Colorado, Delaware, Florida, Idaho, Illinois, Indiana, Iowa, Louisiana, Maryland, Michigan, Minnesota, Missouri, Montana, Nevada, New Hampshire, New Jersey, New York, North Carolina, North Dakota, Ohio (from 12 M. to 5.30 P. M. only), Oklahoma, Oregon, Pennsylvania, Rhode Island (biennially in even years), South Carolina, South Dakota, Tennessee, Texas, Virginia, West Virginia, Washington, Wisconsin and Wyoming. In 1917 in States holding such elections the date is November 6. Election Day is not a legal holiday in States or Territories not listed.

NOVEMBER (Usually the last Thursday). THANKSGIVING DAY: Is observed in all the States and in the District of Columbia, Porto Rico, Hawaii, and Alaska, although it is not a statutory holiday in all.

DECEMBER 25. CHRISTMAS DAY: In all the States and the District of Columbia, Porto Rico, Hawaii, and Alaska.

ARBOR DAY: In some of the States. The date is not uniform.

SATURDAY AFTERNOON: In many of the States and cities and District of Columbia.

There is no National holiday, not even the Fourth of July. Congress has at various times appointed special holidays. In the second session of the Fifty-third Congress it passed an act making Labor Day a public holiday in the District of Columbia, and it has recognized the existence of certain days as holidays for commercial purposes, but, with the exception named, there is no general statute on the subject. The proclamation of the President designating a day of Thanksgiving only makes it a legal holiday in the District of Columbia and the Territories.

THE CENTRE OF POPULATION.

CENSUS YEAR.	Approximate Location by Important Towns.	From Point to Point in Direct Line.†
1790	23 miles East of Baltimore, Md	.....

* West Virginia formed part of Virginia until 1860. † Movement in miles during preceding decade.

MEMORABLE DATES.—(See also "Anniversaries.")

B. C.
1183 Fall of Troy.
1082 Era of the Great Pyramid
818 Carthage founded.
776 Olympic Era began.
753 Foundation of Rome.
588 Jerusalem taken by Nebuchadnezzar
536 Restoration of the Jews under Cyrus
509 Expulsion of Tarquins from Rome.
480 Xerxes defeated Greeks at Thermopylæ.
55 Cæsar conquered Britain.
4 Birth of Jesus Christ.

A. D.
29 The Crucifixion.
70 Jerusalem was destroyed by Titus.
313 Constantine converted to Christianity
410 The Romans abandoned Britain.
827 Egbert, first king of England, Oct. 14.
1066 Battle of Hastings, Norman Conquest
1096 The Crusades began.
1172 Ireland was conquered by Henry II.
1215 King John granted Magna Charta, June 15.
1265 First Representative Parliament in England.
1415 Battle of Agincourt, Oct. 25.
1431 Joan of Arc was burnt, May 30.
1453 Constantinople taken by the Turks.
1455 The Wars of the Roses began.
1462 The Bible was first printed at Mentz.
1471 Caxton set up his printing press.
1492 Columbus discovered America, Oct. 12
1517 The Reformation began in Germany.
1519 Cortez began the conquest of Mexico.
1535 The first English Bible printed.
1539 Monasteries were closed in England.
1558 Accession of Queen Elizabeth, Nov. 17
1565 Revolt of the Netherlands began.
1565 St. Augustine, Fla., settled.
1572 The St. Bartholomew Massacre, Aug. 24
1588 The Spanish Armada defeated, July.
1603 Union of England and Scotland.
1607 Jamestown, Va., was settled May 13.
1609 Hudson River first explored.
1616 Shakespeare died, April 23.
1618 Thirty Years' War in Germany began.
1620 Pilgrims by the Mayflower landed.
1623 Manhattan Island settled.
1634 Maryland settled by Roman Catholics
1636 Rhode Island settled by Roger Williams.
1640 Cromwell's Long Parliament assembled.
1649 Charles I. was beheaded, Jan. 30.
1653 Cromwell became Lord Protector.
1660 Restoration of the Stuarts.
1664 New York conquered from the Dutch.
1664 The great plague of London.
1666 The great fire of London began Sept. 2.
1679 Habeas Corpus Act passed in England.
1682 Pennsylvania settled by Wm. Penn.
1685 Revocation of the Edict of Nantes.
1688 James II. abdicated, Dec. 11.
1690 Battle of the Boyne, July 1.
1690 First newspaper in America; at Boston.
1704 Gibraltar was taken by the English.
1713 Peace of Utrecht, April 11.
1714 Accession of House of Hanover, Aug. 1
1715 First Jacobite Rebellion in Great Britain; the second in 1745
1720 South Sea Bubble.
1745 Battle of Fontenoy, April 30.
1756 Black Hole Suffocation in Calcutta.
1757 Clive won Battle of Plassey in India.
1759 Canada was taken from the French.
1765 Stamp Act enacted.
1773 Steam engine perfected by Watt.
1773 Tea destroyed in Boston Harbor, Dec. 16.
1775 Battle of Lexington, April 19.
1775 Battle of Bunker Hill, June 17.
1776 Battle of Fort Moultrie, Charleston, S. C., June 28.
1776 Declaration of Independence, July 4.
1776 Battle of Trenton, N. J., Dec. 25-26.
1777 Battle of Bennington, Vt., Aug. 16.
1777 Burgoyne's surrender, Oct. 17.
1779 Capt. Cook was killed, Feb. 14.
1781 Cornwallis's surrender at Yorktown, Oct. 19.
1788 First settlement in Australia, Jan. 26.

A. D.
1789 The French Revolution began July 14.
1789 Washington first inaug'ted President, April 30.
1793 Cotton-gin invented by Whitney.
1793 Louis XVI. of France executed, Jan. 21
1796 Vaccination discovered by Jenner.
1798 The Irish Rebellion.
1799 Bonaparte declared First Consul.
1801 Union of Great Britain and Ireland, Jan. 1.
1803 Louisiana purchased from the French
1804 Bonaparte became Emperor of France
1805 Battle of Trafalgar, death of Nelson.
1805 Battle of Austerlitz, Dec. 2.
1807 Fulton's first steamboat voyage.
1812 Second war with Great Britain.
1812 The French expedition to Moscow.
1813 Perry's victory on Lake Erie, Sept. 10.
1814 The printing machine invented.
1814 Scott's "Waverley" published.
1814 Battle of Lake Champlain, McDonough's Victory, Sept 11.
1815 Battle of New Orleans, Jan. 8.
1815 Battle of Waterloo, June 18.
1819 First steamship crossed the Atlantic.
1823 Monroe Doctrine declared, Dec. 2.
1828 First passenger railroad in U. S.
1830 Revolution in France, Orleanist succession.
1835 Morse invented the telegraph.
1835 Seminole War in Florida began.
1835 Great Fire in New York City, Dec. 16-17.
1837 Accession of Queen Victoria, June 20
1845 Texas annexed.
1846 Sewing machine completed by Howe.
1846 The Irish Potato Famine.
1846 British Corn Laws repealed, June 26.
1846 War with Mexico began.
1847 Battle of Chapultepec, Sept. 13.
1848 French Revolution. Republic succeeded.
1848 Gold discovered in California, Sept.
1851 Gold discovered in Australia, Feb. 12
1851 First International Exhibit'n, London
1852 Louis Napoleon became Emperor.
1853 Crimean War began.
1854 Japan opened by Commodore Perry.
1857 The Great Mutiny in India.
1857 The Dred Scott decision.
1857 First Atlantic cable message, Aug. 4.
1859 John Brown's raid into Virginia.
1860 South Carolina seceded, Dec. 20.
1861 Emancipation of the Russian serfs.
1861 Battle of Bull Run, July 21.
1862 Battle of Antietam, Sept. 17.
1863 Lincoln's Emancipation Proclamation, Jan. 1.
1863 Battle of Gettysburg, July 1-3.
1863 Battle of Chickamauga, Sept. 19-20.
1865 Lee surrendered at Appomattox, April 9.
1865 Pres. Lincoln assassinated, April 14.
1867 Maximilian of Mexico executed.
1867 The Dominion of Canada established
1869 Financial "Black Friday" in N. Y., Sept. 24.
1870 Franco-German War began, July 19.
1870 French capitulated at Sedan, Sept. 1.
1870 Rome became the capital of Italy.
1871 The German Empire re-established.
1871 The Irish Church was disestablished.
1871 The great fire in Chicago, Oct. 8-11.
1872 The great fire in Boston, Nov. 9.
1876 Prof. Bell perfected the telephone.
1876 Centennial Exposit'n at Philadelphia
1878 Paris Exposition.
1879 Incandescent Electric Lamp discovered by Edison, Oct. 21.
1881 President Garfield shot, July 2.
1882 Tuberculosis germ discovered by Dr. Koch.
1886 Charleston, S.C., earthquake, Aug. 31.
1888 Great Blizzard in Eastern part of U. S., March 11-14.
1889 Brazil became a Republic.
1889 Johnstown, Pa., flood, May 31.
1893 World's Fair at Chicago.
1893 Queen Liliuokalani of Hawaii deposed, Jan. 16.
1894 Chinese-Japanese War began.
1894 Hawaii made a Republic, July 4.
1894 Battle of Yalu, Sept. 17.

A. D.
1894 Capt. Dreyfus degraded, Dec. 23; restored to rank, July 12, 1906.
1895 Roentgen Ray discovered by W. K. Roentgen, a German physicist.
1895 Cuban Revolution began, Feb. 20.
1896 "Greater New York" bill signed May 11.
1897 The Turkish-Greek War.
1898 The Spanish-American War.
1898 Battles of San Juan and El Caney, July 1-3.
1898 Battle of Santiago de Cuba, July 3.
1898 Battle of Omdurman, Sept. 2.
1899 Universal Peace Conference.
1899 The South African War began.
1899 Philippine-American War began, Feb. 4.
1899 Windsor Hotel fire (N. Y.), Mar. 17.
1900 Paris Exposition.
1900 Boxer Insurrection in China.
1900 Hoboken docks' fire, June 30.
1900 The Galveston tornado, Sept. 8.
1901 Death of Queen Victoria.
1901 Aguinaldo captured by General Funston, Mar. 23
1901 Pan-American Exposition, May 1-Nov. 2.
1901 Assassination of President McKinley Sept. 6.
1901 Marconi signalled letter "S" across Atlantic from England to Newfoundland Dec 12. First message sent in Dec., 1902.
1902 Martinique destroyed by volcano.
1902 Pennsylvania coal strike.
1902 Cuban Republic inaugurated, May 20.
1902 Edward VII. crowned King of Great Britain, Aug. 9.
1903 Kishinev massacre.
1903 Republic of Panama established.
1904 The Great Fire in Baltimore, Feb. 7.
1904 The Russo-Japanese War began.
1904 St. Louis Exposition opened, April 30.
1904 Steamboat General Slocum burned, June 15.
1905 Battle of Mukden, Feb. 20-Mar. 15.
1905 Battle of Sea of Japan, May 27-28.
1905 Norway dissolved un on with Sweden.
1906 Eruption of Vesuvius, April 5-12.
1906 San Francisco earthquake and conflagration, April 18-19.
1908 American Battleship fleet nearly circumnavigated the Globe.
1908 Great earthquake in Southern Italy.
1908 Chelsea (Mass.) fire, April 12.
1910 The North Pole discovered, April 6.
1910 Republic of Portugal established.
1910 Union of South Africa, May 31.
1911 The Italian-Turkish War began.
1911 Postal Banks established in United States, Jan. 3.
1911 President Diaz of Mexico resigned.
1911 The South Pole discovered, Dec. 14.
1911 China proclaimed a Republic.
1912 Balkan War began.
1912 Steamship Titanic wrecked, April 14.
1913 Parcel Post System in U. S., Jan. 1.
1913 Ohio and Indiana floods, March 25-27.
1913 Rebellion in Mexico.
1913 Peace Palace at Hague dedicated.
1913 Steamer Volturno disaster, Oct. 9.
1914 General European war.
1914 S.S. Empress of Ireland sunk, May 29.
1914 Great fire in Salem, June 25.
1914 Panama Canal opened Aug. 15.
1914 City of Mexico invested by the Constitutionalists, Aug. 20.
1914 Cape Cod Canal opened.
1914 Japan dec'd war on Germany, Aug. 23.
1914 Austria dec'd war on Japan, Aug. 25.
1915 Panama-Pacific International Exposition opened, Feb. 20.
1915 Steamship Lusitania sunk, May 7.
1915 Great flood in Southern China, 80,000 drowned, July 14.
1915 Excursion steamer Eastland disaster, July 24.
1915 Wireless communication between Japan and United States established, July 27.
1915 Steamship Arabic sunk, Aug. 19.
1915 Italian liner Ancona sunk, Nov. 9.
1916 Teutonic Peace Proposal made.

TIME DIFFERENCE.

TWELVE O'CLOCK NOON STANDARD (EASTERN†) TIME IN THE UNITED STATES AS COMPARED WITH THE CLOCKS IN THE FOLLOWING CITIES:

Aden	8.00 P.M.	Dublin	4.35 P.M	Melbourne	3.00 A.M.*
Alexandria	7.00 P.M.	Hamburg	6.00 P.M.	Mexico City	10.24 A.M.
Amsterdam	5.20 P.M	Havana	11.31 A.M.	Natal	7.00 P.M.
Athens	7.00 P.M.	Havre	5.00 P.M.	Paris	5.00 P.M.
Berlin	6.00 P.M.	Hongkong	1.00 A.M.*	Petrograd	7.01 P.M.
Berne	6.00 P.M.	Honolulu	6.30 A.M.	Rio de Janiero	2.00 P.M.
Bogota	12.03 P.M.	Lima	12.00 NOON	Rome	6.00 P.M.
Bombay	10.30 P.M.	Lisbon	4.24 P.M.	Santiago (Chile)	12.00 NOON
Bremen	6.00 P.M.	Liverpool	5.00 P.M.	Sitka, Alaska	8.00 A.M.
Brussels	5.00 P.M.	London	5.00 P.M.	Stockholm	6.00 P.M.
Constantinople	7 00 P.M.	Madrid	5.00 P.M.	Vienna	6.00 P.M.
Copenhagen	6.00 P.M.	Manila	1.00 A.M.*	Yokohama	2.00 A.M.*

* At places marked * the time noted is in the morning of the FOLLOWING day.

"SUMMER" time, which is one hour later than that given in the table and which is to be used from May 1 to October 1, was introduced in 1916 in all countries of Europe except Russia, Greece, and the Balkan States. (See statement below.)

† "EASTERN" time includes: New York, Boston, Philadelphia, Baltimore, Washington, Richmond, Norfolk, Charleston, Buffalo, Pittsburgh, Montreal, Quebec, Ottawa, Toronto, etc.

"CENTRAL," which is one hour slo er than Eastern time, includes: Cleveland‡, Chicago, St. Louis, Minneapolis, St. Paul, Milwaukee, Kansas City, Omaha, Indianapolis, Cincinnati, Detroit‡, New Orleans, Memphis, Savannah, Pensacola, Winnipeg, etc.

"MOUNTAIN," which is two hours slower than Eastern time, includes: Denver, Leadville, Colorado Springs, Helena, Regina (N. W. T.), etc.

"PACIFIC," which is three hours slower than Eastern time, includes: San Francisco, Portland (Oregon), Victoria, Vancouver, Tacoma, Seattle, etc.

‡ By the law of the State of Ohio, which the Legislature recently refused to change, Central time is the legal time in all of that State. The trunk line railways at Cleveland, with the exception of the Erie, use Central time. There is a city ordinance which names Eas ern time as the city time, but as above stated, it is at variance with the State law. Detroit has likewise adopted Eastern time.

DAYLIGHT SAVING.

The movement known by this name proposes "to set the clock ahead" one hour in the Summer months, or to be more exact, from May 1 to October 1; the idea being to substitute an hour of sunlight at one end of the day for an hour of artificial light at the other.

The father of the movement was an Englishman, William Willett, who in 1907 published a booklet on the "Waste of Daylight." In 1908 a Daylight Saving bill was introduced in the House of Commons but failed of passage. The measure was opposed on the ground of being needless, deceptive and confusing.

On April 6, 1916, the German Federal Council passed a measure providing that on May 1, 1916, all clocks should be set ahead one hour. The measure was adopted for hygienic and economic reasons. Within three months twelve European countries had followed the lead of Germany and "Summer Time" was in use in Germany, Holland, Austria, Turkey, England, France, Norway, Sweden, Denmark, Italy, Switzerland, Spain and Portugal. Nova Scotia had the honor of introducing the new order in the New World.

Practically no confusion resulted; everything went on as before, people doing exactly the same things at the same hour o'clock, but in reality the whole routine of life had been brought one hour nearer sunrise. The scheme had brought about in the simplest way a vital change affecting millions. A simple "twist of the wrist" had given these nations their place in the sun.

In England, where the change was avowedly a war measure and not designed to outlast the war, a prime consideration was the conserving of the coal supply for naval and military uses. Also, it is estimated that the British people are saving $12,000,000 on gas and electric light bills in a single season and that New York City by this means could save $1,500,000 annually in gas alone. On the other side of the account is the fact that the English companies quickly advanced the price of gas and electric light to the consumer, to meet the loss to themselves through lessened demand. Also, motorists are taking advantage of the greater number of hours of daylight now to be enjoyed and the consumption of gasoline is increasing.

The advantages to be gained are somewhat a matter of latitude: England and Germany are in a position to reap the greatest benefits; Scotland has an excess of Summer daylight, anyway, as is likewise the case with Scandinavia; in locations like our own Southern States there is too little difference in the duration of daylight as between Summer and Winter to warrant the change.

[ARTHUR NEWTON.]

OLD ENGLISH HOLIDAYS.

THESE holidays, with their names, had their origin in mediæval England when the State religion was that of the Church of Rome, and they are still observed generally or in some parts of Britain.

JANUARY 6. TWELFTH DAY, or Twelfth-tide, sometimes called Old Christmas Day, the same as Epiphany. The previous evening is Twelfth Night, with which many social rites have long been connected.

*FEBRUARY 2. CANDLEMAS: Festival of the Purification of the Virgin. Consecration of the lighted candles to be used in the church during the year.

FEBRUARY 14. OLD CANDLEMAS: St. Valentine's Day.

MARCH 25. LADY DAY: Annunciation of the Virgin. April 6 is old Lady Day.

JUNE 24. MIDSUMMER DAY: Feast of the Nativity of John the Baptist. July 7 is old Midsummer Day.

JULY 15. ST. SWITHIN'S DAY. There was an old superstition that if rain fell on this day it would continue forty days.

AUGUST 1. LAMMAS DAY. Originally in England the festival of the wheat harvest. In the Church the festival of St. Peter's miraculous deliverance from prison. Old Lammas Day is August 13.

SEPTEMBER 29. MICHAELMAS: Feast of St. Michael, the Archangel. Old Michaelmas is October 11.

NOVEMBER 1. ALL-HALLOWMAS: All-hallows, or All Saints' Day. The previous evening is All-hallow-e'en, observed by home gatherings and old-time festive rites.

NOVEMBER 2. ALL SOULS' DAY: Day of prayer for the souls of the dead.

NOVEMBER 11. MARTINMAS: Feast of St. Martin. Old Martinmas is November 23.

DECEMBER 28. CHILDERMAS: Holy Innocents' Day.

Lady Day, Midsummer Day, Michaelmas, and Christmas are quarter (rent) days in England, and Whitsunday, Martinmas, Candlemas, and Lammas Day in Scotland.

Shrove Tuesday, the day before Ash Wednesday, and Maundy Thursday, the day before Good Friday, are observed by the Church. Mothering Sunday is Mid-Lent Sunday, in which the old rural custom obtains of visiting one's parents and making them presents.

* Also known as "Groundhog Day."

TABLE OF DAYS BETWEEN TWO DATES.

A TABLE OF THE NUMBER OF DAYS BETWEEN ANY TWO DAYS WITHIN TWO YEARS.

Day Mo.	Jan.	Feb.	Mar.	April.	May.	June.	July.	Aug.	Sept.	Oct.	Nov.	Dec.

30	395	....	454	485	515	546	576	607	638	668	699	730
31	396	...	455	....	516	....	577	608	...	669	..	730

The above table applies to ordinary years only. For leap year, one day must be added to each number of days after February 28.

EXAMPLE.—To find the number of days between June 3, 1900, and February 16, 1901: The figures opposite the third day in the first June column are 154; those opposite the sixteenth day in the second February column are 412. Subtract the first from the second product—*i. e.*, 154 from 412, and the result is 258, the number of days between the two dates.

EASTER SUNDAY.

A TABLE SHOWING THE DATE OF EASTER SUNDAY IN EACH YEAR OF THE NINETEENTH AND TWENTIETH CENTURIES.

ANNIVERSARIES.

DATES OF HISTORICAL EVENTS CUSTOMARILY OR OCCASIONALLY OBSERVED.

See also table of "Memorable Dates" and "Legal Holidays."

Jan. 17. Franklin born, 1706.
Jan. 19. Robert E. Lee born, 1807.
Jan. 27. German Emperor born, 1859.
Jan. 29. William McKinley born, 1843.
Feb. 12. Abraham Lincoln born, 1809.
Feb. 15. Battleship Maine blown up, 1898.
Feb. 22. George Washington born, 1732.
Mar. 5. Boston Massacre, 1770.
Mar. 15. Andrew Jackson born, 1767.
Mar. 17. St. Patrick's Day.
Mar. 18. Grover Cleveland born, 1837.
April 12. Henry Clay born, 1777.
April 12. Fort Sumter fired on, 1861.
April 13. Thomas Jefferson born, 1743.
April 19. Primrose Day in England; Lord Beaconsfield died, 1881.
April 23. Shakespeare born, 1564.
April 27. Gen. U. S. Grant born, 1822.
May 1. Dewey destroyed the Spanish fleet at Manila, 1898
May 13. Society of The Cincinnati organized by officers of Revolutionary Army, 1783.
May 18. The Czar of Russia born, 1868.
May 24. Queen Victoria born, 1819.
June 3. King George V. born, 1865.
June 14. Flag Day in the United States.
July 1. Dominion Day in Canada.
July 3. Cervera's fleet destroyed off Santiago, 1898.
July 12. Orangemen's Day.
July 14. The Bastile was destroyed, 1789.
July 16. Santiago surrendered, 1898.
Aug. 3. Invasion of Belgium by Germany, 1914.
Aug. 7. Gen. Nathanael Greene born, 1742.
Aug. 13. Manila surrendered to Americans, 1898.
Aug. 28. Montenegro became a kingdom, 1910.
Sept. 1. Capitulation of Sedan, 1870.
Sept. 14. City of Mexico taken by U. S. troops, 1847.
Sept. 15. William H. Taft born, 1857.
Oct. 27. Theodore Roosevelt born, 1858.
Nov. 5. Guy Fawkes Day in England. The Gunpowder Plot discovered, 1605.
Nov. 10. Martin Luther born, 1483.
Nov. 25. British evacuated New York, 1783.
Dec. 14. Washington died, 1799.
Dec. 28. Woodrow Wilson born, 1856.

THE FRENCH REVOLUTIONARY ERA.

In September, 1793, the convention decreed that the common era should be abolished in all civil affairs, and that the new French era should begin on September 22, 1792, the day of the true autumnal equinox, and that each succeeding year should begin at the midnight of the day on which the true autumnal equinox falls. The year was divided into twelve months of thirty days each. In ordinary years there were five extra days, from the 17th to the 21st of our September, and at the end of every fourth year was a sixth complimentary day. This reckoning was first used on November 22, 1793, and was continued until December 31, 1805, when it was discontinued, and the Gregorian calendar, used throughout the rest of Europe, was resumed. The following were the dates for the year 1804, the last complete year of this style of reckoning:

Vendemiaire	(Vintage),	September 23 to October 22.
Brumaire	(Foggy),	October 23 to November 22.
Frimaire	(Sleety),	November 22 to December 21.
Nivose	(Snowy),	December 22 to January 21.
Pluviose	(Rainy),	January 21 to February 20.
Ventose	(Windy),	February 20 to March 19.
Germinal	(Budding),	March 22 to April 21.
Floreal	(Flowery),	April 21 to May 20.
Prairial	(Pasture),	May 21 to June 20.
Messidor	(Harvest),	June 20 to July 19.
Thermidor	(Hot),	July 20 to August 19.
Fructidor	(Fruit),	August 19 to September 18.

The months were divided into three decades of ten days each, but to make up the 365 five were added at the end of September: Primidi, dedicated to Virtue; Duodi, to Genius; Tridi, to Labor; Quartidi, to Opinion, and Quintidi, to Rewards. To Leap Year, called Olympic, a sixth day, September 22 or 23, Sextidi, "the day of the Revolution," was added.

To each tenth day, thirty-six in all, were assigned thirty-six "Fetes Decadaires," decreed by the National Convention on the eighteenth Prairial, in honor of the Supreme Being and Nature, the Human Race, the French People, Benefactors of Humanity, Martyrs for Liberty, Liberty and Equality, the Republic, Liberty of the World, Love of Country, Hatred of Tyrants and Traitors, Truth, Justice, Modesty, Glory and Immortality, Friendship, Frugality, Courage, Good Faith, Heroism, Disinterestedness, Stoicism, Love, Conjugal Fidelity, Paternal Love, Maternal Tenderness, Filial Piety, Infancy, Childhood, Manhood, Old Age, Sickness, Agriculture, Industry, Our Ancestors, Our Posterity, Goodness.

READY-REFERENCE CALENDAR.

For ascertaining any Day of the Week for any given Time within Two Hundred Years from the introduction of the New Style, 1752,* *to* 1952 *inclusive.*

NOTE.—To ascertain any day of the week, first look in the table for the year required, and under the months are figures which refer to the corresponding figures at the head of the columns of days below. *For Example:*—To know on what day of the week July 4, 1917, will fall, look in the table of years for 1917, and in a parallel line under July is figure 7, which directs to column 7 in which it will be seen that July 4 falls on Wednesday.

* 1752 same as 1772 from January 1 to September 2. From September 14 to December 31 same as 1780 (September 3–13 were omitted).

Day of the Month.	Day of the Week.	Calendar for Boston, New England, N. Y. State, Michigan, Wisconsin, N. and S. Dakota, Washington, and Oregon.			Calendar for New York City, Connecticut, Pennsylvania, Ohio, Indiana, Illinois, Iowa, Nebraska, Wyoming, and Northern California.			Calendar for Washington, Virginia, Kentucky, Missouri, Kansas, Colorado, Utah, Nevada, and Central California.			Calendar for Charleston. Georgia, Alabama, Louisiana, Arkansas, Texas, New Mexico, Arizona, and Southern California.

Ritualistic Calendar.

COLORS FOR THE ALTAR IN USE IN RITUALISTIC EPISCOPAL CHURCHES IN THE UNITED STATES.

White—From the First Service (First Vespers) of Christmas Day to the Octave of Epiphany inclusive (except on the Feasts of Martyrs); on Maundy Thursday (for the celebration); from the First Service of Easter Day to the Vigil of Pentecost (except on Feasts of Martyrs and Rogation Days); on Trinity Sunday, Conversion of St. Paul, Purification, Annunciation, St. John Baptist, St. Michael, St. Luke, All Saints, Saints who are not Martyrs, and Patron Saints (Transfiguration and Dedication of Church).

Red—From First Vespers of Pentecost to the First Vespers of Trinity Sunday (which includes Ember Days), Holy Innocents (if on a Sunday), and Feasts of all Martyrs.

Violet—From Septuagesima to Maundy Thursday (Easter Eve); Advent Sunday to Christmas Eve; Vigils, Ember Days (except in Whitsun Week), and Rogation Days; Holy Innocents (unless on Sunday).

Black—Good Friday and at funerals. *Green*—All other days.

These regulations as to colors are general. A more minute code changing with each year is published in the church almanacs.

Corn	Apr. 20 to May 30	Medium loam	8 to 12 tons manure	6 to 8 qts	16-18
Wheat	Sept. 20 to Oct. 20	Loam	8 tons; 300 lbs. fer.	2 bush	41-43
Oats	Mar. to May	Moist clay loam	8 tons; 300 lbs. fer.	2 to 2½ bush	16 17
Barley	Mar. to May	Clay loam	8 tons; 300 lbs. fer.	2 to 2½ bush	13-16
Rye	Sept. 1 to Oct. 1	Sand or gravel loam	8 tons; 300 lbs. fer.	1½ bush	40-43
Buckwheat	June to July	Loam	5 tons	½ to 1½ bush	8-10
White beans	May to June	Sandy loam	8 tons	1½ bush	13-14
Potatoes	Mar. to May	Loam	10 to 18 tons	8 to 15 bush	14-22
Sweet potatoes	May to June	Sandy loam		10 to 12 bush	10-15
Cabbage	Mar. to July	Clay or sandy loam	300 to 600 lbs. fer.	4 to 8 oz	8-15
Turnips	July	Loam		2 to 5 lbs	10-12
Mangels	May	Loam	10 to 20 tons	10 to 15 bush	15-18
Flax	May	Limestone loam		20 qts	8-10
Tobacco	Seed bed Mar.	Sandy loam	Commercial fer.		15-20
Hay, timothy	Aug. to Oct	Clay loam		6 to 8 qts	
Hay, clover	Feb. to Apr.	Clay loam		6 qts	
CENTRAL AND WESTERN STATES.					
Corn	Apr. 1 to June 1	Black or sandy loam	5 to 10 tons	6 qts	16-20
Wheat	Fall or Spring	Strong loam	8 tons	2 bush	40-42
Oats	Apr. 1 to May 1	Clay loam	8 tons	2 to 3 bush	12-14
Barley	Fall or Spring (1).	Clay loam	8 tons	2 bush	11-13
Rye	Sept. 1 to 30	Light loam	8 tons	1 to 2 bush	35-40
Buckwheat	June	Clay loam	5 tons	1 to 2 bush	10-12
White beans	May 10 to June 10.	Clay loam	8 tons	1½ bush	12
Potatoes	Mar. 15 to June 1	Sandy loam	5 to 10 tons	5 to 10 bush	10-20
Turnips	July 15 to Aug. 30.	Loam or muck	8 to 10 tons	1 to 6 lbs	10-16
Mangels	Apr. 1 to May 15	Sandy loam	8 to 12 tons	6 to 8 lbs	22-24
Flax	Mar. 15 to May 15.	Loam	10 to 15 tons	2 to 3 pecks	15-20
Tobacco	Seed bed, Mar.	Sandy loam	8 to 10 tons	Oz. to 6 sq. rd.	15-18
Hay	Apr. to May	Clay loam	10 tons	8 to 15 lbs	
SOUTHERN STATES.					
Cotton	Feb. to May 15	Sandy loam (2)		1 to 3 bush	20-30
Corn	Feb. to June	Rich loam	10 bush. cot. seed	8 qts	18-20
Wheat	Sept. to Nov	Clay loam (2)	8 tons	2 bush	43
Oats	Feb., May, Sept.	Clay loam (2)	8 to 10 tons	2½ bush	17
Barley	Apr. to May	Clay loam (2)	8 to 10 tons	2½ bush	17
Rye	Sept. to Oct	Clay loam (2)	10 tons	1½ bush	43
White beans	Mar. to May	Light loam	8 tons	1 to 2 bush	7-8
Cabbage	Oct., Mar. to May.	Light loam	6 to 10 tons	¼ to ½ lb	14
Watermelons	Mar. 1 to May 10	Rich, light loam	5 tons; 300 lbs. fer.	2 to 7 lbs	16-20
Onions	Feb. 1 to Apr. 10	Loam or muck			16-24
Potatoes	Jan., Feb. to Apr.	Light loose loam	8 to 12 tons	8 to 10 bush	11-15
Sweet potatoes	May to June	Sandy loam		10 to 12 bush	12-15
Pumpkins	Apr. 1 to May 1	Rich, light loam		4 to 7 lbs	17-20
Tomatoes	Jan. 1 to Feb. 19	Rich, sandy loam		4 to 9 oz	14-20
Turnips	Feb., Aug., Apr.	Rich, light loam		2 to 6 lbs	8-12
Tobacco	Seed bed, Mar.	Sandy loam	8 to 15 tons	oz. to 6 sq. rd.	18-20
Cow peas	May 1 to July 15	Sandy loam	200 to 300 lbs. phos.	2 to 5 pecks	6-8

(1) The standard varieties of seed planted in the several sections of the United States are as follows: Corn—New England, leaming, sanford, flint; Middle States, leaming, white dent, yellow dent; Central and Western States, leaming, sanford, flint, white dent; Southern States, hickory king, goard-seed, Cox prolific. Wheat—Middle States, fultz; Central and Western States, fultz, poole, fife; Southern States, fulcaster. Oats—New England, white; Middle States, white, black; Central and Western States, gray Norway, silver mine, Russian; Southern States, Texas rustproof. Barley—Middle States, mansbury; Southern States, Tennessee Winter. Rye—New England, white; Middle States, white, Winter; Central and Western States, Winter; Southern States, excelsior Winter. Buckwheat—Middle States, silver hull; Central and Western States, silver hull. Potatoes—New England, green mountain, carmen 3, rose; Middle States, rose, carmen 3, rural 2; Central and Western States, hebron, rural, early rose, early Ohio. Tobacco—Central and Western States, yellow prior, Spanish, white burley. Hay, clover—Middle States, medium red. Sweet Potatoes—Middle States, yellow Jersey; Southern States, yellow Jersey. Cotton—Southern States, Texas stormproof. Spring wheat is to some extent grown in Ohio, Indiana, Illinois and many other States. It matures in eighteen to twenty weeks.

(2) In Texas the black loam is a good soil for cotton, corn, wheat and most other field crops.

THE MOON.

Of all the secondary planets the earth's satellite is by far the most interesting and important. The moon completes her circuit around the earth in a period whose mean or average length is 27 days 7 hours 43.2 minutes; but in consequence of her motion in common with the earth around the sun, the mean duration of the lunar month, that is, the time from new moon to new moon, is 29 days 12 hours 44.05 minutes, which is called the moon's synodical period. If the earth were motionless in space the moon's orbit would be nearly an ellipse, having the earth in one of the foci; hence her distance from the earth varies during the course of a lunar month. Her mean distance from the earth is 238,862 miles. Her maximum distance, however, may reach 252,830 miles, and the least distance to which she can approach the earth is 221,520 miles. Her diameter is 2,160 miles, and if we deduct from her distance from the earth the sum of the two radii of the earth and moon, viz., 3,963 and 1,080 miles, respectively, we shall have for the nearest approach of the surfaces of the two bodies 216,477 miles. Her orbit is a very intricate one, because the earth in moving around the sun carries the moon along with it; hence the latter is sometimes within and sometimes without the earth's orbit. Its form is that of a serpentine curve, always *concave* toward the sun, and its plane is inclined to the plane of the earth's orbit at an angle of 5° 9′, in consequence of which our satellite appears sometimes above and sometimes below the plane of the earth's orbit, through which she passes twice in a revolution. These points of intersection with the ecliptic are called nodes, and it is only at or near them that eclipses can occur. The nodes have a retrograde motion, which causes them to make an entire revolution in 18 years 218 days 21 hours 22 minutes and 46 seconds. Both sun and moon return to a node after 18 years and 11 days, so that an eclipse is followed by another of the same general character at the end of this period, which was well known to the ancients, who called it the Saros, and which was made use of by them in roughly predicting eclipses.

The moon always presents the same face to us, as is evident from the permanency of the various markings on her surface. This circumstance proves that she revolves on an axis, and the time of rotation is exactly equal to the time of revolution around the earth, viz., 27.32166 days. The moon's axis is not perpendicular to the plane of her orbit, but deviates therefrom by an angle of about 6° 41′. In consequence of this fact the poles of the moon lean alternately to and from the earth. When the north pole leans toward the earth we see somewhat more of the region surrounding it, and somewhat less when it leans the contrary way. This displacement is known by the name of libration in latitude.

The moon's motion on her axis is uniform, but her angular velocity in her orbit is subject to slight variations by reason of the form of her orbit; hence it happens that we sometimes see a little more of the eastern or western edge at one time than at another. This phenomenon is known as libration in longitude.

The moon's surface contains about 14,657,000 square miles, or nearly four times the area of Europe. Her volume is 1-49 and her mass 1-81 that of the earth, and hence her density is about 3-5 that of the earth, or about 3 2-5 that of water. At the lunar surface gravity is only 1-6 of what it is at the earth, and therefore a body which weighs 6 pounds here would weigh only 1 pound there.

The centre of gravity of the earth and moon, or the point about which they both actually revolve in their course around the sun, lies *within* the earth; it is 1,063 miles below the surface.

The attractive force of the moon acting on the water of our oceans is mainly instrumental in raising them into protuberances or tides in such a manner as to give the total mass a spheroidal figure whose principal axis would continually coincide with the line joining the centres of the earth and moon, but in consequence of the resistance which this movement of the water encounters from continents and islands, as well as from the liquid molecules themselves, the tidal wave can never arrive at any place until about one hour after the moon has crossed the meridian of the place.

The moon has no atmosphere and no water. The suddenness with which the stars are occulted by the moon is regarded as a conclusive proof that a lunar atmosphere does not exist, and the spectroscope furnishes negative evidence of the same character.

In remote ages the lunar surface was the theatre of violent volcanic action, being elevated into cones and ridges exceeding 20,000 feet high, and at other places rent into furrows or depressions of corresponding depth. The lunar volcanoes are now extinct. A profound silence reigns over the desolate and rugged surface. It is a dead world, utterly unfit to support animal or vegetable life.

THE EARTH'S ATMOSPHERE.

The earth's sensible atmosphere is generally supposed to extend some forty miles in height, probably further, but becoming at only a few miles from the surface of too great a tenuity to support life. The condition and motions of this aerial ocean play a most important part in the determination of climate, modifying, by absorbing, the otherwise intense heat of the sun, and, when laden with clouds, hindering the earth from radiating its acquired heat into space.

HALLEY'S COMET.

Of the great number of comets which have temporarily visited our solar system or have become permanent members of it none has surpassed Halley's in historical associations. It has a record dating back to B. C. 240; its visitations spread alarm and consternation throughout Europe during the Middle Ages; was the first whose return was predicted by an Astronomer Royal of England, and will therefore, for these reasons, be an object of great scientific interest for all time. For the information of those who appreciate such matters the following are the elements of its orbit as deduced from the last visitation:

Perihelion Passage 1910, April, 19.67. Greenwich Mean Time.

Eccentricity = 0.967281.
Semi-axis major = 17.9468.
Perihelion distance = 0.58720.
Inclination to the plane of the earth's orbit = 17° 47′ 18″.
Longitude of the ascending node = 57° 16′ 12″.
Distance from perihelion to node = 111° 42′ 16″.
Daily motion (mean) = 46″ .669.
Period = 76.030 years.*
Motion, retrograde.

The semi-axis major and the perihelion distance are expressed in terms of the earth's mean distance from the sun, taken as unity. See also article on Halley's Comet and on Comets in ALMANACS of 1910 and 1911.

*The periodic time varies considerably by reason of the attraction of the planets. Its average duration is about 76.8 years.

THE MOON'S PHASES, 1917.

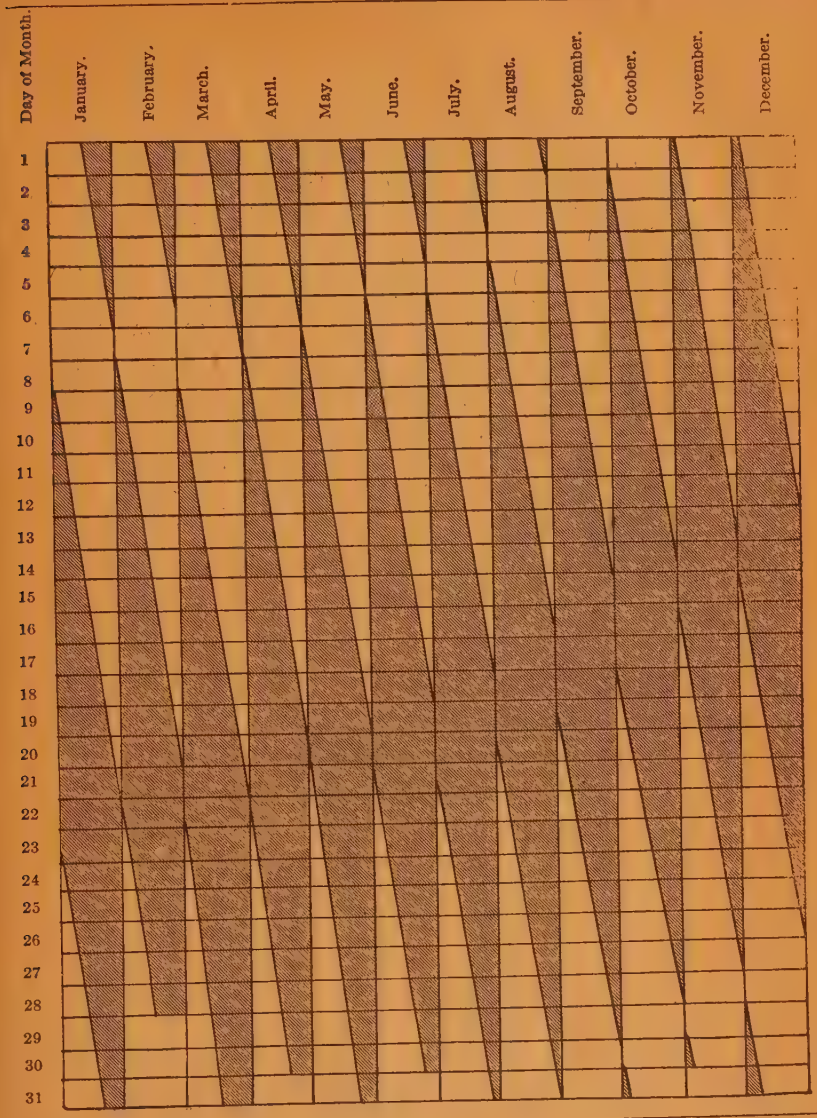
MOONLIGHT CHART, 1917.



EXPLANATION.—The white spaces show the amount of moonlight each night. January 23, February 21, etc., the time of new moon, there is no moonlight for two or three nights; January 29, February 28, etc., the moon sets at or near midnight, when the first half of the night has moonlight; January 8, February 6, etc., full moon, when moonlight lasts the whole night; January 16, February 14, etc., the moon rises at or near midnight, when the latter half of the night has moonlight.

From June 16 to August 1 both the upper and lower transits take place during daylight. The azimuth at the time of greatest Eastern or Western elongation can be easily computed from the formula:

$$\sin A = \frac{\sin p}{\cos l}$$

where A denotes the azimuth, p the polar distance, and l the latitude of the place.

DATE OF GREATEST ELONGATION.

To find the time of greatest Eastern or Western elongation, let H denote the hour angle, and l and p as before, then we shall have

$$\cos H = \tan p \tan l.$$

And the hour angle in *mean time* is

$$Hm = H^\circ \times 0.0664846.$$

This quantity, Hm, added to or subtracted from the time of transit given above, according to the elongation required, will give the *mean time* of the *greatest* elongation at any place whose north latitude is l.

STAR TABLE.

To find the time of the star's transit, add or subtract, according to the sign, the number in the second column of figures to the date of the transit of the pole star given above. Thus, for α Andromedæ February 11: Lower Transit of Pole Star is 4h. 6m. 19s A. M., to which add 10h. 31.8m. and we have 2h. 38m. P. M.; for December 1, we find 7h. 24m. P. M., etc.

APPROXIMATE PARALLAX AND DISTANCE IN LIGHT-YEARS OF SOME OF THE PRINCIPAL FIXED STARS.

By light-years is to be understood the number of years light requires to travel from the star to us.

	Parallax. ″	Light-Years.		Parallax. ″	Light-Years.

α Bootis (Arcturus)	0.127	26	85 Pegasi	0.054	60
α Centauri	0.916	3.6			

The determination of stellar parallax is one of the most difficult and refined problems in practical or observational astronomy. It is to find the angle which the semi-diameter of the earth's orbit subtends at the star—an angle always very small, as seen from the above table, and which cannot be measured directly but by various processes too complicated to be explained here.

ASTRONOMICAL PHENOMENA FOR THE YEAR 1917.

ASTRONOMICAL SIGNS AND SYMBOLS.

☉ The Sun.
☾ The Moon.
☿ Mercury.
♀ Venus.
⊕ The Earth.

♂ Mars.
♃ Jupiter.
♄ Saturn.
♅ Uranus.
♆ Neptune.

☌ Conjunction.
□ Quadrature.
☍ Opposition.
☊ Ascending Node.
☋ Descending Node.

Two heavenly bodies are in "conjunction" (☌) when they have the same *Right Ascension*, or are on the *same meridian, i. e.*, when one is due *north* or *south* of the other; if the bodies are near each other as seen from the earth, they will rise and set at the same time; they are in "opposition" (☍) when in opposite quarters of the heavens, or when one rises just as the other is setting. "Quadrature" (□) is half way between conjunction and opposition. By "greatest elongation" is meant the greatest apparent *angular* distance from the sun; the planet is then generally most favorably situated for observation. Mercury can only be seen with the naked eye at this time. When a planet is in its "ascending" (☊) or "descending" (☋) node it is crossing the plane of the earth's orbit. The term "Perihelion" means nearest, and "Aphelion" furthest, from the sun. An "occultation" of a planet or star is an eclipse of it by some other body, usually the moon.

ASTRONOMICAL PHENOMENA FOR THE YEAR 1917 —*Continued.*

I.—ECLIPSES.

The year 1917 is notable for having seven eclipses, the greatest number possible; there were seven eclipses in 1805 and will be again in 1935 and in 1982; these four are the only occurrences in the nineteenth and twentieth centuries.

The eclipses for 1917 will include four of the sun and three of the moon, as follows:

1. A total eclipse of the moon January 7-8, visible at New York and generally in North America.

Places.	Moon Enters Shadow.	Totality Begins.	Totality Ends.	Moon Leaves Shadow.
	D. H. M.	D. H. M.	D. H. M.	D. H. M.
Boston	Jan. 8 1 6 A.M.	Jan. 8 2 16 A.M.	Jan. 8 3 44 A.M.	Jan. 8 4 54 A.M.
New York	Jan. 8 12 54 A.M.	Jan. 8 2 4 A.M.	Jan. 8 3 32 A.M.	Jan. 8 4 42 A.M.
Washington	Jan. 8 12 42 A.M.	Jan. 8 1 52 A.M.	Jan. 8 3 20 A.M.	Jan. 8 4 30 A.M.
Charleston	Jan. 8 12 31 A.M.	Jan. 8 1 41 A.M.	Jan. 8 3 9 A.M.	Jan. 8 4 19 A.M.
Cincinnati	Jan. 8 12 12 A.M.	Jan. 8 1 22 A.M.	Jan. 8 2 50 A.M.	Jan. 8 4 0 A.M.
Chicago	Jan. 7 12 0 P.M.	Jan. 8 1 10 A.M.	Jan. 8 2 38 A.M.	Jan. 8 3 48 A.M.
New Orleans	Jan. 7 11 50 P.M.	Jan. 8 1 0 A.M.	Jan. 8 2 28 A.M.	Jan. 8 3 38 A.M.
Denver	Jan. 7 10 50 P.M.	Jan. 7 12 0 P.M.	Jan. 8 1 28 A.M.	Jan. 8 2 38 A.M.
Ogden	Jan. 7 10 22 P.M.	Jan. 7 11 32 P.M.	Jan. 8 1 0 A.M.	Jan. 8 2 10 A.M.
San Francisco	Jan. 7 9 41 P.M.	Jan. 7 10 51 P.M.	Jan. 8 12 19 A.M.	Jan. 8 1 29 A.M.

The first apparent contact of the moon's limb with the shadow is 117 degrees from the north point of the moon toward the east. The last contact is 91 degrees from the north point of the moon toward the west.

2. A partial eclipse of the sun January 23, invisible in America. Visible on the continent of Europe and in adjacent portions of Asia and Africa. Magnitude of greatest eclipse 0.725, the sun's diameter being unity.

3. A partial eclipse of the sun June 19, invisible in the United States. Visible in the Canadian Northwest, Alaska, Siberia, and north polar regions.

Magnitude of greatest eclipse 0.473, the sun's diameter being unity.

4. A total eclipse of the moon July 4-5, invisible in North America. Visible generally in the Eastern Hemisphere, and the ending visible in South America.

5. A small partial eclipse of the sun July 19, visible only in the Indian and Antarctic Oceans.

Magnitude of greatest eclipse 0.086, the sun's diameter being unity.

6. An annular eclipse of the sun December 14, invisible in the Northern Hemisphere. Visible as a partial eclipse throughout the south polar regions.

The path of the central or annular eclipse nearly spans the distance between Patagonia and Tasmania, and passes directly over the South Pole.

7. A total eclipse of the moon December 27-28, visible in New York and generally in North America.

Places.	Moon Enters Shadow.	Totality Begins.	Totality Ends.	Moon Leaves Shadow.
	D. H. M.	D. H. M.	D. H. M.	D. H. M.

Boundary line in miles	280	None	220	250	160
United States shore line in miles* (approx.)	735	1,200	470	350	230

* Shore line scaled in steps of 5 miles and excludes islands.

THE MAGNETIC POLES.

THE geographical poles of the earth are the extremities of the imaginary line passing through its centre of gravity and about which it revolves, and are therefore symmetrically located with regard to the equator.

The magnetic poles, however, are not coincident with the geographical poles, nor are they diametrically opposite to each other. Prior to the recent attempt of Amundsen to determine the north magnetic pole, the only other was by Capt. James Ross in June, 1831, who found the dip of the magnetic needle to be 89° 59′ .5, in latitude 70° 5′ .2 N. and longitude 96° 45′ .8 W., which is in King William Land, Canada. The result of Amundsen's observations has not yet been published by the Norwegian authorities.

For the south magnetic pole, from a consideration of all the results available, according to the United States Coast and Geodetic Survey, the position latitude 72° .7 S. and longitude 156° E. has been tentatively adopted. These values are only roughly approximate, and for that reason are given only in degrees and tenths.

By reason of the annual variation of the magnetic needle, it is believed that the magnetic poles are not stationary, but have a slow motion around the geographical poles. The subject is shrouded in mystery and constitutes one of the many as yet unsolved problems in terrestrial physics.

ASTRONOMICAL CONSTANTS.

MEAN solar parallax, 8″.80. Nutation constant, 9″.21.
Aberration constant, 20″.47. Annual precession, 50″.2564+0″.000222 (t—1900).
Obliquity of the ecliptic, 23° 27′ 8″.26—0″.4684 (t—1900).
Annual diminution of obliquity, 0″.4684.
Moon's equatorial horizontal parallax, 57′ 2″.63.
Moon's mean distance from the earth (centre to centre), 238,862 miles.
Sun's mean distance from the earth (astronomical unit), 92,897,400 miles.
Velocity of light, 186,324 miles per second.
Light travels unit of distance—viz. 92,897,400 miles in 498.580 seconds.
Length of the Year—Tropical (equinox to equinox), 365.2421988 days.
Sidereal or absolute revolution, 365.2563604 days.
Anomalistic (from perihelion to perihelion), 365.2596413 days.
Length of Day—Sidereal, 23 hours 56 minutes 4.091 seconds (mean solar time). Mean solar, 24 hours 3 minutes 56.555 seconds (sidereal time).
Length of the Month—Synodical (from new moon to new moon), 29 days 12 hours 44 minutes 2.8 seconds. Tropical, 27 days 7 hours 43 minutes 4.7 seconds. Sidereal (absolute revolution), 27 days 7 hours 43 minutes 11.5 seconds. Anomalistic (from perigee to perigee), 27 days 13 hours 18 minutes 33.1 seconds.
Dimensions of the Earth—Equatorial radius, 3963.34 miles. Polar radius, 3949.99 miles. Eccentricity of the oblate spheroid, 0.0819981

EARTHQUAKE AREAS OF THE EARTH.

FROM Major de Montessus de Balore's catalogue of 130,000 shocks, indicating with some scientific accuracy how the symptoms of seismic activity are manifested over the earth's surface. The period of observation includes generally the last fifty years; but there is no reason to suppose that a longer time would materially affect the proportionate numbers.

Area.	Earthquakes.	Area.	Earthquakes.	Area.	Earthquakes.
Scandinavia.....	646	Greece.....	10,306	United States, Atlantic Coast.....	937
British Isles.....	1,139	Russia.....	258	Mexico.....	5,586
France.....	2,793	Asia Minor.....	4,451	Central America.....	2,739
Spain and Portugal.....	2,656	India.....	813	West Indies.....	2,561
Switzerland	3,895	Japan.....	27,562	South America.....	8,081
Italy.....	27,672	Africa.....	179	Java.....	2,155
Holland and North Germany.....	2,326	Atlantic Islands.....	1,704	Australia and Tasmania.	83
Sicily.....	4,331	United States, Pacific Coast.....	4,467	New Zealand.....	1,926

The most shaken countries of the world are Italy, Japan, Greece, South America (the Pacific Coast), Java, Sicily, and Asia Minor. The lands most free from these convulsions are Africa, Australia, Russia, Siberia, Scandinavia, and Canada. As a rule, where earthquakes are most frequent they are most severe. But to this general statement there are exceptions—Indian shocks, though less numerous, being often very disastrous. Loss of life in many cases depends, however, on density of population rather than on the intensity of the earth movement. Numerically, also, France has registered more seismic tremors than Spain and Portugal, but France in historic times has experienced no earthquake disaster approaching the havoc wrought by the one calamity at Lisbon.

HUMIDITY.

MEAN RELATIVE HUMIDITY, IN PERCENTAGES.

From a table prepared by the United States Weather Bureau, showing the monthly and annual values of relative humidity at regular Weather Bureau stations in the United States, based upon observations made at 8 A.M. and 8 P.M. respectively, 75th meridian time and covering a period of about 14 years of record.

THE GEOLOGICAL STRATA.

THE strata composing the earth's crust is divided by most geologists into two great classes: 1. Those generally attributed to the agency of water. 2. To the action of fire; which may be subdivided as follows: (*a*) Aqueous formations, stratified, rarely crystalline (sedimentary or fossiliferous rocks; metamorphic or unfossiliferous). (*b*) Igneous formations, unstratified, crystalline (volcanic, as basalt; plutonic, as granite).

The geological record is classified into five main divisions or periods: 1. The Archæan, lifeless and dawn of life. 2. The Palæozoic (ancient life). 3. The Mesozoic (middle life). 4. The Cenozoic (recent life). 5. Quaternary, the age in which man's first appearance is indicated.

Periods.		Eras.		Series.	Subdivisions.
Quaternary Period.	Age of Primeval Man.	Quaternary or Post Tertiary.		3. Recent. 2. Champlain. 1. Glacial.	Pleistocene.
Cenozoic Period.	Age of Mammals.	Tertiary Era.		4. Pliocene.	English Crag.
				3. Miocene.	Upper Molasse.
				2. Oligocene.	Rupelian and Tongrian of Belgium.
				1. Eocene.	
Mesozoic Period.	Age of Reptiles.	Cretaceous Era.		4. Laramie.	Upper Chalk.
				3. Colorado.	Lower Chalk. Chalk Marl.
				2. Dakota.	Gault.
				1. Lower.	Neocomian. Lower Greensand.
		Jura-Trias.	Jurassic	3. Purbeck.	Wealden. Purbeck, Portland, Kimmeridge.
				2. Oölite.	Oxford Oölites. Lower or Bath Oölite.
				1. Lias.	1. Lower Lias. 2. Marlstone. 3. Upper Lias.
			7. Triassic.	4. Rhætic.	Kössen beds, Dachstein beds; Alpine Keuper.
				3. Upper.	[Trias, in part.
				2. Middle.	Muschelkalk Bunter-Sandstein.
				1. Lower.	
Palæozoic Period.	Age of Coal Plants.	Carboniferous Era.		3. Permian.	2. Magnesian Limestone.
				2. Carboniferous.	1. Lower Red Sandstone, or Rothli-
					3. Upper Coal-Measures. [gendes.
					2. Lower Coal-Measures.
				1. Subcarboniferous.	1. Millstone Grit. Lower Carboniferous. Mountain Limestone.
	Age of Fishes.	Devonian Era.		5. Catskill and Chemung.	Catskill Red Sandstone. } Old Red Sandstone.
				4. Portage.	Chemung.
				3. Hamilton.	Portage. Genesee Slate.
				2. Coniferous.	Hamilton beds. Marcellus Shale.
				1. Oriskany.	Upper Helderberg, Schoharie, Grit. Oriskany Sandstone.
	Age of Invertebrates.	Upper Silurian.		3. Lower Helderberg.	Lower Helderberg.
				2. Onondaga.	Onondaga Salt Group. Salina beds. Water Lime.
				1. Niagara.	3. Niagara Group. Wenlock Group.
					2. Clinton Group. } Upper Llandovery.
					1. Medina Sandstone.
		Lower Silurian.		3. Trenton.	3. Hudson River beds. Cincinnati Group. Lower Llandovery.
					2. Utica Shales.
					1. Trenton Limestone. Caradoc and Bala Limestone.
				2. Chazy.	Black River Limestone. Chazy Limestone.
				1. Calciferous.	{ Calciferous Sandrock. Magnesian stone.
		Cambrian.			Lower, Middle, and Upper Cambrian.
Archæan Period.				Eozoic (dawn of life). Azoic (lifeless).	1. Laurentian. Huronian.

MAGNETIC DECLINATIONS.

OR VARIATION OF COMPASS FOR JANUARY, 1917—WITH THE ANNUAL CHANGE BETWEEN 1910 AND 1915 FOR THE PRINCIPAL PLACES IN THE UNITED STATES.

A plus (+) sign to the annual change denotes that the declination is increasing, and a minus (—) sign the reverse.

(Specially prepared for THE WORLD ALMANAC in the Office of the United States Coast and Geodetic Survey.)

RULES FOR FORETELLING THE WEATHER.

ADAPTED FOR USE WITH ANEROID BAROMETERS.

A RISING BAROMETER.

A RAPID rise indicates unsettled weather.

A gradual rise indicates settled weather.

A rise with dry air and cold increasing in Summer indicates wind from the northward; and if rain has fallen, better weather may be expected.

A rise with moist air and a low temperature indicates wind and rain from the northward.

A rise with southerly winds indicates fine weather.

A STEADY BAROMETER.

With dry air and seasonable temperature indicates a continuance of very fine weather.

A FALLING BAROMETER.

A rapid fall indicates stormy weather.

A rapid fall with westerly wind indicates stormy weather from the northward.

A fall with a northerly wind indicates storm, with rain and hail in Summer, and snow in Winter.

A fall with increased moisture in the air, and heat increasing, indicates wind and rain from the southward.

A fall with dry air and cold increasing in Winter indicates snow.

A fall after very calm and warm weather indicates rain with squally weather.

The barometer rises for northerly winds, including from northwest by north to the eastward for dry, or less wet weather, for less wind, or for more than one of these changes, except on a few occasions, when rain, hail, or snow comes from the northward with strong wind.

The barometer falls for southerly wind, including from southeast by south to the westward, for wet weather, for stronger wind or for more than one of these changes, except on a few occasions, when moderate wind with rain or snow, comes from the northward.

The above printed rules are in use by the Seawanhaka Corinthian Yacht Club of New York.

DURATION OF DIFFERENT KINDS OF WEATHER IN THE SEVERAL STORMS—VICINITY OF NEW YORK.

CRITICAL WINDS.	Clear Hours.	Cloudy Hours.	Rain Hours.	Clearing Hours.

South to Southeast	14	13.4	15.6	15.4
East to Northeast	20	17.6	31	20.6

WEATHER WISDOM.

SUNSET COLORS.—A gray, lowering sunset, or one where the sky is green or yellowish-green, indicates rain. A red sunrise, with clouds lowering later in the morning, also indicates rain.

HALO (SUN DOGS).—By halo we mean the large circles, or parts of circles, about the sun or moon. A halo occurring after fine weather indicates a storm.

CORONA.—By this term we mean the small colored circles frequently seen around the sun or moon. A corona growing smaller indicates rain; growing larger, fair weather.

RAINBOWS.—A morning rainbow is regarded as a sign of rain; an evening rainbow of fair weather.

SKY COLOR.—A deep-blue color of the sky, even when seen through clouds, indicates fair weather; a growing whiteness, an approaching storm.

FOGS.—Fogs indicate settled weather. A morning fog usually breaks away before noon.

VISIBILITY.—Unusual clearness of the atmosphere, unusual brightness or twinkling of the stars, indicate rain.

FROST.—The first frost and last frost are usually preceded by a temperature very much above the mean.

OBJECTS VISIBLE AT SEA-LEVEL IN CLEAR WEATHER.

The following table shows the distance at sea-level at which objects are visible at certain elevations.

ELEVATION—FEET.	Miles.	ELEVATION—FEET.	Miles.	ELEVATION—FEET.	Miles.

* In Southwestern Assam. It is the wettest place in the world. In 1861 the rainfall there reached 905 inches. Panama—At Balboa Heights. Pacific section, mean annual temperature 80°; annual average rainfall 71 inches. At Colon, Atlantic section, mean annual temperature 80°; annual average rainfall 131 inches. The mean annual temperature of the globe is about 59° Fahr. The average annual rainfall in the world has been variously estimated at from 30 to 60 inches. It ranges from 458 inches in Cherrapongee, India to zero in the Sahara Desert. An inch of rainfall makes 113 tons to the acre. New York City has an annual precipitation of 44.6 inches, or 5.039 tons to the acre. In 1914 it cost 0.733 cents a ton per mile to transport the freight of the United States. Hauling the water supply of an acre of Central Park land fifty miles by rail would, therefore, cost $1.846 a year It is estimated that the annual stream-flow of the earth is 6,500 cubic miles, or enough to replace all the material taken out of the Panama Canal every 2½ seconds.

Highest Temperatures on Record—The highest temperatures occur in Northern Africa, in the interior of Australia, in Southwestern Asia, and in Southwestern North America. The record for the United States is 134° at Greenland Ranch, Cal., July 10, 1913. Ouargla, Algeria, has a record of 127.4° on July 17, 1879, and Jacobadad, India, 126° on June 13, 1897. Lowest Temperatures on Record—The minimum temperatures of Siberia and North America are much lower than any that have been observed in the southern hemisphere. Hann states that the lowest temperature ever observed was —90.4° at Verkhoyansk in Siberia. The lowest temperature ever recorded in the United States was —65° at Fort Keogh, Miles City, Mont., January, 1888. The lowest temperature recorded in the Antarctic by Shackleton was —57° on August 14, 1908 (U. S. Weather Bureau).

GREATEST ALTITUDE IN EACH STATE AND TERRITORY.

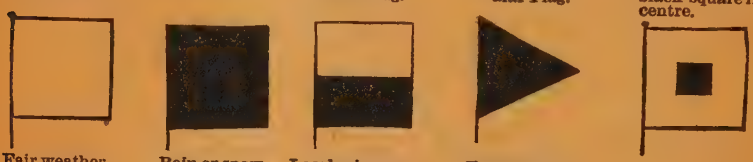
The lowest point of dry land in United States is in Death Valley, Cal., 276 feet below sea level.

WEATHER FLAGS

OF THE WEATHER BUREAU, U. S. DEPARTMENT OF AGRICULTURE.

THE Weather Bureau furnishes, when practicable, for the benefit of all interests dependent upon weather conditions, the "Forecasts" which are prepared daily at the Central Office in Washington, D. C., and certain designated stations. These forecasts are telegraphed to stations of the Weather Bureau, railway officials, postmasters, and many others, to be communicated to the public by telegraph, telephone, "wireless" and mail or by means of flags or steam whistles. The flags adopted for this purpose are five in number, and of the forms and colors indicated below:

EXPLANATION OF WEATHER FLAGS.



When number 4 is placed above number 1, 2 or 3, it indicates warmer; when below, colder; when not displayed, the temperature is expected to remain about stationary. During the late Spring and early Fall the cold-wave flag is also used to indicate anticipated frosts.

WHISTLE SIGNALS.

A warning blast of from fifteen to twenty seconds' duration is sounded to attract attention. After this warning the longer blasts (of from four to six seconds' duration) refer to weather, and shorter blasts (of from one to three seconds' duration) refer to temperature; those for weather are sounded first.

Blasts.	Indicate.	Blasts.	Indicate.
One long	Fair weather.	One short	Lower temperature.
Two long	Rain or snow.	Two short	Higher temperature.
Three long	Local rain or snow.	Three short	Cold wave.

By repeating each combination a few times, with intervals of ten seconds, liability to error in reading the signals may be avoided.

As far as practicable, the forecast messages are telegraphed at the expense of the Weather Bureau; but if this is impracticable, they are furnished at the regular commercial rates and sent "collect." In no case are the forecasts sent to a second address in any place, except at the expense of the applicant.

Persons desiring to display the flags or sound the whistle signals for the benefit of the public should communicate with the Weather Bureau officials in charge of the central stations of their respective States, which are as follows:

Alabama, Montgomery.
Arizona, Phœnix.
Arkansas, Little Rock.
California, San Francisco.
Colorado, Denver.
Florida, Jacksonville.
Georgia, Atlanta.
Idaho, Boisé.
Illinois, Springfield.
Indiana, Indianapolis.
Iowa, Des Moines.
Kansas, Topeka.
Kentucky, Louisville.
Louisiana, New Orleans.
Maryland, Baltimore (for Delaware and Maryland).
Massachusetts, Boston (for New England).
Michigan, Grand Rapids.
Minnesota, Minneapolis.
Mississippi, Vicksburg.
Missouri, Columbia.
Montana, Helena.
Nebraska, Lincoln.
Nevada, Reno.
New Jersey, Trenton.
New Mexico, Santa Fé.
New York, Ithaca.
North Carolina, Raleigh.
North Dakota, Bismarck.
Ohio, Columbus.
Oklahoma, Oklahoma.
Oregon, Portland.
Pennsylvania, Philadelphia.
South Carolina, Columbia.
South Dakota, Huron.
Tennessee, Nashville.
Texas, Houston.
Utah, Salt Lake City.
Virginia, Richmond.
Washington, Seattle.
West Virginia, Parkersburg.
Wisconsin, Milwaukee.
Wyoming, Cheyenne.

THE ANCIENT AND MODERN YEAR.

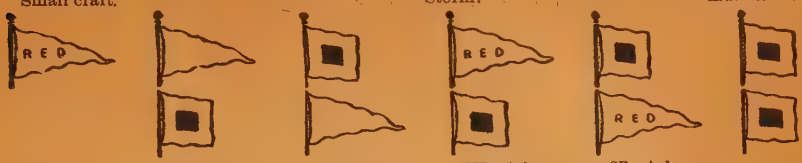
THE Athenians began the year in June, the Macedonians in September, the Romans first in March and afterward in January, the Persians on August 11, the ancient Mexicans on February 23, the Mohammedans in July. The Chinese year, which begins early in February, is similar to the Mohammedan in having 12 months of 29 and 30 days alternately; but in every nineteen years there are seven years which have 13 months. This is not quite correct, and the Chinese have therefore formed a cycle of 60 years, in which period 22 intercalary months occur.

SMALL CRAFT, STORM AND HURRICANE WARNINGS

OF THE WEATHER BUREAU, U. S. DEPARTMENT OF AGRICULTURE, AS DISPLAYED ON THE ATLANTIC, PACIFIC, AND GULF COASTS.

All square flags shown here are red with black centre when displayed as warnings.

Small craft. Storm. Hurricane.



NW. winds. SW. winds. NE. winds. SE. winds.

Small Craft Warning—A red pennant indicates that moderately strong winds are expected. *Storm Warning*—A red flag with a black centre indicates that a storm of marked violence is expected. The pennants displayed with the flags indicate the direction of the wind: white, westerly; red, easterly. The pennant above the flag indicates that the wind is expected to blow from the northerly quadrants; below, from the southerly quadrants. By night a red light indicates easterly winds, and a white light below a red light westerly winds. *Hurricane Warning*—Two red flags with black centres, displayed one above the other, indicate the expected approach of a tropical hurricane, and also one of those extremely severe and dangerous storms which occasionally move across the Lakes and Northern Atlantic Coast. Neither small craft nor hurricane warnings described above are displayed at night.

The following new system of night storm-warning displays on the Great Lakes only became effective October 15, 1916:

Small Craft Warning—A red pennant indicates that moderately strong winds that will interfere with the safe operation of small craft are expected. No night display of small craft warnings is made. *Northeast Storm Warning*—A red pennant *above* a square red flag with black centre displayed by day, or two red lanterns, one above the other, displayed by night, indicate the approach of a storm of marked violence with winds beginning from the *northeast*. *Southeast Storm Warning*—A red pennant *below* a square red flag with black centre displayed by day, or one red lantern displayed by night, indicates the approach of a storm of marked violence with winds beginning from the *southeast*. *Southwest Storm Warning*—A white pennant *below* a square red flag with black centre displayed by day, or a white lantern *below* a red lantern displayed by night, indicates the approach of a storm of marked violence with winds beginning from the *southwest*. *Northwest Storm Warning*—A white pennant *above* a square red flag with black centre displayed by day, or a white lantern *above* a red lantern displayed by night, indicates the approach of a storm of marked violence with winds beginning from the *northwest*. *Hurricane, or Whole Gale Warning*—Two square flags, red with black centres, one above the other, displayed by day, or two red lanterns, with a white lantern between, displayed by night, indicate the approach of a tropical hurricane, or of one of the extremely severe and dangerous storms which occasionally move across the Great Lakes.

VELOCITY OF WINDS IN THE UNITED STATES.

AVERAGE hourly velocity of the wind at selected stations of the United States Weather Bureau, also the highest velocity ever reported for a period of five minutes. (Prepared by Chief of the U. S. Weather Bureau, and revised to January 1, 1916, for THE WORLD ALMANAC.)

Lake Washington–Puget Sound	5,000,000	6½	36	Connects Lake Washington and Puget Sound.
Lehigh Coal and Navigation Co.	4,455,000	108	6	Coalport, Pa., to Easton, Pa.
Louisville and Portland	5,716,686	2½	9	At Falls of Ohio River, Louisville, Ky.
Mattamuskeet Out Fall	600,000	7	6	Hyde County, N. C.
Miami and Erie	8,062,680	274	5½	Cincinnati, Ohio, to Toledo, Ohio.
Miami*	1,765,000	79	6-8	Lake Okeechobee to Miami, Fla.
Morris	5,100,000	103	5	Jersey City, N. J., to Phillipsburg, N. J.
Muscle Shoals and Elk R. Shoals	3,156,919	16	5	Big Muscle Shoals, to Elk River Shoals, Tenn.
North New River	581,504	59	5-8	Lake Okeechobee to Ft. Lauderdale, Fla.
N. J. Coastal Inland Waterway	450,000	114	6	Cape May to Bay Head, N. J.
Ohio	a)4,695,204	70	4	Cleveland, Ohio, to Dresden, Ohio.
‡Oswego	5,239,526	38	12	Oswego, N. Y., to Syracuse, N. Y.
Pennsylvania	7,731,750	193	6	Columbia, Northumberland, Wilkes-Barre, Pa.
Portage Lake and Lake Superior	1,725,000	25	20	From Keweenaw Bay to Lake Superior.
Port Arthur (ship canal)	.....	7	26	Port Arthur, Tex., to Gulf of Mexico.
Sabine-Neches	1,081,000	16	26	Port Arthur Canal to mouth Sabine River, Tex.
Salem	.....	2	5-8	Salem River to Delaware River.
Santa Fé	70,000	10	5	Waldo, Fla., to Melrose, Fla.
Sault Ste Marie (ship canal)	4,000,000	1½	18	Connects Lakes Superior and Huron at St. Mary's River.
Schuylkill Navigation Co.	12,461,600	108	6¼	Mill Creek, Pa., to Philadelphia, Pa.
South New River	792,400	25	6-8	Ft. Lauderdale to Lake Okeechobee, Fla.
Sturgeon Bay and Lake Mich'n	287,000	1¼	20	Between Green Bay and Lake Michigan.
St. Clair Flats	1,180,000	3	20	Canal through delta at mouth of St. Clair River.
St. Lucie	2,075,000	25	8-12	Stuart to Lake Okeechobee, Fla.
St. Mary's Falls	9,400,000	1½	18½	Connects Lakes Superior and Huron at Sault Ste Marie, Mich.
St. Mary's Falls (parallel canal)	9,475,000	1½	24½	Connects Lakes Superior and Huron.
West Palm Beach	474,988	42½	5-8	Lake Okeechobee, Lake Worth, West Palm Beach.
CANALS IN CANADA.				
Chambly	$728,999	12	6½	This canal overcomes the rapids between Chambly and St. Johns.
Cornwall	7,242,804	11	14	Cornwall to Dickinson's Landing.
Lachine	13,404,970	8½	14-18	Montreal to Lachine.
Rideau	5,531,332	133¼	5	Connects River Ottawa with Lake Ontario.
Sault Ste Marie (ship canal)	5,000,000	1½	18¼	Connects Lakes Superior and Huron at St. Mary's River.
Soulanges	8,000,000	14	15	Cascade Point to Coteau Landing.
‖Trent	13,611,000	236	6-8½	Connects Lake Ontario and Lake Huron via Trent River.
Welland (ship canal)	§29,250,951	26¾	14-25	Connects Lake Ontario and Lake Erie.
††Williamsburg	10,490,184	12¼	9-14	Along St. Lawrence River.

* And improvements. †Navigable depth. ‖ Under construction. § Not including cost of improvements and changes in locks, etc., now under way and involving an additional cost of about $20,000,000. †† Consisting of the Farrans Point, Rapide Plat and Galops Canals. (a) Original cost of canal extending from Cleveland to Portsmouth, 317 miles, but now abandoned between Portsmouth and Dresden.

‡ The Erie Canal, Oswego Canal and Champlain Canal are being enlarged by the State of New York to a depth of 12 feet, and with locks of a capacity to pass barges having a net tonnage capacity of 2,000 tons each. The enlarged Champlain Canal between Troy and Whitehall, a distance of sixty-one miles, was completed and placed in commission in May, 1916. The Oswego (Barge) Canal is now open between the Three River Point and Lake Ontario at Oswego for boats of six-foot draught, with a connection with the Erie Canal at Syracuse through a portion of the unimproved canal. Several large sections of the Erie Barge Canal already have been completed and are in commission. Report of State Superintendent of Public Works indicated that entire canal from Hudson River to Lake Ontario will be ready for operation in the season of 1917.

In July, 1916, there were 277 miles of completed Barge Canal in use as follows: Erie (Barge) Canal—Waterford to Jacksonburg (Mohawk River), 86 miles; Lyons to Fairport, 25 miles; Greece to Tonawanda, 73 miles. Total, 184 miles. Champlain (Barge) Canal—Waterford to Northumberland (Hudson River), 26 miles; Northumberland to Whitehall, 35 miles. Total, 61 miles. Oswego (Barge) Canal—Mud Lock to Oswego, 32 miles. Grand total, 277 miles. To this may be added the improved canal between Mud Lock and Baldwinsville, 5 miles, and between Three Rivers and Brewerton, 10 miles, which, though completed, may not be used in connection with the main line of canal, but which has opened Oneida Lake to canal traffic from its westerly end.

The original estimated cost of enlarging the Erie, Champlain and Oswego Canals was $101,000,000, but has since been increased by $19,000,000 for terminals and $8,000,000 for branches. The plan of improvement covers 440 miles of construction and 350 miles of canalized rivers and lakes, or 790 miles altogether.

** The cost of enlarging the Cayuga and Seneca Canal to the same capacity as the improved Erie Canal is estimated at $7,000,000.

TONNAGE ON CANALS.

Sault Ste Marie in 1915, 71,290,304 tons; all New York Canals in 1915, 1,858,114 tons as follows: Erie, 1,155,235; Champlain, 503,030; Oswego, 142,312; Cayuga and Seneca, 26,384; Black River, 31,153.

Some Foreign Canals.	Length, Miles.	Depth, Feet.	Bottom Width, Feet.	Estimated Cost.
Suez—Mediterranean and Red Seas	103	35	108	$127,000,000
Cronstadt—Petrograd	16	20½	....	10,000,000
Manchester—Manchester and Liverpool	35½	28	120	85,000,000

NATIONAL GRANGE, PATRONS OF HUSBANDRY.

Master—Oliver Wilson, Peoria, Ill. *Overseer*—W. H. Vary, Watertown, N. Y. *Lecturer*—E. E. Chapman, Ludlow, Mass. *Steward*—F. C. Bancroft, Wyoming, Del. *Assistant Steward*—J. A. Sherwood, Long Hill, Ct. *Chaplain*—A. P. Reardon, McLouth, Kan. *Treasurer*—Mrs. Eva S. McDowell, 6 Norfolk Terrace, Wellesley, Mass. *Secretary*—C. M. Freeman, Tippecanoe City, Ohio. *Gatekeeper*—C. L. Rice, Austin, Minn. *Ceres*—Mrs. Esther E. Pattee, Laconia, N. H. *Pomona*—Mrs. Cora E. Ketcham, Hastings, Mich. *Flora*—Mrs. Ella Peckham, Newport, R. I. *L. A. Steward*—Mrs. Mabel H. Harland, Payette, Idaho. *High Priest*—C. M. Gardner, Westfield, Mass. *Priest Archon*—Oliver Wilson, Peoria, Ill. *Priest Annalist*—C. E. Spence, Oregon City, Ore. Executive Committee: C. S. Stetson, Chairman, Greene, Me.; A. B. Judson, Balfour, Iowa; W. N. Cady, Secretary, Middlebury, Vt.

The National Grange has established over 30,000 subordinate granges throughout the United States.

FACTS ABOUT THE EARTH.

(Revised by the National Geographic Society of Washington, D. C., from the latest available figures and estimates.)

THE superficial area of the earth is 196,940,000 square miles—140,295,000 square miles of water and 56,255,000 square miles of land. The three great oceans comprise the Atlantic, 41,321,000 square miles; Pacific, 68,634,000 square miles, and Indian, 29,430,000 square miles. There are about 1,000,000 square miles of lake and river surface on the land, and 1,910,000 square miles of islands in the seas. The diameter of the earth at the equator is 7,926 miles, and through the poles 7,899.6 miles. The average elevation of the land above sea level is 2,300 feet. The average depth of the ocean below sea level is 12,600 feet. The deepest place in the ocean yet found is off Mindanao, Philippine Islands, 32,088 feet. The highest mountain is Mount Everest, in the Himalayas, 29,002 feet. This gives a range of 61,090 feet or more, 11½ miles, between the bottom of the oceans and the top of the land.

AREA AND POPULATION OF THE EARTH BY CONTINENTS.

CONTINENTAL DIVISIONS.	Area in Square Miles.	INHABITANTS.		CONTINENTAL DIVISIONS.	Area in Square Miles.	INHABITANTS.	
		Number.	Per Sq. Mile.			Number.	Per Sq. Mile.
Africa	11,622,619	142,751,000	12.3	Australasia	3,312,613	15,934,000	4.8
America, N.	8,589,257	140,084,000	16.3	Europe	3,872,561	464,681,000	120.
America, S.	7,570,015	55,779,000	7.4	Polar Regions	5,081,935	000,000	.....
Asia	17,206,000	872,522,000	50.7	Total	57,255,000	1,691,751,000	29.5

The total area of the land, given here, includes inland waters and is the Sir John Murray estimate. In the areas of the several continents the Statistical Abstract and the Statesman's Yearbook have been followed in the case of North and South America, Europe and Australasia. In the case of Asia and Africa, where detailed surveys have never been made, planimetric measurements of shore lines are relied upon. The polar regions are, of course, only an approximation. Population statistics are from the Statistical Abstract and the Statesman's Yearbook.

The best estimates of the earth's area place the fertile regions at 29,000,000 square miles; steppes at 14,000,000 square miles; deserts at 4,861,000 square miles; and polar regions at 6,970,000 square miles.

The population of the earth at the death of Emperor Augustus, estimated by Bodio, was 54,000,000. The population of Europe hardly exceeded 50,000,000 before the fifteenth century.—*Mulhall.* The population of the earth, at its present ratio of gain, will be about 4,000,000,000 in 2014.

The proportion of females to each 1,000 males in 1910 was: United States 934; England, 1,068; Germany, 1,026. In France (1901), 1,033.

HIGHEST AND LOWEST CONTINENTAL ALTITUDES.

	HIGHEST POINT.	Elevation (Ft.).	Lowest Point.	Below Sea Level (Ft.).
North America	Mount McKinley, Alaska	20,300	Death Valley, California	276
South America	Mount Aconcagua, Chile-Argentina	23,080	Sea level	....
Europe	Mont Blanc, France	15,782	Caspian Sea, Russia	86
Asia	Mount Everest, India-China	29,002	Dead Sea, Palestine	1,290
Africa	Kibo Peak, East Africa	19,320	Desert of Sahara	150
Australia	Mount Kosciusko, New South Wales	7,328	Lake Torrens, South Australia	25

POPULATION OF THE EARTH ACCORDING TO RACE.

RACE.	Location.	Number.	RACE.	Location.	Number.
Indo-Germanic or Aryan (white)	Europe, America, Persia, India, Australia	795,000,000	Malay and Polynesian (brown)	Australasia	35,000,000
Mongolian or Turanian (yellow and brown)	Asia	630,000,000	American Indian, North and South (red and half breeds)	.....	27,000,000
Semitic (white)	Africa, Arabia, etc.	70,000,000			
Negro and Bantu (black)	Africa	134,000,000	Total	.....	1,691,000,000

For statistics of earth's population according to creed, see RELIGIOUS STATISTICS.

The human family is subject to 57 independent and three quasi-independent governments. The British Empire and Russia are the largest two, while Monaco with its eight square miles and San Marino with its thirty-eight square miles of territory are the smallest two. The absolute monarchies are Abyssinia, Afghanistan, Morocco, Siam, Oman, and Monaco; the limited monarchies are Albania, Austria-Hungary, Belgium, Bhutan, British Empire, Bulgaria, Denmark, German Empire, Greece, Italy, Japan, Liechtenstein, Luxemburg, Montenegro, Nepal, Netherlands, Norway, Persia, Roumania, Russia, Serbia, Spain, Sweden, and Turkey; the republics are Andorra, Argentina, Bolivia, Brazil, Chile, China, Colombia, Costa Rica, Cuba, Ecuador, Guatemala, Haiti, Honduras, Liberia, Mexico, Nicaragua, Panama, Paraguay, Peru, Portugal, Salvador, San Marino, Santo Domingo, Switzerland, United States, Uruguay, Venezuela.

The average duration of human life is about 33 years One-quarter of the people on the earth die before age 6, one-half before age 16, and only about 1 person of each 100 born lives to 65.

METRIC SYSTEM OF WEIGHTS AND MEASURES.

THE use of the metric system is obligatory in thirty-four countries of the world, including practically all the countries of South America, and all but three or four of the European countries. Its use is also optional in the following eleven countries: Bolivia, Canada, China, Egypt, Great Britain and Ireland, Greece, Japan, Paraguay, Russia, United States of America, and Venezuela. Various names of the preceding systems are, however, frequently used. In Germany, ½ kilogram = 1 pound; in Switzerland, 3-10 of a meter = 1 foot, etc. If the first letters of the prefixes *deka, hecto, kilo, myria*, from the Greek, and *deci, centi, milli*, from the Latin, are used in preference to our plain English, 10, 100, etc., it is best to employ capital letters for the multiples and small letters for the subdivisions to avoid ambiguities in abbreviations: 1 dekameter or 10 meters = 1 dkm.; 1 decimeter or 1-10 of a meter = 1 dm.

The METER, unit of length, is nearly the ten-millionth part of a quadrant of a meridian, of the distance between Equator and Pole. The International Standard Meter is, practically, nothing else but a length defined by the distance between two lines on a platinum-iridium bar at 0° Centigrade, deposited at the International Bureau of Weights and Measures, Paris, France.

The LITER, unit of capacity, is derived from the weight of one kilogram pure water at greatest density, a cube whose edge is one-tenth of a meter and, therefore, the one-thousandth part of a metric ton.

The GRAM, unit of weight, is a cube of pure water at greatest density, whose edge is one-hundredth of a meter, and, therefore, the one-thousandth part of a kilogram, and the one-millionth part of a metric ton.

The Metric System was legalized in the United States on July 28, 1866, when Congress enacted as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That from and after the passage of this act it shall be lawful throughout the United States of America to employ the weights and measures of the metric system, and no contract or dealing or pleading in any court shall be deemed invalid or liable to objection because the weights or measures expressed or referred to therein are weights or measures of the metric system.

SEC. 2. *And be it further enacted*, That the tables in the schedule hereto annexed shall be recognized in the construction of contracts and in all legal proceedings as establishing in terms of the weights and measures now in use in the United States the equivalents of the weights and measures expressed therein in terms of the metric system; and said tables may be lawfully used for computing, determining, and expressing in customary weights and measures the weights and measures of the metric system.

MEASURES OF LENGTH.

Metric Denominations and Values.		Equivalents in Denominations in Use.	
Myriameter	10,000 meters.	6.2137	miles.
Kilometer	1,000 meters.	0.62137	mile, or 3,280 feet 10 inches.
Hectometer	100 meters.	328	feet 1 inch.
Dekameter	10 meters.	393.7	inches.
Meter	1 meter.	39.37	inches.
Decimeter	1-10 of a meter.	3.937	inches.
Centimeter	1-100 of a meter.	0.3937	inch.
Millimeter	1-1000 of a meter.	0.0394	inch.

MEASURES OF SURFACE.

Metric Denominations and Values.		Equivalents in Denominations in Use.	
Hectare	10,000 square meters.	2.471	acres.
Are	100 square meters.	119.6	square yards.
Centare	1 square meter.	1,550	square inches.

MEASURES OF CAPACITY.

Metric Denominations and Values.			Equivalents in Denominations in Use.	
Names.	Number of Liters.	Cubic Measure.	Dry Measure.	Liquid or Wine Measure.
Kiloliter or stere.	1,000	1 cubic meter	1.308 cubic yards	264.17 gallons.
Hectoliter	100	1-10 of a cubic meter	2 bush. and 3.35 pecks	26.417 gallons.
Dekaliter	10	10 cubic decimeters	9.08 quarts	2.6417 gallons.
Liter	1	1 cubic decimeter	0.908 quart	1.0567 quarts.
Deciliter	1-10	1-10 of a cubic decimeter.	6.1022 cubic inches	0.845 gill.
Centiliter	1-100	10 cubic centimeters	0.6102 cubic inch	0.338 fluid ounce.
Milliliter	1-1000	1 cubic centimeter	0.061 cubic inch	0.27 fluid dram.

METRIC SYSTEM—*Continued.*

WEIGHTS.

Metric Denominations and Values.			Equivalents in Denominations in Use.
Names.	Number of Grams.	Weight of What Quantity of Water at Maximum Density.	Avoirdupois Weight.
Millier or tonneau	1,000,000	1 cubic meter	2204.6 pounds.
Quintal	100,000	1 hectoliter	220.46 pounds.
Myriagram	10,000	10 liters	22.046 pounds.
Kilogram or kilo	1,000	1 liter	2.2046 pounds.
Hectogram	100	1 deciliter	3.5274 ounces.
Dekagram	10	10 cubic centimeters	0.3527 ounce.
Gram	1	1 cubic centimeter	15.432 grains.
Decigram	1-10	1-10 of a cubic centimeter	1.5432 grains.
Centigram	1-100	10 cubic millimeters	0.1543 grain.
Milligram	1-1000	1 cubic millimeter	0.0154 grain.

TABLES FOR THE CONVERSION OF METRIC WEIGHTS AND MEASURES INTO CUSTOMARY UNITED STATES EQUIVALENTS AND THE REVERSE.

From the legal equivalents are deduced the following tables for converting United States weights and measures:

METRIC TO CUSTOMARY. CUSTOMARY TO METRIC.

THE METRIC SYSTEM SIMPLIFIED.

The following tables of the metric system of weights and measures have been simplified as much as possible for THE WORLD ALMANAC by omitting such denominations as are not in practical, everyday use in the countries where the system is used exclusively.

TABLES OF THE SYSTEM.

Length.—The denominations in practical use are millimeters (mm.), centimeters (cm.), meters (m.), and kilometers (km.).
10 mm. = 1 cm.; 100 cm. = 1 m.; 1,000 m. = 1 km. NOTE.—A decimeter is 10 cm.
Weight.—The denominations in use are grams (g.), kilos* (kg.), and tons (metric tons).
1,000 g. = 1 kg.; 1,000 kg. = 1 metric ton.
Capacity.—The denominations in use are cubic centimeters (c. c.) and liters (l.).
1,000 c. c. = 1 l. NOTE.—A hectoliter is 100 l. (seldom used).
Relation of capacity and weight to length: A cubic decimeter is a liter, and a liter of water weighs a kilo.

APPROXIMATE EQUIVALENTS.

A meter is about a yard; a kilo is about 2 pounds; a liter is about a quart; a centimeter is about ½ inch; a metric ton is about same as a ton; a kilometer is about ⅝ mile; a cubic centimeter is about a thimbleful; a nickel weighs about 5 grams.

PRECISE EQUIVALENTS.

1 acre	= .40	hectare	.4047	1 mile	= 1.6	kilometers	1.609
1 bushel	= 35	liters	35.24	1 millimeter	= .039	inch	.0394

MINIMUM WEIGHTS OF PRODUCE.

THE following are approximate weights of certain articles of produce according to the laws of the United States:

	Per Bushel.		Per Bushel.		Per Bushel.
Wheat	60 lbs.	White Potatoes	60 lbs.	Millet Seed	50 lbs.
Corn, not defined	56 "	Sweet Potatoes	46-60 "	Hungarian Grass Seed	48-50 "
Corn, in the ear husked	70 "	Onions	50-57 "	Timothy Seed	45 "
Corn, shelled	56 "	Carrots	50 "	Red Top & Blue Grass Seed	14 "
Rye	56 "	Turnips	55-60 "	Hemp Seed	44 "
Buckwheat	42-52 "	Dried Peaches	33 "	Salt (see note below).	
Barley	48 "	Peaches, not defined	48-54 "	Indian Corn or Maize	56 "
Oats	32 "	Pears, not defined	45-60 "	Corn Meal	48 "
Peas	60 "	Apples, not defined	44-50 "	Ground Peas	24 "
Beans, not defined	60 "	Dried Apples	24-28 "	Malt	30-38 "
Castor Beans	50 "	Clover Seed	60 "	Bran	20 "
Tomatoes	45-60 "	Flax Seed (Linseed)	56 "		

SALT.—Weight per bushel as adopted by different States ranges from 50 to 80 pounds. Coarse salt in Pennsylvania is reckoned at 85 pounds, and in Illinois at 50 pounds per bushel. Fine salt in Pennsylvania is reckoned at 62 pounds, in Kentucky and Illinois at 55 pounds per bushel.

MEASURES AND WEIGHTS OF GREAT BRITAIN.

THE measures of length and the weights are nearly, practically, the same as those in use in the United States. The English ton is 2,240 lbs. avoirdupois, the same as the long ton, or shipping ton of the United States. The English hundredweight is 112 lbs. avoirdupois, the same as the long hundredweight of the United States. The English stone is usually equal to one-eighth hundredweight of 112 lbs., or 14 lbs. avoirdupois. The metre has been legalized at 39.37079 inches, but the length of 39.370432 inches, as adopted by France, Germany, Belgium, and Russia, is frequently used.

The Imperial gallon, the basis of the system of capacity, involves an error of about 1 part in 1,836; 10 lbs. of water = 277.123 cubic inches. (A late authority gives the weight of the Imperial gallon as 10.017 pounds and of the United States gallon as 8.345 pounds.)

The English statute mile is 1,760 yards or 5,280 feet. The following are measures of capacity:

Names.		Pounds of Water.	Cubic Inches.	Litres.	United States Equivalents.
4 gills = 1 pint		1.25	34.66	0.56793	1.20032 liquid pints.
2 pints = 1 quart		2.5	69.32	1.13586	1.20032 " quarts.
2 quarts = 1 pottle		5	138.64	2.27173	2.40064 " "
2 pottles = 1 gallon		10	277.27	4.54346	1.20032 " gallons.
2 gallons = 1 peck	Dry measure	20	554.55	9.08692	1.03152 dry pecks.
4 pecks = 1 bushel		80	2218.19	36.34766	1.03152 " bushels.
4 bushels = 1 coomb		320	8872.77	145.39062	4.12606 " "
2 coombs = 1 quarter		640	17745.54	290.7813	8.2521 " "

A cubic foot of pure gold weighs 1,210 pounds; pure silver, 655 pounds; cast iron, 450 pounds; copper, 550 pounds; lead 710 pounds; pure platinum, 1,220 pounds; tin, 456 pounds; aluminum, 163 pounds.

DOMESTIC WEIGHTS AND MEASURES.

Apothecaries' Weight: 20 grains = 1 scruple; 3 scruples = 1 dram; 8 drams = 1 ounce; 12 ounces = 1 pound.

Avoirdupois Weight (short ton): 27 11-32 grains = 1 dram; 16 drams = 1 ounce; 16 ounces = 1 pound; 25 pounds = 1 quarter; 4 quarters = 1 cwt.; 20 cwt. = 1 ton.

Avoirdupois Weight (long ton): 27 11-32 grains = 1 dram; 16 drams = 1 ounce; 16 ounces = 1 pound; 112 pounds = 1 cwt.; 20 cwt. = 1 ton.

Troy Weight: 24 grains = 1 pennyweight; 20 pennyweights = 1 ounce; 12 ounces = 1 pound.

Circular Measure: 60 seconds = 1 minute; 60 minutes = 1 degree; 30 degrees = 1 sign; 12 signs = 1 circle or circumference.

Cubic Measure: 1,728 cubic inches = 1 cubic foot; 27 cubic feet = 1 cubic yard.

Dry Measure: 2 pints = 1 quart; 8 quarts = 1 peck; 4 pecks = 1 bushel.

Liquid Measure: 4 gills = 1 pint; 2 pints = 1 quart; 4 quarts = 1 gallon; 31½ gallons = 1 barrel; 2 barrels = 1 hogshead.

Long Measure: 12 inches = 1 foot; 3 feet = 1 yard; 5½ yards = 1 rod or pole; 40 rods = 1 furlong; 8 furlongs = 1 statute mile (1,760 yards or 5,280 feet); 3 miles = 1 league.

Mariners' Measure: 6 feet = 1 fathom; 120 fathoms = 1 cable length; 7½ cable lengths = 1 mile; 5,280 feet = 1 statute mile; 6,085 feet = 1 nautical mile.

Paper Measure: 24 sheets = 1 quire; 20 quires = 1 ream (480 sheets); 2 reams = 1 bundle; 5 bundles = 1 bale.

Square Measure: 144 square inches = 1 square foot; 9 square feet = 1 square yard; 30¼ square yards = 1 square rod or perch; 40 square rods = 1 rood; 4 roods = 1 acre; 640 acres = 1 square mile; 36 square miles (6 miles square) = 1 township.

Time Measure: 60 seconds = 1 minute; 60 minutes = 1 hour; 24 hours = 1 day; 7 days = 1 week; 365 days = 1 year; 366 days = 1 leap year.

MEDICAL SIGNS AND ABBREVIATIONS.

℞ (Lat. Recipe), take; āā, of each; ℔, pound; ℥, ounce; ʒ, drachm; ℈, scruple; ♏, minim, or drop; O or o, pint; f ℥, fluid ounce; f ʒ, fluid drachm; as, ℥ss, half an ounce; ℥i, one ounce; ℥iss, one ounce and a half; ℥ij, two ounces; gr., grain; Q. S., as much as sufficient; Ft. Mist., let a mixture be made; Ft. Haust., let a draught be made; Ad., add to; Ad lib., at pleasure; Aq., water; M., mix; Mac., macerate; Pulv., powder; Pil., pill; Solv., dissolve; St., let it stand; Sum., to be taken; D., dose; Dil., dilute; Filt., filter; Lot., a wash; Garg., a gargle; Hor. Decub., at bed time; Inject., injection; Gtt., drops; ss, one-half; Ess., essence.

TEXAS LAND MEASURE.

(Also used in Mexico, New Mexico, Arizona, and California.)

26,000,000	square varas (square of 5,099	varas) = 1 league and 1 labor	= 4,605.5	acres.
1,000,000	square varas (square of 1,000	varas) = 1 labor	= 177.136	acres.
25,000,000	square varas (square of 5,000	varas) = 1 league	= 4,428.4	acres.
12,500,000	square varas (square of 3,535.5	varas) = ½ league	= 2,214.2	acres.
8,333,333	square varas (square of 2,886.7	varas) = ⅓ league	= 1,476.13	acres.
6,250,000	square varas (square of 2,500	varas) = ¼ league	= 1,107.1	acres.
7,225,600	square varas (square of 2,688	varas)	= 1,280	acres.
3,612,800	square varas (square of 1,900.8	varas) = 1 section	= 640	acres.
1,806,400	square varas (square of 1,344	varas) = ½ section	= 320	acres.
903,200	square varas (square of 950.44	varas) = ¼ section	= 160	acres.
451,600	square varas (square of 672	varas) = ⅛ section	= 80	acres.
225,800	square varas (square of 475	varas) = 1-16 section	= 40	acres.
5,645.376	square varas (square of 75.137	varas) = 4,840 square yards	= 1	acre.

To find the number of acres in any number of square varas, multiply the latter by 177 (or to be more exact, by 177⅓), and cut off six decimals.

1 vara = 33⅓ inches. 1,900.8 varas = 1 mile.

WEIGHTS AND MEASURES OF THE PHILIPPINES.

1 pulgada (12 linea)	=	.927 inch.	1 libra (16 onzo)	=	1.0144 lb. av.
1 pie	=	11.125 inches.	1 arroba	=	25.360 lb. av.
1 vara	=	33.375 inches.	1 catty (16 tael)	=	1.394 lb. av.
1 gantah	=	.8796 gallon.	1 pecul (100 catty)	=	139.482 lb. av.
1 caban	=	21.991 gallons.			

KNOTS AND MILES.

THE **Statute Mile** is 5,280 feet.

The **British Admiralty Knot** or **Nautical Mile** is 6,080 feet.

The **Statute Knot** is 6.082.66 feet, and is generally considered the standard. The number of feet in a statute knot is arrived at thus: The circumference of the earth is divided into 360 degrees, each degree containing 60 knots or (360x60), 21,600 knots to the circumference. 21,600 divided into 131,385,456—the number of feet in the earth's circumference—gives 6,082.66 feet—the length of a standard mile.

1 knot	= 1.151 miles	4 knots =	4.606 miles	20 knots =	23.030 miles	600 feet	= 1 cable
2 knots	= 2.303 miles	5 knots =	5.757 miles	25 knots =	28.787 miles	10 cables	= 1 knot
3 knots	= 3.454 miles	10 knots =	11.515 miles	6 feet	= 1 fathom		

ANCIENT GREEK AND ROMAN WEIGHTS AND MEASURES

WITH AMERICAN EQUIVALENTS.

WEIGHTS.

The Roman libra or pound = 10 oz. 18 pwt. 13 5-7 gr., Troy.
The Attica mina or pound = 11 oz. 7 pwt. 16 2-7 gr., Troy.
The Attica talent (60 minæ) = 56 lbs. 11 oz. 0 pwt. 17 1-7 gr., Troy.

DRY MEASURE.

The Roman modus = 1 pk. 2-9 pint.
The Attic chœnix = nearly 1½ pints.
The Attic medimnus = 4 pk. 6 1-10 pints.

LIQUID MEASURE.

The cotyle = a little over ½ pint.
The cyathus = a little over 1½ pints.
The chus = a little over 6⅔ pints.

LONG MEASURE.

The Roman foot = 11 3-5 inches.
The Roman cubit = 1 ft. 5⅜ inches.
The Roman pace = 4 ft. 10 inches.
The Roman furlong = 604 ft. 10 inches.
The Roman mile = 4,835 feet.
The Grecian cubit = 1 ft. 6⅛ inches
The Grecian furlong = 504 ft. 4 1-5 inches.
The Grecian mile = 4,030 ft.

MONEY.

The quadrans = 1 1-10 mills.
The as = 1 3-10 mills.
The sestertius = 3.58 + cents.
The sestertium (1,000 sestertii) = $35.80+.
The denarius = 14.35 + cents.
The Attic obolus = 2.39 + cents.
The drachma = 14.35 + cents.*
The mina (100 drachmæ) = $14.35+.
The talent (60 minæ) = $861.00+.
The Greek stater = aureus (same as the Roman †) = $3.58,79.
The stater = daricus = $7.16,66.

*The modern drachma equals 19.3 cents. † Did not remain, at all periods, at this value, but this is the value indicated by Tacitus

BIBLICAL WEIGHTS REDUCED TO TROY WEIGHT.

	Lbs.	Oz.	Pwt.	Gr.
The Gerah, one-twentieth of a Shekel	0	0	0	12
The Bekah, half a Shekel	0	0	5	0
The Shekel	0	0	10	0
The Maneh, 60 Shekels	2	6	0	0
The Talent, 50 manehs, or 3,000 Shekels	125	0	0	0

ELECTRICAL UNITS AND THEIR POPULAR DEFINITIONS.

THE watt is the unit expressing electrical energy as horsepower (hp) represents energy in mechanics. It is the sum of the volt (pressure) times ampere (rate of flow). Thus 2 volts times 2 amperes would give you 4 watts. Electrical energy is sold at so much per watt hour or more generally at a given amount per kilowatt hour—which means 1,000 watt-hours. This may represent 1 watt for 1,000 hours or say 1,000 watts for 1 hour. 746 watts are equal to one horsepower or inversely 1 kilowatt (kw) is equal to 1⅓ horsepower.

The horsepower represents the energy required to lift a weight of 33,000 pounds—1 foot in 1 minute or 550 lbs. 1 foot in 1 second.

The ohm is the unit of electrical resistance and represents the physical property of a material which offers a resistance to the flow of electricity permitting just 1 ampere to flow at 1 volt of pressure. For example, 1,000 feet of copper wire of 10 gauge has just 1 ohm of resistance and allows the flow of 1 ampere at 1 volt.

A dry battery is made by placing in a hollow receptacle of zinc a piece of carbon, the intervening space being filled with a mixture containg certain chemicals, such as manganese dioxide, powdered carbon and some absorbent material such as sawdust, which is then saturated with salammoniac and the receptacle sealed. The chemical action set up produces a flow of electricity when the two electrodes, the carbon and the zinc, are connected by a conductor of electricity such as a wire, a lamp or a motor.

THEODORE DWIGHT.

FOREIGN MONEYS.

English Money: 4 farthings = 1 penny (*d*); 12 pence = 1 shilling (*s*); 20 shillings = 1 pound (£).
21 shillings = one guinea; 5 shillings = one crown.

French Money: 100 centimes = 1 franc.

German Money: 100 pfennig = 1 mark.

Russian Money: 100 copecks = 1 ruble.

Austro-Hungarian Money: 100 heller = 1 krone (crown).

For United States equivalents, see table of "Value of Foreign Coins in U. S. Money."

TABLE OF GEOMETRICAL PROGRESSION.

(WHEREBY any questions of Geometrical Progression and of Double Ratio may be solved by Inspection, the Number of Terms not exceeding 56.)

STANDARD NEWSPAPER MEASURES.

THE Standard Newspaper Measure, as recognized and now in general use is 13 ems pica. The standard of measurement of all sizes of type is the "em quad," not the letter "m."

The basis of measurements adopted by the International Typographical Union is the lower-case alphabet, from "a" to "z" inclusive, and the ems used are the same body as the type measured.

The weight of a cubic foot of distilled water at a temperature of 60° F. is 1,000 ounces Avoirdupois, *very nearly*, therefore the weight (in ounces, Avoirdupois) of a cubic foot of any of the substances in the above table is found by multiplying the specific gravities by 10, thus:—one cubic foot of oak weighs 1,170 ounces; one cubic foot of marble 2,700 ounces, and so on.

* Compared with water.

FREEZING, FUSING, AND BOILING POINTS.

Substances.	Reaumur.	Centigrade.	Fahrenheit.	Substances.	Reaumur.	Centigrade.	Fahrenheit.

Tensile Strength is the resistance of the fibres or particles of a body to separation. It is therefore proportional to their number, or to the area of its transverse section. The fibres of wood are strongest near the centre of the trunk or limb of a tree. * Tensile strength in pounds per square inch.

THE CAPITOL AT WASHINGTON.

THE Capitol is situated in latitude 38° 53′ 20″.4 north and longitude 77° 00′ 35″.7 west from Greenwich. It fronts east, and stands on a plateau eighty eight feet above the level of the Potomac.

The entire length of the building from north to south is seven hundred and fifty-one feet four inches, and its greatest dimension from east to west three hundred and fifty feet. The area covered by the building is 153,112 square feet.

The dome of the original central building was constructed of wood, covered with copper. This was replaced in 1856 by the present structure of cast iron. It was completed in 1865. The entire weight of iron used is 8,909,200 pounds.

The dome is crowned by a bronze statue of Freedom, which is nineteen feet six inches high and weighs 14,985 pounds. It was modelled by Crawford. The height of the dome above the base line of the east front is two hundred and eighty-seven feet five inches. The height from the top of the balustrade of the building is two hundred and seventeen feet eleven inches. The greatest diameter at the base is one hundred and thirty-five feet five inches.

The rotunda is ninety-seven feet six inches in diameter, and its height from the floor to the top of the canopy is one hundred and eighty feet three inches.

The Senate Chamber is one hundred and thirteen feet three inches in length, by eighty feet three inches in width, and thirty-six feet in height. The galleries will accommodate one thousand persons.

The Representatives' Hall is one hundred and thirty-nine feet in length, by ninety-three feet in width, and thirty-six feet in height.

The southeast corner-stone of the original building was laid September 18, 1793, by President Washington with Masonic ceremonies. The corner-stone of the extensions was laid July 4, 1851, by President Fillmore.

The room now occupied by the Supreme Court was, until 1859, occupied as the Senate Chamber. Previous to that time the court occupied the room immediately beneath, now used as a law library.

LINCOLN'S GETTYSBURG SPEECH.

(*Address at the Dedication of Gettysburg Cemetery, November* 19, 1863.)

FOURSCORE and seven years ago our fathers brought forth upon this continent a new nation, conceived in liberty, and dedicated to the proposition that all men are created equal.

Now we are engaged in a great civil war, testing whether that nation, or any nation so conceived and so dedicated, can long endure. We are met on a great battlefield of that war. We are met to dedicate a portion of it as the final resting-place of those who here gave their lives that that nation might live. It is altogether fitting and proper that we should do this.

But in a larger sense we cannot dedicate, we cannot consecrate, we cannot hallow this ground. The brave men, living and dead, who struggled here have consecrated it far above our power to add or detract. The world will little note nor long remember what we say here, but it can never forget what they did here. It is for us, the living, rather to be dedicated here to the unfinished work that they have thus far so nobly carried on. It is rather for us to be here dedicated to the great task remaining before us; that from these honored dead we take increased devotion to the cause for which they here gave the last full measure of devotion; that we here highly resolve that the dead shall not have died in vain; that the nation shall, under God, have a new birth of freedom, and that government of the people, by the people, for the people, shall not perish from the earth.

UNITED STATES COAST AND GEODETIC SURVEY.

THE Coast and Geodetic Survey of the Department of Commerce is charged with the survey of the coasts of the United States and coasts under the jurisdiction thereof, and the publication of charts covering said coasts. This includes base measure, triangulation, topography, and hydrography along said coasts; the survey of rivers to the head of tide water or ship navigation, deep sea soundings, temperature and current observations along said coasts and throughout the Gulf and Japan streams, magnetic observations and researches and the publication of maps showing the variations of terrestrial magnetism; gravity research, determination of heights, the determination of geographic positions by astronomic observations for latitude, longitude and azimuth, and by triangulation to furnish reference points for State surveys and to co-ordinate Governmental surveys.

The results obtained are published in annual reports and in special publications; charts upon various scales, including sailing charts, general charts of the coast and harbor charts; tide tables issued annually in advance; coast pilots with sailing directions covering the navigable waters; notices to mariners issued weekly as a joint publication of the Coast and Geodetic Survey and the Bureau of Lighthouses and containing current information necessary for safe navigation; catalogues of charts and publications, and such other publications as may be required to carry out the organic law governing the survey.

Constitution of the United States.

Preamble. WE, the people of the United States, in order to form a more perfect Union, establish justice, insure domestic tranquillity, provide for the common defense, promote the general welfare, and secure the blessings of liberty to ourselves and our posterity, do ordain and establish this CONSTITUTION for the United States of America.

ARTICLE I.

Legislative powers. SECTION I. All legislative powers herein granted shall be vested in a Congress of the United States, which shall consist of a Senate and House of Representatives.

House of Representatives. SECTION II. 1. The House of Representatives shall be composed of members chosen every second year by the people of the several States, and the electors in each State shall have the qualifications requisite for electors of the most numerous branch of the State Legislature.

Qualifications of Representatives. 2. No person shall be a Representative who shall not have attained to the age of twenty-five years, and been seven years a citizen of the United States, and who shall not, when elected, be an inhabitant of that State in which he shall be chosen.

Apportionment of Representatives. 3. Representatives and direct taxes shall be apportioned among the several States which may be included within this Union according to their respective numbers, which shall be determined by adding to the whole number of free persons, including those bound to service for a term of years, and excluding Indians not taxed, three-fifths of all other persons. The actual enumeration shall be made within three years after the first meeting of the Congress of the United States, and within every subsequent term of ten years, in such manner as they shall by law direct. The number of Representatives shall not exceed one for every thirty thousand, but each State shall have at least one Representative, and until such enumeration shall be made, the State of New Hampshire shall be entitled to choose 3; Massachusetts, 8; Rhode Island and Providence Plantations, 1; Connecticut, 5: New York, 6: New Jersey, 4; Pennsylvania, 8; Delaware, 1: Maryland, 6, Virginia, 10: North Carolina, 5, South Carolina, 5, and Georgia, 3.*

Vacancies, how filled. 4. When vacancies happen in the representation from any State, the Executive Authority thereof shall issue writs of election to fill such vacancies.

Officers, how appointed. 5. The House of Representatives shall choose their Speaker and other officers, and shall have the sole power of impeachment.

Senate. SECTION III. [See Article XVII., Amendments.] 1. The Senate of the United States shall be composed of two Senators from each State, chosen by the Legislature thereof, for six years; and each Senator shall have one vote.

Classification of Senators. 2. Immediately after they shall be assembled in consequence of the first election, they shall be divided as equally as may be into three classes. The seats of the Senators of the first class shall be vacated at the expiration of the second year, of the second class at the expiration of the fourth year, and of the third class at the expiration of the sixth year, so that one-third may be chosen every second year; and if vacancies happen by resignation, or otherwise, during the recess of the Legislature of any State, the Executive thereof may make temporary appointment until the next meeting of the Legislature, which shall then fill such vacancies.

Qualifications of Senators. 3. No person shall be a Senator who shall not have attained to the age of thirty years, and been nine years a citizen of the United States, and who shall not, when elected, be an inhabitant of that State for which he shall be chosen.

President of the Senate. 4. The Vice-President of the United States shall be President of the Senate, but shall have no vote unless they be equally divided.

5. The Senate shall choose their other officers, and also a President pro tempore, in the absence of the Vice-President, or when he shall exercise the office of President of the United States.

Senate a court for trial of impeachments. 6. The Senate shall have the sole power to try all impeachments. When sitting for that purpose, they shall be on oath or affirmation. When the President of the United States is tried, the Chief Justice shall preside; and no person shall be convicted without the concurrence of two-thirds of the members present.

Judgment in case of conviction. 7. Judgment in cases of impeachment shall not extend further than to removal from office, and disqualification to hold and enjoy any office of honor, trust, or profit under the United States; but the party convicted shall nevertheless be liable and subject to indictment, trial, judgment, and punishment, according to law.

Elections of Senators and Representatives. SECTION IV. 1. The times, places, and manner of holding elections for Senators and Representatives shall be prescribed in each State by the Legislature thereof; but the Congress may at any time by law make or alter such regulations, except as to places of choosing Senators.

Meeting of Congress. 2. The Congress shall assemble at least once in every year, and such meeting shall be on the first Monday in December, unless they shall by law appoint a different day.

Organization of Congress. SECTION V. 1. Each House shall be the judge of the elections, returns, and qualifications of its own members, and a majority of each shall constitute a quorum to do business; but a smaller number may adjourn from day to day, and may be authorized to compel the attendance of absent members in such manner and under such penalties as each House may provide.

Rule of proceedings. 2. Each House may determine the rules of its proceedings, punish its members for disorderly behavior, and with the concurrence of two-thirds expel a member.

Journals of each House. 3. Each House shall keep a journal of its proceedings, and from time to time publish the same, excepting such parts as may in their judgment require secrecy; and the yeas and nays of the members of either House on any question shall, at the desire of one-fifth of those present, be entered on the journal.

Adjournment of Congress. 4. Neither House, during the session of Congress, shall, without the consent of the other, adjourn for more than three days, nor to any other place than that in which the two Houses shall be sitting.

Pay and privileges of members. SECTION VI. 1. The Senators and Representatives shall receive a compensation for their services, to be ascertained by law, and paid out of the Treasury of the United States. They shall in all cases, except treason, felony, and breach of the peace, be privileged from arrest during their attendance at the session of their respective Houses, and in going to and returning from the same; and for any speech or debate in either House they shall not be questioned in any other place.

Other offices prohibited. 2. No Senator or Representative shall, during the time for which he was elected, be appointed to any civil office under the authority of the United States which shall have been created, or the emoluments whereof shall have been increased during such time; and no person holding any office under the United States shall be a member of either House during his continuance in office.

Revenue bills. SECTION VII. 1. All bills for raising revenue shall originate in the House of Representatives, but the Senate may propose or concur with amendments, as on other bills.

How bills become laws. 2. Every bill which shall have passed the House of Representatives and the Senate shall, before it become a law, be presented to the President of the United States; if he approve, he shall sign it, but if not, he shall return it, with his objections, to that House in which it shall have originated, who shall enter the objections at large on their journal, and proceed to reconsider it. If after such reconsideration two-thirds of that House shall agree to pass the bill, it shall be sent, together with the objections, to the other House, by which it shall likewise be reconsidered; and if approved by two-thirds of that House it shall become a law. But in all such cases the votes of both Houses shall be determined by yeas and nays, and the names of the persons voting for and against the bill shall be entered on the journal of each House respectively. If any bill shall not be returned by the President within ten days (Sundays excepted) after it shall have been presented to him, the same shall be a law in like manner as if he had signed it, unless the Congress by their adjournment prevent its return; in which case it shall not be a law.

* See Article XIV., Amendments.

Approval and veto powers of the President.

3. Every order, resolution, or vote to which the concurrence of the Senate and House of Representatives may be necessary (except on a question of adjournment) shall be presented to the President of the United States; and before the same shall take effect shall be approved by him, or being disapproved by him, shall be repassed by two-thirds of the Senate and the House of Representatives, according to the rules and limitations prescribed in the case of a bill.

Powers vested in Congress.

SECTION VIII. 1. The Congress shall have power:

To lay and collect taxes, duties, imposts, and excises, to pay the debts and provide for the common defence and general welfare of the United States; but all duties, imposts, and excises shall be uniform throughout the United States.

2. To borrow money on the credit of the United States.

3. To regulate commerce with foreign nations, and among the several States, and with the Indian tribes.

4. To establish an uniform rule of naturalization and uniform laws on the subject of bankruptcies throughout the United States.

5. To coin money, regulate the value thereof, and of foreign coin, and fix the standard of weights and measures.

6. To provide for the punishment of counterfeiting the securities and current coin of the United States.

7. To establish post-offices and post-roads.

8. To promote the progress of science and useful arts by securing for limited times to authors and inventors the exclusive rights to their respective writings and discoveries.

9. To constitute tribunals inferior to the Supreme Court.

10. To define and punish piracies and felonies committed on the high seas, and offences against the law of nations.

11. To declare war, grant letters of marque and reprisal, and make rules concerning captures on land and water.

12. To raise and support armies, but no appropriation of money to that use shall be for a longer term than two years.

13. To provide and maintain a navy.

14. To make rules for the government and regulation of the land and naval forces.

15. To provide for calling forth the militia to execute the laws of the Union, suppress insurrections, and repel invasions.

16. To provide for organizing, arming, and disciplining the militia, and for governing such part of them as may be employed in the service of the United States, reserving to the States respectively the appointment of the officers, and the authority of training the militia according to the discipline prescribed by Congress.

17. To exercise exclusive legislation in all cases whatsoever over such district (not exceeding ten miles square) as may, by cession of particular States and the acceptance of Congress, become the seat of Government of the United States, and to exercise like authority over all places purchased by the consent of the Legislature of the State in which the same shall be, for the erection of forts, magazines, arsenals, dry-docks, and other needful buildings.

18. To make all laws which shall be necessary and proper for carrying into execution the foregoing powers, and all other powers vested by this Constitution in the Government of the United States, or in any department or officer thereof.

Immigrants, how admitted.

SECTION IX. 1. The migration or importation of such persons as any of the States now existing shall think proper to admit shall not be prohibited by the Congress prior to the year one thousand eight hundred and eight, but a tax or duty may be imposed on such importation, not exceeding ten dollars for each person.

Habeas corpus.

2. The privilege of the writ of habeas corpus shall not be suspended, unless when in cases of rebellion or invasion the public safety may require it.

Attainder.

3. No bill of attainder or ex post facto law shall be passed.

Direct taxes.

4. No capitation or other direct tax shall be laid, unless in proportion to the census or enumeration hereinbefore directed to be taken.

Regulations regarding customs duties.

5. No tax or duty shall be laid on articles exported from any State.

6. No preference shall be given by any regulation of commerce or revenue to the ports of one State over those of another, nor shall vessels bound to or from one State be obliged to enter, clear, or pay duties in another.

Moneys, how drawn.

7. No money shall be drawn from the Treasury but in consequence of appropriations made by law; and a regular statement and account of the receipts and expenditures of all public money shall be published from time to time.

Titles of nobility prohibited.

8. No title of nobility shall be granted by the United States. And no person holding any office of profit or trust under them shall, without the consent of the Congress, accept of any present, emolument, office, or title of any kind whatever from any king, prince, or foreign state.

Powers of States defined.

SECTION X. 1. No State shall enter into any treaty, alliance, or confederation, grant letters of marque and reprisal, coin money, emit bills of credit, make anything but gold and silver coin a tender in payment of debts, pass any bill of attainder, ex post facto law, or law impairing the obligation of contracts, or grant any title of nobility.

2. No State shall, without the consent of the Congress, lay any impost or duties on imports or exports, except what may be absolutely necessary for executing its inspection laws, and the net produce of all duties and imposts, laid by any State on imports or exports, shall be for the use of the Treasury of the United States; and all such laws shall be subject to the revision and control of the Congress.

3. No State shall, without the consent of Congress, lay any duty of tonnage, keep troops or ships of war in time of peace, enter into any agreement or compact with another State, or with a foreign power, or engage in war, unless actually invaded, or in such imminent danger as will not admit of delay.

ARTICLE II.

Executive power, in whom vested.

SECTION I. 1. The Executive power shall be vested in a President of the United States of America. He shall hold his office during the term of four years, and, together with the Vice-President, chosen for the same term, be elected as follows:

Electors.

2. Each State shall appoint, in such manner as the Legislature thereof may direct, a number of electors, equal to the whole number of Senators and Representatives to which the State may be entitled in the Congress; but no Senator or Representative or person holding an office of trust or profit under the United States shall be appointed an elector.

Proceedings of electors.

3. [The electors shall meet in their respective States and vote by ballot for two persons, of whom one at least shall not be an inhabitant of the same State with themselves. And they shall make a list of all the persons voted for, and of the number of votes for each, which list they shall sign and certify and transmit, sealed, to the seat of the Government of the United States, directed to the President of the Senate. The President of the Senate shall, in the presence of the Senate and House of Representatives, open all the certificates, and the votes shall then be counted. The person having the greatest number of votes shall be the President, if such number be a majority of the whole number of electors appointed, and if there be more than one who have such majority, and have an equal number of votes, then the House of Representatives shall immediately choose by ballot one of them for President; and if no person have a majority, then from the five highest on the list the said House shall in like manner choose the President. But in choosing the President, the vote shall be taken by States, the representation from each State having one vote. A quorum, for this purpose, shall consist of a member or members from two-thirds of the States, and a majority of all the States shall be necessary to a choice. In every case, after the choice of the President, the person having the greatest number of votes of the electors shall be the Vice-President. But if there should remain two or more who have equal votes, the Senate shall choose from them by ballot the Vice-President.]*

Proceedings of the House of Representatives.

Time of choosing electors.

4. The Congress may determine the time of choosing the electors and the day on which they shall give their votes, which day shall be the same throughout the United States.

* This clause is superseded by Article XII., Amendments.

Qualifications of the President. 5. No person except a natural born citizen, or a citizen of the United States at the time of the adoption of this Constitution, shall be eligible to the office of President; neither shall any person be eligible to that office who shall not have attained to the age of thirty-five years and been fourteen years a resident within the United States.

Provision in case of his disability. 6. In case of the removal of the President from office, or of his death, resignation, or inability to discharge the powers and duties of the said office, the same shall devolve on the Vice-President, and the Congress may by law provide for the case of removal, death, resignation, or inability, both of the President and Vice-President, declaring what officer shall then act as President, and such officer shall act accordingly until the disability be removed or a President shall be elected.

Salary of the President. 7. The President shall, at stated times, receive for his services a compensation which shall neither be increased nor diminished during the period for which he shall have been elected, and he shall not receive within that period any other emolument from the United States, or any of them.

Oath of the President. 8. Before he enter on the execution of his office he shall take the following oath or affirmation:

"I do solemnly swear (or affirm) that I will faithfully execute the office of President of the United States, and will, to the best of my ability, preserve, protect, and defend the Constitution of the United States."

Duties of the President. SECTION II. 1. The President shall be Commander-in-Chief of the Army and Navy of the United States, and of the militia of the several States when called into the actual service of the United States; he may require the opinion, in writing, of the principal officer in each of the executive departments upon any subject relating to the duties of their respective offices, and he shall have power to grant reprieves and pardons for offences against the United States except in cases of impeachment.

May make treaties, appoint ambassadors, judges, etc. 2. He shall have power, by and with the advice and consent of the Senate, to make treaties, provided two-thirds of the Senators present concur; and he shall nominate, and by and with the advice and consent of the Senate shall appoint ambassadors, other public ministers and consuls, judges of the Supreme Court, and all other officers of the United States whose appointments are not herein otherwise provided for, and which shall be established by law; but the Congress may by law vest the appointment of such inferior officers as they think proper in the President alone, in the courts of law, or in the heads of departments.

May fill vacancies. 3. The President shall have power to fill up all vacancies that may happen during the recess of the Senate by granting commissions, which shall expire at the end of their next session.

May make recommendations to and convene Congress. SECTION III. He shall from time to time give to the Congress information of the state of the Union, and recommend to their consideration such measures as he shall judge necessary and expedient; he may, on extraordinary occasions, convene both Houses, or either of them, and in case of disagreement between them with respect to the time of adjournment, he may adjourn them to such time as he shall think proper; he shall receive ambassadors and other public ministers; he shall take care that the laws be faithfully executed, and shall commission all the officers of the United States.

How officers may be removed. SECTION IV. The President, Vice-President, and all civil officers of the United States shall be removed from office on impeachment for and conviction of treason, bribery, or other high crimes and misdemeanors.

ARTICLE III.

Judicial power, how invested. SECTION I. The judicial power of the United States shall be vested in one Supreme Court, and in such inferior courts as the Congress may from time to time ordain and establish. The judges, both of the Supreme and inferior courts, shall hold their offices during good behavior, and shall at stated times receive for their services a compensation which shall not be diminished during their continuance in office.

To what cases it extends. SECTION II. 1. The judicial power shall extend to all cases in law and equity arising under this Constitution, the laws of the United States, and treaties made, or which shall be made, under their authority; to all cases affecting ambassadors, other public ministers, and consuls; to all cases of admiralty and maritime jurisdiction; to controversies to which the United States shall be a party; to controversies between two or more States, between a State and citizens of another State, between citizens of different States, between citizens of the same State claiming lands under grants of different States, and between a State, or the citizens thereof, and foreign States, citizens, or subjects.

Jurisdiction of the Supreme Court. 2. In all cases affecting ambassadors, other public ministers, and consuls, and those in which a State shall be party, the Supreme Court shall have original jurisdiction. In all the other cases before-mentioned the Supreme Court shall have appellate jurisdiction both as to law and fact, with such exceptions and under such regulations as the Congress shall make.

Rules respecting trials. 3. The trial of all crimes, except in cases of impeachment, shall be by jury, and such trial shall be held in the State where the said crimes shall have been committed; but when not committed within any State the trial shall be at such place or places as the Congress may by law have directed.

Treason defined. SECTION III. 1. Treason against the United States shall consist only in levying war against them, or in adhering to their enemies, giving them aid and comfort. No person shall be convicted of treason unless on the testimony of two witnesses to the same overt act, or on confession in open court.

How punished. 2. The Congress shall have power to declare the punishment of treason, but no attainder of treason shall work corruption of blood or forfeiture except during the life of the person attained.

ARTICLE IV.

Rights of States and records. SECTION I. Full faith and credit shall be given in each State to the public acts, records, and judicial proceedings of every other State. And the Congress may by general laws prescribe the manner in which such acts, records, and proceedings shall be proved, and the effect thereof.

Privileges of citizens. SECTION II. 1. The citizens of each State shall be entitled to all privileges and immunities of citizens in the several States.

Executive requisitions. 2. A person charged in any State with treason, felony, or other crime, who shall flee from justice, and be found in another State, shall, on demand of the Executive authority of the State from which he fled, be delivered up, to be removed to the State having jurisdiction of the crime.

Laws regulating service or labor. 3. No person held to service or labor in one State, under the laws thereof, escaping into another shall, in consequence of any law or regulation therein, be discharged from such service or labor, but shall be delivered up on claim of the party to whom such service or labor may be due.

New States, how formed and admitted. SECTION III. 1. New States may be admitted by the Congress into this Union; but no new State shall be formed or erected within the jurisdiction of any other State, nor any State be formed by the junction of two or more States, or parts of States, without the consent of the Legislatures of the States concerned, as well as of the Congress.

Power of Congress over public lands. 2. The Congress shall have power to dispose of and make all needful rules and regulations respecting the territory or other property belonging to the United States; and nothing in this Constitution shall be so construed as to prejudice any claims of the United States, or of any particular State.

Republican government guaranteed. SECTION IV. The United States shall guarantee to every State in this Union a republican form of government, and shall protect each of them against invasion, and, on application of the Legislature, or of the Executive (when the Legislature cannot be convened), against domestic violence.

ARTICLE V.

Constitution, how amended. The Congress, whenever two-thirds of both Houses shall deem it necessary, shall propose amendments to this Constitution, or, on the application of the Legislatures of two-thirds of the several States, shall call a convention for proposing amendments, which, in either case, shall be valid to all intents and purposes, as part of this Constitution, when ratified by the Legislatures of three-fourths of the several States, or by conventions in three-fourths thereof, as the one or the other mode of ratification may be proposed by the Congress; provided that no amendment which may be made prior to the year one thousand eight hundred and eight shall in any manner affect the first and fourth clauses in the Ninth Section of the First Article; and that no State, without its consent, shall be deprived of its equal suffrage in the Senate.

ARTICLE VI.

Validity of debts recognized. 1. All debts contracted and engagements entered into before the adoption of this Constitution shall be as valid against the United States under this Constitution as under the Confederation.

Supreme law of the land defined.

2. This Constitution and the laws of the United States which shall be made in pursuance thereof and all treaties made, or which shall be made, under the authority of the United States, shall be the supreme law of the land, and the judges in every State shall be bound thereby, anything in the Constitution or laws of any State to the contrary notwithstanding.

Oath; of whom required and for what.

3. The Senators and Representatives before mentioned, and the members of the several State Legislatures, and all executive and judicial officers, both of the United States and of the several States, shall be bound by oath or affirmation to support this Constitution, but no religious test shall ever be required as a qualification to any office or public trust under the United States.

ARTICLE VII.

Ratification of the Constitution.

The ratification of the Conventions of nine States shall be sufficient for the establishment of this Constitution between the States so ratifying the same.

AMENDMENTS TO THE CONSTITUTION.

ARTICLE I.

Religion and free speech.

Congress shall make no law respecting an establishment of religion, or prohibiting the free exercise thereof; or abridging the freedom of speech or of the press; or the right of the people peaceably to assemble, and to petition the Government for a redress of grievances.

ARTICLE II.

Right to bear arms.

A well-regulated militia being necessary to the security of a free State, the right of the people to keep and bear arms shall not be infringed.

ARTICLE III.

Soldiers in time of peace.

No soldier shall, in time of peace, be quartered in any house without the consent of the owner, nor in time of war but in a manner to be prescribed by law.

ARTICLE IV.

Right of search.

The right of the people to be secure in their persons, houses, papers, and effects, against unreasonable searches and seizures, shall not be violated, and no warrants shall issue but upon probable cause, supported by oath or affirmation, and particularly describing the place to be searched, and the persons or things to be seized.

ARTICLE V.

Capital crimes and arrest therefor.

No person shall be held to answer for a capital or other infamous crime unless on a presentment or indictment of a grand jury, except in cases arising in the land or naval forces, or in the militia, when in actual service, in time of war or public danger; nor shall any person be subject for the same offence to be twice put in jeopardy of life or limb; nor shall be compelled in any criminal case to be a witness against himself, nor be deprived of life, liberty, or property, without due process of law; nor shall private property be taken for public use without just compensation.

ARTICLE VI.

Right to speedy trial.

In all criminal prosecutions, the accused shall enjoy the right to a speedy and public trial, by an impartial jury of the State and district wherein the crime shall have been committed, which district shall have been previously ascertained by law, and to be informed of the nature and cause of the accusation; to be confronted with the witnesses against him; to have compulsory process for obtaining witnesses in his favor, and to have the assistance of counsel for his defence.

ARTICLE VII.

Trial by jury.

In suits at common law, where the value in controversy shall exceed twenty dollars, the right of trial by jury shall be preserved, and no fact tried by a jury shall be otherwise re-examined in any court of the United States than according to the rules of the common law.

ARTICLE VIII.

Excessive bail.

Excessive bail shall not be required, nor excessive fines imposed, nor cruel and unusual punishments inflicted.

ARTICLE IX.

Enumeration of rights.

The enumeration in the Constitution of certain rights shall not be construed to deny or disparage others retained by the people.

ARTICLE X.

Reserved rights of States.

The powers not delegated to the United States by the Constitution, nor prohibited by it to the States, are reserved to the States respectively, or to the people.

ARTICLE XI.

Judicial power.

The judicial power of the United States shall not be construed to extend to any suit in law or equity, commenced or prosecuted against one of the United States, by citizens of another State, or by citizens or subjects of any foreign State.

ARTICLE XII.

Electors in Presidential elections.

Vice-President.

The electors shall meet in their respective States, and vote by ballot for President and Vice-President, one of whom at least shall not be an inhabitant of the same State with themselves; they shall name in their ballots the person voted for as President, and in distinct ballots the person voted for as Vice-President; and they shall make distinct lists of all persons voted for as President, and of all persons voted for as Vice-President, and of the number of votes for each, which list they shall sign and certify, and transmit, sealed, to the seat of the Government of the United States, directed to the President of the Senate; the President of the Senate shall, in the presence of the Senate and House of Representatives, open all the certificates, and the votes shall then be counted; the person having the greatest number of votes for President shall be the President, if such number be a majority of the whole number of electors appointed; and if no person have such majority, then from the persons having the highest numbers, not exceeding three, on the list of those voted for as President, the House of Representatives shall choose immediately, by ballot, the President. But in choosing the President, the votes shall be taken by States, the representation from each State having one vote; a quorum for this purpose shall consist of a member or members from two-thirds of the States, and a majority of all the States shall be necessary to a choice. And if the House of Representatives shall not choose a President, whenever the right of choice shall devolve upon them, before the fourth day of March next following, then the Vice-President shall act as President, as in the case of the death or other constitutional disability of the President. The person having the greatest number of votes as Vice-President shall be the Vice-President, if such number be a majority of the whole number of electors appointed, and if no person have a majority, then from the two highest numbers on the list the Senate shall choose the Vice-President; a quorum for the purpose shall consist of two-thirds of the whole number of Senators, and a majority of the whole number shall be necessary to a choice. But no person constitutionally ineligible to the office of President shall be eligible to that of Vice-President of the United States.

ARTICLE XIII.

Slavery prohibited.

1. Neither slavery nor involuntary servitude, except as a punishment for crime whereof the party shall have been duly convicted, shall exist within the United States, or any place subject to their jurisdiction.

2. Congress shall have power to enforce this article by appropriate legislation.

CONSTITUTION OF THE UNITED STATES—*Continued.*

ARTICLE XIV.

Protection for all citizens.

1. All persons born or naturalized in the United States, and subject to the jurisdiction thereof, are citizens of the United States and of the State wherein they reside. No State shall make or enforce any law which shall abridge the privileges or immunities of citizens of the United States; nor shall any State deprive any person of life, liberty, or property without due process of law, nor deny to any person within its jurisdiction the equal protection of the laws.

Apportionment of Representatives.

2. Representatives shall be apportioned among the several States according to their respective numbers, counting the whole number of persons in each State, excluding Indians not taxed. But when the right to vote at any election for the choice of electors for President and Vice-President of the United States, Representatives in Congress, the executive and judicial officers of a State, or the members of the Legislature thereof, is denied to any of the male members of such State, being of twenty-one years of age, and citizens of the United States, or in any way abridged, except for participation in rebellion or other crime, the basis of representation therein shall be reduced in the proportion which the number of such male citizens shall bear to the whole number of male citizens twenty-one years of age in such State.

Rebellion against the United States.

3. No person shall be a Senator or Representative in Congress, or elector of President and Vice-President, or holding any office, civil or military, under the United States, or under any State, who, having previously taken an oath, as a member of Congress, or as an officer of the United States, or as a member of any State Legislature, or as an executive or judicial officer of any State, to support the Constitution of the United States, shall have engaged in insurrection or rebellion against the same, or given aid and comfort to the enemies thereof. But Congress may, by a vote of two-thirds of each House, remove such disability.

The public debt.

4. The validity of the public debt of the United States, authorized by law, including debts incurred for payment of pensions and bounties for services in suppressing insurrection and rebellion, shall not be questioned. But neither the United States nor any State shall assume or pay any debt or obligation incurred in aid of insurrection or rebellion against the United States, or any claim for the loss or emancipation of any slave; but all such debts, obligations, and claims shall be held illegal and void.

5. The Congress shall have power to enforce by appropriate legislation the provisions of this article.

ARTICLE XV.

Right of suffrage.

1. The right of the citizens of the United States to vote shall not be denied or abridged by the United States or by any State on account of race, color, or previous condition of servitude.

2. The Congress shall have power to enforce the provisions of this article by appropriate legislation.

ARTICLE XVI.

Taxes on Incomes.

The Congress shall have power to lay and collect taxes on incomes, from whatever source derived, without apportionment among the several States, and without regard to any census or enumeration.

ARTICLE XVII.

Senators elected by the people.

1. The Senate of the United States shall be composed of two Senators from each State, elected by the people thereof, for six years; and each Senator shall have one vote. The electors in each State shall have the qualifications requisite for electors of the most numerous branch of the State Legislatures.

Filling of vacancies.

2. When vacancies happen in the representation of any State in the Senate, the executive authority of such State shall issue writs of election to fill such vacancies: Provided, That the Legislature of any State may empower the executive thereof to make temporary appointment until the people fill the vacancies by election as the Legislature may direct.

3. This amendment shall not be so construed as to affect the election or term of any Senator chosen before it becomes valid as part of the Constitution.

RATIFICATION OF THE CONSTITUTION.

The Constitution was ratified by the thirteen original States in the following order:

Delaware, December 7, 1787, unanimously.
Pennsylvania, December 12, 1787, vote 46 to 23.
New Jersey, December 18, 1787, unanimously.
Georgia, January 2, 1788, unanimously.
Connecticut, January 9, 1788, vote 128 to 40.
Massachusetts, February 6, 1788, vote 187 to 168.
Maryland, April 28, 1788, vote 63 to 12.
South Carolina, May 23, 1788, vote 149 to 73.
New Hampshire, June 21, 1788, vote 57 to 46.
Virginia, June 25, 1788, vote 89 to 79.
New York, July 26, 1788, vote 30 to 28.
North Carolina, November 21, 1789, vote 193 to 75.
Rhode Island, May 29, 1790, vote 34 to 32.

RATIFICATION OF THE AMENDMENTS.

I. to X. inclusive were declared in force December 15, 1791.

XI. was declared in force January 8, 1798.

XII., regulating elections, was ratified by all the States except Connecticut, Delaware, Massachusetts, and New Hampshire, which rejected it. It was declared in force September 28, 1804.

XIII. The emancipation amendment was ratified by 31 of the 36 States; rejected by Delaware and Kentucky, not acted on by Texas, conditionally ratified by Alabama and Mississippi. Proclaimed December 18, 1865.

XIV. Reconstruction amendment was ratified by 23 Northern States; rejected by Delaware, Kentucky, Maryland, and 10 Southern States, and not acted on by California. The 10 Southern States subsequently ratified under pressure. Proclaimed July 28, 1868.

XV. Negro citizenship amendment was not acted on by Tennessee, rejected by California, Delaware, Kentucky, Maryland, New Jersey, and Oregon; ratified by the remaining 30 States. New York rescinded its ratification January 5, 1870. Proclaimed March 30, 1870.

XVI. Income tax amendment was ratified by all the States except Connecticut, Florida, Pennsylvania, Rhode Island, Utah and Virginia. Declared in force February 25, 1913.

XVII. Providing for the direct vote of United States Senators by the people, was ratified by all the States except Alabama, Delaware, Florida, Georgia, Kentucky, Louisiana, Maryland, Mississippi, Rhode Island, South Carolina, Utah and Virginia. Declared in force May 31, 1913.

WHITE HOUSE RULES.

THE following rules have been arranged for the conduct of business at the Executive Offices during the Winter of 1916-17:

The Cabinet will meet on Tuesdays and Fridays from 11 A. M. until 1 P. M.

Senators and Representatives having business to transact will be received from 10.30 A. M. to 12 M., excepting on Cabinet days. In view of the pressure of business at the Executive Offices during the Congressional session it would greatly facilitate matters if Senators and Members could telephone for an appointment before calling, as many will have first made appointments in this way, and those calling without appointments are therefore necessarily delayed in seeing the President.

The East Room will be open daily, Sundays excepted, for the inspection of visitors, between the hours of 10 A. M. and 2 P. M.

JOSEPH P. TUMULTY, *Secretary to the President.*

DECLARATION OF INDEPENDENCE.

IN CONGRESS JULY 4, 1776.

THE unanimous declaration of the thirteen United States of America. When in the Course of human events, it becomes necessary for one people to dissolve the political bands which have connected them with another, and to assume among the powers of the earth, the separate and equal station to which the Laws of Nature and of Nature's God entitles them, a decent respect to the opinions of mankind requires that they should declare the causes which impel them to the separation.

We hold these truths to be self-evident, that all men are created equal, that they are endowed by their Creator with certain unalienable Rights, that among these are Life Liberty and the pursuit of Happiness. That to secure these rights, Governments are instituted among Men, deriving their just powers from the consent of the governed, That whenever any Form of Government becomes destructive of these ends, it is the Right of the People to alter or to abolish it, and to institute new Government, laying its foundation on such principles and organizing its powers in such form, as to them shall seem most likely to effect their Safety and Happiness. Prudence, indeed, will dictate that Governments long established should not be changed for light and transient causes; and accordingly all experience hath shewn, that mankind are more disposed to suffer, while evils are sufferable, than to right themselves by abolishing the forms to which they are accustomed. But when a long train of abuses and usurpations, pursuing invariably the same Object evinces a design to reduce them under absolute Despotism, it is their right, it is their duty, to throw off such Government, and to provide new Guards for their future security. Such has been the patient sufferance of these Colonies; and such is now the necessity which constrains them to alter their former Systems of Government The history of the present King of Great Britain is a history of repeated injuries and usurpations, all having in direct object the establishment of an absolute Tyranny over these States. To prove this, let Facts be submitted to a candid world.

He has refused his Assent to Laws, the most wholesome and necessary for the public good.

He has forbidden his Governors to pass Laws of immediate and pressing importance, unless suspended in their operation till his Assent should be obtained; and when so suspended, he has utterly neglected to attend to them.

He has refused to pass other Laws for the accommodation of large districts of people, unless those people would relinquish the right of Representation in the Legislature, a right inestimable to them and formidable to tyrants only.

He has called together legislative bodies at places unusual, uncomfortable, and distant from the depository of their public Records, for the sole purpose of fatiguing them into compliance with his measures.

He has dissolved Representative Houses repeatedly, for opposing with manly firmness his invasions on the rights of the people.

He has refused for a long time, after such dissolutions, to cause others to be elected; whereby the Legislative powers, incapable of Annihilation, have returned to the People at large for their exercise; the State remaining in the meantime exposed to all the dangers of invasion from without, and convulsions within.

He has endeavored to prevent the population of these States; for that purpose obstructing the Laws for Naturalization of Foreigners; refusing to pass others to encourage their migrations hither, and raising the conditions of new Appropriations of Lands.

He has obstructed the Administration of Justice, by refusing his Assent to Laws for establishing Judiciary Powers.

He has made Judges dependent on his Will alone, for the tenure of their offices, and the amount and payment of their salaries.

He has erected a multitude of New Offices, and sent hither swarms of Officers to harass our people, and eat out their substance.

He has kept among us, in times of peace, Standing Armies without the Consent of our legislature.

He has affected to render the Military independent of and superior to the Civil power.

He has combined with others to subject us to a jurisdiction foreign to our constitution, and unacknowledged by our laws; giving his Assent to their Acts of pretended Legislation:

For quartering large bodies of armed troops among us:

For protecting them, by a mock Trial, from punishment for any Murders which they should commit on the Inhabitants of these States:

For cutting off our Trade with all parts of the world:

For imposing Taxes on us without our Consent:

For depriving us in many cases, of the benefits of Trial by jury:

For transporting us beyond Seas to be tried for pretended offences:

For abolishing the free System of English Laws in a neighboring Province, establishing therein an Arbitrary government, and enlarging its Boundaries so as to render it at once an example and fit instrument for introducing the same absolute rule into these Colonies.

For taking away our Charters, abolishing our most valuable Laws, and altering fundamentally the Forms of our Governments:

For suspending our own Legislatures, and declaring themselves invested with power to legislate for us in all cases whatsoever.

He has abdicated Government here, by declaring us out of his Protection and waging War against us.

He has plundered our seas, ravaged our Coasts, burnt our towns, and destroyed the lives of our people.

He is at this time transporting large Armies of foreign Mercenaries to compleat the works of death, desolation and tyranny, already begun with circumstances of Cruelty & perfidy scarcely paralleled in the most barbarous ages, and totally unworthy the Head of a civilized nation.

He has constrained our fellow-Citizens taken captive on the high Seas to bear Arms against their Country, to become the executioners of their friends and Brethren, or to fall themselves by their Hands.

He has excited domestic insurrections amongst us, and has endeavored to bring on the inhabitants of our frontiers, the merciless Indian Savages, whose known rule of warfare, is an undistinguished destruction of all ages, sexes and conditions.

In every stage of these Oppressions We have Petitioned for Redress in the most humble terms:

DECLARATION OF INDEPENDENCE—*Continued.*

Our repeated Petitions have been answered only by repeated injury. A Prince, whose character is thus marked by every act which may define a Tyrant, is unfit to be the ruler of a free people.

Nor have We been wanting in attentions to our British brethren. We have warned them from time to time of attempts by their legislature to extend an unwarrantable jurisdiction over us. We have reminded them of the circumstances of our emigration and settlement here. We have appealed to their native justice and magnanimity, and we have conjured them by the ties of our common kindred to disavow these usurpations, which would inevitably interrupt our connections and correspondence. They too have been deaf to the voice of justice and of consanguinity. We must, therefore, acquiesce in the necessity, which denounces our Separation, and hold them, as we hold the rest of mankind, Enemies in War, in Peace Friends.

WE, THEREFORE, the REPRESENTATIVES of the UNITED STATES OF AMERICA, IN GENERAL CONGRESS, Assembled, appealing to the Supreme Judge of the world for the rectitude of our intentions, do, in the Name, and by authority of the good People of these Colonies, solemnly PUBLISH and DECLARE, That these United Colonies are, and of Right ought to be FREE AND INDEPENDENT States; that they are Absolved from all Allegiance to the British Crown, and that all political connection between them and the State of Great Britain is and ought to be totally dissolved; and that as FREE AND INDEPENDENT STATES, they have full Power to levy War, conclude Peace, contract Alliances, establish Commerce, and to do all other Acts and Things which INDEPENDENT STATES may of right do. And for the support of this Declaration, with a firm reliance on the protection of Divine Providence, We mutually pledge to each other our Lives, our Fortunes, and our sacred Honor.

SIGNERS OF THE DECLARATION OF INDEPENDENCE.

WASHINGTON'S FAREWELL ADDRESS.

EXTRACTS FROM HIS ADDRESS COUNSELLING THE MAINTENANCE OF THE UNION.—CONFINEMENT OF THE GENERAL GOVERNMENT TO ITS CONSTITUTIONAL LIMITATIONS, AND AVOIDANCE OF RELATIONS WITH FOREIGN POLITICAL AFFAIRS.

(*To the People of the United States on His Approaching Retirement from the Presidency.*)

Here, perhaps, I ought to stop; but a solicitude for your welfare, which cannot end but with my life, and the apprehension of danger natural to that solicitude, urge me, on an occasion like the present, to offer to your solemn contemplation, and to recommend to your frequent review, some sentiments, which are the result of much reflection, of no inconsiderable observation, and which appear to me all-important to the permanency of your felicity as a people. These will be afforded to you with the more freedom, as you can only see in them the disinterested warnings of a parting friend, who can possibly have no personal motive to bias his counsel; nor can I forget, as an encouragement to it, your indulgent reception of my sentiments on a former and not dissimilar occasion.

Interwoven as is the love of liberty with every ligament of your hearts, no recommendation of mine is necessary to fortify or confirm the attachment.

PRESERVATION OF THE UNION.

The unity of government, which constitutes you one people, is also now dear to you. It is justly so; for it is a main pillar in the edifice of your real independence—the support of your tranquillity at home, your peace abroad, of your safety, of your prosperity, of that very liberty which you so highly prize. But as it is easy to foresee that, from different causes and from different quarters, much pains will be taken, many artifices employed, to weaken in your minds the conviction of this truth; as this is the point in your political fortress against which the batteries of internal and external enemies will be most constantly and actively (though often covertly and insidiously) directed—it is of infinite moment that you should properly estimate the immense value of your national union to your collective and individual happiness; that you should cherish a cordial, habitual and immovable attachment to it; accustoming yourselves to think and speak of it as of the palladium of your political safety and prosperity; watching for its preservation with jealous anxiety; discountenancing whatever may suggest even a suspicion that it can, in any event, be abandoned; and indignantly frowning upon the first dawning of every attempt to alienate any portion of our country from the rest, or to enfeeble the sacred ties which now link together the various parts.

For this you have every inducement of sympathy and interest. Citizens by birth or choice of a common country, that country has a right to concentrate your affections. The name of America, which belongs to you in your national capacity, must always exalt the just pride of patriotism, more than any appellation derived from local discriminations. With slight shades of difference, you have the same religion, manners, habits, and political principles. You have, in a common cause, fought and triumphed together; the independence and liberty you possess are the work of joint counsels and joint efforts, of common dangers, sufferings, and successes.

ENCROACHMENTS BY THE GOVERNMENT.

It is important, likewise, that the habits of thinking, in a free country, should inspire caution in those intrusted with its administration, to confine themselves within their respective constitutional spheres, avoiding, in the exercise of the powers of one department, to encroach upon another. The spirit of encroachment tends to consolidate the powers of all the departments in one, and thus to create, whatever the form of government, a real despotism. A just estimate of that love of power, and proneness to abuse it which predominates in the human heart, is sufficient to satisfy us of the truth of this position. The necessity of reciprocal checks in the exercise of political power, by dividing and distributing it into different depositories, and constituting each the guardian of the public weal, against invasions by the others, has been evinced by experiments, ancient and modern; some of them in our own country, and under our own eyes. To preserve them must be as necessary as to institute them. If, in the opinion of the people, the distribution or modification of the constitutional powers be, in any particular, wrong, let it be corrected by an amendment in the way which the Constitution designates. But let there be no change or usurpation; for though this, in one instance, may be the instrument of good, it is the customary weapon by which free governments are destroyed. The precedent must always greatly overbalance, in permanent evil, any partial or transient benefit which the use can, at any time, yield.

Observe good faith and justice toward all nations; cultivate peace and harmony with all; religion and morality enjoin this conduct; and can it be that good policy does not equally enjoin it? It will be worthy of a free, enlightened, and, at no distant period, a great nation, to give to mankind the magnanimous and too novel example of a people always guided by an exalted justice and benevolence. Who can doubt that, in the course of times and things, the fruits of such a plan would richly repay any temporary advantages which might be lost by a steady adherence to it? Can it be that Providence has not connected the permanent felicity of a nation with its virtue? The experiment, at least, is recommended by every sentiment which ennobles human nature. Alas! is it rendered impossible by its vices?

ENTANGLEMENTS WITH FOREIGN POWERS.

Against the insidious wiles of foreign influence (I conjure you to believe me, fellow-citizens) the jealousy of a free people ought to constantly awake; since history and experience prove that foreign influence is one of the most baneful foes of republican government. But that jealousy to be useful, must be impartial; else it becomes the instrument of the very influence to be avoided, instead of a defence against it. Excessive partiality for one foreign nation, and excessive dislike for another, cause those whom they actuate to see danger only on one side, and serve to veil, and even second, the arts

of influence on the other. Real patriots, who may resist the intrigues of the favorite, are liable to become suspected and odious, while its tools and dupes usurp the applause and confidence of the people, to surrender their interests.

The great rule of conduct for us, in regard to foreign nations, is, in extending our commercial relations, to have with them as little political connection as possible. So far as we have already formed engagements, let them be fulfilled with perfect good faith. Here let us stop.

Europe has a set of primary interests, which to us have none, or a very remote relation. Hence she must be engaged in frequent controversies, the causes of which are essentially foreign to our concerns. Hence, therefore, it must be unwise in us to implicate ourselves, by artificial ties, in the ordinary vicissitudes of her politics, or the ordinary combinations and collisions of her friendships or enmities.

Our detached and distant situation invites and enables us to pursue a different course. If we remain one people under an efficient government, the period is not far off when we may defy material injury from external annoyance; when we may take such an attitude as will cause the neutrality we may at any time resolve upon, to be scrupulously respected; when belligerent nations, under the impossibility of making acquisitions upon us, will not lightly hazard the giving us provocation; when we may choose peace or war, as our interest, guided by justice, shall counsel.

PARTING COUNSELS.

In offering to you, my countrymen, these counsels of an old and affectionate friend, I dare not hope that they will make the strong and lasting impression I could wish; that they will control the usual current of the passions, or prevent our nation from running the course which hitherto has marked the destiny of nations; but if I may even flatter myself that they may be productive of some partial benefit, some occasional good; that they may now and then recur to moderate the fury of party spirit, to warn against the mischiefs of foreign intrigues, to guard against the impostures of pretended patriotism, this hope will be full recompense for the solicitude for your welfare by which they have been dictated.

United States, September 17, 1796. GEORGE WASHINGTON.

THE MONROE DOCTRINE.

"THE Monroe doctrine" was enunciated in the following words in President Monroe's message to Congress December 2, 1823:

"In the discussions to which this interest has given rise, and in the arrangements by which they may terminate, the occasion has been deemed proper for asserting, as a principle in which rights and interests of the United States are involved, that the American continents, by the free and independent condition which they have assumed and maintain, are henceforth not to be considered as subjects for future colonization by any European power. * * * We owe it, therefore, to candor and to the amicable relations existing between the United States and those powers to declare that we should consider any attempt on their part to extend their system to any portion of this hemisphere as dangerous to our peace and safety. With the existing colonies or dependencies of any European power we have not interfered and shall not interfere. But with the governments who have declared their independence and maintain it, and whose independence we have, on great consideration and on just principles, acknowledged, we could not view any interposition for the purpose of oppressing them or controlling in any other manner their destiny by any European power in any other light than as the manifestation of an unfriendly disposition toward the United States."

Secretary of State Olney in his despatch of July 20, 1895, on the Venezuelan Boundary Dispute, said:

"It (the Monroe doctrine) does not establish any general protectorate by the United States over other American States. It does not relieve any American State from its obligations as fixed by international law, nor prevent any European power directly interested from enforcing such obligations or from inflicting merited punishment for the breach of them."

President Roosevelt in a speech in 1902 upon the results of the Spanish-American war, said:

"The Monroe doctrine is simply a statement of our very firm belief that the nations now existing on this continent must be left to work out their own destinies among themselves, and that this continent is no longer to be regarded as the colonizing ground of any European power. The one power on the continent that can make the power effective is, of course, ourselves; for in the world as it is, a nation which advances a given doctrine, likely to interfere in any way with other nations, must possess the power to back it up, if it wishes the doctrine to be respected."

The United States Senate on August 2, 1912, adopted the following resolution proposed by Senator Lodge, by a vote of 51 to 4, the negative votes being those of Senators Cummins of Iowa, McCumber of North Dakota, Percy of Mississippi, and Stone of Missouri,

"*Resolved.* That when any harbor or other place in the American Continent is so situated that the occupation thereof for naval or military purposes might threaten the communications or the safety of the United States, the Government of the United States could not see without grave concern the possession of such harbor or other place by any corporation or association which has such a relation to another Government, not American, as to give that Government practical power of control for national purposes."

This action of the Senate grew out of the report that a stretch of territory bordering on Magdalena Bay, Mexico, might be acquired by the subjects of a foreign country, and thus through their control by their own national Government become the base of permanent naval or military occupation. In explanation of the resolution Senator Lodge said: "The declaration rests on a much broader and older ground than the Monroe doctrine. This resolution rests on the generally accepted principle that every nation has a right to protect its own safety; and if it feels that the possession of any given harbor or place is prejudical to its safety, it is its duty and right to intervene." The Senate added that the opening of the Panama Canal gave to Magdalena Bay an importance that it had never before possessed, as the Panama routes pass in front of it.

Not being a joint resolution requiring the concurrence of the House of Representatives and the signature of the President, the resolution adopted as above was an expression of opinion of the Senate only. The other house took no action.

THE UNITED STATES CENSUS.

THE Constitution requires that a census of the United States shall be taken decennially. The first census was taken in 1790 under the supervision of the President; subsequent censuses, to and including that of 1840, were taken under the supervision of the Secretary of State. In 1849 the administration of the census work was transferred to the newly organized Department of the Interior, where it remained until the passage, in 1903, of the act creating the Department of Commerce and Labor, by which act the Census Bureau was transferred to the new department. Meanwhile Congress, by act approved March 6, 1902, had made the Census Office a permanent bureau of the Government. Since March 4, 1913, when the Department of Commerce and the Department of Labor were separately organized, the Bureau of the Census has been attached to the former department.

The work of the Census Bureau is divided into two main branches, namely, the decennial census and special statistical inquiries, the latter mostly made in the intervals between the decennial censuses. The thirteenth decennial census was taken as of date April 15, 1910. It covered four main subjects: (1) population, (2) agriculture, (3) manufactures, and (4) mines, quarries, and oil and gas wells.

The results of this census have been published and have been used wherever available for the tables of the present ALMANAC and those preceding it. The aggregate cost of the census of 1910 was about $14,290,000, in addition to which $1,675,000 was spent in carrying on the annual investigations of the permanent bureau during the census period. Of this amount $7,200,000 represents the cost of collecting the data through the employment of over 70,000 paid enumerators, besides supervisors, clerks, and special agents. The balance is the cost of tabulating and publishing the results. A more detailed account of the census of 1910 is given in the 1911 issue of THE WORLD ALMANAC.

The permanent work of the Census Bureau is provided for by the act of Congress approved March 6, 1902, and amendments thereto. These acts authorize and direct the bureau to make statistical inquiries regarding the insane, feeble-minded, deaf and dumb, and blind; crime, pauperism, and benevolence; deaths and births in the areas maintaining adequate registration systems; social and financial statistics of cities; wealth, debt and taxation; religious bodies; electric light and power, telephones and telegraphs, and street and electric railways; transportation by water; cotton produced, consumed, imported, exported, and on hand, and active cotton spindles; stocks of leaf tobacco held by manufacturers and dealers. The statistics of deaths (which now cover more than two-thirds of the population), of cities, of cotton produced, consumed, etc., and of tobacco stocks, are secured annually; the other statistics mentioned are collected at intervals of five or ten years, but not in connection with the regular decennial censuses. The act of 1902 also provides for a census of manufactures in the fifth year intervening between the decennial censuses.

The Director of the Census is appointed by the President of the United States and receives a salary of $6,000 per annum. The present director is Samuel L. Rogers of North Carolina. The permanent office organization includes a chief clerk, William L. Austin; four chief statisticians—for Population William C. Hunt; for Manufactures, William M. Steuart; for Statistics of States and Cities, Starke M. Grogan, and for Vital Statistics, Richard C. Lappin; a geographer, Charles S. Sloane, and nine chiefs of division. The entire number of employés in the bureau at Washington is now about 600; in addition there are about 700 special agents employed intermittently in the Southern States for the collection of cotton statistics. The number of employés in Washington was greatly increased during the decennial census; in August, 1910, it was more than 3,700, in addition to field employés.

TELESCOPES.

THERE are two kinds of telescopes, viz., refracting and reflecting. In the former the rays of light are made to converge to a focus by lenses, while in the latter they are made to converge by being reflected from the surface of a slightly concaved, highly polished mirror.

The chief disadvantages of refracting telescopes are the chromatic and spherical aberrations of the lenses. In reflecting telescopes these aberrations can be done away with by using parabolic mirrors, but the great objection to the latter are the many mechanical difficulties that have to be overcome.

Owing to the travelling of the earth in its orbit and revolving about its axis, stars if viewed by a fixed telescope would soon disappear. It is thus necessary that a telescope be mounted so a star will always be in its field. This is accomplished by using an equatorial mounting.

In an equatorial mounting there are two axes, one called the "polar" that is parallel to the axis of the earth, and the other the "declination" at right angles to it. Hence, when a star is to be followed, the telescope is clamped in position, and by means of clockwork follows the star so it always remains in view.

The magnifying power of telescopes is generally expressed in diameters, the practical limit of power being 100 diameters per inch of diameter of the telescope. Thus the 36-inch telescope at the Lick Observatory may give a magnifying power of 3,600 diameters. But such high power can only be used in a very clear atmosphere, and consequently most astronomical observations are made at 1,000 diameters.

REFRACTING TELESCOPES.

The largest in the world are in the United States. The one at Yerkes Observatory, Geneva Lake, Wis., has an object lens 40 inches in diameter with a focal length of 64 feet. The movable part of the instrument turning on the polar axis weighs about 12 tons, and the clock 1½ tons. Other large telescopes are the 36-inch at Lick Observatory, Mt. Hamilton, Cal., where many important astronomical discoveries have been made; the 26-inch at the U. S. Observatory, Washington, D. C., and the 24-inch belonging to Harvard University. There is a 30-inch refracting telescope at the Allegheny Observatory, Riverview Park, Pa.

Abroad is the 30-inch at the Imperial Observatory, Pulovak (near Petrograd), Russia. This telescope has a platform at the lower end of the polar axis, from which observers can readily operate the instrument. The Meudon Observatory (near Paris, France) has a 32-inch, the Potsdam, Prussia, a 31-inch, and the Royal Observatory, at Greenwich, England, a 28-inch. There is a 32-inch at the Nicolaieff Observatory of Russia.

REFLECTING TELESCOPES.

One of the most perfect instruments ever built is at Mt. Wilson Observatory, Pasadena, Cal. The mirror is silver on glass, 60 inches in diameter, and weighs nearly a ton. The telescope is moved by electric motors in right ascension and declination. An important feature in this instrument is the different focal lengths that can be obtained. The 60-inch mirror has a 25-foot focus, but by a suitable arrangement of mirrors it is possible to get focal lengths of 80, 100 and 150 feet. At the same observatory is a 100-inch reflector, the tube with the mirror at the bottom is 43 feet long, and with the mountings weighs nearly 20 tons. There is a 36-inch reflector at Lick Observatory, Harvard University has a 28-inch and a 60-inch, and at the Yerkes Observatory is a 24-inch.

Other notable reflectors are the Lord Rosse, at Birr Castle, Ireland, which has a mirror 72 inches in diameter of speculum metal and a focal length of 54 feet, a 48-inch at Melbourne, Australia, a 60-inch at Ealing, England, a 48-inch at Paris, France, and a 39-inch at Meudon, France. The contract for the construction of a 60-inch reflecting telescope for the National Observatory at Cordoba, Argentina, was awarded in 1915. Work was started installing a 72-inch reflector in the Dominion Astronomical Observatory, Victoria, B. C., Canada.

THE NATIONAL FLAG.

THE official flag of the United States bears forty-eight white stars in a blue field arranged in six rows of eight stars each. Two stars were added in 1912 by the admission of Arizona and New Mexico to the Union. The garrison flag of the Army is made of bunting, thirty-six feet fly and twenty feet hoist, thirteen stripes, and in the upper quarter, next the staff, is the field or "union" of stars, equal to the number of States, on blue field, over one-third length of the flag, extending to the lower edge of the fourth red stripe from the top. The storm flag is twenty feet by ten feet, and the recruiting flag nine feet nine inches by four feet four inches. The "Union Jack" is blue with a star for every State in white. The Coast Guard flag, authorized by act of Congress, March 2, 1799, was originally prescribed to "consist of sixteen perpendicular stripes, alternate red and white, the union of the ensign bearing the arms of the United States in dark blue on a white field." The sixteen stripes represented the number of States which had been admitted to the Union at that time, and no change has been made since. June 14, the anniversary of the adoption of the flag, is celebrated as Flag Day in a large part of the Union.

The National flag should be hoisted preferably at, but not earlier than sunrise, and never later than 8 o'clock. When the National and State or other flags fly together the National flag should be on the right. When used on a bier or casket at a funeral the stars should be placed at the head. In no case should the flag be allowed to touch the ground. The statutes of the United States forbid the use of the flag in registered trade-marks, and the use of the flag for advertising purposes is illegal.

The President's flag consists of a blue background, in the centre of which appears the seal of the United States.

The flag of Admiral of U. S. Navy is blue with four white stars—two horizontal and two perpendicular in centre.

The flag of Vice-Admiral of U. S. Navy is blue with three white stars—triangular.

The flag of the Secretary of the Navy is blue with two white stars (perpendicular) at either end and white anchor in centre.

The consular flag is blue with large white C in centre, surrounded by thirteen white stars.

The flag of the Panama Canal consists of a blue square bearing the letters "P. C." in white.

The flag of New York State is blue charged with the arms of the State. The flag of New York City consists of three perpendicular lines, blue, white, and orange (the blue nearest the flag staff); on the white bar is the seal of the city, without the legend.

THE UNITED STATES GOVERNMENT PRINTING OFFICE.

IN this establishment practically all the printing for the United States Government is done except the manufacture of paper money and postage stamps. The Public Printer is the executive head of the Government Printing Office. Directly or through his principal officers he purchases all materials and machinery subject to the provisions of law, disburses all money, appoints all officers and employés, and exercises general supervision over the affairs of the office. The Superintendent of Documents has general supervision over the distribution of all public documents, excepting those printed for the use of the two Houses of Congress and for the Executive Departments. He is required to prepare a comprehensive index of public documents and consolidated index of Congressional documents, and is authorized to sell at cost any public document in his charge, the distribution of which is not specifically directed.

The principal officers are as follows: Public Printer, Cornelius Ford; Deputy Public Printer, Henry T. Brian; Chief Clerk, John L. Alverson; Private Secretary, Joseph P. O'Lone; Purchasing Agent, Edward S. Moores; Superintendent of Work, Daniel V. Chisholm; Foreman of Printing T. Frank Morgan; Congressional Record Clerk, William A. Smith; Superintendent of Documents Josiah H. Brinker.

UNITED STATES SECRET SERVICE.

THE Secret Service Division of the Treasury Department is under the direction of Wm. J. Flynn chief of the division. The service is principally engaged in detecting and prosecuting makers and dealers in counterfeit paper money and coin. Details are also furnished for the protection of the President of the United States.

The arrests of counterfeiters number about 400 annually; other arrests are for bribery, impersonating United States Government officers, perjury, and violating sections of the United States Revised Statutes relating to foreign and domestic obligations and coins.

NATIONAL ASSOCIATION OF LETTER CARRIERS.

THE objects of the association are: First, to unite fraternally all letter carriers in the United States for their mutual benefit. Second, to obtain and secure rights as Government employés and to strive at all times to promote the welfare of every member. Third, to create and establish the United States Letter Carriers' Mutual Benefit Association, as defined in the Constitution and General Laws governing said association. Fourth, in conjunction with the Post-Office Department, to strive for the constant improvement of the service. Fifth, to create and establish the United States Letter Carriers' National Sick Benefit Association. The association has a membership of 35,000. The dues are $1.50 per annum.

President—Edward J. Gainor, Muncie, Ind. *Vice-President*—Al. Tharp, New York, N. Y. *Secretary*—Edward J. Cantwell, Washington, D. C. *Treasurer*—Charles D. Duffy, Chicago, Ill. Headquarters, 945 Pennsylvania Avenue, Washington, D. C.

LIFEBOAT REQUIREMENTS.

UNDER date of August 17, 1916, the Steamboat Inspection Service of the Department of Commerce issued the following:

The Board of Supervising Inspectors at its meeting of January, 1916, revised all of the rules for lifeboat requirements, for publication in four parts, namely; (1) Ocean and Coastwise, (2) Great Lakes, (3) Lakes other than the Great Lakes, Bays, and Sounds, (4) Rivers.

Only one of these parts is ready for distribution, which is for ocean and coastwise vessels.

Owing to the Seamen's Act, approved March 4, 1915, the rules for lifeboat requirements are very complex and extensive, and vary for the different classes of waters, and the bureau must decline to prepare a short statement of lifeboat requirements for publication, owing to the necessary incompleteness of any such statement.

THE SINGLE TAX.

THE following statement of the single tax principle was written by Henry George, Sr.:

We assert as our fundamental principle the self-evident truth enunciated in the Declaration of merican Independence, that all men are created equal and are endowed by their Creator with certain nalienable rights. We hold that all men are equally entitled to the use and enjoyment of what God as created and of what is gained by the general growth and improvement of the community of which hey are a part. Therefore, no one should be permitted to hold natural opportunities without a fair eturn to all for any special privilege thus accorded to him, and that value which the growth and mprovement of the community attaches to land should be taken for the use of the community; that ach is entitled to all that his labor produces; therefore, no tax should be levied on the products of abor.

To carry out these principles, we are in favor of raising all public revenues for national, State, ounty, and municipal purposes by a single tax upon land values, irrespective of improvements, and f the abolition of all other forms of direct and indirect taxation.

Since in all our States we now levy some tax on the value of land, the single tax can be instituted y the simple and easy way of abolishing, one after another, all other taxes now levied and com- nensurately increasing the tax on land values until we draw upon that one source for all expenses of overnment, the revenue being divided between local government, State government, and the general overnment, as the revenue from direct taxes is now divided between the local and State governments, r by a direct assessment being made by the general government upon the States and paid by them rom revenues collected in this manner. The single tax we propose is not a tax on land, and therefore vould not fall on the use of land and become a tax on labor.

It is a tax not on land, but on the value of land. Thus it would not fall on all land, but only on aluable land, and on that not in proportion to the use made of it, but in proportion to its value—the remium which the user of land must pay to the owner, either in purchase money or rent, for permis- ion to use valuable land. It would thus be a tax not on the use and improvement of land, but on the wnership of land, taking what would otherwise go to the owner as owner, and not as user.

In assessments under the single tax all values created by individual use or improvement would e excluded, and the only value taken into consideration would be the value attaching to the bare and by reason of neighborhood, etc., to be determined by impartial periodical assessments. Thus he farmer would have no more taxes to pay than the speculator who held a similar piece of land idle, nd the man who on a city lot erected a valuable building would be taxed no more than the man vho held a similar lot vacant. The single tax in short would call upon men to contribute to the ublic revenues not in proportion to what they produce or accumulate, but in proportion to the alue of the natural opportunities they hold. It would compel them to pay just as much for holding and idle as for putting it to its fullest use. The single tax, therefore, would—

1st. Take the weight of taxation off the agricultural districts, where land has little or no value, respective of improvements, and put it on towns and cities, where bare land rises to a value of nillions of dollars per acre.

2d. Dispense with a multiplicity of taxes and a horde of tax-gatherers, simplify government, d greatly reduce its cost.

3d. Do away with the fraud, corruption, and gross inequality inseparable from our present ethods of taxation, which allow the rich to escape while they grind the poor. Land cannot be hid carried off, and its value can be ascertained with greater ease and certainty than any other.

4th. Give us with all the world as perfect freedom of trade as now exists between the States of e Union, thus enabling our people to share through free exchanges in all the advantages which ture has given to other countries, or which the peculiar skill of other peoples has enabled them to ain. It would destroy the trusts, monopolies, and corruptions which are the outgrowths of the iff. It would do away with the fines and penalties now levied on any one who improves a farm, cts a house, builds a machine, or in any way adds to the general stock of wealth. It would leave ery one free to apply labor or expend capital in production or exchange without fine or restriction, nd would leave to each the full product of his exertion.

5th. It would, on the other hand, by taking for public use that value which attaches to land by eason of the growth and improvement of the community, make the holding of land unprofitable to he mere owner and profitable only to the user. It would thus make it impossible for speculators and nonopolists to hold natural opportunities unused or only half used, and would throw open to labor he illimitable field of employment which the earth offers to man. It would thus solve the labor roblem, do away with involuntary poverty, raise wages in all occupations to the full earnings of abor, make overproduction impossible until all human wants are satisfied, render labor-saving in- entions a blessing to all, and cause such an enormous production and such an equitable distribution wealth as would give to all comfort, leisure, and participation in the advantages of an advancing vilization, in securing to each individual equal right to the use of the earth. It is also a proper nction of society to maintain and control all public ways for the transportation of persons and roperty, and the transmission of intelligence; and also to maintain and control all public ways in ies for furnishing water, gas, and all other things that necessarily require the use of such common ays.

NATIONAL RIVERS AND HARBORS CONGRESS.

THE purposes of the congress as set forth in its Constitution are as follows:

"The objects of this congress shall be the collection and preparation of all obtainable data touching he scientific improvement, development and uses of the rivers and harbors of the nation; these data to in- lude findings of the Board of United States Engineers and other scientific facts dealing with questions of aterway transportation and allied subjects.

"To disseminate to as many of the people of the United States as possible the scientific knowledge col- ected and prepared, through the publications of this association, its news bureau and its field representa- ives—to the end that the people may be educated to the importance of waterway development, and that he greatest good to the greatest number may be had through the scientific improvement and maintenance f our lakes, rivers, harbors and canals for navigation and commerce.

"The membership of this congress shall consist of commercial, manufacturing and kindred organizations, aterway improvement associations, corporations, companies, and individual citizens engaged or interested n commercial or industrial enterprises, who may subscribe to its Constitution and contribute to the sup- ort and prosecution of the objects of the congress." *President*—Hon. Jos. E. Ransdell, Lake Providence, a. *Secretary-Treasurer*—S. A. Thompson, Washington, D. C.

PROGRESS OF THE UNITED STATES

a Figures of 1916 are somewhat preliminary and subject to revision. *b* Exclusive of Alaska and islands belonging to the United States. *c* Census figures, relating to Continental United States; the figures for 1916 represent an estimate. *d* Census figures. *e* True valuation of real and personal property. *f* 1912. *g* 1800 to 1850, outstanding principal of the public debt, January 1. *h* Figures for the years 1800 to 1850 include the total public debt. *i* 1915. *j* Gold and silver cannot be stated separately prior to 1876. From 1862 to 1875, inclusive, gold and silver were not in circulation, except on the Pacific Coast, where it is estimated that the average specie circulation was about $25,000,000, and this estimate is continued for the three following years under the head of gold. After that period gold was available for circulation. *k* As the result of a special investigation by the Director of the Mint, a reduction of $135,000,000 was made in the estimate of gold coin in circulation on July 1, 1907, as compared with the basis of previous years, and on September 1, 1910, a reduction of $9,700,000 was made in the estimate of silver coin. *l* Includes notes of Bank of United States; State bank notes; demand notes of 1862 and 1863; fractional currency, 1870; Treasury notes of 1890-1891 to date, and currency certificates, act of June 8, 1892-1900. *m* Includes all deposits, demand and time. *n* Includes value of buildings, $3,556,639,496. The Twelfth Census was the first to collect statistics of buildings on farms. *o* Includes value of buildings, $6,325,451,528. *p* Wealth production on farms, estimate of the Department of Agriculture, 1915. The figures of the various censuses are not comparable, reasons for which will be found in census reports. *q* Exclusive of neighborhood industries and hand trades, included in years previous to 1905. *r* "Ordinary receipts" include receipts from customs, internal revenue, direct tax, public lands, and "miscellaneous," but do not include receipts from loans, premiums, Treasury notes, or revenues of Post-Office Department. *s* Includes corporation and individual income taxes, $124,867,430 in 1916. *t* "Ordinary disbursements" include disbursements for war, navy, Indians, pensions, payments for interest, and "miscellaneous," but do not include payments for premiums, principal of public debt, or disbursements for postal service paid from revenues thereof. *u* Imports for consumption after 1850. *v* Based on general imports. *w* Domestic exports only after 1860. *x* 1914. *y* Includes canal boats and barges prior to 1880. *z* First six months. (1) Figures relate to the Western Union only and after 1900 do not include messages sent over leased wires or under railroad contracts. (2) Estimated 1912. (3) 1800 to 1850, inclusive, from census of 1880; from 1880 to 1900, inclusive, from Rowell's Newspaper Directory; after 1900 from Ayer's American Newspaper Annual. Figures for 1915 include outlying possessions. (4) Includes salaries for teachers only. (5) 1850, total alien passengers arrived; 1850, 15 months ending December 31; after 1850, fiscal years ending June 30.

UNITED STATES GEOGRAPHIC BOARD.

Chairman—Andrew Braid, Coast and Geodetic Survey, Department of Commerce. *Secretary*—Charles S. Sloane, Bureau of the Census, Department of Commerce. Headquarters, Washington, D. C.

Frank Bond, General Land Office, Department of the Interior.
Goodwin D. Ellsworth, Post-Office Department.
William B. Greeley, Forest Service, Department of Agriculture.
David M. Hildreth, Topographer, Post-Office Department.
Frederick W. Hodge, Bureau of American Ethnology, Smithsonian Institution.
Robert B. Marshall, Superintendent National Parks, Department of the Interior.
William McNeir, Bureau of Accounts, Department of State.
C. Hart Merriam, Bureau of Biological Survey, Department of Agriculture.
John S. Mills, Department of the Treasury.
James E. Payne, Government Printing Office.
George R. Putnam, Bureau of Lighthouses, Department of Commerce.
Capt. Thomas Snowden, Hydrographer, Department of the Navy.
Charles W. Stewart, Library and Naval War Records Office, Department of the Navy.
Major Ralph H. Van Deman, General Staff, War Department.

By executive order of August 10, 1906, the official title of the United States Board on Geographic Names was changed to United States Geographic Board, and its duties enlarged. The board passes on all unsettled questions concerning geographic names which arise in the departments, as well as determining, changing, and fixing place names within the United States and its insular possessions, and all names hereafter suggested by any officer of the Government shall be referred to the board before publication. The decisions of the board are to be accepted by all the departments of the Government as standard authority. Advisory powers were granted the board concerning the preparation of maps compiled, or to be compiled, in the various offices and bureaus of the Government, with a special view to the avoidance of unnecessary duplication of work; and for the unification and improvement of the scales of maps, of the symbols and conventions used upon them, and of the methods of representing relief. Hereafter, all such projects as are of importance shall be submitted to this board for advice before being undertaken.

UNITED STATES COURT OF CUSTOMS APPEALS

(WASHINGTON, D. C.)

Presiding Judge—Robert M. Montgomery. *Associate Judges*—James F. Smith, Orion M. Barber, Marion De Vries, George E. Martin. *Attorney-General*—Thomas W. Gregory. *Assistant Attorney-General*—Bert Hanson. *Clerk*—Arthur B. Shelton ($3,500). *Marshal*—Frank H. Briggs ($3,000).

SEC. 188. There shall be a United States Court of Customs Appeals, which shall consist of a Presiding Judge and four Associate Judges, each of whom shall be appointed by the President, by and with the advice and consent of the Senate, and shall receive a salary of seven thousand dollars a year. The Presiding Judge shall be so designated in the order of appointment and in the commission issued to him by the President; and the Associate Judges shall have precedence according to the date of their commissions. Any three members of said court shall constitute a quorum, and the concurrence of three members shall be necessary to any decision thereof. In case of a vacancy or of the temporary inability, or disqualification for any reason of one or two of the Judges of said court, the President may, upon the request of the Presiding Judge of said court, designate any qualified United States Circuit or District Judge or Judges to act in his or their places and such Circuit or District Judges shall be duly qualified to so act.

SEC. 189. The said Court of Customs Appeals shall always be open for the transaction of business, and sessions thereof may, in the discretion of the court, be held in the several judicial circuits, and at such places as said court may from time to time designate.

SEC. 195. That the Court of Customs Appeals established by this chapter shall exercise exclusive appellate jurisdiction to review by appeal, as herein provided, final decisions by a board of general appraisers in all cases as to the construction of the law and the facts respecting the classification of merchandise and the rate of duty imposed thereon under such classifications, and the fees and charges connected therewith, and all appealable questions as to the jurisdiction of said board, and all appealable questions as to the laws and regulations governing the collection of the customs revenues; and the judgments and decrees of said Court of Customs Appeals shall be final in all such cases: *Provided, however*, That in any case in which the judgment or decree of the Court of Customs Appeals is made final by the provisions of this title, it shall be competent for the Supreme Court, upon the petition of either party, filed within sixty days next after the issue by the Court of Customs Appeals of its mandate upon decision, in any case in which there is drawn in question the construction of the Constitution of the United States, or any part thereof, or of any treaty made pursuant thereto, or in any other case when the Attorney-General of the United States shall, before the decision of the Court of Customs Appeals is rendered, file with the court a certificate to the effect that the case is of such importance as to render expedient its review by the Supreme Court, to require, by certiorari or otherwise, such case to be certified to the Supreme Court for its review and determination, with the same power and authority in the case as if it had been carried by appeal or writ of error to the Supreme Court: *And provided further*, That this act shall not apply to any case involving only the construction of section 1, or any portion thereof, of an act entitled "An act to provide revenue, equalize duties, and encourage the industries of the United States, and for other purposes," approved August 5, 1909, nor to any case involving the construction of section 2 of an act entitled "An act to promote reciprocal trade relations with the Dominion of Canada, and for other purposes," approved July 26, 1911. (Amendment as approved, August 22, 1914.)

SEC. 196. No appeal shall be taken or allowed from any Board of United States General Appraisers to any other court, and no appellate jurisdiction shall thereafter be exercised or allowed by any other courts in cases decided by said Board of United States General Appraisers, but all appeals allowed by law from such Board of General Appraisers shall be subject to review only in the Court of Customs Appeals hereby established, according to the provisions of this chapter: *Provided*, That nothing in this chapter shall be deemed to deprive the Supreme Court of the United States of jurisdiction to hear and determine all customs cases which have heretofore been certified to said court from the United States Circuit Courts of Appeals on applications for writs of certiorari or otherwise, nor to review by writ of certiorari any customs case heretofore decided or now pending and hereafter decided by any Circuit Court of Appeals, provided application for said writ be made within six months after August 5, 1909: *Provided further*, That all customs cases decided by a Circuit or District Court of the United States or a court of a Territory of the United States prior to said date above mentioned, and which have not been removed from said courts by appeal or writ of error, and all such cases theretofore submitted for decision in said courts and remaining undecided may be reviewed on appeal at the instance of either party by the United States Court of Customs Appeals, provided such appeal be taken within one year from the date of the entry of the order, judgment, or decrees sought to be reviewed.

SEC. 197. Immediately upon the organization of the Court of Customs Appeals, all cases within the jurisdiction of that court pending and not submitted for decision in any of the United States Circuit Courts of Appeals, United States Circuit, Territorial or District Courts, shall, with the record and samples therein, be certified by said courts to said Court of Customs Appeals for further proceedings in accordance herewith: *Provided*, That where orders for the taking of further testimony before a referee have been made in any of such cases, the taking of such testimony shall be completed before such certification.

SEC. 198. If the importer, owner, consignee, or agent of any imported merchandise, or the Collector or Secretary of the Treasury, shall be dissatisfied with the decision of the Board of General Appraisers as to the construction of the law and the facts respecting the classification of such merchandise and the rate of duty imposed thereon under such classification, or with any other appealable decision of said board, they, or either of them, may, within sixty days next after the entry of such decree or judgment, and not afterward, apply to the Court of Customs Appeals for a review of the questions of law and fact involved in such decision: *Provided*, That in Alaska and in the insular and other outside possessions of the United States ninety days shall be allowed for making such application to the Court of Customs Appeals. Such application shall be made by filing in the office of the clerk of said court a concise statement of errors of law and fact complained of; and a copy of such statement shall be served on the collector, or the importer, owner, consignee, or agent, as the case may be. Thereupon the court shall immediately order the Board of General Appraisers to transmit to said court the record and evidence taken by them, together with the certified statement of the facts involved in the case and their decision thereon; and all the evidence taken by and before said board shall be competent evidence before said Court of Customs Appeals. The decision of said Court of Customs Appeals shall be final, and such cause shall be remanded to said Board of General Appraisers for further proceedings to be taken in pursuance of such determination.

SEC. 199. Immediately upon receipt of any record transmitted to said court for determination the clerk thereof shall place the same upon the calendar for hearing and submission; and such calendar shall be called and all cases thereupon submitted, except for good cause shown, at least once every sixty days: *Provided*, That such calendar need not be called during the months of July and August of any year.

UNITED STATES CUSTOMS DUTIES.

A TABLE OF LEADING ARTICLES IMPORTED INTO THE UNITED STATES OR INTO ANY OF ITS POSSESSIONS (EXCEPT PHILIPPINE ISLANDS, GUAM AND TUTUILA), GIVING RATES OF ENTRY BY THE TARIFF ACT OF 1913 COMPARED WITH THE TARIFF ACT OF 1909.

(The following table covers only the articles of principal importance imported.)
(ad val.—ad valorem; n.s.p.f.—not specially provided for.)
* Effective March 1, 1914.

CUSTOM HOUSE EXAMINATION OF BAGGAGE.

The Tariff of 1913 provides for the exemption from duty of wearing apparel, etc., as shown in paragraph 642, as follows:

642. Wearing apparel, articles of personal adornment, toilet articles, and similar personal effects of persons arriving in the United States; but this exemption shall include only such articles as were actually owned by them and in their possession abroad at the time of or prior to their departure from a foreign country, and as are necessary and appropriate for the wear and use of such persons and are intended for such wear and use, and shall not be held to apply to merchandise or articles intended for other persons or for sale: *Provided*, That in case of residents of the United States returning from abroad all wearing apparel, personal and household effects taken by them out of the United States to foreign countries shall be admitted free of duty, without regard to their value, upon their identity being established under appropriate rules and regulations to be prescribed by the Secretary of the Treasury: *Provided further*, That up to but not exceeding one hundred dollars in value of articles acquired abroad by such residents of the United States for personal or household use or as souvenirs or curios, but not bought on commission or intended for sale, shall be admitted free of duty.

BAGGAGE DECLARATIONS.

The law requires that every person entering the United States shall make a declaration and entry of personal baggage. The senior member of a family present as a passenger may, however, declare for the entire family. A failure to declare articles acquired abroad and brought in as baggage renders the articles subject to forfeiture and the passengers liable to criminal prosecution. (Sections 2802 and 3082, R. S.)

CUSTOM HOUSE EXAMINATION OF BAGGAGE—*Continued.*

The exact number of pieces of baggage accompanying a passenger must be stated in the declaration, including trunks, valises, boxes, hand bags, and packages or bundles of every kind. Forms of baggage declarations will be furnished passengers by the steamship officers. The declaration should be prepared and signed at least one day before the expected arrival of the vessel. Declarations spoiled in preparation should not be destroyed, but should be turned over to the purser, who will furnish a new blank.

When the declaration has been prepared and signed, the coupon at the bottom of the form must be detached and retained by the passenger and the declaration delivered to the ship's officer designated to receive the same. After all the baggage and effects of the passenger have been landed, the coupon which has been retained must be presented at the inspector's desk, and an inspector will then be detailed to examine the baggage.

Passengers must acknowledge in person, on the pier, their signatures to the declarations.

RETURNING RESIDENTS OF THE UNITED STATES.

Returning residents of the United States must declare all articles acquired abroad, in their baggage or on their persons, whether by purchase, by gift, or otherwise, and whether dutiable or free of duty. Exemption, however, will be allowed by customs officers of articles aggregating not over $100 in value, if suitable for personal or household use or as souvenirs or curios, and whether intended for the personal use of the passengers or as gifts or presents to others, provided the articles are not bought on commission for another person nor intended for sale. Articles so exempt from duty must, nevertheless, be declared. Articles belonging to one passenger cannot be included in the exemption of another.

Use does not exempt from duty wearing apparel or other articles obtained abroad. Such articles which have been used abroad may, however, be specifically noted on the declaration, and due allowance will be made by the appraising officers for depreciation through wear and use and duties charged upon the articles at their value in their condition as imported.

Passengers must not deduct the $100 exemption in making out their declarations. Such deductions will be made by customs officers on the pier.

All wearing apparel, personal and household effects taken out of the United States by residents shall be admitted free of duty without regard to their value upon their identity being established. If remodelled, repaired, or improved abroad, the cost of such remodelling, repairing, or improvement must be declared, and receipted bills for such alterations should be presented. The cost of such repairs is subject to duty, but may be included by customs officers within the $100 exemption. If the cost or value of the repairs be not declared, the articles will be subject to duty upon their entire value.

Citizens of the United States or persons who have at any time resided in this country shall be deemed to be residents of the United States, unless they shall have abandoned their residence in this country and acquired an actual bona fide residence in a foreign country. Such citizens or former residents who declare as nonresidents must present satisfactory evidence to the customs officers upon the pier that they have given up their residence in the United States and have become bona fide residents of a foreign country.

The residence of a wife follows that of the husband, and the residence of a minor child follows that of its parents.

The examination of baggage will be facilitated and difficulties avoided if receipted bills for foreign purchases be presented, and if all articles acquired abroad be packed separately in one or more trunks.

NONRESIDENTS OF THE UNITED STATES.

Nonresidents of the United States must declare all articles in their baggage or on their persons which do not constitute wearing apparel, articles of personal adornment, toilet articles, or similar personal effects, whether intended for their personal use or for others. They must also declare all articles of wearing apparel, jewelry, and other articles of personal adornment, toilet articles, and similar effects when not owned by them or when intended for other persons or for sale.

HOUSEHOLD EFFECTS.

Household effects, such as furniture, table linen, bed linen, tableware, etc., imported as baggage must be declared. If shown to the satisfaction of the customs officers to have been actually owned and used abroad by the passenger not less than one year and not intended for any other person nor for sale, such effects will be admitted free of duty. If not so owned and used abroad, duties must be paid thereon, unless included in the $100 exemption allowed returning residents.

CIGARS AND CIGARETTES.

Each passenger over eighteen years of age may bring in free of duty 50 cigars or 300 cigarettes, or smoking tobacco not exceeding three pounds, if for the bona fide use of such passenger. These articles must be declared, but will be passed free by customs officers in addition to the $100 exemption.

CONTESTED VALUATION.

Passengers dissatisfied with values placed upon dutiable articles by the customs officers on the pier may demand a re-examination. Application therefor should be made to the officers in charge immediately. If, for any reason, this course is impracticable, the packages containing the articles should be left in customs custody and application for reappraisement made to the collector of customs in writing within ten days after the original appraisement. No request for reappraisement can be entertained after the articles have been removed from customs custody.

Examination of any baggage may be postponed if the passenger requests the officer taking his declaration to have the baggage sent to the appraiser's stores.

Currency or certified checks only can be accepted in payment of duties, but upon request baggage will be retained on the pier for 24 hours to enable the owner to secure currency or certified checks.

The offering of gratuities or bribes to customs officers is a violation of law. Customs officers who accept gratuities or bribes will be dismissed from the service. and all parties concerned are liable to criminal prosecution.

Discourtesy or incivility on the part of customs officers should be reported to the collector at the custom house, to the deputy collector or deputy surveyor at the pier, or to the Secretary of the Treasury. Passengers should not, however, deem customs officers discourteous merely because such officers examine baggage thoroughly or appraise articles at a value different from that stated in the passenger's declaration.

BAGGAGE FOR TRANSPORTATION IN BOND.

Baggage may be forwarded in bond to any other port of entry upon good reason therefor being shown.

Passengers desiring to have such baggage forwarded in bond should so indicate on their declara-

CUSTOM HOUSE EXAMINATION OF BAGGAGE—*Continued.*

tions, and also make a request therefor upon the inspector at the time he is assigned to the examination of their baggage. Similar action should be taken when it is desired to have baggage forwarded to another country in transit through the United States.

SEALSKIN GARMENTS.

An act of Congress of 1897, as amended in 1912, expressly forbids the importation into the United States of garments made in whole or in part of the skins of seals taken in the waters of the Pacific Ocean. Unless the owner is able to establish to the satisfaction of the collector that the garments are not prohibited by said act, they cannot be admitted.

AIGRETTES AND OTHER PLUMAGE.

Paragraph 347 of the present Tariff Act contains the following proviso:

"The importation of aigrettes, egret plumes, or so-called osprey plumes, and the feathers, quills, heads, wings, tails, skins, or parts of skins, of wild birds, either raw or manufactured, and not for scientific or educational purposes, is hereby prohibited; but this provision shall not apply to the feathers or plumes of ostriches or to the feathers or plumes of domestic fowls of any kind."

Any of the above-described prohibited articles will be excluded from entry when brought in by passengers as trimmings on hats or other articles of wearing apparel, and will be confiscated whether found in the baggage or on the person. In cases where there has been no wilful intent to violate the law, such prohibited articles may be exported to a foreign country.

W. G. McAdoo, Secretary of the Treasury.

THE SOUTHERN COMMERCIAL CONGRESS.

President—Duncan U. Fletcher, Jacksonville, Fla. *First Vice-President*—Thomas S. Southgate, Norfolk, Va. *Second Vice-President*—Albert P. Bush, Mobile, Ala. *Managing Director*—Clarence J. Owens, Washington, D. C. *Treasurer and Resident Director*—William H. Saunders, Washington, D. C.

The headquarters of the Congress is at the Southern Building, Fifteenth and H Streets, Washington, D. C.; Clarence J. Owens, Managing Director.

Among the purposes of the organization are the following:

(*a*) To promote and develop the interests of the following sixteen States of the United States known as the "Southern States," to wit: Alabama, Arkansas, Florida, Georgia, Kentucky, Louisiana, Maryland, Mississippi, Missouri, North Carolina, Oklahoma, South Carolina, Tennessee, Texas, Virginia, and West Virginia.

(*b*) To collect and disseminate information regarding the resources and conditions of the said States and the opportunities and advantages offered in them for the safe and profitable investment of capital; the attractions offered in the South to the homeseeker, artisan and laborer, and the importance to the National Government of enacting proper legislation looking to the conservation of the natural resources of the South and the improvement of its rivers, harbors and transportation facilities.

(*c*) To encourage, promote and foster the development of the resources of the South with its own capital and by its own inhabitants.

(*d*) To encourage and obtain the establishment in the South of commercial, manufacturing, industrial and other enterprises, and to foster those already existing therein.

(*e*) To encourage, foster and promote the creation and establishment of institutions and organizations whose energies shall be principally directed toward the development of the material resources of the South.

(*f*) To promote and develop proper immigration to the South and to promote and foster the establishment of such organizations as may bring about the development of desirable immigration to the South.

(*g*) To encourage the movement for the construction of good roads and for the extension of railroad and trolley transportation.

(*h*) To encourage, foster and develop patriotic and National sentiments throughout the South and elsewhere in the Nation, and particularly to promote, encourage and foster the feeling and desire for a greater Nation through a greater South.

(*i*) To promote the improvement of educational and other conditions which tend to develop the material resources and happiness of the residents of the South.

UNITED STATES BUREAU OF PLANT INDUSTRY.

The Bureau of Plant Industry studies plant life in all its relations to agriculture. It investigates the diseases of fruit and forest trees, truck crops and other plants, and carries on field tests and demonstrations of their control and prevention. It studies the bacteriological problems connected with plant production and also the factors of plant nutrition and distributes cultures of nitrogen-gathering bacteria for the inoculation of the seed of leguminous crop plants. It is engaged in the improvement of crops by breeding and selection and the acclimatization and adaptation of new crops and varieties. It is encouraging the production of drug-producing crops and other special crops, and is studying the general physiological problems influencing the growth of plants. In co-operation with the Bureau of Animal Industry and the Forest Service it is conducting a campaign for the eradication of poisonous plants, especially in the vast stock-grazing areas of the West. It is investigating various technological problems in connection with crop production, particularly with reference to fibre and paper-producing plants and to the standardization and handling of grain. It is engaged in the study of various phases of economic botany and in the devising of methods for the improvement of forest-grazing areas. It is carrying on a propaganda in the interest of good seeds for the farmer and the improvement in the quality of farm seeds. It is conducting extensive work in the breeding and testing of the principal field crops, such as the small grains, corn, cotton, tobacco, forage crops, and sugar-producing plants, with special reference to the improvement of these crops. It is engaged in the operation of testing stations in the semi-arid regions for the co-operative investigation of the problems encountered in crop production under the conditions existing in those areas. The adaptation and breeding of crops is a special feature of this work, which also includes physical determinations of the factors influencing plant growth in those regions.

It is conducting horticultural studies of garden crops and maintains an experimental farm for this and other lines of the work of the bureau. It is engaged in investigations of the transportation and storage of fruits, and in the general upbuilding of the fruit industry. It maintains greenhouses and trial grounds for the work of plant propagation and improvement. It is engaged in the introduction of seeds and plants from foreign countries and in the operation of plant introduction and testing gardens to aid in the development of new plant industries. It is also engaged in the Congressional distribution of seeds and plants.

Postal Information.

(*Revised by the Post-Office Department for* THE WORLD ALMANAC. *Sections quoted by numbers in this subject refer to the Postal Laws and Regulations.*)

DOMESTIC RATES OF POSTAGE.

ALL mailable matter for transmission by the United States mails within the United States to or from or between the possessions of the United States is divided into four classes, under the following regulations: (Domestic rates apply to mail for Canada, Mexico, Cuba, Tutuila and Manua and other islands of the Samoan group east of longitude 171° west of Greenwich, Porto Rico, Guam, Hawaii, the Philippines, the "Canal Zone," the Republic of Panama, and Shanghai City, China, also to mail for officers or members of the crew of vessels of war of the United States, and officers and men of the United States Navy in the United States Naval Hospital, Yokohama, Japan, and to other places where the United States mail service is in operation.)

First-Class Matter—This class includes letters, postal cards, "post cards," and anything sealed or otherwise closed against inspection (except as provided for under other classifications all matter wholly or partly in writing, whether sealed or unsealed, except manuscript copy accompanying proof sheets or corrected proof sheets of the same, or anything containing writing not authorized on mail matter of other classes.

First-class or letter rate of postage to any part of the United States, its possessions, or the above-named countries, *two cents per ounce or fraction thereof.*

Rates on local or drop letters at free delivery offices, two cents per ounce or fraction thereof. At offices where there is no free delivery by carriers, and the addressee cannot be served by rural free delivery carriers, one cent per ounce or fraction thereof.

Rates on **postal cards**, one cent (double or "reply" cards, two cents). Postal cards issued by the Post-Office Department may bear written, printed, or other additions as follows:

(*a*) The face of the card may be divided by a vertical line placed approximately one-third of the distance from the left end of the card; the space to the left of the line to be used for a message, etc., but the space to the right for the address only.

(*b*) Addresses upon postal cards may be either written, printed, or affixed thereto, at the option of the sender.

(*c*) Very thin sheets of paper may be attached to the card on condition that they completely adhere thereto. Such sheets may bear both writing and printing.

(*d*) Advertisements, illustrations, or writing may appear on the back of the card and on the left third of the face.

2. The addition to a postal card of matter other than as above authorized will subject the card, when sent in the mails, to postage according to the character of the message—at the letter rate if wholly or partly in writing, of the third-class rate if entirely in print. In either case the postage value of the stamp impressed upon the card will not be impaired.

3. Postal cards must be treated in all repects as sealed letters, except that those mailed for local delivery will be returned to the sender if undeliverable and the name and address of the sender appear thereon. Undeliverable "double" postal cards will be returned to the sender if known.

4. Postal cards bearing articles of glass, metal, mica, sand, tinsel or other similar substances, are unmailable except when inclosed in tightly sealed envelopes with proper postage attached, or when treated in such manner as will prevent the objectionable substances from being rubbed off or injuring persons handling the mails.

Cards that have been spoiled in printing or otherwise will be redeemed from the *original purchasers* at 75 per cent, of their face value if unmutilated.

POST CARDS (private mailing cards) bearing written or printed messages are transmissible in the mails.

Private mailing cards ("post cards") in the domestic mails must conform to the following conditions:

(*a*) A "post card" must be an unfolded piece of cardboard not exceeding approximately 3 9-16 by 5 9-16 inches, nor less than approximately 2¾ by 4 inches.

(*b*) It must in form and in the quality and weight of paper be substantially like the Government postal card.

(*c*) It may be of any color not interfering with a legible address and postmark.

(*d*) It may or may not, at the option of the sender, bear near the top of the face the words "post card."

(*e*) The face of the card may be divided by a vertical line; the left half to be used for a message, etc., but that to the right for the address only.

(*f*) Very thin sheets of paper may be attached to the card, and then only on condition that they completely adhere thereto. Such sheets may bear both writing and printing.

(*g*) Advertisements and illustrations may appear on the back of the card and on the left half of the face.

2. Cards, without cover, conforming to the foregoing conditions are transmissible in the domestic mails (including the possessions of the United States) and to Cuba, Canada, Mexico, the Republic of Panama, and Shanghai, China, at the postage rate of 1 cent each.

3. When "post cards" are prepared by printers and stationers for sale, it is desirable that they bear in the upper right hand corner of the face an oblong diagram containing the words "Place postage stamp here," and at the bottom of the space to the right of the vertical dividing line, the words "This space for the address."

4. Cards which do not conform to the conditions prescribed by these regulations are, when sent in the mails, chargeable with postage according to the character of the message—at the letter rate, if wholly or partly in writing, or at the third-class rate, if entirely in print.

5. Cards bearing particles of glass, metal, mica, sand, tinsel, or other similar substances, are *unmailable*, except when inclosed in tightly sealed envelopes, or when treated in such manner as will prevent the objectionable substances from being rubbed off or injuring persons handling the mails.

6. Cards mailed under cover of sealed envelopes (transparent or otherwise) are chargeable with postage at the first-class rate; if inclosed in unsealed envelopes, they are subject to postage according to the character of the message—at the first-class rate if wholly or partly in writing, or the third-class rate if entirely in print; and the postage stamps should be affixed to the envelopes covering the same. Postage stamps affixed to matter inclosed in envelopes are not to be recognized in payment of postage thereon.

Postage on all letters should be *fully* prepaid, but if prepaid one full rate and no more, they will be forwarded, and the amount of deficient postage collected on delivery; if wholly unpaid, or prepaid with less than one full rate and deposited at a post-office, the addressee will be notified to remit postage; and if he fails to do so they will be sent to the Dead Letter Office; but they will be returned to the sender if he is located at the place of mailing, and if his address be printed or written upon them.

Letter rate is charged on typewriting and carbon or letter press copies thereof, and on all imitations or reproductions of typewriting or manuscript obtained by printing, multigraph, mimeograph or similar mechanical process unless such reproductions are presented at post-office windows in the minimum number of twenty identical unsealed copies.

Letters and other matter prepaid at the letter rate—two cents an ounce or fraction thereof—(but no other class of mail matter) will be returned to the sender free if a request to that effect is printed or written on the envelope or wrapper. The limit of weight is the same as that for fourth-class matter.

DOMESTIC RATES OF POSTAGE—*Continued.*

Prepaid letters and other matter prepaid at the letter rate will be forwarded from one post-office to another upon the written request of the person addressed, without additional charge for postage. The direction on forwarded letters may be changed as many times as may be necessary to reach the person addressed. Nothing may be added to such letters except the forwarding address without subjecting them to new postage.

Second-Class Matter—This class includes all printed newspapers and periodicals that have been "Entered as second-class matter," under the act of March 3, 1879, and are regularly issued at stated intervals as frequently as four times a year, from a known office of publication, and mailed by the publishers or news agents to actual subscribers or as sample copies or to news agents for sale, and newspapers and publications of this class mailed by persons other than publishers or registered news agents. Also periodical publications entered under the act of August 24, 1912, of benevolent and fraternal societies, organized under the lodge system and having a membership of a thousand persons, and the publications of strictly professional, literary, historical and scientific societies, and incorporated institutions of learning, State institutions of learning, trade unions, etc., provided that these be published at stated intervals not less than four times a year, and that they be formed of printed paper sheets without board, cloth, leather or other substantial binding. Also periodicals issued by State Departments of Agriculture which are entered under the act of June 6, 1900. Publishers who wish to avail themselves of the privileges of the acts of August 24, 1912 and June 6, 1900, are required to make formal application to the department through the postmaster at the place of publication, producing satisfactory evidence that the organizations, societies, and institutions represented come within the purview of the law. Publications designed primarily for advertising or free circulation, or circulation at a nominal rate, or not having a legitimate list of subscribers, are not entitled to the pound rate under the act of March 3, 1879.

Rates of postage to publishers and news agents, *one cent a pound or fractional part thereof,* prepaid in currency. Newspapers (except weeklies) mailed by the publishers or by registered news agents for local delivery by city letter carriers and periodicals not exceeding 2 ounces in weight are subject to the rate of one (1) cent each, to be prepaid by stamps affixed or in money under special permits. Periodicals exceeding two ounces in weight mailed for local carrier delivery are subject to the rate of two (2) cents each, to be prepaid by stamps affixed or in money under special permits.

Publications which have not been admitted to the second-class are third- or fourth-class matter.

Publications sent to actual subscribers in the county where printed and published are free, unless mailed for delivery at a city letter-carrier office.

Rates of postage on second-class newspapers, magazines, or periodicals, mailed by others than the publishers or news agents, *one cent for each four ounces or fraction thereof.* Postage must be paid by stamps affixed or if 300 or more identical pieces are mailed at one time, under permit, it may be paid in money. It should be observed that the rate is one cent for each four ounces, not one cent for each paper contained in the same wrapper. This rate applies only when a complete copy is mailed. Parts of second-class publications or partial or incomplete copies are not entitled to second-class rates. Second-class matter is entitled to special delivery when special delivery stamps (or ten cents in ordinary stamps and the words "Special Delivery" placed on the wrapper) are affixed in addition to the regular postage. No limit of weight is prescribed.

Second-class matter must be so wrapped that it may be easily examined. The sender's name and address may be written in them or on the wrapper, also the words "sample copy" when sent as such, or "marked copy" when it contains a marked item or article. Typographical errors in the text may be corrected, but any other writing subjects the matter to letter postage.

Third-Class Matter—Mail matter of the third class includes printed engravings, circulars in print (or by the mimeograph, multigraph, hectograph, electric-pen, or similar process when at least twenty identical copies are mailed at post-office windows at one time), and other matter wholly in print (except books), proof sheets, corrected proof sheets, and manuscript copy accompanying the same. Printed books are fourth-class matter, as is also miscellaneous printed matter weighing *more than* four pounds. See "Parcel Post or Fourth-Class Mail."

The rate on matter of this class is *one cent for each two ounces or fraction thereof.* Postage must be paid by stamps affixed, unless 300 or more identical pieces are mailed under special permit when the postage at that rate may be paid in money.

Manuscript unaccompanied by proof sheets of the same is subject to the letter rate.

Third-class matter must admit of easy inspection, otherwise it will be charged letter rate on delivery. It must be fully prepaid, or it will not be despatched. New postage must be prepaid for forwarding to a new address or returning to senders by mail.

The limit of weight is four pounds. Packages of miscellaneous printed matter weighing over four pounds are mailable at the parcel post pound or zone rates. It is entitled, like matter of the other classes, to special delivery when special delivery stamps are affixed in addition to the regular postage, or when ten cents in ordinary stamps are affixed in addition to the regular postage and the words "Special Delivery" are placed on the wrapper.

Upon matter of the third class, or upon the wrapper or envelope inclosing the same, or the tag or label attached thereto, the sender may write his own name, occupation, and residence or business address, preceded by the word "from," and may make marks other than by written words to call attention to any word or passage in the text, and may correct any typographical errors. There may be placed upon articles of the third class, a simple manuscript dedication or inscription not of the nature of a personal correspondence. Upon the wrapper or envelope of third-class matter, or the tag or label attached thereto, may be placed in writing or otherwise the words "Please do not open until Christmas" or words to that effect, and there may be printed any matter mailable as third class. Written designation of the contents such as "photo," "printed matter," is also permissible, but there must be left on the address side a space sufficient for a legible address, postmark and the necessary stamps.

FOURTH-CLASS MATTER—PARCEL POST.

Fourth-Class Matter Embraces that known as domestic parcel post mail, and includes merchandise, farm and factory products, seeds, cuttings, bulbs, roots, scions, and plants, books (including catalogues), miscellaneous printed matter weighing more than 4 pounds, and all other mailable matter not embraced in the first, second, and third classes.

Rates of Postage on Fourth-Class or Parcel Post Matter—To Be Fully Prepaid—Unsealed—are as follows:

(*a*) Parcels weighing 4 ounces or less, except books, seeds, plants, etc., 1 cent for each ounce or fraction thereof, any distance

(*b*) Parcels weighing 8 ounces or less containing books, seeds, cuttings, bulbs, roots, scions, and plants, 1 cent for each 2 ounces or fraction thereof, regardless of distance.

(*c*) Parcels weighing more than 8 ounces containing books, seeds, plants, etc., parcels of miscellaneous printed matter weighing more than 4 pounds, and all other parcels of fourth-class matter weighing more than 4 ounces are chargeable, according to distance or zone, at the pound rates shown in the following table, a fraction of a pound being considered a full pound:

* The local rate applies to parcels mailed under the following conditions: (1) At any post-office for local delivery at such office. (2) At any city letter carrier office, or at any point within its delivery limits, for delivery by carriers from that office. (3) At any post-office from which a rural route starts, for delivery on such route, or when mailed at any point on a rural route for delivery at an other point thereon, or at the office from which the route starts, or for delivery on any other rural route starting from the same office.

Zones—Parcel Post Guide and Maps—For parcel post purposes the United States is divided into units of area thirty minutes square. Such units form the basis of the eight postal zones. To ascertain in which zone a post-office is located from the office of mailing, a parcel post guide, costing 55 cents, and map, costing 20 cents, are jointly used. The guide applies to all offices, but a separate map is required for each unit. A zone key is furnished with the guide and makes the map unnecessary. The guide and maps may be purchased by sending a postal money order to the Third Assistant Postmaster-General, Washington, D. C. Stamps are not accepted. The unit numbers are also printed in the U. S. Official Postal Guide, which may be consulted at any post-office and purchased by remitting the price by money order to the Disbursing Clerk, Post-Office Department, Washington, D. C.

Alaska, Hawaiian, and Philippine Islands, etc.—The eighth zone rate of 12 cents for each pound or fraction thereof on all parcels weighing more than 4 ounces (except books, seeds, cuttings, bulbs, roots, scions, and plants, weighing 8 ounces or less) applies (1) between the United States and the Hawaiian Islands; (2) between the United States and its postal agency at Shanghai, China; (3) between any two points in Alaska and between any point in Alaska and any other point in the United States; (4) between the United States and the Canal Zone; (5) between the United States and the Philippine Islands; (6) to, from, or between Guam, Tutuila, and Manua and other islands of the Samoan group east of longitude 171° west of Greenwich, and the United States and its other possessions; (7) between the United States and its naval vessels stationed in foreign waters.

Canada, Cuba, Mexico, and Republic of Panama—The rate of 12 cents for each pound or fraction thereof also applies to fourth-class matter, including seeds, cuttings, bulbs, roots, scions, and plants (but excepting books and other printed matter on which the rate is 1 cent for each two ounces or fraction thereof in all cases), weighing more than four ounces and not exceeding 4 pounds 6 ounces when mailed to Canada, Mexico, Cuba, and the Republic of Panama. (Parcels weighing up to 11 pounds may be sent

to Mexico and the Republic of Panama as foreign parcel post mail under the parcel post conventions with those countries.)

The Limit of Weight of fourth-class matter is 50 pounds for parcels mailed for delivery within the first and second zones, and 20 pounds for all other zones.

Limit of Size—Parcel post matter may not exceed 84 inches in length and girth combined. In measuring a parcel the greatest distance in a straight line between the ends (but not around the parcel) is taken as its length, while the distance around the parcel at its thickest part is taken as its girth. For example, a parcel 35 inches long, 10 inches wide, and 5 inches high measures 65 inches in length and girth combined.

Name and Address of Sender—A parcel of fourth-class matter may not be accepted for mailing unless it bears the name and address of the sender, which should be preceded by the word "From."

Additions to Fourth-Class Mail—There may be placed on fourth-class matter, or on the wrapper or cover, tag or label, any marks, numbers, names, or letters for purpose of description, or any writing which is permissible on third-class matter. There may be written on the blank leaves or cover of any book a simple manuscript dedication or inscription not in the nature of personal correspondence. Space sufficient for a legible address, postmark, the necessary postage stamps, and any words necessary for forwarding or return, must be left on the address side of parcels.

Inclosures—There may be inclosed with fourth-class matter a written or printed invoice showing the name and address of the sender and of the addressee; the names and quantities of articles inclosed together with inscriptions indicating, "for purpose of description," the price, style, stock number, size, and quality of the articles; the order or file number, date of order, and date and manner of shipment, and the initials or name of the salesman, or of the person by whom the articles were packed or checked.

Inscriptions, such as "Merry Christmas," "With best wishes," "Do not open until Christmas," or words to that effect, may be written on fourth-class mail, or on a card inclosed therewith.

Communications Attached to Parcels—When it is desired to send a communication with a parcel on which postage at the fourth-class rate has been fully prepaid, the communication may be placed in an envelope fully prepaid at the first-class rate and addressed to correspond with the address on the parcel and then be tied to or otherwise securely attached to the outside of the parcel in such manner as to prevent its separation therefrom and not to interfere with the address on the parcel.) The stamps to cover the postage on the parcel must be affixed to the wrapper of the parcel, and those to pay the postage on the communication must be affixed to the envelope of the communication. Parcels to which such communications are attached are treated as fourth-class matter. Only one special delivery fee is required on such parcels sent as special delivery matter.

Public Library Books, otherwise mailable as parcel post matter, may bear any printed or written mark constituting a necessary inscription for the purpose of a permanent library record.

Proprietary Articles of Merchandise, such as harmless medicinal preparations, soaps, tobacco, food products, etc., put up in fixed quantities, in original sealed packages, by the manufacturer so as to allow examination of the packages in their simplest mercantile form and labelled in printing so as to show the nature of contents, quantity, and name of the manufacturer, are mailable at the fourth-class rates of postage. If such sealed packages are inclosed in an outer wrapper, the latter must not be sealed.

Meats and Meat-Food Products—Before meat or meat-food products of cattle, sheep, swine, or goats may be accepted for mailing from one State or Territory to another State or Territory, the certificate of inspection or exemption required by Sec. 477, Postal Laws and Regulations, must be filed with the postmaster. Such certificate must be prepared and furnished by the sender.

Game—The dead bodies of any wild animals or birds, or parts thereof, including furs, skins, plumage, etc., lawfully killed and offered for shipment, may be accepted for mailing only when the parcels are plainly marked to show the actual nature of the contents and the name and address of the sender. The dead bodies, or parts thereof, of any wild animals or birds which have been killed or offered for shipment in violation of the laws of a State, Territory, or district, are unmailable, persons sending such articles and the addressees knowingly receiving them in violation of the law being liable to a fine of not more than $200. (Sec. 477½, Postal Laws and Regulations.)

Nursery Stock, including all field-grown florists' stock, trees, shrubs, vines, cuttings, grafts, scions, buds, fruit pits, and other seeds of fruit and ornamental trees or shrubs, and other plants and plant products for propagation, except field, vegetable, and flower seeds, bedding plants, and other herbaceous plants, bulbs, and roots, may be admitted to the mails only when accompanied with a certificate from a State or Government inspector to the effect that the nursery from which such nursery stock is shipped has been inspected within a year and found free from injurious insects, and the parcel containing such nursery stock is plainly marked to show the nature of the contents and the name and address of the sender. (Secs. 478 and 478½, Postal Laws and Regulations.)

Place of Mailing—Parcels of fourth-class matter weighing more than four ounces must be mailed at a post-office, branch post-office, named, numbered, or lettered station, or delivered to a rural or other carrier duly authorized to receive such matter. Parcels weighing four ounces or less not sent as insured mail may be deposited in letter or package boxes.

SENDER'S RECEIPTS FOR ORDINARY FOURTH-CLASS PARCELS.

The postmaster at the mailing office may, on payment of one cent, give the sender of an ordinary parcel of fourth-class mail a receipt therefor. A postage stamp to cover the charge for the receipt shall be affixed thereto. The name and address of the addressee of the parcel shall be written in the receipt by the sender. (Section 458½, Postal Laws and Regulations.)

The purpose of this receipt is to provide senders of fourth-class parcels, when desired, a record evidencing their mailing, for which a fee of one cent is charged. Their issuance does not in any way insure the parcels against loss while in the mails and no receipt is obtained from the addressee upon delivery. Persons who desire either of these latter facilities should insure their parcels.

Receipt will be given on tag form 3817. The name and address of the addressee shall be written on the tag by the sender, who may place his own name thereon if he desires, and affix on the tag a one-cent postage stamp in the space provided. The tag shall be tied to the parcel before mailing. The postal employé accepting the article shall compare the address on the tag with that on the parcel, postmark the stamp to show the date of acceptance, detach the receipt, and deliver it to the sender.

When such receipts are desired by firms and individuals mailing a number of parcels at one time a Firm Registration Book is used. Each sheet must have affixed postage stamps at the rate of one cent for each parcel listed thereon, which stamps shall be postmarked and the sheet returned to the sender. These sheets are to be filled out by the sender.

When such receipts are desired by patrons residing on rural routes, the parcel should be delivered to the rural carrier, payment being made at the time at the rate of one cent for each parcel, in addition to the postage. The carrier will obtain receipts at the post-office to which he is attached, affix stamp, postmark, and deliver the receipts to the senders on his next trip.

INSURANCE OF FOURTH-CLASS MAIL.

Fees and Conditions—Fourth-class mail shall not be registered, but may be insured against injury, loss or rifling in an amount equivalent to its actual value, but not to exceed $5 in any one case, on payment of a fee of 3 cents; not to exceed $25 on payment of a fee of 5 cents; not to exceed $50 on payment of

a fee of 10 cents, or not to exceed $100 on payment of a fee of 25 cents, in addition to the postage, both to be prepaid by stamps affixed; but indemnity will not be allowed in cases of loss of such mail addressed to the Philippine Islands, unless the loss occurred in the postal service of the United States. Such mail may be insured at any post-office or station thereof, or by rural carriers. The sender must fill out an insurance tag, which will be furnished him on request, to be attached to the parcel. Return receipts for insured parcels may be obtained by indorsing the parcels "Return receipt desired." When an article is so damaged as to render it wholly worthless, it is regarded as lost, provided it was packed and indorsed in accordance with the postal requirements. In cases where articles are not rendered worthless, payment will be made for the actual, usual, direct and necessary cost of repairs required to place them in a serviceable condition. Claim must be made within six months from the date the parcel was mailed.

COLLECT-ON-DELIVERY SERVICE.

Conditions and Fee—Parcels of fourth-class or parcel post matter may be sent C. O. D. from one money order post-office to another on payment of a fee of 10 cents in addition to the postage, both to be prepaid with stamps affixed. The amount to be remitted to the sender must not exceed $100. The remittance is made by post-office money order, the fee therefor being included in the amount collected from the addressee. A C. O. D. tag furnished by the postmaster must be filled in by the sender and attached to the parcel. Such a parcel becomes automatically insured up to $50, without additional charge against the non-receipt of returns, therefor, if delivered, and against loss, rifling or damage in an amount equivalent to the actual value of its contents.

A receipt is given to the sender of a C. O. D. parcel at the time of mailing, but no return receipt is furnished, as the remittance shows that delivery has been made. Examination of contents of a C. O. D. parcel is not permitted until it has been receipted for and all charges paid.

PREPARATION AND WRAPPING OF MAIL MATTER.

Examination—Fourth-class or parcel post matter must be so wrapped or enveloped that the contents may be examined easily by postal officials. When not so wrapped, or when bearing or containing writing not authorized by law, the matter will be treated as of the first class. Nailed Boxes—Parcel post mail may be inclosed in boxes to which the lids are nailed or screwed, provided the lids can be readily removed with a chisel or screw driver for examination of contents.

Wrapping—All matter should be securely wrapped so as to bear transmission without breaking, or injuring mail bags, their contents, or the persons handling them. Many articles are damaged in the mails for the reason that they are not properly wrapped to withstand the necessary handling. Umbrellas, canes, golf sticks, and similar articles must be reinforced by strips of wood or otherwise sufficiently wrapped to withstand handling and transportation. Hats must be packed in strong boxes; if in ordinary pasteboard hat boxes they must be properly crated. But flowers, candies, etc., should be inclosed in strong and suitable boxes. Stove castings and pieces of machinery should be protected with excelsior or similar material and wrapped in cloth or strong paper or be properly boxed or crated. Mailable hides and pelts must be thoroughly wrapped to prevent the escape of grease. Parcels weighing 20 pounds or under are generally carried inside mail bags with other mail; those weighing over 20 pounds are usually carried outside mail bags. They should be wrapped with that understanding. Parcels improperly or insufficiently wrapped will not be accepted for transmission in the mails.

Harmful Articles not absolutely excluded from the mails, but which, from their form or nature, might, unless properly secured, destroy, deface, or otherwise damage the contents of the mail bag, or harm the person of any one engaged in the postal service, may be transmitted in the mails only when packed in accordance with the postal regulations. *Sharp-pointed or sharp-edged instruments or tools* must have their points and edges protected so that they cannot cut through their covering, and be thoroughly wrapped. *Powders and all pulverized dry substances* must be so wrapped that none of the contents of the package will sift out. *Pastes, salves, etc.*, not easily liquefiable must be inclosed in water-tight containers and placed in strong boxes and securely wrapped.

Liquids—Admissible liquids in packages not exceeding the limit of weight of fourth-class matter will be accepted for mailing when intended for delivery at the office of mailing or on a rural route starting therefrom when inclosed in a glass or metal container securely inclosed and heavily wrapped, provided it is not necessary to transport them over steam or electric railways.

Admissible liquids and oils, pastes, salves, or other articles easily liquefiable, will be accepted for mailing, regardless of distance, when they conform to the following conditions:

(*a*) *When in strong glass bottles holding 4 ounces or less*, the total quantity sent in one parcel shall not exceed 24 ounces, liquid measure. Each bottle shall be wrapped in paper or other absorbent substance and then all placed in a box made of cardboard or other suitable material and packed in a container made of double-faced corrugated pasteboard of good quality. The corners of the container must fit tightly and be reinforced with tape so as to prevent the escape of any liquid if the contents should be broken, and the whole parcel shall be securely wrapped with strong paper and tied with twine. Single bottles of liquid holding 4 ounces or less may also be packed as prescribed in the following paragraphs (*b*) and (*c*):

(*b*) *When in glass bottles holding more than 4 ounces*, the total quantity sent in one parcel shall not exceed 16 ounces liquid measure. The bottle must be very strong and must be inclosed in a block or tube of metal, wood, papier mâché or similar material; and there must be provided between the bottle and the block or tube a cushion of cotton, felt, or other absorbent. The block or tube, if of wood or papier mâché, must be at least one-eighth of an inch thick for bottles holding 8 ounces or less, and at least three-sixteenths of an inch thick for bottles holding more than 8 ounces. The block or tube must be rendered watertight by an application on the inside of paraffin or other suitable substance and must be closed by a screw top cover with sufficient screw threads to require at least one and one-half complete turns before it will come off. The cover must be provided with a washer, so that no liquid could escape if the bottle should be broken. Any number of bottles separately packed as herein prescribed may be included in a single package if the limit of weight and size for fourth-class matter be not exceeded.

(*c*) *Bottles containing liquid* may also be packed in strong and tight receptacles of wood, metal, or waterproof corrugated pasteboard. Space must be left all around the bottle, which must be filled with bran, sawdust, or other absorbent material in sufficient quantity to absorb all the liquid if the bottle should get broken.

(*d*) *When in a metal container*, the weight limit of the parcel is the same as for other fourth-class matter. The container must be securely sealed and inclosed in a strong box.

(*e*) When in parcels weighing more than 20 pounds, mailable liquids in securely sealed glass bottles or metal cans will be accepted for mailing to offices in the first and second zones when packed in strong boxes and surrounded with sawdust or other suitable substances to protect the contents from breakage. All such packages to be marked "FRAGILE—THIS SIDE UP," or with similar inscriptions and to be transported outside of mail bags.

All packages containing liquid must be marked "FRAGILE."

Fragile Articles—Articles easily broken must be very securely wrapped for safe transmission. Among such articles are: Amber, cakes, candles, chalk, china, combs, clocks, delicate mechanisms, fans,

flowers, fountain pens, hats, instruments of precision, millinery, musical instruments, pipes, plaster-of-paris articles, plumes, pottery, porcelain, phonographs and phonograph records, test tubes, typewriters, watches, wax articles, etc. *Glass, crockery, fragile toys, and other fragile articles* must be so packed as to prevent the escape of particles or pieces from the packages if broken in transit. *Cigars* should be packed in a manner to prevent damage by shock or jar. *Maps, drawings, paintings, etc.*, must be suitably protected with stout material to prevent damage. When not flat, they should be rolled around a stout stick and carefully wrapped or inclosed in a strong pasteboard tube. All such articles should be marked "FRAGILE." Eggs will be accepted for local delivery when so packed in a basket or other container as to prevent damage to other mail. Eggs will be accepted for mailing regardless of distance when each egg is separately wrapped and surrounded with excelsior, cotton, or other suitable material and packed in a strong container made of double-faced corrugated pasteboard, metal, wood, or other suitable material and wrapped so that nothing can escape from the package. All such parcels shall be labeled "EGGS." Eggs in parcels weighing more than 20 pounds will be accepted for mailing to offices in the first and second zones when packed in crates, boxes, baskets, or other containers having tight bottoms to prevent the escape of anything from the packages and so constructed as properly to protect the contents. Such packages are to be marked "EGGS—THIS SIDE UP," and to be transported outside of mail bags. Eggs for hatching shall be accepted for mailing, regardless of distance, when each egg is wrapped separately and surrounded with excelsior, wood-wool, or other suitable material and packed in a basket, preferably with a handle, or other suitable container, lined with paper, fibre-board or corrugated pasteboard, in such a way that nothing can escape from the package. Such parcel shall be labeled "Eggs for Hatching," "Keep from Heat and Cold," "Please Handle with Care," or other suitable words, and shall be handled outside of mail sacks.

Perishable Articles—Parcels containing perishable articles shall be marked "PERISHABLE." Articles likely to spoil within the time reasonably required for transportation and delivery shall not be accepted for mailing. *Butter, lard, and perishable articles*, such as fish, fresh meats, dressed fowl, vegetables, fruits, berries, and articles of a similar nature which decay quickly, when so packed or wrapped as to prevent damage to other mail, will be accepted for local delivery either at the office of mailing or on any rural route starting therefrom. When inclosed in an inner cover and a strong outer cover of wood, metal, heavy corrugated pasteboard, or other suitable material, and wrapped so that nothing can escape from the package, they will be accepted for mailing to all offices to which in the ordinary course of mail they can be sent without spoiling. *Butter, dressed fowl, vegetables, fruits*, and other perishable articles in parcels weighing more than 20 pounds will be accepted for mailing to offices in the first and second zones when suitably wrapped or inclosed and packed in crates, boxes, or other suitable containers having tight bottoms to prevent the escape of anything from the package, and so constructed as properly to protect the contents. All such parcels to be transported outside of mail bags. Vegetables and fruits which do not decay quickly will be accepted for mailing to any zone if packed so as to prevent damage to other mail.

Forwarding and Return—A new prepayment of postage at the rate applicable between the forwarding office and the one to which fourth-class matter is to be forwarded must be made by the addressee or by some one for him each time it is forwarded. A new prepayment must likewise be made before undeliverable fourth-class matter may be returned to the sender by mail.

Requests for Further Information should be addressed as follows: Third Assistant Postmaster-General, Division of Classification, relative to the classification and admissibility of matter as parcel post mail, rates of postage, limit of weight and size, permissible inclosures and additions, attaching communications to parcels, etc. Third Assistant Postmaster-General, Division of Registered Mails, relative to the insurance and C. O. D. features. Second Assistant Postmaster-General, Division of Railway Mail Service, relative to the admissibility to the mails and wrapping of matter which from its form or character would be liable to injure the mails or the person of postal employés.

ADDITIONAL POSTAL LAWS AND REGULATIONS.

Unmailable Matter—Unmailable domestic matter—that is, matter which is not admissible to the United States mails for delivery in the United States or in any of its possessions—includes:

All matter illegibly, incorrectly, or insufficiently addressed.

All second-class matter and all matter of the third or fourth class not wholly prepaid; and letters and other first-class matter not prepaid one full rate—2 cents.

All matter exceeding the prescribed limit of weight or size. There is no limit of weight for second-class matter or for books and documents published or circulated by order of Congress.

Postal cards or post cards which bear delineations, epithets, terms, or language of an indecent, lewd, lascivious, obscene, libellous, scurrilous, defamatory or threatening character, or calculated by the terms or manner or style of display, and obviously intended to reflect injuriously upon the character or conduct of another, also articles bearing such matter upon the wrapper or outside cover. Dunning postal or other cards are included in this class.

Post cards bearing particles of glass, metal, mica, sand, tinsel, or other similar substances, are unmailable, except as provided under "First-Class Matter."

All matter concerning any lottery, gift, enterprise, or similar scheme, offering prizes dependent in whole or in part upon lot or chance, or concerning fraudulent schemes devised for the purpose of obtaining money or property under false pretences, representations or promises.

Spirituous, vinous, malted, fermented or other intoxicating liquors of any kind; poisons of every kind, and articles and compositions containing poison (except as prescribed in par. 4, sec. 472), and poisonous animals, insects, and reptiles, and explosives of every kind and inflammable materials, including matches, moving picture films (unless made of cellulose-acetate), gasoline, naphtha, benzine, denatured alcohol, and all liquids having flash point at or below 80° F., and infernal machines, and mechanical, chemical, or other devices or compositions which may ignite or explode, and disease germs or scabs (except as prescribed in sec. 473), and other natural or artificial articles, compositions, or materials of whatever kind which may kill, or in anywise hurt, harm or injure another, or damage, deface, or otherwise injure the mail or other property, live animals (except as prescribed in sec. 476), guano or any article exhaling bad odor, whether sealed as first-class matter or not, shall not be admitted to the mails. (Par. 2, sec. 472.)

Poisons, Explosives, Inflammable Materials, Dangerous Articles, Intoxicating Liquors, Etc.—Section 472. All kinds of poison and all articles and compositions containing poison, and all poisonous animals, insects and reptiles, and explosives of all kinds and inflammable materials, and infernal machines and mechanical, chemical or other devices or compositions which may ignite or explode, and all disease germs or scabs, and all other natural or artificial articles, compositions or materials of whatever kind which may kill or in anywise hurt, harm, or injure another, or damage, deface, or otherwise injure the mails or other property, whether sealed as first-class matter or not, are hereby declared to be nonmailable matter, and shall not be conveyed in the mails or delivered from any post-office or station thereof, nor by any letter carrier; but the Postmaster-General may permit the transmission in the mails, under such rules and regulations as he shall prescribe as to preparation and packing, of any article hereinbefore described which are not outwardly or of their own force dangerous or injurious to life, health or property: *Provided*, That all spirituous, vinous, malted, fer-

mented or other intoxicating liquors of any kind, are hereby declared to be nonmailable and shall not be deposited in or carried through the mails. Whoever shall knowingly deposit or cause to be deposited for mailing or delivery, or shall knowingly cause to be delivered by mail according to the direction thereon, or at any place at which it is directed to be delivered by the person to whom it is addressed, anything declared by this section to be nonmailable unless in accordance with the rules and regulations hereby authorized to be prescribed by the Postmaster-General, shall be fined not more than one thousand dollars, or imprisoned not more than two years, or both; and whoever shall knowingly deposit or cause to be deposited for mailing or delivery, or shall knowingly cause to be delivered by mail according to the direction thereon, or at any place to which it is directed to be delivered by the person to whom it is addressed, anything declared by this section to be nonmailable, whether transmitted in accordance with the rules and regulations authorized to be prescribed by the Postmaster-General or not, with the design, intent, or purpose to kill, or in anywise hurt, harm, or injure another, or damage, deface, or otherwise injure the mails or other property, shall be fined not more than five thousand dollars, or imprisoned not more than ten years, or both.

2. Spirituous, vinous, malted, fermented, or other intoxicating liquors of any kind, poisons of every kind, and articles and compositions containing poison (except as prescribed in the fourth paragraph hereof), and poisonous animals, insects, and reptiles, and explosives of every kind, and inflammable materials (including matches, kerosene oil, gasoline, naphtha, benzine, turpentine, denatured alcohol, etc.), and infernal machines, and mechanical, chemical or other devices or compositions which may ignite or explode, and disease germs or scabs (except as prescribed in sec. 473), and other natural or artificial articles, compositions, or materials of whatever kind which may kill, or in anywise hurt, harm, or injure another, or damage, deface, or otherwise injure the mail or other property, live animals (except as prescribed in sec. 476), raw hides or pelts, guano, or any article exhaling bad odor, whether sealed as first-class matter or not, shall not be admitted to the mails.

3. Liquids not spirituous, vinous, malted, fermented, or otherwise intoxicating (including samples of altar or communion wine used in church services), and not liable to explosion or spontaneous combustion or ignition by shock or jar, and not inflammable, fruits or vegetable matter liable to decomposition, comb honey, soft soap, paste or confections, ointments, salves, and articles of similar consistency, may be admitted to the mails for transmission in the domestic mails when inclosed in packages in conformity with the conditions prescribed in secs. 474 and 475.

4. Medicines and anaesthetic agents, which are not outwardly or of their own force dangerous or injurious to life, health or property, and not in themselves unmailable, may be admitted to the mails for transmission in the domestic mails when inclosed in packages in conformity with the conditions prescribed in Parcel Post Regulations; *Provided*, That the terms "medicines" and "anaesthetic agents" shall not be construed to mean poisons; *Provided further*, That the article mailed bears the label or superscription of the manufacturer thereof, or dealer therein, or of the licensed physician, surgeon, dentist, or veterinarian preparing or prescribing the same.

Third- or Fourth-Class Matter Mailable Without Stamps—Under special permits postage may be paid in money for third- or fourth-class matter mailed in quantities of 250 or more *identical* pieces of the fourth class, or 300 or more *identical* pieces of the third class. For information concerning the regulations governing such mailings inquiry should be made of the postmaster.

Special Delivery Service—Ten cents on each letter or other article, in *addition* to the regular postage, entitles the article to immediate delivery by special messenger. Special delivery stamps are sold at post-offices, and must be affixed to such mail. Ordinary stamps to the value of ten cents in addition to the regular postage, affixed to a letter or other piece of mail, will entitle it to special delivery if it is marked "Special Delivery." The delivery, at carrier offices, extends to the limits of the carrier routes. At non-carrier offices it extends to one mile from the post-office. Also to patrons of rural routes residing within one-half mile of such routes. Postmasters are not obliged to deliver beyond these limits, and letters addressed to places beyond must await delivery in the usual way, notwithstanding the special delivery stamp.

Registration—All domestic mail matter except fourth-class matter may be registered at the rate of *ten cents for each piece* in addition to the regular rates of postage, to be fully prepaid by stamps. Each piece must bear the name and address of the sender, and a receipt will be returned from the person to whom addressed, when indorsed "receipt desired," or words of similar import. Mail matter can be registered at all post-offices in the United States.

In case of the injury or loss of domestic registered mail in the postal service, indemnity will be paid for the value thereof, not exceeding $50.00 in any one case of first-class matter, and not exceeding $25.00 in any one case of third-class matter. Indemnity within the prescribed limit will be paid for the market value of merchandise lost or the actual, usual, direct and necessary cost of repairs whichever the department may decide upon, and the actual, usual, direct and essential expenses incurred in the duplication of valuable papers, or the original cost of such papers when they are not or cannot be duplicated. Claims for indemnity must be made within one year from the date of loss of domestic mail and date of mailing of foreign mail. The limit of indemnity paid for registered articles lost in the international mails is fifty francs.

Domestic Money Orders—Domestic money orders are issued by money-order post-offices for any amount up to $100, at the following rates:

For sums not exceeding $2.50, 3 cents; over $2.50 to $5, 5 cents; over $5 to $10, 8 cents; over $10 to $20, 10 cents; over $20 to $30, 12 cents; over $30 to $40, 15 cents; over $40 to $50, 18 cents; over $50 to $60, 20 cents; over $60 to $75, 25 cents; over $75 to $100, 30 cents.

All domestic money orders must be made payable at a designated money order office, but those issued at any money order office in the continental United States, excepting Alaska, may be paid at any money order office in the continental United States, excepting Alaska, if presented for payment on or before the expiration of the thirtieth day following the date of issue. If presented after that date and within one year from the last day of the month in which issued, they shall be paid only at the office designated in the money order as the paying office, or repaid at the office of issue.

Stamped Envelopes—Embossed stamped envelopes and newspaper wrappers of several denominations, sizes and colors are kept on sale at post-offices, singly or in quantities, at a small advance on the postage rate. Stamps cut from stamped envelopes or wrappers are valueless, but postmasters are authorized to give good stamps for stamped envelopes or newspaper wrappers that may be spoiled in directing, if presented in a substantially whole condition.

Applications for the establishment of post-offices should be addressed to the Postmaster-General, accompanied by a statement of the necessity therefor. Instructions will then be given and blanks furnished to enable the petitioners to provide the department with the necessary information.

The franking privilege was abolished July 1, 1873, but the following mail matter may be sent free by legislative saving clauses, viz.:

1. All public documents printed by order of Congress, the Congressional Record and speeches contained therein, franked by Members of Congress, or the Secretary of the Senate, or Clerk of the House.

ADDITIONAL POSTAL LAWS AND REGULATIONS—*Continued.*

2. Seeds transmitted by the Secretary of Agriculture, or by any Member of Congress, procured from that department.

3. Letters and packages relating exclusively to the business of the Government of the United States, mailed only by officers of the same, and letters and parcels mailed by the Smithsonian Institution. All these must be covered by specially printed "penalty" envelopes or labels.

4. The Vice-President, Members and Members-elect and Delegates and Delegates-elect to Congress may frank any mail matter to any Government official or to any person correspondence, not over four ounces in weight, upon official or departmental business.

All communications to Government officers and to Members of Congress are required to be prepaid by stamps unless inclosed in "penalty" envelopes furnished for replies.

Suggestions to the Public—Mail all letters, etc., as early as practicable, especially when sent in large numbers, as is frequently the case with newspapers and circulars.

All mail matter at large post-offices is necessarily handled in great haste and should therefore in all cases be so PLAINLY addressed as to leave NO ROOM FOR DOUBT AND NO EXCUSE FOR ERROR on the part of postal employés. Names of States should be written in full in order to prevent errors which arise from the similarity of such abbreviations as Cal., Col.; Pa., Va., Vt.; Me., Mo., Md.; Ioa., Ind.; N. H., N. M., N. Y., N. J., N. C., D. C.; Miss., Minn., Mass.; Nev., Neb.; Penn., Tenn., etc., when hastily or carelessly written. This is especially necessary in addressing mail matter to places of which the names are borne by several post-offices in different States.

Avoid as much as possible using envelopes made of flimsy paper, especially where more than one sheet of paper, or any other article than paper, is inclosed. Being often handled, and even in the mail-bags subject to pressure, such envelopes not infrequently split open, giving cause of complaint.

Never send money or any other article of value through the mail except either by means of a money order or in a registered letter or by insured parcel post. Any person who sends money or valuables otherwise not only runs a risk of losing his property, but exposes to temptation every one through whose hands his letter passes, and may be the means of ultimately bringing some clerk or letter-carrier to ruin.

See that every letter or package bears the full name and post-office address of the writer, in order to secure the return of the letter if the person to whom it is directed cannot be found. A much larger portion of the undelivered letters could be returned if the names and addresses of the senders were always fully and plainly written or printed on the envelopes. Persons who have large correspondence find it most convenient to use "special request envelopes;" but those who only mail an occasional letter can avoid much trouble by writing a request to "return if not delivered," etc., on the envelope.

When dropping a letter, newspaper, etc., into a street mailing-box, or into the receptacle at a post-office, always see that the packet falls into the box and does not stick in its passage; observe, also, particularly, whether the postage stamps remain securely in their places.

Postage stamps should be placed on the upper right-hand corner of the addressed side of all mail matter.

Imitations of postage stamps are not permissible on mail matter.

Space should be left on the address side of all mail matter sufficient for a legible address and for all directions permissible thereon, for postage stamps, for postmarking, rating, and any words necessary for forwarding or return. Watermarks or printing in light tints which do not render the reading of the address difficult will be permitted.

The street and number (or box number) should form a part of the address of all mail matter directed to cities. In most cities there are many persons, and even firms, bearing the same name. Before depositing any package or other article for mailing, the sender should assure himself that it is wrapped and packed in the manner prescribed by postal regulations; that it does not contain *unmailable* matter nor exceed the limit of weight as fixed by law; and that it is fully prepaid and properly addressed.

It is unlawful to send an ordinary letter by express or otherwise outside of the mails unless it be inclosed in a Government-stamped envelope of sufficient value to pay the postage to which it is subject. It is also unlawful to inclose a letter in an express package unless it pertains wholly to the contents of the package.

It is forbidden by the regulations of the Post-Office Department for postmasters to give any person information concerning the mail matter of another, or to disclose the name of a box-holder at a post-office.

Letters addressed to persons temporarily sojourning in a city where the Free Delivery System is in operation should be marked "Transient" or "General Delivery," if not addressed to a street and number or some other designated place of delivery.

Foreign books, etc., infringing United States copyright are *undeliverable* if received in foreign mails, or mailed here.

FOREIGN MAILS.

POSTAGE RATES AND CONDITIONS—See Exceptions Below.

THE rates of postage to all foreign countries and colonies except Canada, Cuba, Mexico and Panama are as follows:

Letters	first ounce or less, 5 cents; each additional ounce	3 cents.
Postal cards, each		2 cents.
Newspapers and other printed matter, per 2 ounces		1 cent.
Commercial papers (such as legal and insurance papers, deeds, bills of lading, invoices, manuscript for publication, etc.)	Packets not in excess of 10 ounces	5 cents.
	Packets in excess of 10 ounces, for each 2 ounces or fraction thereof	1 cent.
Samples of merchandise	Packets not in excess of 4 ounces	2 cents.
	Packets in excess of 4 ounces, for each 2 ounces or fraction thereof	1 cent.
Registration fee on letters or other articles		10 cents.

On printed matter and commercial papers the limit of weight is 4 pounds 6 ounces, except that single volumes of books to Salvador, Canada, Mexico, Cuba, and Panama, are unrestricted as to weight. Size—The limit of size is 18 inches in any one direction, except that printed matter or commercial papers in rolls may be 30 inches long by 4 inches in diameter.

Ordinary letters for countries of the Postal Union (except Canada and Mexico) will be forwarded, whether any postage is prepaid on them or not. All other mailable matter must be prepaid at least partially. Domestic rates apply to matter for Porto Rico, Guam, Philippine Islands, Cuba, "Canal Zone," Republic of Panama, Tutuila, Hawaii, Shanghai City, U. S. Naval Vessels and officers and men of the U. S. Navy in the U. S. Naval Hospital, Yokohama, Japan.

EXCEPTIONS.

GREAT BRITAIN AND IRELAND, NEWFOUNDLAND, BAHAMAS, BARBADOS, BRITISH GUIANA, BRITISH HONDURAS, DUTCH WEST INDIES, AND LEEWARD ISLANDS.

The rate on letters for these countries is two cents for each ounce or fraction. The Postal Union rates apply to postal cards, post cards, printed matter, commercial papers and samples.

FOREIGN MAILS—*Continued.*

GERMANY.*

The postage rate on letters for Germany by direct ocean transportation is two cents an ounce. Letters paid at the two-cent rate are despatched only by steamers able to land the mails at a German port. Letters paid at the Postal Union rate are despatched by the quickest route.

A fast steamer sailing for Germany via Plymouth and Cherbourg carries letters for Germany prepaid at the Postal Union rate and at the two-cent rate—the letters paid at the five-cent (Postal Union) rate are landed at Plymouth (the quickest route), whereas the letters paid at the two-cent rate are carried through to Germany by the transatlantic steamer.

The Postal Union rates apply to postal cards, post cards, printed matter, commercial papers and samples regardless of the route by which sent, also to letters despatched via England and France.

CANADA.

Letters, two cents for each ounce or fraction of an ounce.

Postal cards and post cards, one cent.

Double postal cards (with paid reply), two cents.

Second-class matter (newspapers and periodicals), one cent for each 4 ounces or fraction thereof. No limit of weight.

Printed matter (except second-class), one cent for each 2 ounces or fraction thereof. Limit of weight 4 pounds 6 ounces, except for single volumes of printed books.

Fourth-class matter (domestic parcel post) not exceeding 4 ounces in weight is subject to the rate of one cent for each ounce or fraction of an ounce, and when exceeding 4 ounces in weight is subject to the rate of 12 cents a pound or fraction thereof. Packages of seeds, plants, etc., not exceeding 4 ounces in weight are subject to the rate of one cent for each ounce or fraction of an ounce, and when exceeding 4 ounces are subject to the rate of 12 cents a pound or fraction thereof. Limit of weight 4 pounds 6 ounces, except for a single book.

Commercial papers, samples, printed books and miscellaneous printed matter may be mailed at the Postal Union postage rates and under the conditions applicable to such articles in foreign mails.

Any mailable matter may be registered, but cannot be sent as insured mail.

Sealed articles, other than letters in their usual and ordinary form, are unmailable. But unsealed packages may contain, in sealed receptacles, articles which cannot be safely transmitted in unsealed receptacles; provided the contents of the closed receptacles are plainly visible or are precisely stated on the covers of the closed receptacles and with the packages so wrapped that the outer cover can be easily opened.

Prepayment of postage upon any article, except the reply half of a double postal card, can be effected only by means of United States postage stamps. Letters will be despatched if prepaid one full rate of postage. Postage on other articles must be prepaid in full.

CUBA.

Letters, 2 cents for each ounce or fraction of an ounce.

Postal cards and post cards, 1 cent.

Double post cards (with paid reply), 2 cents.

Second-class matter (newspapers and periodicals), 1 cent for each 4 ounces or fraction thereof. No limit of weight.

Printed matter (except second-class), 1 cent for each 2 ounces or fraction thereof. Limit of weight 4 pounds 6 ounces, except for single volumes of printed books. Packages of miscellaneous printed matter and packages of books weighing over 4 pounds but not over 4 pounds 6 ounces may also be sent as fourth-class matter at the rate of 12 cents a pound.

Fourth-class matter (domestic parcel post) not exceeding 4 ounces in weight is subject to the rate of 1 cent for each ounce or fraction of an ounce, and when exceeding 4 ounces in weight is subject to the rate of 12 cents a pound or fraction thereof. Packages of seeds, plants, etc., not exceeding 4 ounces in weight are subject to the rate of 1 cent for each ounce or fraction of an ounce, and when exceeding 4 ounces are subject to the rate of 12 cents a pound or fraction thereof. Limit of weight 4 pounds 6 ounces, except for a single book.

Commercial papers, samples, printed books and miscellaneous printed matter may be mailed at the Postal Union postage rates and under the conditions applicable to such articles in foreign mails.

Any mailable matter may be registered, but cannot be sent as insured mail.

Liquids and fatty substances (except samples) are unmailable.

Sealed articles, other than letters in their usual and ordinary form, are unmailable. But unsealed packages may contain, in sealed receptacles, articles which cannot be safely transmitted in unsealed receptacles; provided the contents of the closed receptacles are plainly visible or are precisely stated on the covers of the closed receptacles and with the packages so wrapped that the outer cover can be easily opened.

Prepayment of postage upon any article, except the reply half of a double postal card, can be effected only by means of United States postage stamps. Letters and postal cards must be despatched whether prepaid or not. Postage on other articles (except fourth-class matter) must be prepaid at least in part, and on fourth-class matter in full.

MEXICO.

Letters, 2 cents for each ounce or fraction of an ounce.

Postal cards and post cards, 1 cent.

Double postal cards (with paid reply), 2 cents.

Second-class matter (newspapers and periodicals), 1 cent for each 4 ounces or fraction thereof. No limit of weight.

Printed matter (except second-class), 1 cent for each 2 ounces or fraction thereof. Limit of weight 4 pounds 6 ounces, except for single volumes of printed books. Packages of miscellaneous printed matter and packages of books weighing over 4 pounds but not over 4 pounds 6 ounces may also be sent as fourth-class matter at the rate of 12 cents a pound.

Fourth-class matter (domestic parcel post) not exceeding 4 ounces in weight is subject to the rate of 1 cent for each ounce or fraction of an ounce and when exceeding 4 ounces in weight is subject to the rate of 12 cents a pound or fraction thereof. Packages of seeds, plants, etc., not exceeding 4 ounces in weight are subject to the rate of 1 cent for each 2 ounces or fraction of an ounce, and when exceeding 4 ounces are subject to the rate of 12 cents a pound or fraction thereof. Limit of weight 4 pounds 6 ounces, except for a single book.

Parcels may also be sent by foreign parcel post under the conditions of the parcel-post convention with Mexico. The limit of weight is 4 pounds 6 ounces, except that to certain places parcels weighing up to 11 pounds may be forwarded. (For list of places see "Postal Guide.")

Customs declarations must be attached to all parcels of fourth-class matter and all packages sent by foreign parcel post.

Commercial papers, samples, printed books and miscellaneous printed matter may be mailed at the Postal Union postage rates and under the conditions applicable to such articles in foreign mails.

*The 2-cent letter rate to Germany is suspended owing to war. All letters for Germany are now subject to the Postal Union rate of 5 cents for the first ounce or less and 3 cents for each additional ounce or fraction thereof.

FOREIGN MAILS—*Continued.*

Any mailable matter may be registered, but cannot be sent as insured mail.

Sealed articles, other than letters in their usual and ordinary form, are unmailable. But unsealed packages may contain, in sealed receptacles, articles which cannot be safely transmitted in unsealed receptacles; provided the contents of the closed receptacles are plainly visible or are precisely stated on the covers of the closed receptacles and with the packages so wrapped that the covers can be easily opened.

Prepayment of postage upon any article, except the reply half of a double postal card, can be effected only by means of United States postage stamps. Letters will be despatched if prepaid one full rate of postage. Postage on other articles must be prepaid in full.

Matter addressed to Mexico must, in all cases, bear as part of the address the name of the State in which the city or town is located. For example, Acapulco, *Guerrero*, Mexico; not Acapulco, Mexico.

PANAMA.

Letters, 2 cents for each ounce or fraction of an ounce.

Postal cards and post cards, 1 cent.

Double postal cards (with paid reply), 2 cents.

Second-class matter (newspapers and periodicals), 1 cent for each 4 ounces or fraction thereof. No limit of weight.

Printed matter (except second-class), 1 cent for each 2 ounces or fraction thereof. Limit of weight 4 pounds 6 ounces, except for single volumes of printed books. Packages of miscellaneous printed matter and packages of books weighing over 4 pounds but not over 4 pounds 6 ounces may also be sent as fourth-class matter at the rate of 12 cents a pound.

Fourth-class matter (domestic parcel post) not exceeding 4 ounces in weight is subject to the rate of 1 cent for each ounce or fraction of an ounce, and when exceeding 4 ounces in weight is subject to the rate of 12 cents a pound or fraction thereof. Packages of seeds, plants, etc., not exceeding 4 ounces in weight are subject to the rate of 1 cent for each ounce or fraction of an ounce, and when exceeding 4 ounces are subject to the rate of 12 cents a pound or fraction thereof. Limit of weight 4 pounds 6 ounces, except for a single book.

Parcels up to 11 pounds in weight may also be sent by foreign parcel post, under the conditions of the parcel post convention with Panama.

Customs declarations must be attached to all parcels of fourth-class matter and all packages sent by foreign parcel post.

Commercial papers, samples, printed books and miscellaneous printed matter may be mailed at the Postal Union postage rates and under the conditions applicable to such articles in foreign mails.

Any mailable matter may be registered, but cannot be sent as insured mail.

Liquids and fatty substances (except samples) are unmailable.

Sealed articles, other than letters in their usual and ordinary form, are unmailable. But unsealed packages may contain, in sealed receptacles, articles which cannot be safely transmitted in unsealed receptacles; provided the contents of the closed receptacles are plainly visible or are precisely stated on the covers of the closed receptacles and with the packages so wrapped that the cover can be easily opened.

Prepayment of postage upon any article, except the reply half of a double postal card, can be effected only by means of United States postage stamps. Letters and postal cards must be despatched whether prepaid or not. Postage on other articles (except fourth-class matter) must be prepaid at least in part, and on fourth-class matter in full.

SHANGHAI, CHINA.

Articles intended for delivery in the city of Shanghai, China, are subject to United States domestic postage rates and conditions, but letters specially addressed via Europe-Siberia are subject to the foreign rate. Certain matter may also be sent by *foreign* parcel post.

UNITED STATES NAVAL VESSELS.

Mail matter for officers or members of the crews of United States vessels of war stationed abroad is subject to domestic postage rates and conditions. Packages of fourth-class matter exceeding 4 ounces in weight are subject to the rate of 12 cents for each pound or fraction of a pound *when the vessels are stationed in foreign waters*. Articles should be addressed "U. S. S. (name of vessel), care of Postmaster, New York, N. Y." and be fully prepaid. Mail so addressed will be forwarded to the vessels, whether at domestic or foreign ports. Express packages will not be received unless they conform to the postal regulations and are placed in the mail with the postage properly prepaid.

UNITED STATES NAVAL HOSPITAL, YOKOHAMA, JAPAN.

Mail for officers and men of the United States Navy in the United States Naval Hospital at Yokohama, is subject to domestic rates and conditions, the same as that for officers and men on U. S. naval vessels stationed abroad.

SAMPLES OF MERCHANDISE

must be bona fide trade samples without any salable value. **Wrapping**—Samples of merchandise must be wrapped so that the contents may be easily examined without injury to wrappers. **Permissible Writing**—They must bear no writing except the name or the social position of the sender, a manufacturer's or trade mark, numbers, prices and indications relating to the weight, size, dimensions and quantity to be disposed of, and words which are necessary to precisely indicate the origin and nature of the merchandise. **Weight**—Packages of samples must not exceed 12 ounces in weight. **Size**—The size must not exceed 12 inches in length, 8 inches in breadth, and 4 inches in depth, except when in the form of a roll, they may be 12 inches in length and 6 inches in diameter. **Postage**—The postage on samples is 2 cents for the first 4 ounces or less, and 1 cent for each additional 2 ounces or fraction of 2 ounces. Register all valuable articles. Registration fee 10 cents.

PARCEL POST.

Postage, 12 cents a pound or fraction thereof; greatest length (unless specially noted below), 3 feet 6 inches; greatest length and girth combined (unless specially noted below), 6 feet; limit of weight (unless specially noted below), 11 pounds; value not limited; registration fee, 10 cents.

Unsealed packages of mailable merchandise may be sent by parcel post to Argentine Republic (parcels cannot be registered; see item "Customs Declarations"), Dutch Guiana (parcels cannot be registered; see item "Customs Declarations"), Uruguay (parcels cannot be registered; see item "Customs Declarations"),* Hungary, Bermuda, Jamaica, including Cayman Islands, Turks Island, including Caicos Islands, Barbados (parcels cannot be registered), the Bahamas, British Honduras, Mexico (limit of size, 2 feet in length, 4 feet in girth; limit of weight for places named in "Postal Guide," 11 pounds; for other places, 4 pounds, 6 ounces), Leeward Islands (Antigua, Anguilla, Barbuda, Dominica, Montserrat, Nevis, Redonda, St. Kitts, and the

FOREIGN MAILS—*Continued.*

Virgin Islands), Colombia (limit of size, 2 feet in length, 4 feet in girth), Costa Rica, Salvador (see item "Customs Declarations"), British Guiana, Danish West Indies (St. Croix, St. John, and St. Thomas), and the Windward Islands (Grenada, Grenadines, St. Lucia, and St. Vincent), Trinidad, including Tobago; Venezuela (see item "Customs Declarations"), Bolivia, Ecuador, Peru, and Chile, Newfoundland, including Labrador. Parcels for Labrador can only be forwarded during the months of July, August, and September; Honduras (Republic of), *Germany, including Cameroon (Kamerun), Toga, German Samoa, German East Africa and German Southwest Africa; Greece (parcels cannot be registered), Italy, including Erythrea, Benadir, Bengazi, and Tripoli in Tripoli (Barbary) and Republic of San Marino and Islands of Carpatos and Rhodes. Liberia*, Netherlands (parcels cannot be registered; see item "Customs Declarations"), New Zealand including Cook and Fanning Islands; Nicaragua, Guatemala, Norway, Japan, including Formosa, Karafuto (Japanese Saghalien), and Korea (Chosen); Hongkong, including Kowloon and Chung Chow, Colony of Hongkong; Austria, including Durazzo, San Giovanni de Medua, Santi Quaranta, Scutari, and Valona, all in Albania*, Gibraltar (parcels cannot be registered; see item "Customs Declarations"), French Guiana (parcels cannot be registered; see item "Customs Declarations")*, Belgium, ‡France, excluding Algeria and Corsica (parcels cannot be registered; see item "Customs Declarations"), Great Britain and Ireland (parcels cannot be registered), Australia, including Tasmania, Denmark, including Faroe Islands and Iceland; Sweden. China (parcels for non-steam served places must not exceed 25 cubic decimeters (one cubic foot) in volume; Hayti, Brazil, Dominican Republic, Dutch West Indies; Curacao and Aruba, Bonaire, Saba. St. Eustatius and the Dutch part of St. Martins (parcels cannot be registered; see item "Customs Declarations"); French West Indies: Martinique, Guadeloupe (including Marie Galante, Deseade, Les Saints, Petite Terre, St. Bartholomew and the French portion of St. Martins) (parcels cannot be registered; see item "Customs Declarations"), Panama. Parcels must be wrapped so as to permit their contents to be easily examined by postmasters. The presence, in an unsealed parcel, of sealed receptacles containing mailable articles which cannot be safely transmitted in the unsealed receptacles, will not render the parcel unmailable, provided the contents of the sealed receptacles are plainly visible, or are unmistakably indicated by the method of packing or by a precise statement on the covers. But such sealed receptacles will not be admitted to the parcel post unless inclosed in an outside cover open to inspection. Any article absolutely prohibited admission to the regular mails for any country is also inadmissible to parcel post mails for that country; but no article is excluded from parcel post mails solely because it is dutiable in the country of destination. ‡Liquids, poisonous, explosive, and inflammable substances are excluded.

CUSTOMS DECLARATIONS.

A "Customs Declaration" Form 4402 (which will be furnished on application at the post-office or a station) must be properly and fully filled out, stating the actual contents, value, etc., of the parcel. General terms, such as "merchandise" or "samples," will not answer; the contents must be accurately described. "Customs Declarations" must be firmly attached to the cover of the parcel, but not pasted or affixed so that they will seal the package and prevent examination of the contents without damaging the cover. In addition to being tied by means of a cord passing through the eyelet, the tag should be bound flat to the parcel (with the front or "declaration" side facing out), so that the tag cannot be used as a handle to lift the parcel while in transit.

Two (2) copies of the "declaration" (form 4402) must be attached to each parcel for Argentine Republic, Dutch Guiana, Dutch West Indies, French West Indies, Netherlands, French Guiana, Gibraltar, Salvador, and Uruguay, and three (3) copies to each parcel for Venezuela.

France—Two copies of the special customs declaration, "Form No. 2 Bis" (4402½), showing in addition to the usual entries the gross weight of the parcel and net weight of the contents, must be attached to parcels for France. One copy may be pasted to the package, but the other copy must be affixed in such a manner that it can be readily removed at the exchange office where the mail is prepared for despatch to France.

GENERAL REGULATIONS RESPECTING FOREIGN MAILS.

Rates and conditions to countries not in the Universal Postal Union are now the same as those to Universal Postal Union countries.

Postage can be prepaid upon articles (other than the reply half of double postal cards) only by means of the postage stamps of the country *in* which the articles are mailed. Hence articles mailed in one country addressed to another country which bear postage stamps of the country to which they are addressed are treated as if they had no postage stamps attached to them.

Unpaid letters received from the Postal Union and insufficiently prepaid correspondence of all kinds is chargeable with double the amount of the deficient postage.

Matter to be sent in the mails at less than letter rates must be so wrapped that it can be readily examined at the office of delivery, as well as the mailing office, without destroying the wrapper.

Packages of newspapers and periodicals sent in the mails to foreign countries are restricted to a single (outside) address. Those sent to Canada, Cuba, Mexico, Panama, and Shanghai (City), China, are transmissible as in domestic mails.

The United States two-cent postal card should be used for card correspondence with foreign countries (except Canada, Cuba, Mexico, Panama, and Shanghai City, to which countries the one-cent card is transmissible), but where these cards cannot be obtained, it is allowable to use for this purpose the United States one-cent postal card with a one-cent United States adhesive postage stamp attached thereto. Private cards can be used if conforming in size, etc., to Government cards, such cards should bear the words "post card."

Mail matter *of all kinds* received from any country of the Postal Union is required to be reforwarded at the request of the addressee, from one post-office to another, and in the case of articles other than parcel post packages, to any foreign country embraced in the Postal Union, without additional charge for postage.

All articles prohibited from domestic mails are also excluded from circulation in the mails to and from foreign countries. Postal cards or letters addressed to go around the world will not be forwarded, being prohibited.

---

* Service suspended (except to German Samoa) on account of war at time ALMANAC was printed.

‡ Service to the French Departments (states) of Aisne, Ardennes, Aube, Haute-Marne, Haute-Saonne, Marne, Meurthe et Moselle, Meuse, Nord, Oise, Pas de Calais, Seine-et-Marne, Somme, and Vosges suspended.

‡ Liquids and oils, pastes, salves or other articles easily liquefiable are admissible, provided they are packed in accordance with the regulations prescribed for the admission of such substances to the United States domestic parcel post mails, except to Belgium, Bermuda, Chile, China, Colombia, Dominican Republic, Ecuador, French Guiana, Guatemala, Hungary, Manchuria, Martinique, Nicaragua, and Peru.

FOREIGN MAILS—*Continued.*

FEES FOR INTERNATIONAL MONEY ORDERS.

Fees are subject to change.

DOMESTIC RATES.

Table No. 1.

When payable in Bahamas, Bermuda, British Guiana, British Honduras, Canada, Canal Zone, Cuba, Martinique, Mexico, Newfoundland, the Philippine Islands, the United States Postal Agency at Shanghai (China) and certain islands in the West Indies, listed in the Register of Money Order Offices

Use the Domestic form for these Orders.

For Orders from		
	$00.01 to $2.50	3 cents
From	$2.51 to $5	5 cents
"	$5.01 to $10	8 cents
"	$10.01 to $20	10 cents
"	$20.01 to $30	12 cents
"	$30.01 to $40	15 cents
"	$40.01 to $50	18 cents
"	$50.01 to $60	20 cents
"	$60.01 to $75	25 cents
"	$75.01 to $100	30 cents

INTERNATIONAL RATES.

Table No. 2.

When payable in Apia, Austria, Belgium, Bolivia, Chile, Costa Rica, Denmark, Egypt, France, Germany, Great Britain and Ireland, Greece, Honduras, Hongkong, Hungary, Italy, Japan, Liberia, Luxemburg, Netherlands, New South Wales, New Zealand, Norway, Peru, Portugal, Queensland, Russia, Salvador, South Australia, Sweden, Switzerland, Tasmania, Union of South Africa,* Uruguay, and Victoria

Use the International form for these Orders.

For Orders from		
	$00.01 to $10	10 cents
From	$10.01 to $20	20 cents
"	$20.01 to $30	30 cents
"	$30.01 to $40	40 cents
"	$40.01 to $50	50 cents

"	$90.01 to $100	1 dollar

Observe that for orders payable in the countries referred to in Table No. 1, only the *Domestic* rates are to be charged and the *Domestic* forms are to be used.

* The Union of South Africa comprises the provinces of the Cape of Good Hope (formerly Cape Colony), the Transvaal, the Orange Free State (formerly Orange River Colony), and Natal (including Zululand).

POSTAL-SAVINGS SYSTEM.

INFORMATION FOR DEPOSITORS ANNOUNCED BY POST-OFFICE DEPARTMENT.

Object—1. The Postal-Savings System is established by authority of the act of Congress approved June 25, 1910, for the purpose of providing facilities for depositing savings at interest, with the security of the United States Government for repayment.

Safety—2. The faith of the United States is solemnly pledged to the payment of deposits made in postal-savings depository offices, with accrued interest thereon, as provided by the Postal-Savings act.

Who May Deposit—3. An account may be opened and deposits made by any person of the age of 10 years or over in his or her own name, or by a married woman in her own name and free from any control or interference by her husband.

4. Deposits will be accepted only from individuals, and no account will be opened in the name of any corporation, association, society, firm or partnership in the name of any person as an officer of a corporation, association, or society, in the name of any person as a member of a firm or partnership, or in the name of two or more persons jointly. No account will be opened in the name of one person in trust for or on behalf of another person or persons.

5. A person may open a postal-savings account at any depository post-office, but no person may at the same time have more than one postal-savings account either at the same office or at different offices.

6. All accounts shall be opened in person by the depositor or his authorized representative. After opening an account, a depositor may forward subsequent deposits to the post-office by registered mail or by money order made payable to the postmaster. See paragraph No. 26.

No Charges to Depositors—7. No charges or fees are collected or required from depositors in connection with the opening of accounts or the subsequent deposit or withdrawal of moneys.

How to Open an Account—8. When a person applies to open an account, he shall furnish the necessary information to enable the postmaster to fill out an application, which the depositor will then be required to sign.

Deposits—9. Deposits are evidenced by postal-savings certificates issued in fixed denominations of $1, $2, $5, $10, $20, $50, and $100, each bearing the name of the depositor, the number of his account, the date of issue, and the name of the depository office. The depositor shall sign a duplicate of each certificate, which the postmaster will retain.

10. No account may be opened for less than $1, nor will fractions of a dollar be accepted for deposit. (See paragraph 11 relative to postal-savings cards and stamps.)

11. No person is permitted to deposit more than $1,000 in any one calendar month nor to have a total balance to his credit at any time of more than $1,000 exclusive of accumulated interest.

12. Postal-savings certificates are not transferable or negotiable and are payable only to the person to whom issued, except as provided in paragraphs 27, 28, and 29.

13. On opening an account a depositor is supplied with an envelope in which he may keep his savings certificates. This envelope bears information for his guidance, and a blank ledger record on which an account of his deposits and withdrawals may be kept.

14. If a postal-savings certificate is lost or destroyed the depositor should notify the postmaster. Upon compliance by the depositor with the necessary requirements, a new certificate will be issued by the Third Assistant Postmaster-General if deemed proper.

15. Postmasters are not permitted to receive issued postal-savings certificates for safe-keeping.

Postal-Savings Cards and Stamps—16. Amounts less than $1 may be saved for deposit by purchasing 10-cent postal-savings cards and 10-cent postal-savings stamps. Each postal-savings card bears blank spaces in which such stamps may be affixed from time to time. A postal-savings card with nine postal-savings stamps affixed will be accepted as a deposit of $1 either in opening an account or in adding to an existing account or it may be redeemed in cash.

17. Postal-savings cards and stamps are not valid for postage, and postmasters will not exchange them for postage stamps nor exchange postage stamps for postal-savings cards or stamps.

Interest—18. Interest at the rate of 2 per cent. per annum will be allowed on the amount represented by each postal-savings certificate, payable annually. Interest will not be paid for any fraction of a year.

19. Deposits will bear interest from the first day of the month next following that in which made.

20. Interest will continue to accrue annually on a postal-savings certificate as long as it remains outstanding, certificates being valid until paid, without limitation as to time.

21. Compound interest is not allowed on an outstanding certificate, but a depositor may withdraw

POSTAL-SAVINGS SYSTEM—*Continued.*

interest accrued and make a new deposit, subject to the restriction that deposits at interest will not be received for less than $1.

Withdrawals—22. A depositor may at any time withdraw the whole or any part of the deposits to his credit, with any interest payable thereon, by surrendering, at the office of issue, postal-savings certificates, properly indorsed, for the amount to be withdrawn.

23. A depositor presenting a certificate for payment in full shall indorse it in the presence of the postmaster or his representative and surrender it. The postmaster or his representative, upon being satisfied as to the depositor's identity, will then make payment.

24. When a depositor desires to withdraw only a part of the amount represented by any certificate, the depository postmaster will cancel the certificate, after paying any interest that may be due thereon, and issue a new certificate or certificates covering the amount remaining on deposit, which will bear interest from the first day of the following month.

25. When a depositor desires to withdraw the interest payable on any certificate, he will be required to give his receipt for the amount of the interest paid. The postmaster will enter on the back of the certificate the date of the interest payment.

Deposits Not Made in Person—26. When a depositor, for good and sufficient reason, is unable to appear in person to make an additional deposit, the amount to be deposited may be sent by a representative or forwarded by registered mail if the money order service is not available, by a money order made payable to the postmaster. Postal-savings accounts may be opened by mail. This important extension of the service will have the practical effect of bringing postal-savings facilities within the reach of every person in the United States. A person residing at a post-office not authorized to accept postal-savings deposits may open an account on or after that date by applying to his local postmaster, who will act as agent for a nearby post-office authorized to accept such deposits. After an account has been opened deposits may be made either in person, by a representative, by money order, or by registered mail if the money order service is not available.

Withdrawals Not Made in Person—27. When, for good and sufficient reason, a depositor is unable to appear in person to make a withdrawal, a blank order for the purpose will be furnished upon his application by mail or at the request of his representative. When the order has been properly filled out and signed by the depositor, his signature witnessed by a disinterested person, and the order returned to the postmaster, together with each certificate to be paid properly indorsed, payment will be made to the depositor's representative, or a money order covering the amount withdrawn, less the money-order fee, will be forwarded to the depositor.

28. When a depositor who is unable to appear in person desires to withdraw the interest payable on any certificate, the blank order furnished will be accompanied by a receipt for the interest to be paid. Upon return of such papers, properly signed by the depositor, the postmaster will make payment as provided in paragraph 27.

Death of Depositor—29. In case of the death of a depositor the Third Assistant Postmaster-General will authorize the payment of the amount standing to his credit to the executor or administrator of his estate upon compliance with necessary requirements. In case of the death of a depositor intestate, where no formal administration is desired by his relatives, the Third Assistant Postmaster-General may authorize the postmaster, upon obtaining an affidavit in proper form, to pay the amount to the persons entitled under the State laws to receive it.

Account of Woman Who Marries—30. A woman who opens an account and afterward marries should present her postal-savings certificates to the postmaster at the issuing office in order that the certificates may be indorsed as payable to her in her new name. The postmaster will receive no further deposits from a woman who marries and fails to comply with this requirement.

Postal-Savings Bonds—31. A depositor may exchange the whole or any part of his deposits in sums of $20, $100 and $500 for United States registered or coupon bonds bearing interest at the rate of 2½ per cent. per annum, payable semi-annually, redeemable at the pleasure of the United States after one year from date of issue, and both principal and interest being payable 20 years from such date in United States gold coin. The exchange may be made as of January 1 and July 1 of each year.

32. A depositor desiring to convert his postal-savings deposits into bonds on January 1 and July 1 of any year shall make application to the postmaster at least one month previously on a form which will be supplied in triplicate for the purpose. At the time of making application the depositor shall indorse and surrender postal-savings certificates covering the amount of the bonds desired, and the postmaster will give him a receipt for the certificates. When the bonds applied for have been issued by the Secretary of the Treasury, he will forward them direct to the depositor. The exchange is considered as taking effect on the date when the bonds begin to bear interest (January 1 or July 1), and any yearly interest due on the certificates surrendered will be paid by the postmaster on or after that date. A person may hold any amount of bonds.

33. Postal-savings deposits which have been exchanged for bonds are not counted as a part of the maximum of $1,000 allowed one depositor, and there is no limitation upon the amount of postal-savings bonds which may be acquired by a depositor.

34. Postal-savings bonds are exempt from all taxes or duties of the United States, as well as from taxation in any form by or under State, municipal, or local authority.

35. Postal-savings bonds can be procured only by the surrender of postal-savings deposits and will not be issued to persons who are not depositors, but whether in registered or coupon form they may, after receipt by the depositor, be sold or transferred at any time. A leaflet containing additional information concerning postal-savings bonds may be obtained from the postmaster.

Information—36. Further information concerning the Postal-Savings System may be obtained by application at any depository post-office or by addressing the Third Assistant Postmaster-General, Division of Postal Savings, Washington, D. C.

A person desiring to open a postal-savings account should visit the post-office in person, where full instructions will be given. If for any good reason he cannot visit the office a representative may be sent, who will be instructed how to proceed.

TRAVELERS' AID SOCIETY.

President—Gilbert Colgate. *Hon. Vice-Presidents*—Cardinal Farley, Hon. Jacob H. Schiff, Bishop David H. Greer. *Vice-Presidents*—Rev. Dr. Francis Brown, Rev. Dr. Samuel Schulman. *Treasurer*—James McAlpin Pyle. *Chairman of Executive Committee*—Rush Taggart. *General Secretary*—Orin C. Baker. *Headquarters*—465 Lexington Avenue, New York City.

The Travelers' Aid Society is non-sectarian, non-political and non-commercial in organization and work, has national and international co-operation. Object: Protects and assists all travellers, especially young women, girls and boys, without fee or gratuity. Safeguards in all the emergencies of travel from influences and dangers vicious, morally, financially, and physically. Prevents error, extortion and crime, relieves suffering, and combats vice of every form. Trained women agents, recognized by official badge, meet trains and boats. Supported by voluntary contributions.

DISTANCES FROM NEW YORK TO CITIES IN UNITED STATES.

BOYCOTTING, BLACKLISTING, AND INTIMIDATION LAWS.

THE States having laws prohibiting *boycotting* in terms are Alabama, Colorado, Illinois, Indiana, and Texas.

The States having laws prohibiting *blacklisting* in terms are Alabama, Arizona, Arkansas, California, Colorado, Connecticut, Florida, Illinois, Indiana, Iowa, Kansas, Minnesota, Mississippi (applies to telegraph operators only), Missouri, Montana, Nevada, New Mexico, North Carolina, North Dakota, Oklahoma, Oregon, Texas, Utah, Virginia, Washington, and Wisconsin.

Boycotting and picketing by peaceful and lawful means are declared legal by a Federal statute.

A number of States have laws concerning *intimidation*, conspiracy against workingmen, and interference with employment, viz.: Alabama, Colorado, Connecticut, Delaware, Florida, Georgia, Idaho (applies to mine employés only), Illinois, Kansas, Kentucky, Louisiana, Maine, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Nevada, New Hampshire, New Jersey, New York, North Dakota, Oklahoma, Oregon, Pennsylvania, Porto Rico, Rhode Island, South Dakota, Texas, Utah, Vermont, Washington, West Virginia and Wisconsin.

In the following States it is unlawful for an employer to exact any agreement, either written or verbal, from an employé not to join or become a member of a labor organization, as a condition of employment: California, Colorado, Connecticut, Idaho, Indiana, Louisiana, Massachusetts, Minnesota, Mississippi (applies to telegraph operators only), Nevada, New Jersey Oregon, Pennsylvania, Porto Rico, South Carolina, Utah, and Wisconsin.

EIGHT-HOUR LAWS.

Alaska.—Eight hours constitute a day's labor on all public works and in all mines and workings, smelting and reduction works, and at coke ovens.

Arizona.—Eight hours constitute a day's labor on all public works and in all mines and workings, smelting and reduction works, blast furnaces, rolling mills, etc.

Arkansas.—Eight hours constitute a day's work on public highways and bridges and for railway telegraph operators.

California.—Unless otherwise expressly stipulated, eight hours constitute a day's work. The time of service of all laborers, workmen, and mechanics employed upon any public works of, or work done for, the State, or for any political sub-division thereof, whether the work is to be done by contract or otherwise, and of employés in mines and smelters, is limited and restricted to eight hours in any one calendar day.

Colorado.—A day's work for all workingmen employed by the State, or any county, township, school district, municipality, or incorporated town, and for all employés in underground or open cut mines or workings, and in smelting and refining works, is restricted to eight hours.

Connecticut.—Eight hours of labor constitute a lawful day's work unless otherwise agreed. Railroad telegraph operators controlling the movement of trains may work but eight hours, except at stations kept open only in the daytime. Engineers, firemen, machinists and other mechanics employed in State institutions may work but eight hours, except in case of emergency.

Delaware.—Eight hours constitute a lawful day's work for all municipal employés of the City of Wilmington.

District of Columbia.—A day's work for all laborers and mechanics employed by the District of Columbia, or by any contractor or sub-contractor upon any public works of the District, is limited to eight hours.

Hawaii.—For all mechanics, clerks, laborers, and other employés on public works and in public offices eight hours of actual service constitute a day's work.

Idaho.—Eight hours' actual work constitute a lawful day's labor for manual laborers employed by the day on all State, county, and municipal works. Labor in mines and smelters is limited to eight hours per day.

Illinois.—Eight hours are a legal day's work in all mechanical employments, except on farms, and when otherwise agreed; the law does not apply to service by the year, month or week. Eight hours constitute a day's labor on the public highways.

Indiana.—Eight hours of labor constitute a legal day's work on the public roads, and for all classes of mechanics, workingmen, and laborers, excepting those engaged in agricultural and domestic labor. Overwork by agreement and for extra compensation is permitted.

Iowa.—Eight hours constitute a day's labor on the public roads.

Kansas.—Eight hours are a day's work for all laborers, mechanics, or other persons employed by or on behalf of the State or any county, city, township or other municipality.

Kentucky.—Eight hours constitute a day's work on all public works of the State.

Maryland.—No mechanic or laborer employed by the Mayor or City Council of Baltimore, or by any agent or contractor under them, shall be required to work more than eight hours as a day's labor.

Massachusetts.—Eight hours shall constitute a day's work for all laborers, workmen, and mechanics employed by or on behalf of the Commonwealth or any county therein, or of any city or town in the Commonwealth upon acceptance of the statute by a majority of voters present and voting upon the same at any general election.

Minnesota.—Eight hours constitute a day's labor for all laborers, workmen, or mechanics employed by or on behalf of the State, whether the work is done by contract or otherwise.

Mississippi.—Eight hours are a day's labor on highways.

Missouri.—Eight hours constitute a legal day's work. The law does not prevent an agreement to work for a longer or a shorter time and does not apply to agricultural laborers. It is unlawful for employers to work their employés longer than eight hours per day in mines and smelters, or as train despatchers, etc., on railroads, unless the office is open only during the daytime. Eight hours are a day's labor on highways, and on all public works in cities of the second class.

Montana.—Eight hours constitute a legal day's work for persons engaged to operate or handle hoisting engines at mines. The law applies only to such plants as are in operation sixteen or more hours per day, or at or in mines where the engine develops fifteen or more horse-power, or where fifteen or more men are employed underground in the twenty-four hours. A day's labor on public works and in smelters, underground mines and in railroad and other tunnels is limited to eight hours.

Nebraska.—Eight hours constitute a day's work on public roads and on all public works in cities of the first class.

Nevada.—For labor on public highways, in and about all mines, in smelters, plaster and cement mills, as train despatchers, etc., on railroads, and on all works and undertakings carried on or aided by the State, county, or municipal governments, the hours of labor are fixed at eight per day.

New Jersey.—Eight hours is the limit of a day's work by any person employed by or on behalf of the State or any municipality thereof.

New Mexico.—Eight hours constitute a day's labor in all employment by or on behalf of the State or municipality.

New York.—Eight hours constitute a day's work on highways, and on work done by or for the State, or a municipal corporation, whether directly by contractors or sub-contractors; also for all

classes of employés, except in farm or domestic labor, though overwork for extra pay is permitted in private employments.

North Dakota.—Eight hours are a day's labor on public roads

Ohio.—Eight hours constitute a day's work on all public works; also in all engagements to labor in any mechanical, manufacturing or mining business, unless otherwise expressly stipulated in the contract.

Oklahoma.—Eight hours constitute a day's labor on all public works, and in underground mines.

Oregon.—Eight hours constitute a day's labor on all public works, and in underground mines yielding metal.

Pennsylvania.—Eight hours of labor shall be deemed and held to be a legal day's work in all cases of labor and service by the day where there is no agreement or contract to the contrary. This does not apply to farm or agricultural labor or to service by the year, month or week Eight hours constitute a day's labor for all mechanics, workmen, and laborers in the employ of the State, or of any municipal corporation therein, or otherwise engaged on public works. This act shall be deemed to apply to employés of contractors. Engineers hoisting workmen at anthracite coal mines may work but eight hours per day.

Philippine Islands.—Eight hours constitute a day's work on highways.

Porto Rico.—No laborer may be compelled to work more than eight hours per day on public works.

South Dakota.—For labor on public highways a day's work is fixed at eight hours.

Tennessee.—Eight hours shall be a day's work on the highways.

Texas.—Eight hours constitute a day's work on the highways, and by train despatchers, etc., except at stations where but one operator is employed.

Utah.—Eight hours constitute a day's labor on all works carried on or aided by the State, county or municipal governments, and in all underground mines or workings, and in smelters and all other establishments for the reduction of ores.

Washington.—Eight hours in any calendar day shall constitute a day's work on any work done for the State, or for any county or municipality, and in underground coal mines

West Virginia.—Eight hours shall constitute a day's work for all laborers, workmen, and mechanics who may be employed by or on behalf of the State, and for telegraph operators directing the movement of trains where three or more passenger or ten or more freight trains pass in 24 hours.

Wisconsin.—In all engagements to labor in any manufacturing or mechanical business, where there is no express contract to the contrary, a day's work shall consist of eight hours, but the law does not apply to contracts for labor by the week, month or year. Eight hours constitute a day's labor on the public highways. Employés on public works and train despatchers may be employed but eight hours per day.

Wyoming.—Eight hours' actual work constitute a legal day's labor in all underground mines, in smelters, and on all State and municipal works.

United States.—A day's work for all laborers, workmen and mechanics who may be employed by the United States, or by any contractor or sub-contractor upon any of the public works of the United States, including dredging and rock excavation in river and harbor work, is limited to eight hours.

After January 1, 1917, 8 hours shall be deemed a day's work and the measure of a day's work for the purpose of reckoning the compensation for services of employés of carriers engaged in interstate and foreign commerce by steam railway.

THE WORLD ALMANAC is indebted to Commissioner Royal Meeker of the U. S. Bureau of Labor Statistics for this Summary of Labor Legislation revised to date

AMERICAN FEDERATION OF LABOR.

HEADQUARTERS—Washington, D. C. *President*—Samuel Gompers. *Secretary*—Frank Morrison. *Treasurer*—John B. Lennon, Bloomington, Ill. *First Vice-President*—James Duncan, Quincy, Mass. *Second Vice-President*—James O'Connell, Washington, D. C. *Third Vice-President*—D. A. Hayes, Philadelphia, Pa. *Fourth Vice-President*—Joseph F. Valentine, Cincinnati, Ohio. *Fifth Vice-President*—John R. Alpine, Chicago, Ill. *Sixth Vice-President*—H. B. Perham, St. Louis, Mo. *Seventh Vice-President*—Frank Duffy, Indianapolis, Ind. *Eighth Vice-President*—William Green, Indianapolis, Ind.

The federation is composed of 109 national and international unions, 5 departments, 45 State branches, 718 city central unions, and 689 local unions. The approximate paid membership is 2,045,793. The objects and aims of the American Federation of Labor are officially stated to render employment and means of subsistence less precarious by securing to the workers an equitable share of the fruits of their labor.

INTERNATIONAL UNIONS COMPRISING THE AMERICAN FEDERATION OF LABOR.

Asbestos Workers, International Association of Heat and Frost Insulators and—Thomas J. McNamara, 2516 Slattery Street, St. Louis, Mo.

Bakery and Confectionery Workers' International Union of America—Charles Iffland, 212 Bush Temple of Music, Chicago, Ill.

Barbers' International Union, Journeymen—Jacob Fischer, 222 East Michigan Street, Indianapolis, Ind.

Bill Posters and Billers of America, International Alliance of—William McCarthy, Fitzgerald Building, 1482-90 Broadway, New York City.

Blacksmiths, International Brotherhood of—William F. Kramer, Monon Building, Chicago, Ill.

Boilermakers and Iron Shipbuilders of America, Brotherhood of—F. P. Reinemeyer, Suite 7-12, Law Building, Kansas City, Kan.

Bookbinders, International Brotherhood of—Walter N. Reddick, 222 East Michigan Street, Indianapolis, Ind.

Boot and Shoe Workers' Union—C. L. Baine, 246 Summer Street, Boston, Mass.

Brewery Workmen, International Union of the United—Joseph Proebstle, 2347 Vine Street, Cincinnati, Ohio.

Brick, Tile, and Terra Cotta Workers' Alliance, International—William Van Bodegraven, 2341 West Twelfth Street, Chicago, Ill.

Bridge and Structural Iron Workers, International Association of—Harry Jones, 304 American Central Life Building, Indianapolis, Ind.

Broom and Whisk Makers' Union, International—W. R. Boyer, 851 King Place, Chicago, Ill.

Brushmakers' International Union—George J. Vitzthun, 2052 Gates Avenue, Brooklyn, N. Y.

Carpenters and Joiners of America, United Brotherhood of—Frank Duffy, Carpenters' Building, Indianapolis, Ind.

Carriage, Wagon, and Automobile Workers of North America, International Union of—William P. Mavell, 37 Lewis Block, Buffalo, N. Y.

Carvers' Association of North America, International Wood—Thomas J. Lodge, 10 Carlisle Street, Roxbury, Mass.

Cigarmakers' International Union of America—George W. Perkins, Monon Building, Chicago, Ill.

Clerks' International Protective Association, Retail—H. J. Conway, Lock Drawer 248, Lafayette, Ind.

Compressed Air and Foundation Workers' Union of the United States and Canada—Henry Kuhlmann, 12 St. Mark's Place, New York City.

Coopers' International Union of North America—William R. Deal, Bishop Building, Kansas City, Kan.

Cutting Die and Cutter Makers, International Union of—William Bondy, 727 Manida Street, New York.

Diamond Workers' Protective Union of America—Andries Meyer, 323 Washington Street, Brooklyn, N. Y.

Electrical Workers of America, International Brotherhood of—Charles P. Ford, Reisch Building, Springfield, Ill.

Elevator Constructors, International Union of—Frank J. Schneider, 418 Perry Building, Philadelphia, Pa.

Engineers, International Union of Steam and Operating—James G. Hannahan, 6334 Yale Avenue, Chicago, Ill.

Firemen, International Brotherhood of Stationary—C. L. Shamp, 3615 North Twenty-fourth Street, Omaha, Neb.

Foundry Employés, International Brotherhood of—George Bechtold, 810 Olive Street, St. Louis, Mo.

Fur Workers' Union of United States and Canada, International—Andrew Wennels, 1181 Broadway, New York City.

Garment Workers of America, United—B. A. Larger, Bible House, New York City.

Garment Workers' Union, International Ladies—Abe Baroff, 32 Union Square, New York City.

Glass Bottle Blowers' Association of the United States and Canada—Harry Jenkins, Rooms 930-932 Witherspoon Building, Juniper and Walnut Streets, Philadelphia, Pa.

Glass Workers' Union, American Flint—William P. Clarke, Ohio Building, Toledo, Ohio.

Glove Workers' Union of America, International—Elizabeth Christman, 166 West Washington Street, Chicago, Ill.

Granite Cutters' International Association of America, The—James Duncan, Hancock Building, Quincy, Mass.

Grinders' and Finishers' National Union, Pocket Knife Blade—F. A. Didsbury, 508 Brook Street, Bridgeport, Ct.

Hat and Cap Makers of North America, United Cloth—Max Zuckerman, 62 East Fourth Street, New York City.

Hatters of North America, United—Martin Lawlor, Bible House, New York City.

Hod Carriers', Building and Common Laborers' Union of America, International—A. Persion, 82 State Street, Albany, N. Y.

Horseshoers of United States and Canada, International Union of Journeymen—Hubert S. Marshall, 605 Second National Bank Building, Cincinnati, Ohio.

Hotel and Restaurant Employés' International Alliance and Bartenders' International League of America—Jere L. Sullivan, Commercial Tribune Building, Cincinnati, Ohio.

Typographical Union, International—J. W. Hays, Newton Claypool Building, Indianapolis, Ind.
Upholsterers' Union of North America—James H. Hatch, Box 10, Station Y, New York City.
Weavers' Amalgamated Association, Elastic Goring—Alfred Haughton, 50 Cherry Street, Brockton, Mass.
Weavers' Protective Association, American Wire—E. E. Desmond, 99 Seventh Street, Harrison, N. J.
Weavers' Union of America, International Shingle—William H. Reid, 202 Maynard Building, Seattle, Wash.
White Rats Actors' Union of America—Harry Mountford, 227 West Forty-sixth Street New York City.

NATIONAL UNIONS

NOT AFFILIATED WITH THE AMERICAN FEDERATION OF LABOR.

Bricklayers, Masons and Plasterers International. William Dobson, University Park Building, Indianapolis, Ind.
Brotherhood of Locomotive Engineers. Warren S. Stone, Grand Chief Engineer, Cleveland, Ohio; W. B. Prenter, General Secretary, Cleveland, Ohio.
Brotherhood of Locomotive Firemen and Enginemen. A. H. Hawley, General Secretary and Treasurer, Jefferson Building, Peoria, Ill.
Brotherhood of Railroad Trainmen. A. E. King, General Secretary-Treasurer, American Trust Building, Cleveland, Ohio.
National Window Glass Workers. J. M. Neenan, Electric Building, Cleveland, Ohio.
Order of Railway Conductors of America. A. B. Garretson, President, Cedar Rapids Savings Bank Building, Cedar Rapids, Iowa; C. E. Whitney, Grand Secretary.

KNIGHTS OF LABOR.

General Executive Board: General Master Workman, John W. Hayes, Washington, D. C., Chairman; General Worthy Foreman, William A. Denison, Rochester, N. Y.; General Secretary-Treasurer, I. D. Chamberlain, Washington, D. C.; Chris. Hill, Brooklyn, N. Y.; F. W. Bonehill, Rochester, N. Y.

INDUSTRIAL WORKERS OF THE WORLD.

HEADQUARTERS, 164 West Washington St., Chicago, Ill. Wm. D. Haywood, General Secretary-Treasurer; Joseph J. Ettor, Assistant Secretary and General Organizer. Executive Board—F. H. Little, A. C. Christ, M. J. Welsh, Francis Miller, W. E. Mattingly.

PREAMBLE—The working class and the employing class have nothing in common.

Between these two classes a struggle must go on until the workers of the world organize as a class, take possession of the earth and the machinery of production, and abolish the wage system.

We find that the centring of the management of industries into fewer and fewer hands makes the trades unions unable to cope with the ever-growing power of the employing class. The trades unions foster a state of affairs which allows one set of workers to be pitted against another set of workers in the same industry, thereby helping defeat one another in wage wars. Moreover, the trades unions aid the employing class to mislead the workers into the belief that the working class have interests in common with their employers.

These conditions can be changed and the interest of the working class upheld only by an organization formed in such a way that all its members in any one industry, or in all industries, if necessary, cease work whenever a strike or lockout is on in any department thereof, thus making an injury to one an injury to all.

Instead of the conservative motto, "A fair day's wages for a fair day's work," we must inscribe on our banner the revolutionary watchword, "Abolition of the wage system."

It is the historic mission of the working class to do away with capitalism. The army of production must be organized, not only for the every day struggle with capitalists but also to carry on production when capitalism shall have been overthrown. By organizing industrially we are forming the structure of the new society within the shell of the old.

The organization differs from syndicalism in that great stress is laid upon having a form of organization to correspond, cell for cell, tissue for tissue, with capitalist industry itself, and also because it seeks to build a new union on revolutionary lines rather than to attempt to change the present reactionary and out-of-date craft unions. The organization claims to have blended the practical features of socialism, anarchism, and syndicalism, and yet it is distinct from all three.

The I. W. W. is composed of 535 recruiting and industrial unions, having a total membership of 85,000, five national administrations—Hawaiian, Australian, New Zealand, Great Britain, and South African.

Excerpts from Constitution and By-Laws follow:

The Industrial Workers of the World shall be composed of actual wage-workers brought together in an organization embodying thirteen national industrial departments, national industrial unions, local industrial unions, local recruiting unions, industrial councils, and individual members.

The annual convention of the Industrial Workers of the World shall be held on the third Monday of September each year at such place as may be determined by previous convention.

Members-at-large shall pay an initiation fee of $2.00 and $1.00 per month dues and assessments. No working man or woman shall be excluded from membership in local unions because of creed or color.

That to the end of promoting industrial unity and of securing necessary discipline within the organization, the Industrial Workers of the World refuse all alliances, direct or indirect, with existing political parties or anti-political sects.

THE WORKERS' INTERNATIONAL INDUSTRIAL UNION.

HEADQUARTERS, Detroit, Mich. General Secretary-Treasurer, H. Richter, Detroit; General Organizer, Rudolph Katz, Maywood. N. J. General Executive Board—August Gilhaus, New York City; A. Giergin-sky, Hartford, Ct.; Ingvar Paulsen, Roxbury, Mass.; W. A. Peyton, Cincinnati, Ohio; W. Hammerlindl, San Francisco, Cal.

PREAMBLE—The working class and the employing class have nothing in common.

Between these two classes a struggle must go on until the toilers come together on the political field under the banner of a distinct revolutionary political party governed by the workers' class interests, and on the industrial field under the banner of One Great Industrial Union to take and hold all means of production and distribution, and to run them for the benefit of all wealth producers.

The rapid gathering of wealth and the centring of the management of industries into fewer and fewer hands make the trades unions unable to cope with the ever-growing power of the employing class, because the trades unions foster a state of things which allows one set of workers to be pitted against another set of workers in the same industry, thereby helping defeat one another in wage wars. The trades unions aid the employing class to mislead the workers into the belief that the working class have interests in common with their employers.

Excerpts from Constitution and By-Laws follow:

The Workers' International Industrial Union shall be composed of actual wage-workers brought together in an organization embodying thirteen national industrial departments, national industrial unions, local industrial unions, local recruiting unions, industrial councils and individual members.

A national industrial union shall be comprised of the local industrial unions of the various localities in America in a given industry.

The industrial departments shall consist of not less than ten local unions, aggregating a membership of not less than ten thousand members. The industrial departments shall be sub-divided in industrial unions of closely kindred industries in the appropriate organizations for representation in the departmental administration. The departments included are: Department of Mining Industry; Transportation Industry; Metal and Machinery Industry; Glass and Pottery Industry; Food-Stuffs Industry; Brewery, Wine and Distillery Industry; Floricultural, Stock and General Farming Industries; Building Industry; Textile Industries; Leather Industries; Wood Working Industries; Public Service Industries; Miscellaneous Manufacturing.

The annual convention shall be held on the Sunday preceding the Fourth of July of each year at such place as may be determined by previous convention.

Individual members may be admitted to membership-at-large in the organization on payment of 50 cents initiation fee and 25 cents per month dues, together with assessments.

None but actual wage-workers shall be members of the Workers' International Industrial Union. No member of the Workers' International Industrial Union shall be an officer in a pure and simple trade union. No member of one industrial or trade organization in the Workers' International Industrial Union can at the same time hold a card in another industrial or trade organization of this body. No workingman or workingwoman shall be excluded from membership because of creed or color.

STRIKES AND LOCKOUTS IN THE UNITED STATES.

AS TABULATED BY THE UNITED STATES BUREAU OF LABOR STATISTICS.

In the following table an effort has been made to show the principal causes of the strikes tabulated, though this has been difficult in many cases on account of the indefinite character of the information available.

NUMBER OF STRIKES AND LOCKOUTS, BY CAUSES, 1915.

Matter of Dispute.	Strikes.	Lockouts.	Matter of Dispute.	Strikes.	Lockouts.
Increase of wages	286	12	For organizing	....	12
Decrease of wages	90	10	For open or closed shop	20	12
Non-payment of wages	10	1	Discharge of foreman wanted	11	....
Increase of hours	7	....	Because of discharge of union men	60	13
Decrease of hours	67	7	Because of employment of non-union men	40	5
Wages and hours	133	2	Discrimination	8	....
General conditions	35	4	Sympathetic	9	1
Conditions and wages	28	1	Jurisdictional	25	....
Conditions and hours	6	....	Miscellaneous	113	22
Conditions, wages, and hours	11	1	Not reported	208	39
Recognition of the union	37	15			
Recognition and wages	26	1			
Recognition and hours	6	....	Total	1,246	159
Recognition, wages, and hours	10	1			

RESULTS OF STRIKES AND LOCKOUTS, 1915.

Result.	Strikes.	Lockouts.	Result.	Strikes.	Lockouts.	Result.	Strikes.	Lockouts.
Won	164	16	pending arbitration	28	2	Pending	140	31
Compromised	273	30				Not reported	513	63
Lost	128	17						
Employés return'd			Total	593	65	Grand total	1,246	159

As shown in the following table the duration of the strikes that ended in 1915 varied from less than 1 day to 3 years and 9 months, the latter being the strike of federated shopmen on the Harriman lines that was finally called off in June.

DURATION OF STRIKES AND LOCKOUTS.

Duration.	Strikes.	Lockouts.	Duration.	Strikes.	Lockouts.	Duration.	Strikes.	Lockouts.
Less than 1 day	10	....	10 days	18	....	32 to 35 days	12	1
1 day	30	1	11 days	12	....	36 to 42 days	21	4
2 days	43	....	12 days	6	1	43 to 49 days	9	....
3 days	41	1	13 days	13	2	50 to 63 days	20	4
4 days	26	2	14 days	16	1	64 to 77 days	12	2
5 days	29	2	15 to 18 days	16	5	78 to 91 days	13	2
6 days	23	....	19 to 21 days	20	....	92 to 199 days	22	7
7 days	24	3	22 to 24 days	22	3	200 to 1,367 days	15	2
8 days	19	2	25 to 28 days	14	1			
9 days	12	1	29 to 31 days	13	2	Total	531	49

The total duration of these strikes was 18,973 days and of the lockouts 3,075 days, the average duration of the strikes being 36 days and of the lockouts 63 days. If, however, the 37 strikes and 9 lockouts which lasted more than three months are omitted from consideration, the average was 17 days for strikes and 27 days for lockouts.

NUMBER OF STRIKES AND LOCKOUTS BY MONTHS IN WHICH STARTED, 1915.

Month.	Strikes.	Lockouts.	Month.	Strikes.	Lockouts.	Month.	Strikes.	Lockouts.
Pend'g Dec. 31,'14	37	17	June	52	6	December	70	8
January	49	13	July	94	14			
February	45	12	August	137	7	Total	1,104	148
March	72	14	September	146	14	Month not stated	142	11
April	88	16	October	102	7			
May	110	10	November	102	10	Grand total	1,246	159

In the above table only those strikes are counted as pending December 31, 1914, which were actually settled during the year 1915.

In 701 strikes and 144 lockouts the employés were connected with unions; in 117 strikes and 3 lockouts they were non-union employés; in 29 strikes they were non-union at the time of striking, but organized almost immediately after.

NUMBER OF STRIKES IN THE 13 INDUSTRY GROUPS IN WHICH THE LARGEST NUMBER OF STRIKES OCCURRED, 1914 AND 1915.

Industry.	1915.		1914.	Industry.	1915.		1914.
	Strikes.	Lockouts.	Strikes and Lockouts.		Strikes.	Lockouts.	Strikes and Lockouts.
Metal trades	280	41	129	Teaming	28	2	34
Building trades	204	27	275	Furniture	16	4	18
Clothing industries	127	12	78	Theatrical employés	14	5	20
Textile work	77	7	54	Transportation	17	1	52
Mining	65	2	51	Lumber	13	1	40
Baking	30	33	47	Printing and publishing	4	2	30
Iron and steel workers	30	....	34				

NUMBER OF STRIKES IN THE 14 INDIVIDUAL OCCUPATIONS IN WHICH THE LARGEST NUMBER OF STRIKES OCCURRED, 1914 AND 1915.

Occupation.	1915.		1914.	Occupation.	1915.		1914.
	Strikes.	Lockouts.	Strikes and Lockouts.		Strikes.	Lockouts.	Strikes and Lockouts.
Machinists	163	16	44	Teamsters	28	2	30
Bakers	30	33	47	Tailors	26	1	14
Miners, coal	55	2	48	Street-railway employés	22	2	27
Carpenters	42	8	35	Painters	20	4	61
Metal polishers	37	13	26	Sheet-metal workers	21	2	13
Moulders	42	6	27	Electrical workers	20	....	9
Plumbers and steam-fitters	34	9	83	Weavers	19	1	4

The following table shows the number of strikes and lockouts in 1914 and 1915 by States and by sections of the country; on account of their incompleteness the figures for the two years do not admit of close comparison:

NUMBER OF STRIKES BY STATES, 1915.

State.	Strikes.	Lockouts.	State.	Strikes.	Lockouts.	State.	Strikes.	Lockouts.
Alabama	1	2	Maine	6	....	Pennsylvania	148	15
Alaska	....	....	Maryland	11	1	Porto Rico	7	1
Arizona	4	1	Massachusetts	131	7	Rhode Island	22	2
Arkansas	2	1	Michigan	29	3	South Carolina	4	....
California	21	6	Minnesota	11	3	South Dakota	1	....
Colorado	4	....	Mississippi	1	....	Tennessee	4	3
Connecticut	141	8	Missouri	37	4	Texas	9	....
Delaware	14	....	Montana	3	....	Utah	6	....
Dist. of Columbia	1	....	Nebraska	2	....	Vermont	5	1
Florida	....	....	Nevada	....	....	Virginia	9	....
Georgia	9	2	New Hampshire	5	....	Washington	25	5
Idaho	....	....	New Jersey	100	9	West Virginia	23	3
Illinois	52	21	New York	196	22	Wisconsin	15	5
Indiana	21	9	North Carolina	3	....	Wyoming	1	....
Iowa	11	2	North Dakota	1	....	In several States	1	....
Kansas	6	1	Ohio	115	18			
Kentucky	14	1	Oklahoma	5	1	Total	1,246	159
Louisiana	3	1	Oregon	6	1			

The largest number of disputes occurred in the leading manufacturing States, New York, Pennsylvania, Connecticut, Massachusetts, and Ohio, having 801, or considerably more than half the strikes and lockouts shown for 1915.

The following table shows the number of strikes and lockouts in cities in which 10 or more disputes occurred during 1915, with the number of disturbances occurring in the same city for the year 1914. Allowance for incompleteness of data should be made in comparing the two years.

CITIES IN WHICH 10 OR MORE STRIKES OCCURRED IN 1914 AND 1915.

City.	1915.		1914.	City.	1915.		1914.
	Strikes.	Lockouts.	Strikes and Lockouts.		Strikes.	Lockouts.	Strikes and Lockouts.
New York, N. Y.	127	15	74	Hartford, Ct.	15	1	3
Bridgeport, Ct.	51	2	3	New Haven, Ct.	16	....	2
Philadelphia, Pa.	36	6	19	St. Louis, Mo.	14	2	9
Chicago, Ill.	25	15	24	Newark, N. J.	13	2	9
Cleveland, Ohio	32	3	18	Wilmington, Del.	13	....	2
Boston, Mass.	26	3	27	Kansas City, Mo.	11	2	17
Springfield, Mass.	22	1	6	Seattle, Wash.	11	2	5
Worcester, Mass.	20	2	8	Baltimore, Md.	11	1	14
Pittsburgh, Pa.	21	....	20	Wheeling, W. Va.	12	....	1
Toledo, Ohio	16	4	8	Waterbury, Ct.	11	....	1
Detroit, Mich.	16	3	22	Trenton, N. J.	10	1	9
Elizabeth, N. J.	17	....	2	Cincinnati, Ohio	9	2	11
Jersey City, N. J.	16	1	5	Reading, Pa.	9	2	3

At the annual meeting of the American Federation of Labor in November, 1915, a statement was made in regard to the number of strikes occurring during the year preceding the meeting. This statement was made up from reports filed by the individual unions that compose the federation. The total number of these disturbances and their results were as follows:

Result.	1914-15.	1913-14.	Result.	1914-15.	1913-14.
Won	552	543	Lost	119	60
Compromised	115	118			
Pending	218	236	Total	1,004	957

STRIKES AND LOCKOUTS, JANUARY TO JUNE, 1916.

According to data compiled from various sources by the United States Bureau of Labor Statistics, the number of strikes and lockouts during the six months January to June, 1916, inclusive, was 1,719. The number similarly compiled during the first six months of the calendar year 1915 was 487.

STRIKES AND LOCKOUTS IN THE UNITED STATES—*Continued.*

NUMBER OF STRIKES AND LOCKOUTS BEGINNING IN EACH MONTH, JANUARY TO JUNE, 1916, INCLUSIVE.

Kind of Dispute.	January.	February.	March.	April.	May.	June.	Month Not Stated.	Total
Strikes	151	157	215	317	478	201	133	1,652
Lockouts	8	5	8	11	15	12	8	67
Total	159	162	223	328	493	213	141	1,719

The column for June includes disputes that began in that month only. During this month 152 other disputes were reported which either began in preceding months or the date of beginning was not given. These disputes have been placed in the columns in which they belong.

INTERNATIONAL TRADE UNION STATISTICS.

The following table shows the membership of trade unions in the principal trade union countries, according to returns received through various sources. The returns are for the year 1913. Canada trade unionists are estimated to number 150,000. Australia (in 1912) 497,925.

TRADE UNION MEMBERSHIP.

Country.	Total Membership.	Country.	Total Membership.	Country.	Total Membership.
Austria	748,760	Hungary (1912)	97,000	Sweden	97,252
Belgium	202,746	Italy (1912)	971,667	Switzerland (1912)	131,380
Denmark	152,787	Netherlands	220,275	United Kingdom	3,928,191
France	1,026,302	New Zealand	71,544	United States	2,604,701
German Empire	3,835,660	Norway	64,108		

DISTRIBUTION OF THE ANNUAL DISBURSEMENTS OF TRADE UNIONS IN VARIOUS COUNTRIES FOR THE YEAR 1912.

(Source: Supplement 11 to the Reichsarbeitsblatt, pt. 2, pp. 68, 69, Berlin, 1915.)

POPULATION ENGAGED IN INDUSTRIAL OCCUPATIONS.

The following table gives the percentages of total occupied population for the principal groups in the eight leading industrial countries prior to the war:

Occupation Group.	Great Britain.	France.	Germany.	Austria.	Hungary.	Italy.	Belgium.	United States.
Agriculture	12.66	41.42	35.11	60.80	70.15	59.06	21.90	See separate classification below.
Commercial occupations	11.39	6.54	6.30	3.34	2.56	3.43	11 79	
Conveyance of men, goods and messages	8.20	2.89	2.89	1.70	1.55	3.12	2.03	
Mines and quarries	5.00	1.59	3.25	1.56	.78	.89	6.46	
Metals, machines, implements and conveyances	7.89	4.35	6.99	2.78	2.15	2.14	5.95	
Building and works of construction	6.77	4.20	6.99	2.96	1.48	5.02	7.28	
Textile fabrics	6.92	4.55	3.75	3.26	.37	4.81	6.86	
Dress	7.23	8.05	5.39	3.92	2.85	6.64	7.86	

A distinct classification adopted by United States Census Bureau based on 1910 census is as follows: All occupations, 38,167,336 (consisting of 30,091,564 males and 8,075,772 females) with per cent. in parentheses showing distribution of total. Agriculture, forestry, and animal husbandry, 12,659,203 (33.2); extraction of minerals, 964,824 (2.5); manufacturing and mechanical industries, 10,658,881 (27.9); transportation, 2,637,671 (6.9); trade 3,614,670 (9.5); public service (not elsewhere classified), 459,291 (1.2); professional service, 1,663,569 (4.4); domestic and personal service, 3,772,174 (9.9); clerical occupations, 1,737,053 (4.6).

SYNDICALISM.

So diverse are the views on Syndicalism held by Syndicalists and their avowed enemies that a middle course will give a clearer outline of its aims and expectations than would a full statement drawn from the many and conflicting reports available to date.

Syndicalism was born of the growing differences and controversies within labor and trade unions. The first symptoms appeared in France, whence the doctrine soon spread to Italy, to England and thence to America. Syndicalism is antagonistic to government, to existing labor unions and to capital alike, and is even designed to supplant socialism.

Born in the brain of the intellectuals within the great unions, Syndicalism has made a profound impression upon workers within and without the unions in a remarkably short time. The doctrine of Syndicalism demands the turning over of every and all means of production and distribution to the Syndicalist trade unions, to be controlled by said unions so that the workmen will become their own employers, thus securing the whole product for themselves. The first objective aim is to eliminate the present owners, but means to accomplish this vary.

In France the Syndicalists adopt the general "strike," but in a different sense from which strikes are known in America. For instance, the Syndicalists strike not for higher wages. Primarily they aim at the total cessation from all activity, stoppage of mails, lighting, transportation and every activity that now binds society together. They depend upon non-interference or co-operation of the army (in Europe) and upon crippling the power of all established government wherever the army is not a factor. They rely upon the consequent uprising of all society wherever active Syndicalism prevails, and trust to the peaceful reapportionment of all authority and rights to the associated labor and trade unions true to the doctrine of Syndicalism.

The government is regarded as the greatest enemy by the Syndicalists. They claim that corrupt political control makes just economic control impossible. While the objects to be attained seem reasonable enough, the means of accomplishing these objects are dangerously speculative and appear to threaten society with anarchy in its direst form.

Syndicalism demands that social revolution come through labor unions in order to abolish capitalism, whereas Socialists expect to work reform by political agitation through Parliamentary majorities. Syndicalists see the futility of all endeavor to obtain government majorities and hence ignore the government altogether in their propaganda, relying upon the genius of Syndicalism to permeate the mind of the masses sufficiently to sap the strength and power of government opposition and thus obtain all their demands by a bloodless revolution.

Prior to the war France had approximately 600,000 avowed Syndicalists. Agricultural Italy was a veritable hotbed of Syndicalism. Organized farm laborers controlled over 200,000 acres of tillable land, which were farmed on the co-operative plan, and the entire Italian railway system was under the influence of advanced Syndicalism.

At a conference of Syndicalists held in England in November, 1910, 60,000 professed followers attended, since which date their doctrine has spread considerably, especially among the more intelligent of the industrial workers.

Here in America Syndicalism first showed its head during the labor troubles at Lawrence, Mass., under direction of the Industrial Workers of the World. The Syndicalists have also widened and extended the definition of the word labor by including in its comprehension all workers who are actively useful within the community. This includes the physician, teacher, artist, and those engaged in other professions.

UNITED STATES BOARD OF MEDIATION AND CONCILIATION.

Commissioner—William L. Chambers. *Assistant Commissioner*—G. W. W. Hanger. *Members of Board*—William L. Chambers, Martin A. Knapp, and G. W. W. Hanger.

(Created by act of Congress, Approved July 15, 1913.)

The purpose for which the board was established is to settle by mediation, conciliation and arbitration all controversies concerning wages, hours of labor, or conditions of employment that may arise between any common carrier or carriers engaged in the transportation of passengers or property wholly by railroad, or partly by railroad and partly by water, for a continuous carriage or shipment from one State or Territory of the United States or the District of Columbia, to any other State or Territory of the United States or the District of Columbia, or from any place in the United States to an adjacent foreign country, or from any place in the United States through a foreign country to any other place in the United States, and their employés, which includes all persons actually engaged in any capacity in train operation or train service of any description, whether the cars upon or in which they are employed are owned or held and operated by the carrier under lease or other contract.

The Commissioner is appointed by the President for a term of seven years, salary $7,500, and is the executive officer of the board, which consists of the Commissioner and not more than two other officials of the Government, who are designated by the President. The Assistant Commissioner is appointed by the President, salary $5,000 per annum.

Since the organization of the board and up to June 30, 1916, fifty-six controversies between railroads and their employés engaged in train operation have reached the stage where an appeal for the services of the Board of Mediation and Conciliation was made. In all of these cases an adjustment of the controversy was secured by the board, forty-five cases having been settled by mediation alone, while eleven were settled by arbitration.

CHILDREN'S BUREAU.

DEPARTMENT OF LABOR.

HEADQUARTERS, Washington, D. C. Chief of Bureau, Julia C. Lathrop ($5,000); Helen L. Sumner, Assistant Chief ($2,400).

The Children's Bureau was created by an act of April 9, 1912, to investigate and report upon all matters pertaining to the welfare of children and child-life among all classes of our people, and especially to investigate the questions of infant mortality, the birth rate, orphanage, juvenile courts, desertion, dangerous occupations, accidents, and diseased children, employment and legislation affecting children in the several States and Territories.

For the fiscal year beginning July 1, 1916, an appropriation of $164,640 was made by Congress, providing for a staff of seventy-six persons. With this staff and appropriation the organization of the bureau falls into certain divisions, as an industrial division, a social service division, a division on child hygiene, a statistical division, and a library division.

THE ALLIANCE FRANCAISE.

THE Federation of French Alliances in the United States and Canada number 150 groups. The officers of the federation are: *Honorary President*—J. J. Jusserand, French Ambassador. *President*—J. Le Roy White, Baltimore. *Vice-Presidents*—M. Alexander, T. Mason, New York; H. Kirke White, Detroit; G. Desaulniers, Montreal; A. Legallet, San Francisco, Cal.; B. E. Young, Nashville, Tenn. *Secretary*—M. Louis Delamarre. *Treasurer*—M. T. Tileston Wells. Office, 200 Fifth Avenue, New York City.

THE NATIONAL CIVIC FEDERATION.

OFFICE, 1 MADISON AVENUE, NEW YORK.

AN organization of prominent representatives of capital, labor, and the general public formed in 1900 as the direct outgrowth of conventions held in Chicago and New York in 1898-1899. Its purpose is to organize the best brains of the Nation in an educational movement seeking the solution of some of the great problems related to social and industrial progress; to provide for study and discussion of questions of national import; to aid thus in the crystallization of the most enlightened public opinion; and, when desirable, to promote legislation in accordance therewith. National organizations of manufacturers, farmers, wage-earners, bankers, lawyers, economists, scientists, churchmen, merchants, trade and transportation representatives and many other class societies meet frequently to discuss their respective interests. The object of The National Civic Federation, in addition to creating departments to study national problems, is to provide a means by which all these elements of society may come together and consider questions in which they have a common interest.

OFFICERS AND EXECUTIVE COUNCIL.

President, V. Everit Macy; Vice-Presidents, Samuel Gompers, Charles S. Barrett; Treasurer, Isaac N. Seligman; Chairman Executive Council, Ralph M. Easley; Chairman Industrial Economics Department, John Hays Hammond; Chairman Welfare Department, Louis A. Coolidge; Chairman Woman's Department, Miss Maude Wetmore; Chairman Taxation Department, E. Owen, Montgomery, Ala.; Chairman Press and Publication Committee, Mrs. Gilbert Montague, New York City; Chairman By-Laws Committee, Mrs. Lindon W. Bates, New York City.

NATIONAL ASSOCIATION OF MANUFACTURERS.

President, George Pope; *Secretary*, George S. Boudinot; *Assistant Secretary*, W. M. Benney; *Treasurer*, Henry Abbott; *General Manager*, J. Philip Bird. Headquarters, 30 Church Street, New York.

DECLARATION OF LABOR PRINCIPLES.

1. Fair dealing is the fundamental and basic principle on which relations between employés and employers should rest.

2. The National Association of Manufacturers is not opposed to organizations of labor as such, but it is unalterably opposed to boycotts, blacklists and other illegal acts of interference with the personal liberty of employer or employé.

3. No person should be refused employment or in any way discriminated against on account of membership or non-membership in any labor organization, and there should be no discriminating against or interference with any employé who is not a member of a labor organization by members of such organizations.

4. With due regard to contracts, it is the right of the employé to leave his employment whenever he sees fit, and it is the right of the employer to discharge any employé when he sees fit.

5. Employers must be free to employ their work people at wages mutually satisfactory, without interference or dictation on the part of individuals or organizations not directly parties to such contracts.

6. Employers must be unmolested and unhampered in the management of their business in determining the amount and quality of their product, and in the use of any methods or systems of pay which are just and equitable.

7. In the interest of employés and employers of the country, no limitation should be placed upon the opportunities of any person to learn any trade to which he or she may be adapted.

8. The National Association of Manufacturers disapproves absolutely of strikes and lockouts, and favors an equitable adjustment of all differences between employers and employés by any amicable method that will preserve the rights of both parties.

9. Employés have the right to contract for their services in a collective capacity, but any contract that contains a stipulation that employment should be denied to men not parties to the contract is an invasion of the constitutional rights of the American workman, is against public policy, and is in violation of the conspiracy laws. This association declares its unalterable antagonism to the closed shop and insists that the doors of no industry be closed against American workmen because of their membership or non-membership in any labor organization.

10. The National Association of Manufacturers pledges itself to oppose any and all legislation not in accord with the foregoing declaration.

May 6, 1913—In the "Manouba" case between France and Italy.

INTERNATIONAL TRIBUNALS OF EGYPT.

In 1876, as the result of negotiations between the Ottoman and Egyptian Governments and the various Christian powers having representatives at Cairo, certain courts were created in Egypt for the trial of civil and commercial causes arising between natives and foreigners of different nationality, as well as all questions of real estate between any person and suits of foreigners against the Egyptian Government and members of the Khedival family. These mixed tribunals, in civil matters within their exclusive jurisdiction, superseded the consular courts. A mixed tribunal consists of five Judges, three of whom are foreigners and two natives. The foreign Judges are appointed by the Khedive on the recommendation of the great powers, each of which is represented by from one to three Judges. There are three tribunals of original jurisdiction (first instance), one each at Cairo, Alexandria, and Mansura, and a Court of Appeals at Alexandria. The United States is represented in these courts by the following Judges:

Court of Appeals.—Somerville P. Tuck of New York (appointed 1908; appointed to Court of First Instance 1894).

Court of First Instance.—William G. Van Horne of Utah (appointed 1902); Pierre Crabités of Louisiana (appointed 1911).

THE NEW YORK PEACE SOCIETY.

This society was founded in 1815, merged with the American Peace Society in 1828, refounded in 1906 and incorporated in 1910. It has a membership of 1800, with branches in Poughkeepsie, Albany, North Tonawanda, and elsewhere.

Its purpose is "To foster a spirit of justice and good will among the nations, to promote the judicial settlement of international disputes and to support public measures which tend to remove causes of enmity, to unite nations in friendly co-operation and to hasten the coming brotherhood of man."

Both men and women are eligible for membership in the society, and receive free its monthly magazine and tickets to its annual course of lectures.

The officers of the society are: *President*—Andrew Carnegie. *Secretary*—William H. Short. *Treasurer*—Central Trust Company of New York, Forty-second Street branch. Headquarters, 70 Fifth Avenue, New York City.

THE PANAMA CANAL.

THE organization for the completion, maintenance, operation, government and sanitation of the anama Canal and its adjuncts and the government of the Canal Zone consists of the following departments, offices and agencies, and such others as may be established by the Governor of the Panama Canal on the Isthmus or elsewhere with the approval of the President of the United States, all to be under the direction of the Governor, subject to the supervision of the Secretary of War:

Executive Department—Headquarters, Balboa Heights; Gen. George W. Goethals, Governor; C. A. McIlvaine, Executive Secretary; W. P. Copeland, Chief Clerk; C. H. Calhoun, Chief Division of Civil Affairs; Capt. Harry D. Mitchell, Chief Division of Police and Fire; A. R. Lang, Superintendent Division of Schools; Charles R. Williams, District-Attorney, Ancon, Canal Zone.

Department of Operation and Maintenance—Headquarters, Balboa Heights; Lieut.-Col. Chester Harding, Engineer of Maintenance; Lieut.-Col. J. J. Morrow, Corps of Engineers, U. S. A., Assistant to the Engineer of Maintenance; C. J. Embree, Office Engineer; Capt. W. H. Rose, Electrical Engineer; D. E. Wright, Resident Engineer; F. H. Cooke, Designing Engineer; T. B. Mönniche, Engineer of Docks, Cristobal; Capt. T. H. Dillon, Superintendent of Gatun Locks, Gatun; W. G. Comber, Resident Engineer, Paraiso; D. C. Nutting, Jr., Superintendent Mechanical Division, Balboa; Commander H. I. Cone, U. S. N., Marine Superintendent; Lieut. P. P. Bassett, Captain of the Port, Cristobal; Lieut. A. B. Reed, Captain of the Port, Balboa; Board of Local Inspectors, Lieut. P. P. Bassett, Lieut. A. B. Reed, and J. Macfarlane, headquarters Balboa Heights; First Lieut. Creswell Garlington, Assistant Engineer Division of Fortifications; George M. Wells, Resident Engineer Building Division; R. H. Whitehead, Superintendent Pacific Locks, Pedro Miguel; F. D. Wilson, Chief Hydrographer; O. E. Malsbury, Assistant Engineer Section of Surveys; C. C. Snedeker, Supervisor, Coco Solo, Cristobal.

Supply Department—Major W. R. Grove, Chief Quartermaster, Balboa Heights; Capt. F. H. Smith, Assistant Chief Quartermaster; C. H. Mann, Sales Agent, Cristobal; Robert K. Morris, General Manager Commissary Division, Cristobal.

Accounting Department—Headquarters Balboa Heights; H. A. A. Smith, Auditor; T. L. Clear, Collector; John H. McLean, Paymaster; Ad. Faure, Chief Accountant.

Health Department—Lieut.-Col Deane C. Howard, Medical Corps, U. S. A., Chief Health Officer, Balboa Heights; Major Elbert E. Persons, General Inspector, Balboa Heights; Major Albert E. Truby, U. S. A., Superintendent Ancon Hospital; Dr. M. C. Guthrie, Chief Quarantine Officer, Balboa Heights; Capt. H. P. Carter, Health Officer of Panama, Ancon; Capt. D. W. Harmon, Health Officer of Colon, Cristobal.

Washington Office—Major Earl I. Brown, U. S. A., General Purchasing Officer and Chief of Office; Ray L. Smith, Assistant to the Chief of Office; A. L. Flint, Chief Clerk, Purchasing Department.

Panama Railroad Company—Samuel W. Heald, Superintendent, Balboa Heights; William F. Foster, Master of Transportation, Balboa Heights. Office in the United States, No. 24 State Street, New York.

Courts—William H. Jackson, District Judge, Ancon; E. M. Goolsby, Clerk, Ancon; W. H. May, Marshal, Ancon; S. E. Blackburn, Magistrate, Balboa; John W. Thompson, Magistrate, Cristobal.

The Canal has a summit elevation of 85 feet above the sea. It is about 50 miles in length from deep water in the Caribbean Sea to deep water in the Pacific Ocean. The distance from deep water to the shore line in Limon Bay is about 4 1-2 miles, and from the Pacific shore line to deep water is about 4 miles; hence the length of the Canal from shore to shore is approximately 41 1-2 miles. The channel ranges in width from 300 to 1,000 feet. The average bottom width of the channel in this project is 649 feet, and the minimum width is 300 feet. The Canal has a minimum depth of 41 feet. The time required for the passage of a ship of medium size through the entire length of the Canal is estimated at from 9 1-2 to 10 hours, and for larger vessels from 10 1-2 to 11 hours.

The Gatun Dam along the crest is 8,000 feet long, including the spillway, or about 1 1-2 miles, and 2,100 feet wide at its greatest width. The crest of the dam is at an elevation of 115 feet above sea level, or 30 feet above the normal level of Gatun Lake, and 100 feet wide. The width of the dam at the normal water level of the lake, *i. e.*, 85 feet above sea level, is about 388 feet.

The Panama Canal was opened to navigation on August 15, 1914.

The actual construction cost at present estimated for completing the Canal is $325,201,000, which includes $20,053,000 for sanitation and $7,382,000 for civil administration. These figures do not include the $50,000,000 paid to the New French Canal Company and to the Republic of Panama for property and franchises. Hence it is estimated that the total construction cost of the Canal to the United States will approximate $375,000,000.

Appropriations by Congress to March 31, 1916, $379,960,275 (which includes appropriations for other than construction purposes); fortifications, $14,689,873; total credits by United States Treasury to March 31, 1916, $394,650,149.

TRAFFIC FOR FISCAL YEAR ENDED JUNE 30, 1916.

Covering the fiscal year from July 1, 1915, to June 30, 1916, and showing the number of vessels passing through the Canal in each direction:

The number of ocean-going vessels passing through the Canal during the period from July 1, 1915, to June 30, 1916, inclusive, was 787. Their aggregate net tonnage, according to the rules for the measurement of vessels for the Panama Canal, was 2,479,761. The total quantity of cargo carried through the Canal on these ships was 3,140,046 tons. The aggregate of the tolls collected from the ships was $2,399,830.42. The total amount expended on account of the operation and maintenance of the Canal was $6,999,750.15, leaving a deficit in the account of $4,599,919.73. The largest item in the operation and maintenance costs is the charge for dredging, which is slightly over one-half of the total. The dredging in Gaillard Cut cost $3,513,350.06, and the total dredging charge in this account was $3,560,016.04. This is just about twice the charge for the preceding fiscal year, which was $1,769,475.59. The increased cost in this matter was due to the slides on both banks of the Canal north of Gold and Contractor's Hills, which caused the suspension of traffic from the middle of September, 1915, to the middle of April, 1916, and the consequent great falling off in the amount of tolls collected for the year.

The number of ships which passed through the Canal during the fiscal year 1915 (the Canal was opened to commercial traffic for the first time on August 15, 1914) was 1,088. Their aggregate net tonnage was 3,843,035. The cargo they carried through the Canal amounted to 4,969,792 tons. Their tolls amounted to $4,343,383.69, after all refunds had been made.

For convenience the traffic in the two years may be compared in this form:

ITEM	Fiscal Year 1915.	Fiscal Year 1916.	Per Cent. 1916 of 1915.
No. of vessels	1,088	787	72.3
Net tonnage	3,843,035	2,479,761	64.5
Tons of cargo	4,969,792	3,140,046	63.4
Tolls	$4,343,383.69	$2,399,830.42	55.3

The vessels were distributed over the principal trade routes as follows:

THE PANAMA CANAL—*Continued.*

ATLANTIC TO PACIFIC.

	Vessels.	Net Tonnage	Tons of Cargo.
United States, coastwise	2	11,039	18,805
United States to South and Central America	12	43,016	73,329
United States to Far East and Australia	20	94,719	149,089
Atlantic terminus of Canal to South & Central America	19	35,126	23,455
Europe to west coast of South America	3	8,988	9,414
Europe to west coast of North America	2	5,883	9,790
Miscellaneous routings	1	4,869	8,492
Vessels in ballast	11	32,718	....
Total	70	236,358	292,771

PACIFIC TO ATLANTIC.

	Vessels.	Net Tonnage	Tons of Cargo.
United States, coastwise	....	.....	.....
South and Central America to United States	21	77,519	143,752
Far East and Australia to United States	2	10,234	5,559
South and Central America to Atlantic terminus of Canal	19	36,280	28,528
West coast of South America to Europe	5	17,135	27,521
West Coast of North America to Europe	1	3,642	6,596
Miscellaneous routings	2	12,109	13,064
Vessels in ballast	4	6,767	....
Total	54	163,686	225,020

Distances from New York to San Francisco by water, former route, 13,135 miles; via Panama Canal, 5,262 miles. New York to Hawaii, former all-water route, 12,800 miles; by Canal, 7,000 miles. New York to Manila via Hawaii, former route, 17,800 miles; by Canal, 12,000 miles.

The Canal brings Callao 4,320 miles nearer Liverpool by steamer, reducing the distance from 10,230 miles to 5,910 miles and saving about 14 days in time. To Valparaiso the shortening in distance is 1,813 miles, making it 7,185 instead of 8,998, and the saving in time is about 6 days. By its means the United States has an all-sea route, which is from 2,500 to 3,000 miles shorter than routes from Europe. New York, via the Canal, is 3,779 miles from Callao, instead of 9,769 as formerly, while New Orleans is only 3,264 miles from Callao.

Between New York and Yokohama the reduction is 3,729 miles, and that Japanese city is brought nearer to New York than Liverpool by 1,805 miles. Shanghai is 1,629 miles nearer to New York. Sydney, Australia, is 3,806 miles nearer to New York, and the distance between the two cities is 2,382 miles less than the distance between Sydney and Liverpool. Wellington, New Zealand, is 2,542 miles nearer New York, and the distance between them is 2,759 miles less than between Wellington and Liverpool. Between New Zealand and Europe there is an average saving of 1,600 miles.—(From United States Consular Report.)

PANAMA CANAL TOLL RATES.

1. On merchant vessels carrying passengers or cargo, one dollar and twenty cents ($1.20) per net vessel ton—each one hundred (100) cubic feet—of actual earning capacity.

2. On vessels in ballast without passengers or cargo, forty (40) per cent. less than the rate of tolls for vessels with passengers or cargo.

3. Upon naval vessels, other than transports, colliers, hospital ships, and supply ships, fifty (50) cents per displacement ton.

4. Upon Army and Navy transports, colliers, hospital ships and supply ships, one dollar and twenty cents ($1.20) per net ton, the vessels to be measured by the same rules as are employed in determining the net tonnage of merchant vessels.

The Panama Canal Act of 1912, providing for the permanent government of the Canal Zone and other regulations, was amended in a bill signed by the President on June 15, 1914, known as the "Panama Tolls Exemption Repeal Bill," whereby the clause exempting American coastwise vessels from paying tolls was repealed. Full text of the Panama Canal Act of 1912 was printed in the 1914 edition of THE WORLD ALMANAC.

PANAMA CANAL NEUTRAL.

ALL NAVIES OF THE WORLD MAY USE IT DURING WAR.

It is provided by treaties that the Panama Canal, like the Suez Canal, shall remain absolutely neutral. It "shall be free and open to the vessels of commerce and war of all nations and shall never be blockaded, nor shall any right of war be exercised nor any act of hostility be committed within it."

Strict rules of neutrality have been devised for the passage of war vessels of the nations engaged in conflict. The warships will be compelled to pass through with the least possible delay and with only such intermissions as may result from the necessities of the service.

No belligerent may "embark or disembark troops, munitions of war or warlike materials in the Canal, except in the case of accidental hindrance of the transit, and in such case the transit shall be resumed with all possible despatch."

The treaty provides that no warship will have the right to exercise the law of search on a commercial ship in transit through the Canal and the provision likewise protects all ships within three marine miles of either terminal.

Ships carrying contraband either in the Atlantic or Pacific do so at their own risk, but warships may not remain in the three-mile zone longer than twenty-four hours, and the treaty stipulates that "a vessel of one belligerent shall not depart within twenty-four hours from the departure of a vessel of war of the other belligerent."

AMERICAN SCENIC AND HISTORIC PRESERVATION SOCIETY.

The society was founded by Andrew H. Green, incorporated in 1895, and is a National society for the protection of natural scenery, the preservation of historic landmarks and the improvement of cities *President*—Geo. F. Kunz. *Secretary*—Edw. H. Hall, 154 Nassau St., New York. *Treasurer*—N. T. Phillips.

TERRITORIAL EXPANSION OF THE UNITED STATES.

ADDITIONS to the original territory of the Union, include Alaska, Hawaiian and Philippine Islands, Samoa and Guam, in the Pacific, and Porto Rico and Pine Islands, in the West Indies, and the Panama Canal Zone. The area of the original thirteen States (years 1783–1817) comprised 892,135 square miles.

The additions to the territory of the United States subsequent to the peace treaty with Great Britain of 1783 are shown by the following table:

TERRITORIAL EXPANSION OF THE UNITED STATES—*Continued.*

ADDITIONS TO THE TERRITORY OF THE UNITED STATES FROM 1800 TO 1900.

Territorial Division.	Year	Area Added. S. Miles.	Territorial Division.	Year	Area Added. S. Miles.	Territorial Division.	Year	Area Added. S. Miles.
Louisiana purchase..	1803	327,987	Gadsden purchase...	1853	29,670	Addit'nal Philippines	1901	68
Gained through treaty with Spain	1819	13,435	Alaska.....	1867	590,884	Panama Canal Zone.	1904	436
Florida.....	1819	58,666	Hawaiian Islands...	1898	6,449	Total added area.	..	2851,171
Texas	1845	389,166	Porto Rico.....	1898	3,435	Total United States including original 13 States.		3,743,306
Oregon	1846	286,541	Guam	1898	210			
Mexican cession	1848	529,189	Philippine Islands...	1898	114,958			
			Samoa.....	1899	77			

Payments for above were made by the United States as follows: Louisiana purchase, $15,440,000; Gadsden purchase, $10,000,000; Alaska, $7,200,000; Florida, $5,000,000; Hawaiian Islands, public debt assumed to the amount of $4,000,000.

By treaty of February 2, 1848, a payment of $8,250,000 was made to Mexico in consideration of the extension acquired by the boundaries of the United States, as defined in that treaty.

The treaty of Paris, of December 10, 1898, terminating the Spanish-American war, provided for a money payment to Spain (for relinquishing claim to Porto Rico, Guam and Philippine Islands) of $20,000,000, and a subsequent treaty of November 7, 1900, provided for a further payment of $100,000 for other Philippine Islands.

By the first treaty the Philippine Islands were ceded to the United States, and the later treaty of November 7, 1900, ceded certain outlying islands of the Philippines not included in the first cession.

A payment of $10,000,000 was made to the Republic of Panama under treaty stipulations governing the control of the Panama Canal strip.

No money payments were made upon the acquisition of the other Territories mentioned in the list.

The United States did not acquire, by the Isthmian Canal Convention of November 18, 1903, any title to territory in the Republic of Panama, but merely a perpetual right of occupation, use, and control of and over a zone of land ten miles in width. For this privilege it paid to the Republic of Panama the sum of $10,000,000, and undertook to pay the sum of $250,000 annually so long as such occupancy continued, such payments beginning on February 26, 1913.

INSULAR POSSESSIONS OF THE UNITED STATES.

THE PHILIPPINES.

The Philippine Islands, lying off the southern coast of Asia, between Formosa and Borneo, in longitude 116° 40′ and 126° 34′ E., and latitude 4° 40′ and 21° 3′ N., embrace 3,141 islands and islets, of which only 1,668 are named. They are bounded on the north by the China Sea, east by the Pacific Ocean, south by the Celebes Sea and Borneo, west by China Sea. The climate is one of the best in the tropics. The thermometer during July and August rarely goes below 79° or above 85°. The extreme ranges in the year are said to be 61° and 97°, and the annual mean 81°. The total land area is about 115,026 square miles. The two islands, with areas exceeding 10,000 square miles each, are Luzon, 40,969, being about the size of New York, and Mindanao, with 36,292 square miles. The only other islands having areas of over 1,000 square miles are:

Samar.....	5,031	Paragua...	4,027	Cebu.....	1,762
Negros....	4,881	Mindoro...	3,851	Bohol.....	1,441
Panay.....	4,611	Leyte.....	2,722	Masbate...	1,236

There are twenty islands, each having areas between 100 and 1,000 square miles, seventy-three between 10 and 100, and 262 between 1 and 10 square miles, and the remaining 2,775 have areas of less than a square mile each.

POPULATION.

The census of 1903 showed a population of 7,635,426, of whom about 9 per cent., or 647,740 are non-Christians, and nearly seven millions are more or less civilized. The estimated population for 1915 was 8,937,597. Racially the people are principally of Malay stock. The civilized tribes are practically all adherents of the Catholic Church, the religion being introduced into the country by the Spaniards when they took possession of the islands in 1565. The Moros are Mohammedans and the other wild peoples have no recognized religious beliefs. The wild tribes form about 10 per cent. of the entire population.

There are about twenty-five different tribes in the islands speaking some one of nineteen dialects, the most populous tribe being the Visayans, who constitute 47 per cent. of the entire civilized population; second, Tagalogs, 20 per cent.; third, Ilocanos, about 10 per cent.; Bicols, 7 per cent.; Pangasinan, 6 per cent.; Pampangan, 5 per cent.; Cagayan, 3 per cent., and Zambalan, 2 per cent.

The islands with large populations are: Luzon, with 3,798,507 inhabitants, of whom 223,506 are uncivilized; Panay, 743,646 (14,933 uncivilized); Cebu, 592,247 (all civilized); Mindanao, 499,634 (252,940 uncivilized); Negros, 460,776 (21,217 uncivilized); Leyte, 357,641 (all civilized); Bohol, 243,148 (all civilized); Samar, 222,690 (688 uncivilized). The capital of the Archipelago is Manila, with 266,943 inhabitants. Other towns are: In Luzon, Bauan (39,094), Lipa (37,934), Laoag (34,454), Batangas (33,131), San Carlos (27,166), Tabaco (21,946), in Samar, Calbayog (15,895); in Panay, Janiuay (20,738), Miagao (20,656), Iloilo (19,054); in Cebu, Argao (35,448), Cebu (31,079), Barili (31,617), Carcar (31,895), Sibonga (25,848); in Leyte, Baybay (22,990), Ormoc (16,128).

The density of population in the Philippines is about 74 per square mile; that of Java is not less than 595; that of the continental United States is about 31 per square mile. There are about 20,000 Americans and Europeans in the islands, including troops, while the number of Chinese is estimated at 50,000.

EDUCATION.

Education has been practically reorganized by the Americans. The total annual enrolment for the year 1915 is 610,519. The total number of schools is 4,284. Altogether 803 permanent school buildings of all classes have been completed since the beginning of American occupation, representing a total of 4,234 rooms. In August, 1915, 10,502 teachers were employed, of whom 483 were Americans and 10,019 Filipinos. The English language exclusively is taught in the public schools, and emphasis is placed on industrial training.

IN GENERAL.

Vital statistics are confined to Manila, population (1914), 266,943; death rate for the last quarter of 1915 was 23.98 per 1,000, and the birth rate 33.62 per 1,000. Among the American residents, however, the death rate is only 10 to 15 per 1,000.

The assessed real estate property value as of October 1, 1915, was $341,228,755. The reported value of church buildings, mostly Catholic, is $20,849,355. The bonded indebtedness of the Philippine Government, including the bonded indebtedness of the cities of Manila and Cebu, is $16,125,000.

In 1914 there were 73 newspapers and periodicals

published in the islands, 17 being in English, 7 in English and Spanish, 1 in English and native dialects, 1 in English and German, 15 in Spanish, 10 in Spanish and native dialects, 20 in native dialects, and 2 in Chinese.

On December 31, 1914, there were in operation 685 post-offices, free delivery municipal letter-carrier service in 447 municipalities, 302 money-order offices, 439 postal savings banks with 48,876 accounts. Of the 48,876 depositors 41,414 are Filipinos.

The total kilometerage of telegraph and cable lines on December 31, 1914, were 9794.60 and the number of telegraph offices 303. Of the 303 telegraph offices 7 are wireless stations.

There are in operation about 714 miles of railroad, of which about 582 miles are in Luzon, 72 miles in Panay, and 60 miles in Cebu. Manila has an urban and suburban electric railway system operating about 40 miles of line. Already more than 9,400 miles of public roads have been built.

Agriculture.

Although agriculture is the chief occupation of the Filipinos, yet only one-ninth of the surface is under cultivation. The soil is very fertile, and even after deducting the mountainous areas it is probable that the area of cultivation can be very largely extended and that the islands can support a population equal to that of Japan. Out of 800,000 farmers, less than 2,500 operate large farms. The Bureaus of Education and Agriculture through combined effort have in five years more than doubled the production of corn, while the rice crop increased 40 per cent.; the cocoanut industry developed 300 per cent. in eight years, while the exports of sugar and tobacco practically doubled in ten years. Only a small fraction of the land is cultivated.

The chief products are hemp, rice, corn, sugar, tobacco, cocoanuts and cacao, hemp being the most important commercial product and constituting 40 per cent. of the value of all exports.

Imports and Exports.

In the year ended June 30, 1916, the imports of merchandise from the United States into the Philippines were $23,804,367, and the total exports from the Philippines for the same period to the United States were $28,838,526.

The imports of merchandise from foreign countries, year ended June 30, 1916, were $22,169,258, and the exports were $32,625,505. The principal foreign countries trading with the Philippines are Great Britain, France, French East Indies, China, Japan, and Spain.

Civil Government of the Philippines.

Under the Act of Congress approved July 1, 1902, the Governor-General and members of the Upper House of the Legislature, the Philippine Commission, were appointed by the President. Wm. H. Taft, the first Governor-General, was succeeded by Luke E. Wright in December, 1903, by Henry Clay Ide in 1905, James F. Smith in 1906, W. Cameron Forbes in 1909, and Francis Burton Harrison in 1913. At first there were 8 and later 9 members of the commission, 5 Americans and 3 Filipinos; members of the commission were secretaries of the four executive departments—Interior, Finance and Justice, Commerce and Police, and Public Instruction. In 1907 the elective Assembly was established, forming the Lower House of the Legislature, its authority being limited to the so-called civilized provinces, of which there are 38, each with a Governor, Treasurer and Prosecuting Attorney or fiscal, who are elected for terms of four years. The judiciary consists of the Supreme Court, with seven Judges; Courts of First Instance and Justice of the Peace Courts. The Philippine Constabulary, which is distributed throughout the Archipelago in 125 stations, consists of 341 officers and 4,972 enlisted men.

Of the laws recently enacted by the Legislature may be mentioned that authorizing the Governor-General to purchase the Manila Railroad, that creating the Philippine National Bank, and a general revision of administrative legislation under the title "Administrative Code of the Philippine Islands."

By the Act of Congress approved August 29, 1916, the Philippine Commission is abolished, there being substituted as the Upper House of the Legislature a Senate composed of 24 members, and instead of the Assembly, a House of Representatives of 90 members, all of whom are to be elected at triennial elections, excepting two Senators and nine Representatives who are to be appointed by the Governor-General to represent the non-Christian provinces. This act generally enlarges the powers of the Insular Government, and embodies as a preamble the following statement:

Whereas, It was never the intention of the people of the United States in the incipiency of the war with Spain to make it a war of conquest or for territorial aggrandizement; and

Whereas, It is, as it has always been, the purpose of the people of the United States to withdraw their sovereignty over the Philippine Islands and to recognize their independence as soon as a stable government can be established therein; and

Whereas, For the speedy accomplishment of such purpose it is desirable to place in the hands of the people of the Philippines as large a control of their domestic affairs as can be given them without, in the mean time, impairing the exercise of the rights of sovereignty by the people of the United States, in order that, by the use and exercise of popular franchise and governmental powers, they may be the better prepared to fully assume the responsibilities and enjoy all the privileges of complete independence.

PORTO RICO.

The island of Porto Rico, over which the flag of the United States was raised in token of formal possession on October 18, 1898, is the most eastern of the Greater Antilles in the West Indies and is separated on the east from the Danish island of St. Thomas by a distance of about fifty miles, and from Hayti on the west by the Mona passage, seventy miles wide. Distances from San Juan, the capital, to important points are as follows: New York, 1,411 miles; Charleston, S. C., 1,200 miles; Key West, Fla., 1,050 miles; Havana, 1,000 miles.

The island is a parallelogram in general outline, 108 miles from the east to the west, and from 37 to 43 miles across, the area being about 3,604 square miles, or somewhat less than half that of the State of New Jersey (Delaware has 2,050 square miles and Connecticut 4,990 square miles). The population according to an enumeration made by the United States Government in 1900 was 953,243, of whom 589,426 were white and 363,817 colored. The density was 260 to the square mile in 1900; 83.2 per cent. of the population could not read. The population in 1915 is reported as 1,198,970.

Porto Rico is unusually fertile, and its dominant industries are agriculture and lumbering. In elevated regions the vegetation of the temperate zone is not unknown. There are more than 500 varieties of trees found in the forests, and the plains are full of palm, orange, and other trees. The principal crops are sugar, coffee, tobacco, and maize, but oranges, bananas, rice, pineapples, and many other fruits are important products. The largest article of export from Porto Rico is sugar. The next is tobacco. Other exports in order of amount are coffee, fruits, molasses, cattle, timber, and hides.

The principal minerals found in Porto Rico are gold, carbonates, and sulphides of copper and magnetic oxide of iron in large quantities. Lignite is found at Utuado and Moca, and also yellow amber. A large variety of marbles, limestones, and other building stones are deposited on the island, but these resources are very undeveloped. There are salt works at Guanica and Salina on the south coast, and at Cape Rojo on the west, and these constitute the principal mineral industry in Porto Rico.

The principal cities are Mayaguez, with 16,939, Ponce, 35,027 inhabitants; and San Juan, the capital, with 48,716. The shipments of domestic merchandise from the United States to Porto Rico, year ended June 30, 1916, were $34,927,311. The exports of domestic merchandise to the United States were $60,906,453. The foreign trade, year ended June 30, 1916, was: Imports, $3,058,400; exports, $5,883,589. Exports of sugar to United States in year ended June 30, 1916, $45,799,299.

An act providing for a civil government for Porto Rico was passed by the Fifty-sixth Congress and received the assent of the President April 12, 1900. A statement of its provisions was printed in THE WORLD

PORTO RICO—*Continued.*

ALMANAC for 1901, pages 92 and 93. President Roosevelt in his message to Congress in December, 1906, recommended the granting of United States citizenship to the Porto Ricans, and bills were introduced in the Sixty-second and Sixty-third Congresses providing for citizenship and revision of the organic act, but they failed to reach a final vote. In the first session of the Sixty-fourth Congress a new organic act for Porto Rico was passed by the House of Representatives, and on May 23, 1916, the bill was passed, giving the Porto Rican Government all its internal revenue regardless of whether the goods on which it is paid are used in Porto Rico or this country. Heretofore revenues on goods used in the United States have gone to the Federal treasury. Property and educational qualifications are provided for applicants for citizenship.

Under the act of 1900, there are two legislative chambers, the Executive Council, or "Upper House," composed of the Government Secretary, Attorney-General, Treasurer, Auditor, Commissioner of the Interior, and Commissioner of Education, and five citizens appointed by the President, and the House of Delegates, or "Lower House," consisting of 35 members, elected by the people. The island is represented in the Congress of the United States by a Resident Commissioner.

The Legislature in 1914 authorized the issue of bonds in the amount of $1,000,000 for the construction of public improvements and a further issue of bonds in the sum of $150,000 for additional work on the irrigation systems, and provided for secondary railroads subventioned by the Government of Porto Rico.

In 1915 it made women eligible for membership on school boards, designated a Mothers' Day, established a system of juvenile courts, authorized the sale to laborers of certain public lands; granted to former owners of real property sold for taxes subsequent to July 1, 1901, or to any one interested therein, the right of redemption and provided for the protection of Porto Rican cigars from fraudulent misrepresentation.

GUAM.

The island of Guam, the largest of the Mariana Archipelago, was ceded by Spain to the United States by article 2 of the Treaty of Peace, concluded at Paris, December 10, 1898. It lies in a direct line from San Francisco to the southern part of the Philippines, and is 5,044 miles from San Francisco and 1,506 miles from Manila. It is about 30 miles long and 100 miles in circumference, and has a population of 12,517. The inhabitants are mostly immigrants or descendants of immigrants from the Philippines, the original race of the Mariana Islands being nearly extinct. The prevailing language is English. Spanish and Chamorro are also spoken. Nine-tenths of the islanders can read and write. The island is thickly wooded, well watered, and fertile, and possesses an excellent harbor. The productions are tropical fruits, cacao, rice, corn, tobacco, and sugar cane. The island of Guam was discovered by Hernando de Magallanes on March 6, 1521.

The island was captured by the U. S. S. Charleston, Capt. Henry Glass commanding, June 21, 1898, the American flag raised over Fort Santa Cruz, and a salute fired. Later the island was made a naval station, and Commander E. D. Taussig, of the U. S. S. Bennington, took possession February 1, 1899. The Governor is a naval officer, and the island has a marine garrison as well as a station ship.

TUTUILA (AMERICAN SAMOA).

Tutuila, the Samoan island which, with its attendant islets of Manu'a, Olosega, Ofu, Aunuu and Rose, became a possession of the United States by virtue of the tripartite treaty with Great Britain and Germany in 1899, covers, according to the Bureau of Statistics of the Department of Commerce, fifty-five square miles, and has (by census of February 1, 1912) 7,251 inhabitants. It possesses the most valuable island harbor, Pago-Pago, in the South Pacific, and perhaps in the entire Pacific Ocean. Commercially the island is unimportant at present, but is extremely valuable in its relations to the commerce of any nation desiring to cultivate trans-Pacific commerce.

Ex-Chief Justice Chambers, of Samoa, says of Pago-Pago that "The harbor could hold the entire naval force of the United States, and is so perfectly arranged that only two vessels can enter at the same time. The coaling station, being surrounded by high bluffs, cannot be reached by shells from outside." Capacity of coaling station, 4,200 tons.

The Samoan Islands, in the South Pacific, are fourteen in number and lie in a direct line drawn from San Francisco to Auckland, New Zealand. Tutuila is 4,160 miles from San Francisco, 2,263 miles from Hawaii, 1,580 miles from Auckland, 2,354 miles from Sydney, and 4,200 miles from Manila. The inhabitants are native Polynesians and Christians of different denominations.

The civil government is administered by a Governor, a naval officer nominated by the Navy Department and appointed by the President. All civil affairs are under the jurisdiction of the Navy Department.

WAKE AND OTHER ISLANDS.

The United States flag was hoisted over Wake Island on July 4, 1898, by Gen. F. V. Greene, commanding Second Detachment Philippine expedition. It is a small island in the direct route from Hawaii to Hongkong, about 2,000 miles from the first and 3,000 miles from the second.

The United States possesses a number of scattered small islands in the Pacific Ocean, some hardly more than rocks or coral reefs, over which the flag has been hoisted from time to time. They are of little present value and mostly uninhabited. The largest are Christmas, Gallego, Starbuck, Penrhyn, Phœnix, Palmyra, Howland, Baker, Johnston, Gardner, Midway, Morell, and Marcus Islands. The Midway Islands are occupied by a colony of telegraphers in charge of the relay in the cable line connecting the Philippines with the United States, in all about forty persons.

The Santa Barbara group is a part of California and the Aleutian chain, extending from the peninsula of Kamchatka in Asiatic Russia to the promontory in North America which separates Bering Sea from the North Pacific, a part of Alaska.

HAWAII.

HAWAII was annexed to the United States by joint resolution of Congress July 7, 1898. A bill to create Hawaii a Territory of the United States was passed by Congress and approved April 30, 1900.

The area of the several islands of the Hawaiian group is as follows: Hawaii, 4,210 square miles; Maui, 760; Oahu, 600; Kauai, 590; Molokai, 270; Lanai, 150; Niihau, 97; Kahoolawe, 63. Total, 6,740 square miles.

At the time of the discovery of the islands by Captain Cook in 1778 the native population was about 200,000. This has steadily decreased, so that at the census of 1910 the native born numbered but 98,157. Total foreign born (1910), 93,752.

The first United States census of the islands was taken in 1900 with the following result: Hawaii Island, 46,843; Kauai Island, 20,562; Niihau Island, 172; Maui Island, 25,416; Molokai Island and Lanai Island, 2,504; Oahu Island, 58,504. Total of the Territory, 154,001. The population of the City of Honolulu was

HAWAII—*Continued.*

39,306. The population of Hawaii according to the 1910 census, made by the United States Census Bureau, was 191,909, Honolulu City having a population of 52,183. Estimated population in 1916 (by Territorial Board of Health), 237,623.

POPULATION OF HAWAII, BY ISLANDS, 1910.

Hawaii	55,382	Lanai	131	Molokai	1,791
Kahoolawe	2	Maui	28,623	Niihau	208
Kauai	23,744	Midway	35	Oahu	81,993

BY COLOR OR RACE.

Hawaiian	26,041	Spanish	1,900	Black	158
Caucasian Hawaiian	8,772	Other Caucasian	14,867	Mulatto	537
Asiatic Hawaiian	3,734	Chinese	21,674	All other	2,736
Portuguese	22,303	Japanese	79,674		
Porto Rican	4,890	Korean	4,533		

The exports of domestic merchandise from Hawaii to the United States in the twelve months ended June 30, 1916, were valued at $64,445,631. The imports into Hawaii from the United States for the same period were valued at $28,029,681. Exports of sugar from Hawaii in year ended June 30, 1916, was $54,409,380.

The value of imports and exports for the fiscal year ended June 30, 1916, aggregated $98,769,062, the imports valued at $34,098,210, and exports $64,670,852. (The imports from the United States have doubled during the last eight years.) The exports of pineapples have increased 8 1-2 times, or from about $800,000 to about $6,389,705 during the last seven years. The customs receipts were $1,161,051.

The Territorial bonded indebtedness was $8,024,000, or 3.87 per cent. of the assessed value of property, which is $206,970,229.

Bank deposits aggregated $26,379,249, of which commercial deposits were $17,317,339 and savings deposits $9,061,910.

There are 93 post-offices. There are powerful wireless stations for transmitting and receiving messages to and from San Francisco and Japan and with vessels at sea.

The number of schools is 223. There are 1,128 teachers, and the number of pupils has increased during the 16 years of Territorial government from 15,537 to 37,946. This is exclusive of 112 Japanese schools, given over to the teaching of the Japanese language and other Japanese ethics not included in the curriculum of the public schools. The attendance at these schools for the year 1915 was 11,216.

The Hawaiian Department, U. S. A., is the largest military department of the United States, while the Naval Station at Pearl Harbor is one of the most important naval depots and promises to eventually become the largest.

The new Territorial Government was inaugurated at Honolulu June 14, 1900, and the first Territorial Legislature began its sessions at Honolulu February 20, 1901. The Legislature is composed of two Houses—the Senate of fifteen members, holding office four years, and the House of Representatives of thirty members, holding office two years. The Legislature meets biennially, and sessions are limited to sixty days.

The executive power is lodged in a Governor, a Secretary, both appointed by the President, and hold office four years, and the following officials appointed by the Governor, by and with the consent of the Senate of Hawaii. An Attorney-General, Treasurer, Commissioner of Public Lands, Commissioner of Agriculture and Forestry, Superintendent of Public Works, Superintendent of Public Instruction, Auditor and Deputy, Surveyor, High Sheriff, and members of the Boards of Health, Public Instruction, Prison Inspectors, etc. They hold office for four years, and must be citizens of Hawaii.

The Territorial Courts comprise a Supreme Court of three members, five Circuit Courts, of which one has three members, who sit separately, and the others one member each, and 29 District Courts. The Supreme Court and Circuit Court Judges are appointed by the President, and the District Magistrates by the Governor of Hawaii. The Circuit Courts are the courts of general original jurisdiction. They try law, equity, probate, and divorce cases. The First Circuit Court acts also as a court of land registration. The Circuit and District Courts act also as Juvenile Courts. The Territory is a Federal Judicial District, with two District Judges, District-Attorney, and Marshal, all appointed by the President. The District Judges have all the powers of a Circuit Judge.

The Territory is represented in Congress by a delegate, who is elected biennially by the people.

Provision is made in the act creating the Territory for the residence of Chinese in the Territory, and prohibition as laborers to enter the United States.

CUBA.

THE island of Cuba is 760 miles long, and its width varies from about 25 miles to 100 miles. Its area comprises 45,881 square miles, or about that of Pennsylvania. It has numerous safe and commodious harbors, that of Havana being one of the largest and finest in the world. Measuring from points of nearest approach to its neighbors, Cuba is about 100 miles from Key West, Fla., north; 54 miles from Hayti, east; 130 miles from Yucatan, west, and 85 miles from Jamaica, south. There are 2,360 miles of railway lines and 200 miles of electric railways.

The two principal agricultural staples of the island are sugar and tobacco. It also produces in considerable quantities fruits, vegetables, timber and metals, mainly iron, manganese and copper ore, and is adapted to coffee and cotton raising. The ground has no rival for fertility, and when duly cultivated gives marvellous results. The sugar cane when planted in superior ground is cut during 50 years without being planted again. Cuba is superior to the rest of the tropical lands, with the possible exception of Porto Rico. The whole land is mantled with rich soils, fertile calcareous loams, which, under constant humidity, yield in abundance every form of useful vegetation of the tropical and temperate climes. It has 1,246 miles of shaded roads and highways. The average fluctuation of the temperature is 12 degrees. The average in January is 70.3; July, 82.4; extremes, 60 to 92. Value of farms, plantations, etc., $120,000,000; tobacco crop, calculated at $32,000,000, and although there are but few plantations, oranges, grapefruit, etc., produce annually $10,000,000, while pineapples, cocoa, molasses, asphalt, iron, nickel, mahogany, cedar, etc., produce $10,000,000 also. Cuba's annual sugar crop exceeds $130,000,000.

The Government is republican in form. The President, who is chosen by popular suffrage, serves four years and appoints his own Cabinet. The Congress consists of a Senate and House of Representatives, one Representative being chosen for every 25,000 inhabitants, as nearly as possible. The provinces, of which there are six, corresponding to the American States, elect their own Governors and control their own internal affairs.

POPULATION.

Population of Cuba in 1915, 2,511,098; provinces, as follows:

Pinar del Rio	262,996	Santa Clara	580,138
Habana	659,818	Camaguey	159,026
Matanzas	272,681	Oriente	576,439

CUBA—*Continued.*

Population of cities as follows:

Pinar del Rio	13,138	Santa Clara	16,702
San Antonio de los Baños	10,236	Trinidad	12,567
Habana	312,370	Camagüey	33,605
Matanzas	36,009	Guantánamo	12,673
Cienfuegos	34,546	Holguin	10,569
Sancti Spiritus	15,091	Manzanillo	20,343
Sagua la Grande	17,426	Santiago de Cuba	48,609

FOREIGN TRADE, 1914-15.

According to the latest statistics published by the Cuban Treasury Department, the trade for the fiscal year ended June 30, 1915, amounted to $347,579,000, of which $128,132,000 represented imports and $219,447,000 exports. Compared with the figures for the preceding year, there was a decline of $5,876,000 in imports and an increase of $48,450,000 in exports. Of the imports in 1914-15, $78,972,000 worth came from the United States, $14,098,000 worth from England, $10,227,000 worth from Spain, $4,240,000 worth from France, $3,023,000 worth from British India, $2,428,000 worth from Porto Rico, $2,219,000 worth from Germany, and $2,187,000 worth from Norway. The principal countries of destination and the amounts purchased were as follows: United States, $185,995,000; England, $24,218,000; Spain, $2,911,000; Canada, $1,416,000. The returns show a big decrease in the trade with Germany and notable increases in the trade with the Scandinavian countries and the Netherlands.

THE CUBAN GOVERNMENT.

President (Salary, $25,000) ..... GEN. MARIO G. MENOCAL
Vice-President ..... ENRIQUE JOSE VARONA

CABINET.

Secretary of State—Dr. Pablo Desvernine.
Secretary of the Treasury—Leopoldo Cancio y Luna.
Secretary of Government—Aurelio Hevia.
Secretary of Justice—Cristobal de la Guardia.
Secretary of Public Works—José Ramón Villalón.
Sec'y of Agriculture, Commerce and Labor—Emilio Núñez.
Secretary of Public Instruction and Fine Arts—Ezequiel García Enseñat.
Secretary of Health and Charities—Enrique Núñez.
Secretary of the Presidency—Dr. Rafael Montoro.

LEGISLATIVE.

President of the Senate—Dr. Eugenio Sanchéz Agramonte.
President (Speaker) of the House of Representatives—Dr. Orestes Ferrara.

The Isle of Pines, which under the generally accepted survey is supposed to have an area of 614.34 square marine miles, or about 521,381 acres, is situated off the south coast of Western Cuba, its nearest point to the larger island being about 34 1-2 statute miles distant, while the island itself and its adjacent keys form the southern barrier of the Gulf of Batabano, a bight which extends northward to an extent sufficient to make Habana Province, to which the Isle of Pines is officially attached, the narrowest part of Cuba. The Isle of Pines is practically the only land southward of Cuba to Panama, from which it is distant about 850 miles; it is 230 miles almost due east of Cape Cartuche, Yucatan, and 370 miles northwest of the island of Jamaica.

UNITED STATES BUREAU OF WAR RISK INSURANCE.

(William C. De Lanoy, Director (Salary, $5,000); J. B. B. Parker, Assistant Director. Headquarters, Treasury Department, Washington, D. C.)

THE Bureau of War Risk Insurance was created by Act of Congress on September 2, 1914, to cover American vessels and their cargoes against the risks of war. It was to expire September 2, 1916, but on August 11, 1916, was extended for a further period of one year.

During the two years of this bureau's existence it has covered war risk insurance on many vessels and cargoes where the market was small; and without the assistance which was granted by the bureau many of these vessels could not have sailed.

From September 2, 1914, to August 3, 1916, the bureau issued 1,543 policies, insuring ships and cargoes of a value of $139,113,737, for which the Government received in premiums $2,924,315.20, with a known loss to date of only $771,329.57, reduced through salvage by the sum of $58,811.42, reducing the net loss to $712,518.15.

The expenses attending the conduct of the bureau up to July 3, 1916, a period of 22 months, has been $33,582.47.

The bureau has a list of ports to which the rates are not made public but may be had upon application to the bureau. The published schedule of rates is as follows:

Rates—Rates from any ports in the United States to any ports in the world (other than those named in the special list), or *vice versa*, are on steam vessels as follows:

Cargo, Freight, and Advances—1. Between ports of the United States or its possessions, or between non-belligerent ports in the Western Hemisphere, or between the west coast of the United States and Japan or China, 5 cents per $100.

2. Between United States ports and belligerent ports in the Western Hemisphere, 10 cents per $100.

3. Between United States ports and non-belligerent ports other than above not north of Havre in Europe nor east of Sicily in the Mediterranean, 1-2 per cent.

4. To ports in the Far East via Suez, 5-8 per cent.

5. To all other ports, 3-8 per cent.

Vessel (Voyage Risks)—By voyage, meaning from port of loading to not more than two ports of discharge.

1. Between ports of the United States or its possessions, or between non-belligerent ports in the Western Hemisphere, or between the west coast of the United States and Japan or China, 5 cents per $100.

2. Between United States ports and belligerent ports in the Western Hemisphere, 10 cents per $100.

3. Between United States ports and non-belligerent ports other than above not north of Havre in Europe nor east of Sicily in the Mediterranean, 1-2 per cent.

4. To ports in the Far East via Suez, 5-8 per cent.

5. To all other ports, 3-8 per cent.

Vessel (Time)—Time policies to be issued for a period of 90 days only; rate, 1 1-4 per cent.

If warranted to use only ports in the Western Hemisphere, 1-2 per cent.

If warranted to use only non-belligerent ports in the Western Hemisphere, 1-4 per cent.

All rates subject to change without notice and effective from the date thereof. Rates for sailing vessels to be advised in each case.

NATIONAL PARKS IN THE UNITED STATES.

THE National parks and reservations mentioned below are under the supervision of the Secretary of the Interior. Congress, by act of August 25, 1916, created a National Park Service, and placed the administration of the National parks and monuments under the Department of the Interior in charge of a director of such service. General information, the annual administrative reports, copies of the rules and regulations, and compilations of the laws relating to the parks may be obtained from the Secretary of the Interior or from the supervisors of the parks.

YELLOWSTONE NATIONAL PARK is in Wyoming, Montana, and Idaho, and has an area of 2,142,720 acres. The supervisor's address is Yellowstone Park, Wyoming. The park can be reached by the following railroads: Northern Pacific Railroad to Gardiner, the northern entrance, via Livingston, Mont.; Oregon Short Line Railroad to Yellowstone, Mont., the western entrance; Chicago, Burlington and Quincy Railroad to Cody, Wyo., from which the eastern entrance of the park is accessible. Stage and private transportation connections for the reservation are made at all these points. The tourist season extends from June 1 to September 15.

YOSEMITE NATIONAL PARK, CALIFORNIA, including the Yosemite Valley and Mariposa Big Tree Grove, embraces an area of 719,622 acres. The supervisor's address is Yosemite, Cal. The park can be reached from Merced on the Atchison, Topeka and Santa Fé and the Southern Pacific Railroads by way of Yosemite Valley Railroad, which runs to the western boundary, and by connections of the same roads to Raymond, on the southwest; stage lines run from the terminus of the Yosemite Valley Railroad and from Raymond to Yosemite Valley within the park. The tourist season extends from May 1 to November 1, but the park is accessible and hotel accommodations are furnished the entire year.

GLACIER NATIONAL PARK, MONTANA, has an area of approximately 915,000 acres, of which 15,000 acres have been surveyed. Within the limits stated there are 250 lakes, ranging from 10 miles to a few hundred feet in extent. There are about 80 glaciers between 5 square miles and a few acres in area. There are wild animals, plants, and rocks in number and quantity to satisfy the most ardent student, and views of great variety, beauty and grandeur to gratify the artist and the lover of nature. The address of the supervisor is Belton, Mont. The park can be reached via the Great Northern Railway. The tourist season extends from May 1 to about September 15.

MOUNT RAINIER NATIONAL PARK, WASHINGTON, has an area of 207,360 acres. The supervisor's address is Ashford, Wash., The park is reached by stage or private transportation from Ashford, Wash., on the Tacoma Eastern Railroad, and by trail from Fairfax, on the Northern Pacific Railroad. The tourist season extends from June 15 to September 15.

SEQUOIA NATIONAL PARK, CALIFORNIA, has an area of 161,597 acres. The address of the supervisor is Three Rivers, Cal. This park may be reached from Visalia, on the Southern Pacific and the Atchison, Topeka and Santa Fé Railroads by way of the Visalia Electric Railroad Company to Lemon Cove, thence by stage or private conveyance to the Giant Forest within the park, or by private conveyance from Visalia via Lemon Cove.

GENERAL GRANT NATIONAL PARK, CALIFORNIA, has an area of 2,536 acres. This reservation is administered jointly with Sequoia National Park, and the tourist season extends from June 1 to September 15. The address of the supervisor is given above. The park may be reached from Sanger, on the Southern Pacific Railroad, thence by auto stage or private conveyance, a distance of 46 miles to the park, also from Cuttler Station on the Atchison, Topeka and Santa Fé Railroad, thence 39 miles by stage or private conveyance by way of Orosi and Badger to the park.

CRATER LAKE NATIONAL PARK, OREGON, has an area of 159,360 acres. The address of the supervisor during the tourist months (June 15 to September 30) is Crater Lake, Ore., and during the balance of the year Klamath Falls, Ore. This park may be reached by stage or automobile from Klamath Falls, Medford, Chiloquin, or Ashland, Ore., on the Southern Pacific Railroad.

WIND CAVE NATIONAL PARK, SOUTH DAKOTA, contains 10,522 acres. The supervisor's address is Wind Cave, S. Dak. This park may be reached by private conveyances from Hot Springs, on the Chicago, Burlington and Quincy and the Chicago and Northwestern Railroads, or by similar conveyance from Custer, on the Chicago, Burlington and Quincy Railroad. The reservation is open to tourists the entire year.

SULLYS HILL PARK, NORTH DAKOTA, on the shore of Devils Lake, has an area of 780 acres. The address of the supervisor is Fort Totten, N. Dak. Devils Lake, Narrows, and Tokio, on the Great Northern Railroad, are close to the park, and from these points the reservation can be approached by wagon or by boat (private conveyance).

PLATT NATIONAL PARK, AT SULPHUR, OKLAHOMA, has an area of 848.22 acres. Sulphur is the post-office address of the supervisor. The town is accessible by the Atchison, Topeka and Santa Fé and the St. Louis and San Francisco Railroads. The park, which is open to tourists the entire year, is within walking or riding distance of the railroads.

MESA VERDE NATIONAL PARK, COLORADO, under the organic act approved June 29, 1906, contained an area of 42,376 acres, and the 5-mile strip under the park jurisdiction for the protection of ruins, provided for by the act, abutting the park, contained 175,360 acres. The 5-mile strip was eliminated from park supervision by the act of June 30, 1913, and the boundaries of the park proper were changed so as to make the present aggregate area 76.51 square miles, or 48,966.4 acres. The address of the supervisor is Mancos, Col., the nearest railroad station, on the Rio Grande Southern Railroad. This station is about 25 miles from the ruins, which may be reached only by horseback or on foot. The tourist season extends from May 1 to September 30.

CASA GRANDE RUIN, ARIZONA, a reservation; has an area of 480 acres. The nearest railroad station is Casa Grande, on the Southern Pacific Railroad. It may also be reached by private conveyance from Florence, Ariz., on the Phoenix and Eastern Railroad. The address of the custodian is Florence.

The Mesa Verde National Park and the Casa Grande Reservation were set aside to protect the instructive prehistoric ruins and other objects of antiquity which they contain. These ruins are being excavated and repaired and are open for the inspection of visitors. Reports on the repair of such ruins have been issued by the Department of the Interior, and more detailed accounts are distributed by the Bureau of American Ethnology, Smithsonian Institution.

ROCKY MOUNTAIN NATIONAL PARK, created by the act of January 26, 1915, is in Colorado, about 45 miles in an air line northwest of Denver. It has an area of approximately 229,000 acres, and is on both sides of the Continental Divide in the neighborhood of Longs Peak. The park may be reached from Lyons, on the Chicago, Burlington and Quincy Railroad; from Loveland, on the Colorado and Southern Railroad; and from Granby, on the Denver and Salt Lake Railroad.

LASSEN VOLCANIC NATIONAL PARK, CALIFORNIA, created by act of August 8, 1916, has an area of 82,880 acres, and contains Lassen Peak, 10,437 feet elevation, still exhibiting some volcanic activity; the remarkable Cinder Cone, 6,907 feet elevation, erupted a few hundred years ago; many hot springs and mud geysers, seven lakes and many interesting ice caves and lakes of volcanic glass. The park may be reached from Red Bluff, Susanville, or Westwood, on the Southern Pacific Railway, and from Keddie, on the Western Pacific Railway. No appropriation has yet been made for administration of this park.

HAWAII NATIONAL PARK, TERRITORY OF HAWAII, created by act of August 1, 1916, contains three celebrated Hawaiian volcanoes—Kilauea, Mauna Loa, and Haleakala, wholly unique of their kind, the most

NATIONAL PARKS IN THE UNITED STATES—*Continued.*

famous in the world of science, and the most continuously, variously and harmlessly active volcanoes on earth. It also contains a wonderful lake of lava and magnificent tropical forests. No appropriation has yet been made for administration of this park.

HOT SPRINGS RESERVATION, ARKANSAS (the permanent reservation), has an area of 911.63 acres. Eleven bathhouses on the reservation and twelve in the City of Hot Springs, as well as several hotels operated in connection with bathhouses, receive hot water from the springs, under lease with the Secretary of the Interior. The address of the supervisor is Hot Springs, Ark.

PRESERVATION OF AMERICAN ANTIQUITIES—Under the Act of Congress approved June 8, 1906, interdepartmental regulations governing the excavation, appropriation, etc., of prehistoric ruins or objects of antiquity have been promulgated by the Secretaries of the Interior, Agriculture, and War. Applications for permits to make excavations on the public lands, Indian reservations, or the national monuments named below should be addressed to the Secretary of the Interior. The following have been preserved from entry and set aside as national monuments: Devils Tower, Wyoming; Montezuma Castle, Arizona; Petrified Forest, Arizona; El Morro, New Mexico; Chaco Canyon, New Mexico; Muir Woods, California; Natural Bridges, Utah; Lewis and Clark Cavern, Montana; Tumacacori, Arizona; Navajo, Arizona; Mukuntuweap, Utah; Shoshone Cavern, Wyoming; Gran Quivira, New Mexico; Sitka National Monument, Alaska; Rainbow Bridge, Utah; Pinnacles, California; Colorado, Colorado; Papago Saguaro National Monument, Arizona; Capulin Mountain, New Mexico; Sieur de Monts, Maine; Dinosaur National Monument, Utah.

Nine other National monuments within National forests have also been set aside under this act and placed under the jurisdiction of the Secretary of Agriculture, to whom inquiries in regard thereto should be addressed. Two other National monuments (Big Hole Battlefield, in Montana, and Cabrillo, in California) are under jurisdiction of the Secretary of War.

FORESTS AND FORESTRY.

(Report of year ended June 30, 1916.)

OUR forests now cover 550,000,000 acres, or about one-fourth of the United States. Forests publicly owned contain one-fifth of all timber standing. Forests privately owned contain at least four-fifths of the standing timber. The timber privately owned is not only four times that publicly owned, but it is generally more valuable.

The original forests of the United States contained timber in quantity and variety far beyond that upon any other area of similar size in the world. They covered 850,000,000 acres, with a stand of not less than 5,200,000,000,000 feet of merchantable timber, according to present standards of use. There were five great forest regions—the Northern, the Southern, the Central, the Rocky Mountain and the Pacific.

The present rate of cutting for all purposes undoubtedly exceeds the annual growth of the forests. The great pineries of the Lake States are nearing exhaustion and heavy inroads have been made upon the supply of valuable timber throughout all parts of the country.

The heavy demands for timber have been rapidly pushing the great centres of the lumber industry toward the South and West. In consequence, the State of Washington now leads in lumber production, followed closely by Louisiana, then Mississippi, North Carolina, and Oregon. Among the softwoods, in 1915, the production of yellow pine lumber amounted to about fourteen and three-quarter billion feet; the Douglas fir of the Northwest held second place, with more than four and one-half billion feet, while white pine, with two and three-quarter billion feet ranked third. Of the hardwoods oak came first, with approximately three billion feet, followed in the order named by cypress, maple, red gum, chestnut, yellow poplar, birch, and beech.

We take from our forests yearly, including waste in logging and in manufacture, more than 22,000,000,000 cubic feet of wood, valued at about $1,375,000,000.

We use in a single year 90,000,000 cords of firewood, nearly 40,000,000,000 board feet of lumber, 150,000,000 ties, nearly 1,700,000,000 staves, 445,000,000 board feet of veneer, over 135,000,000 sets of heading, over 350,000,000 barrel hoops, over 3,300,000 cords of native pulp wood, 170,000,000 cubic feet of round mine timbers, nearly 1,500,000 cords of wood for distillation, over 140,000 cords for excelsior, and nearly 3,500,000 telegraph and telephone poles.

About 4,333,000 cords of wood are used in the manufacture of paper, of which about 1,000,000 cords are imported practically all from Canada. The demand for wood pulp is making a severe drain on the spruce forests, which furnish the principal supply, though a number of other woods, such as poplar, hemlock, pine, and balsam, are now being used in considerable quantities. Tests by the Forest Service of the United States Department of Agriculture have shown that pulp suitable for use in the manufacture of news and wrapping paper can be made from some ten species of native woods, including Sitka spruce, Western hemlock, Engelmann spruce, red fir, white fir, and lodgepole pine.

The demand for highly durable woods for railroad ties threatened to create a serious problem in many parts of the country where the supplies of white oak, chestnut, cedar, and cypress are growing less. In place of these, more plentiful woods, such as Southern pine, Douglas fir, tamarack, and hemlock, are coming into use, largely in consequence of the introduction of treatment by preservatives which retard decay.

UNITED STATES FOREST SERVICE.

The Forest Service is one of the bureaus of the Department of Agriculture. It has charge of the administration and protection of the National forests and also promotes the practice of forestry generally through investigations and the diffusion of information.

The work of the Government in forestry was initiated by the appointment of Dr. Franklin B. Hough in 1876 as special agent in the Department of Agriculture. In 1881 a division of forestry was created in that department. In 1901 this division became the Bureau of Forestry, and in 1905, when the care of the National forests was given to this bureau, its name became the Forest Service.

Previously the care of National forests had been in the hands of the Department of Interior.

A law authorizing the President to set apart forest reserves was passed in 1891, but no provision for their administration and use was made until 1897. Previous to 1905 the Bureau of Forestry merely gave expert advice, on request, to the Department of the Interior concerning the application of forestry to the forest reserves. The change of name from "forest reserves" to "National forests" was made in 1907 to correct the impression that the forests were, as "reserves," withdrawn from use. Since the Forest Service took charge of them the fundamental aim has been to open them to the widest use consistent with their proper protection.

The National forests were set aside as follows: By President Harrison, 13,416,710 acres; by President Cleveland, 25,686,320 acres; by President McKinley, 7,050,089 acres; by President Roosevelt, 148,346,924 acres. Since early in 1909 a careful readjustment of the boundaries has been going on. In consequence President Taft added to the National forests 4,333,847 acres and eliminated from them 11,680,578 acres, while to June 30, 1916, President Wilson has added 562,279 acres and eliminated 11,615,124 acres. Acts of Congress prohibit any additions by the President to the National forest area in Washington, Oregon, California, Idaho, Montana, Wyoming, and Colorado.

The present net area of the National forests, including Alaska and Porto Rico, is 155,407,920 acres, with an additional 706,975 acres acquired by purchase in the White Mountains and Southern Appalachian regions for National forest purposes.

The expenditures upon the National forests for protection, administration, and improvement at present exceed the revenues from the forests by about $2,500,000 to $3,000,000 a year, depending partly on the severity of the fire season and partly on the activity of the general lumber market, and excluding the recent appropriation of $10,000,000 by Congress for roads and trails. The normal gross cost of administration and protection is approximately $4,750,000, while from $300,000 to $600,000 yearly is invested in the construction of roads, trails, buildings, and other permanent improvements. The cost of administration includes the cost of handling much free-use business, while the cost of protection is chiefly the cost of protecting water supplies and future timber supplies.

COMPARISON OF RECEIPTS FROM THE SEVERAL SOURCES FOR THE FISCAL YEARS 1916 AND 1915.

Fiscal Year.	Timber.	Grazing.	Special Uses, Etc.	All Sources.
1916	$1,412,592.51	$1,210,214.59	$200,733.61	$2,823,540.71
1915	1,175,133.95	1,130,495.00	175,840.40	2,481,469.35

Under the law 25 per cent. of the receipts are paid to the States in which the National forests are located, to be expended for roads and schools. The amount to be paid to the States in this way from the receipts in 1916 is about $695,541.40.

By the acts of Congress organizing them as States, Arizona and New Mexico also receive for their school funds an additional share of the receipts based on the proportion that their school lands within the National forests bear to the total National forest area in the States. The approximate amounts due on account of the receipts for 1916 are $31,046.12 to Arizona, and $10,329 to New Mexico.

Congress has also provided that 10 per cent. of the receipts shall be set aside as an appropriation to be used under the direction of the Secretary of Agriculture for road and trail building in National forests in co-operation with State authorities or otherwise. The amount thus appropriated on account of fiscal year 1916 receipts is $278,216.56. This, added to the amount carried over from 1915 receipts fund, $151,089.21, and the amount appropriated for improvements, in the regular agricultural bill, $400,000, makes the total available for the construction of roads, trails, cabins, bridges, telephone lines, etc., on the National forests for the fiscal year 1917, $829,305.77.

In addition to the foregoing the Federal Aid Road act, passed by Congress in 1916, appropriated ten million dollars for the construction and maintenance of roads and trails within or partly within National forests. This money becomes available at the rate of a million dollars a year for the next ten years. In general, the States and counties are required to furnish co-operation in an amount at least equal to 50 per cent. of the estimated cost of the surveys and construction of projects approved by the Secretary of Agriculture. The apportionments among the States is based on the area of National forest lands in each State and the estimated value of the timber and the forage resources which the forests contain. The total amount from all sources available for roads, trails and other improvements on the National forests during the fiscal year 1917 is $1,829,305.77.

The total regular appropriation for salaries, general expenses, and improvements for the fiscal year 1917 is $5,574,735.00, as against $5,553,256.00 for 1916.

The grazing receipts for 1916 were paid by the holders of 28,052 permits to graze 1,860,635 cattle, horses, and swine, and of 5,276 permits to graze 7,886,473 sheep and goats. The receipts from timber sales were paid by approximately 11,000 purchasers to cut the equivalent of 545,428,000 board feet of timber. The receipts from special uses were paid by the holders of approximately 5,000 permits. In other words, these receipts represent profitable use of the forests by some 49,000 individuals or concerns. To the use for which payment was made must be added the heavy free use of the forests by the public. Figures for free use of timber are as follows:

FREE USE OF TIMBER ON NATIONAL FORESTS.

Fiscal Year.	Number of Users.	Cut.	Value.
		Board Feet.	
1916	41,544	120,853,000	$184,653.00
1915	40,015	123,168,000	206,464.13

In issuing permits for reservoirs, conduits, power-houses and transmission lines for commercial power development the Forest Service has steadfastly insisted on conditions designed to prevent speculative or perpetual holdings and to secure the full development of available power and the payment of reasonable charges for the use of land.

The total stand of timber on the National forests is estimated at nearly six hundred billions board feet.

The following table shows the local cut of timber from the National forests in the fiscal year 1916:

State.	Cut Under Sale.	Cut Under Free Use.		Total Cut.
		Written Permit.	Without Written Permit.	
	Board Feet.	*Board Feet.*	*Board Feet.*	*Board Feet.*
Oregon	88,157,000	7,663,000	2,297,000	98,117,000
Idaho	76,679,000	20,969,000	74,000	97,722,000
California	57,352,000	7,711,000	192,000	65,255,000
Montana	47,249,000	8,861,000	1,774,000	57,884,000
Arizona	44,672,000	1,224,000	4,889,000	50,785,000
Washington	48,187,000	1,918,000	50,000	50,155,000
Alaska	35,019,000	11,723,000	3,000,000	49,742,000
Colorado	39,611,000	9,627,000	33,000	49,271,000
Utah	25,844,000	9,727,000	126,000	35,697,000
New Mexico	17,761,000	4,479,000	9,270,000	31,510,000
Wyoming	20,513,000	7,382,000	.....	27,895,000
South Dakota	20,896,000	5,224,000	.....	26,120,000
Arkansas	12,238,000	138,000	.....	12,376,000
Minnesota	5,323,000	329,000	10,000	5,662,000
Nevada	1,607,000	1,276,000	.....	2,883,000
Virginia	1,355,000	216,000	.....	1,571,000
Tennessee	1,066,000	294,000	.....	1,360,000
North Carolina	1,156,000	.....	.....	1,156,000
Michigan	353,000	88,000	.....	441,000
New Hampshire	266,000	.....	.....	266,000
Oklahoma	.....	145,000	.....	145,000
Florida	81,000	14,000	60,000	155,000
North Dakota	.....	65,000	.....	65,000
Georgia	43,000	.....	.....	43,000
Nebraska	.....	5,000	.....	5,000
Totals	545,428,000	99,078,000	21,775,000	666,281,000

The great areas contained in the National forests have now been brought to a condition where they are beginning to serve the purposes of the West. The conservation of timber and forage through wise use and the protection of stream flow are the means of sustaining many industries which have contributed materially to the prosperity of the country.

ORGANIZATION OF THE FOREST SERVICE.

At the head of the Forest Service are the Forester, Henry S. Graves, and the Associate Forester, A. F. Potter. The work is organized under the following branches: Operation, James B. Adams in charge; Lands, E. A. Sherman in charge; Silviculture, W. B. Greeley in charge; Grazing, A. F. Potter in charge; Research, including Forest Products Laboratory, Earle H. Clapp in charge; Acquisition of Lands under the Weeks law, William L. Hall in charge.

The 153 National forests are grouped in seven districts, with a District Forester in charge of each, and headquarters as follows: District 1 (Montana, Northeastern Washington, Northern Idaho, Northwestern South Dakota, and Southwestern North Dakota), Missoula, Mont., F. A. Silcox, District Forester; District 2 (Colorado, Wyoming, the remainder of South Dakota, Nebraska, Northern Michigan, and Northern Minnesota), Denver, Col., Smith Riley, District Forester; District 3 (Arizona and New Mexico), Albuquerque, N. Mex., P. G. Redington, District Forester; District 4 (Utah, Southern Idaho, Western Wyoming, Eastern and Central Nevada and a small portion of Northwestern Arizona), Ogden, Utah, L. F. Kneipp, District Forester; District 5 (California and Southwestern Nevada), San Francisco, Cal., Coert Du Bois, District Forester; District 6 (Washington, Oregon, and Alaska), Portland, Ore., Geo. H. Cecil, District Forester; District 7 (Arkansas, Florida, Oklahoma, South Carolina, Georgia, North Carolina, Tennessee, Virginia, West Virginia, New Hampshire, Porto Rico), Washington, D. C., William L. Hall, District Forester.

On July 1, 1916, the force employed by the Forest Service numbered 3,682. Of these 3,008 were employed upon the National forests and 674 were engaged in administrative, scientific and clerical work at the Washington and district headquarters. Of the employés on the National forests the force engaged principally in protective work numbered 2,078 men, as follows: Forest Rangers, 406; Assistant Forest Rangers, 769; Forest Guards, 903. The protective force was therefore about one man for every 75,000 acres, or 117 square miles. (Prussia has one man for every 1,700 acres, and Baden one for every 750.)

BRANCH OF SILVICULTURE.

The replacement of old stands by new growth is accomplished by regulating the cutting through the insertion of special provisions in timber sales contracts in such a way as to insure natural reproduction. On completely denuded areas, however, artificial reforestation by planting or sowing is generally necessary for the establishment of a new growth of trees. The object of such work is usually to produce commercial timber, although in a number of cases the reforesting of denuded watersheds is undertaken primarily to control and regulate the flow of streams directly supplying cities and towns. During the year ended June 30, 1916, over 10,000 acres in National forests were planted or sown to trees, chiefly Douglas fir, Western yellow pine, Western white pine, white pine, and lodgepole pine. There are 21 Government nurseries which supply the National forests. These have a present stock of about 37,000,000 plants and are capable of supplying 15,000,000 a year.

BRANCH OF GRAZING.

The number of stock grazed during the past season (1916), under permit, was 1,860,635 head of cattle, horses, and swine, and 7,886,473 head of sheep and goats. The annual productive value of this number of stock is more than $30,000,000. The number of persons holding permits to graze live stock during the past year was 33,328.

About 16 per cent. of all the sheep in the United States are grazed in the National forests.

EASTERN NATIONAL FORESTS.

The act of March 1, 1911, commonly known as the Weeks law, provides for the acquisition of forest lands on the watersheds of navigable streams. Its purpose is to promote and protect the navigability of the streams by preserving the forest on the upland portions of their watersheds. Through this act means are afforded of extending the National forest system to regions where the Government has hitherto owned no forest lands and taken no direct part in forest preservation.

The original appropriation was $2,000,000 per year for five and one-half years, beginning with the last half of the fiscal year 1911. The Agricultural Appropriation bill for the fiscal year 1913 made the appropriation for 1912 and subsequent years available until expended.

In order to concentrate the purchases where they will be of the greatest benefit from the standpoint of watershed protection, certain areas in the Appalachian region have been designated, aggregating 6,966,304 acres, to which purchases will be for the present confined. The United States Geological Survey has examined the greater part of this land, as required by law, in order to determine whether or not the forest cover exercises a beneficial influence in regulating the flow of navigable streams. Up to July 1, 1916, 6,966,304 acres were reported upon favorably by the Geological Survey.

The Forest Service has been designated as the bureau to receive proposals of land and to examine and value lands for purchase. The National Forest Reservation Commission considers the recommendations of the Forest Service and approves the lands to be purchased and fixes the price to be paid.

From April 1, 1911, to June 30, 1916, proposals were received covering 4,227,060 acres, of which 3,547,414 acres were within the general areas in the White Mountains and the Southern Appalachians which had been selected for purchase.

During the same period 2,137,269 acres were examined, and 1,329,487 acres were approved by the National Forest Reservation Commission. The total surveyed acreage under protection, including acquired and additional areas approved for purchase, is as follows: Georgia area, 96,385; Maine area, 24,825; New Hampshire area, 280,439; North Carolina area, 249,765; South Carolina area, 17,270; Tennessee area, 223,204; Virginia area, 291,618; West Virginia area, 102,220. Total, 1,285,726.

As these lands are acquired they are administered along the same lines as are the National forests in the West, and the above-named areas will, as title is obtained and plans for handling them are prepared, be given formal designation as National forests.

FOREST POLICY OF THE STATES.

The movement for National forestry has been followed by a widespread development of State forest activities. New York and Pennsylvania, the pioneers in this field, inaugurated State policies before the work of the National Government had awakened general interest in forestry, but in most of the States forest work has been either a direct outgrowth of Federal activities or indirectly due to them. Ten or twelve years ago few States were giving their forest problems any serious consideration; to-day 32 have forest departments, 24 employ professionally trained foresters, and practically all show recognition of the need for a State forest policy.

The appropriations for the yearly support of the several State forest departments vary greatly. The smallest is $500; the greatest approximately $315,000. Those which appropriate over $25,000 are: Pennsylvania, $315,000; New York, $178,000; Minnesota, $118,000; Michigan, $105,000; Massachusetts, $78,000, in addition to $175,000 for the suppression of gypsy and brown-tail moths; Maine, $73,000; New Hampshire, $39,000; Washington and Wisconsin, $35,000 each; Oregon, $30,000, and New Jersey, $43,000.

FORESTS AND FORESTRY—*Continued.*

Systematic forest fire protection by the States has been greatly stimulated by the operation of the so-called Weeks law, under which the Federal Government co-operates through the Forest Service with individual States for protecting the watersheds of navigable streams, the Federal Government bearing in no case more than half the cost nor contributing more than $8,000 to any State in any one year. More than thirteen million acres of private and State-owned land are protected by Federal appropriations under this act, at an average cost of three-fourths of a cent per acre. Altogether, more than one hundred million acres are fairly well protected against forest fires under this law by the combined private, State, and Federal appropriations, at an average cost of less than two cents per acre. The States which have entered into co-operative agreements under this law are: Maine, New Hampshire, Vermont, Massachusetts, Connecticut, New York, New Jersey, Maryland, Virginia, West Virginia, North Carolina, Kentucky, Texas, Wisconsin, Minnesota, Michigan, South Dakota, Montana, Idaho, Washington, and Oregon.

Tennessee, Alabama, Colorado, and California have organized fire-warden systems, but do not appropriate State funds for fire protection. Maine, by means of a timber land tax, supports an efficient forest fire service covering the unorganized townships in the northern part of the State; in the remaining townships each bears the cost of an ex-officio warden system. The Forest Service of Minnesota covers 20,000,000 acres by systematic patrol and maintains a permanent field force of rangers and patrolmen, with ex-officio town fire-wardens as an auxiliary force. Idaho has adopted a co-operative system of protection with private owners, under which the State pays its pro rata share of the cost, on the basis of State-owned area within the area protected by a privately organized system.

In the fifty years preceding 1913, forest fires had caused an average annual loss in the United States of about 70 human lives and at least $25,000,000 worth of timber, besides the loss of live stock, crops, buildings, and various kinds of improvements worth many millions more. Added to this are the enormous losses from the destruction of young tree growth, soil deterioration, damage to water courses and water supplies, interruption of business, and depreciation of property.

New York has a State-owned "Forest Preserve" of 1,825,882 acres in the Adirondack and Catskill Mountains, under fire protection, but not under forest management, which the State Constitution forbids. The entire central portion of these two mountain regions, comprising 7,200,000 acres, is protected from fire by a State ranger system; in the rest of the State, town officers are depended on to keep fires down. Private owners are furnished tree seedlings at cost from the State nurseries, which also grow material for reforesting denuded portions of the preserve. Three laws give forest lands reduction of, or exemption from, tax assessment under certain conditions. Pennsylvania has more than 1,000,000 acres of State-owned forests and practises forestry on them, maintaining a State ranger training school at Mont Alto. These forests are chiefly in the mountains of the central part of the State, and protect streamflow as well as supply timber. Additional lands may be purchased at not more than $10 per acre. Private lands are protected under a fire-warden system. The State distributes planting material. The same is true of Maine, New Hampshire, Vermont, Connecticut, Maryland, Kentucky, Ohio, Kansas, Michigan, Wisconsin, Minnesota, North Dakota, and Idaho.

Minnesota, Wisconsin, and Michigan have large holdings of State forests. Minnesota has approximately 1,000,000 acres of school lands which are to be retained for State school forests, besides 43,000 acres now in State forests. Wisconsin has 400,000 acres reserved, and Michigan 589,000, of which 312,000 acres are used for exchange to add to the 277,000 acres permanently reserved in several large blocks in different parts of the State. South Dakota has 75,000 acres of State forest in the Black Hills. New Jersey 13,720 acres, and New Hampshire, Vermont, California, Connecticut, Massachusetts, Indiana, and Maryland from 2,000 to 9,000 acres each.

In Vermont, Massachusetts, Connecticut, New York, Pennsylvania, and Michigan the tax on forest land may be levied chiefly on yield or income.

PRIVATE FORESTRY.

While progress in the forestry movement has been mainly through public agencies, in the last few years a marked advance has been made by private owners.

The greater part of the privately owned timber of the country is in the Northwest, where the liability of the timber to destruction by fire and the example of the protective work carried on by the Government led to the formation of fire protective associations among the timber owners. From the Northwest the movement spread over a considerable part of the timbered area in the Northern and Western States. At present there are forty associations of this kind in the States of Washington, Oregon, California, Idaho, Montana, Michigan, Maine, New Hampshire, Vermont, Pennsylvania, West Virginia, Kentucky, and North Carolina. The associations are supported by assessments on an acreage basis and maintain a system of protection more or less similar to that on the National forests. The land thus privately protected is estimated at approximately twenty-five million acres.

The practice of forestry by private owners is gradually extending in the Northeastern States, largely because conditions in that region make it economically possible. The greatest progress has been made in Central New England, where excellent nearby markets, low-priced rough land, and a varied demand for forest products combine to make the growing of trees profitable. Many New England farmers are planting old pastures to white pine, and in some sections land with young tree growth is valued more highly than similar land without. Considerable planting is also being done by the farmers of the Middle West in the form of farm woodlots and windbreaks. While these produce comparatively little saw timber they yield a large amount of firewood and post material, besides benefiting the farm by their presence.

AMERICAN WOOD-PRESERVERS' ASSOCIATION.

President—Carl G. Crawford, Louisville, Ky. *First Vice-President*—John Foley, Philadelphia, Pa. *Second Vice-President*—M. K. Trumbull, Kansas City, Mo. *Secretary-Treasurer*—F. J. Angier, Baltimore, Md.

The objects and purposes of the association shall be to advance the wood-preserving industry in all its branches; to afford its members opportunities for the interchange of ideas with respect to improvements in the wood-preserving industry, and for the discussion of all matters bearing upon the industry of wood preserving; to maintain a high business and professional standard in all respects, and to standardize specifications for wood preservatives and their introduction into the materials to be preserved.

The means to be employed for these purposes shall be meetings for the presentation and discussion of appropriate papers, and for social and professional intercourse; the publication of such papers and discussions as may be deemed expedient; co-operation with other societies, associations and organizations in the work of standardizing specifications affecting the wood-preserving industry, and all other things incidental or conducive to the attainment of the objects of the association or any of them, and as the members may from time to time consider advisable.

Thirteenth annual meeting will be held in New York, N. Y., January 23, 24, and 25, 1917.

CONSERVATION OF NATURAL RESOURCES.

THE National Conservation Association, with headquarters in the Munsey Building, Washington, D. C., is now the organized head of the conservation movement in the United States.

In a booklet explaining the objects of the association is the following:

"The National Conservation Association is fighting for the prompt and orderly development of our natural resources, for the welfare of ourselves and our children, and for the rights of the plain people. The association is bound neither by political considerations nor official connections. It is free to speak the whole truth.

"That conservation means the use of our natural resources for the benefit of us all and not merely for the profit of a few is already household knowledge. The task which the National Conservation Association has set for itself is to get this principle put into practical effect."

The association has no political affiliations, and is supported by membership dues and voluntary contributions. It publishes bulletins, legislative briefs, statements, and leaflets, and scrutinizes all Federal conservation legislation.

Gifford Pinchot, President; Charles W. Eliot, Honorary President; Harry A. Slattery, Secretary.

The National Conservation Congress is the National clearing-house for the State Conservation Commissions and Conservation Committees of National associations and all organizations concerned in the conservation of the country's natural resources. It is the organized head of the conservation movement in the United States. Its chief object is "to afford an agency through which the people of the country may frame policies and principles affecting the conservation and utilization of their resources, to be put into effect by their respective representatives in the State and Federal Governments."

The Congress holds annual meetings "to provide for discussion of the resources of the United States as the foundation for the prosperity of the people." The Congress also undertakes "to furnish definite information concerning the resources and their development, use, and preservation."

Membership dues range from $1 a year to $100 or more, according to classification.

The Congress is managed by its officers and an Executive Committee, and by an Advisory Board, consisting of one member from each National association having a Conservation Committee.

President—E. Lee Worsham, Atlanta, Ga. *Executive Secretary*—Thomas R. Shipp, 610 Riggs Building, Washington, D. C. *Treasurer*—Norman C. McLoud, Cleveland, Ohio.

THE AMERICAN FORESTRY ASSOCIATION.

THE American Forestry Association, with headquarters at 1410 H Street Northwest, Washington, D. C., was organized in 1882 and incorporated in January, 1897. It is devoted to the conservation of private, State and National forests and to public education in the knowledge of trees, their care and development. It is a voluntary organization for the inculcation and spread of a forest policy on a scale adequate for our economic needs, and any person is eligible for membership. It is independent, has no official connection with any Federal or State department or policy, and is devoted to a public service conducive to National prosperity. It asserts that forestry means the propagation and care of forests for the production of timber as a crop; protection of watersheds; utilization of non-agricultural soil; use of forests for public recreation.

It declares that forestry is of immense importance to the people; that the census of 1913 shows our forests annually supply over one and a quarter billion dollars' worth of products; employ 735,000 people; pay $367,000,000 in wages; cover 550,000,000 acres unsuited for agriculture; regulate the distribution of water; prevent erosion of lands, and are essential to the beauty of the country and the health of the Nation. It recognizes that forestry is an industry limited by economic conditions; that private owners should be aided and encouraged by investigations, demonstrations, and educational work, since they cannot be expected to practise forestry at a financial loss; that Federal and State Governments should undertake scientific forestry upon National and State forest reserves for the benefit of the public. It will devote its influence and educational facilities to the development of public thought and knowledge along these practical lines.

It supports these policies: Federal administration and management of National forests; adequate appropriations for their care and management; Federal co-operation with the States—especially in forest fire protection. State activity by acquirement of forest lands; organization for fire protection; encouragement of forest planting by communal and private owners; non-political departmentally independent forest organization, with liberal appropriations for these purposes. Forest fire protection by Federal, State and fire protective agencies, and its encouragement and extension, individually and by co-operation; without adequate fire protection all other measures for forest crop production will fail. Forest planting by Federal and State Governments and long-lived corporations, and acquirement of waste lands for this purpose; and also planting by private owners where profitable, and encouragement of natural regeneration. Forest taxation reforms removing unjust burdens from owners of growing timber. Closer utilization in logging and manufacturing without loss to owner; aid to lumbermen in achieving this. Cutting of mature timber where and as the domestic market demands it, except on areas maintained for park or scenic purposes, and compensation of forest owners for loss suffered through protection of watersheds, or on behalf of any public interest. Equal protection to the lumber industry and to public interests in legislation affecting private timberland operations, recognizing that lumbering is as legitimate and necessary as the forests themselves. Classification by experts of lands best suited for farming and those best suited for forestry; and liberal National and State appropriations for this work.

The membership of the association is close to 13,000 in every State in the Union, every Province in Canada and every civilized and semi-civilized country in the world. The subscribing membership is $3.00 a year; contributing membership is $10.00 a year; sustaining membership is $25.00 a year and life membership is $100.00. Members receive each month the *American Forestry Magazine* which contains articles on everything pertaining to trees, forests, and birds.

President—Charles Lathrop Pack, Lakewood, N. J. *Treasurer*—John E. Jenks, Washington, D. C. *Executive Secretary and Editor-in-Chief*—Percival S. Ridsdale, Washington, D. C.

BIRD CENSUS.

During the Summer of 1914 the Biological Survey of the United States Department of Agriculture took initial steps toward a census of the birds of the United States for the purpose of ascertaining approximately the number and relative abundance of the different species. In view of the recognized value of birds to agriculture, such information cannot fail to be of great value.

One of the most abundant birds in the United States, possibly the most abundant bird, is the robin. It is also one of the most sociable, and in the Northeastern part, where it is most abundant, it commonly nests close to farm buildings, but almost never in extensive woods.

No other bird is anywhere near as abundant as either the robin or the English sparrow, but several others are common enough to make their total numbers run well into the millions. For every 100 robins reported in the 1914 census there were 49 catbirds, 37 brown thrashers, 28 house wrens, 27 kingbirds, and 26 bluebirds. This last number is particularly gratifying because only a few years ago nearly the whole bluebird population of the Eastern States was destroyed by an unusually severe Winter. Since then the birds have been gradually recovering from the catastrophe, and this season's census shows that there are now several million bluebirds in Northeastern United States.

This preliminary census shows that the most abundant bird on farms of the Northeastern States is the robin; that the next is the English sparrow, and that following these are the catbird, the brown thrasher, the house wren, the kingbird, and the bluebird, in the order named.

On August 29, 1916, the United States Senate ratified the treaty with Canada extending to all migratory birds the same protection on both sides of the Canadian border.

NATIONAL STATUARY HALL.

WORKS of art in the Capitol Building, Washington, have been acquired by gift from private individuals interested in the preservation of the historical, biographical, or pictorial art of the Nation; by the gift from States, as instanced by the statues of distinguished citizens forming the collection in Statuary Hall, and by purchase by the Government. A general supervision of the art works of the Capitol is exercised by the Joint Committee on the Library. This committee also has charge of accessions to the art works of the Capitol Building, except as otherwise provided by law.

Statuary Hall, formerly the hall of the House of Representatives, was established as Statuary Hall by Act of Congress of July 2, 1864. By this legislation a National Hall of Statuary was created, and the President was authorized to invite each State to contribute to the collection to be formed, two statues, in either marble or bronze, of deceased citizens of the State whom "for historic renown or from civil or military services" the State should consider as worthy of commemoration in this National Hall of Statuary.

The following is a list of statues presented by the States and the dates of the works:

STATE.	Name.	Date.	STATE.	Name.	Date

UNITED STATES PENSION STATISTICS.

NUMBER OF ARMY AND NAVY PENSIONERS ON THE ROLL JUNE 30, 1916.

Regular Establishment—Invalids or survivors, 15,553; widows and dependents, 4,549.

Service—Act of May 11, 1912, invalids or survivors, 320,376; act of February 6, 1907, invalids or survivors, 1,727.

Civil War, General Law—Invalids or survivors, 39,593; widows and dependents, 52,217.

Civil War, Act of June 27, 1890—Invalids or survivors, 681; dependents, 3,725.

Civil War, Act of April 19, 1908—Widows, 235,536.

War with Spain—Invalids or survivors, 24,101; widows and dependents, 4,371.

War of 1812—Widows, 115.

War with Mexico—Invalids or survivors, 513; widows, 3,785.

Indian Wars—Invalids or survivors, 676; widows, 1,902.

Army nurses (women), 252.

Total pensioners on the roll June 30, 1916, 709,572.

Total number of original applications during fiscal year ended June 30, 1916, 59,395.

Total number of original claims allowed for fiscal year ended June 30, 1916, 19,004.

Number of pensioners on roll June 30, 1916—Invalids or survivors, 403,120; widows and dependents, 306,452; total, 709,572.

Paid pensioners, during 1916, $159,155,089.92.

(For number of pension claims, pensioners and disbursements, by years, from 1867 to 1912, see WORLD ALMANAC for 1913, page 166.)

Expenses for the Pension Bureau and Disbursing Office in disbursing pension fund for the fiscal year ended June 30, 1916, $1,656,722.33.

All the pension agencies have been consolidated, and all pensioners are now paid by the Commissioner of Pensions through the Disbursing Office of the Pension Bureau, Washington, D. C.

TOTAL DISBURSEMENTS FOR PENSIONS FOR ALL WARS AND OF THE PEACE ESTABLISHMENT TO JUNE 30, 1916.

War of the Revolution (estimated), $70,000,000; War of 1812 (service pension), $45,991,743.76; Indian wars (service pension), $13,790,299.13; war with Mexico (service pension), $50,422,229.22; Civil War, $4,765,075,020.92; war with Spain and Philippine insurrection, $53,744,667.55; regular establishment, $39,098,319.01; unclassified, $16,508,447.41. Total, $5,054,630,727.

The following are the rates for total disability from causes incident to the service:

Army—Lieutenant-colonel and all officers of higher rank, $30; major, surgeon, and paymaster, $25; captain, provost marshal, and chaplain, $20; first lieutenant, assistant surgeon, and deputy provost marshal, $17; second lieutenant and enrolling officer, $15; enlisted men, $8.

Navy—Captain and officers of higher rank, commander, lieutenant commanding and master commanding, surgeon, paymaster, and chief engineer, respectively ranking with commander by law, $30; lieutenant, surgeon, paymaster, and chief engineer, respectively ranking with lieutenant by law, and passed assistant surgeon, $25; master, professor of mathematics, assistant surgeon, assistant paymaster and chaplain, $20; first assistant engineer, ensign, and pilot, $15; cadet midshipman, passed midshipman, midshipman, clerks of admirals, paymasters, or other officers commanding vessels, second and third assistant engineers, master's mate, and warrant officers, $10; enlisted men, $8.

Marine Corps—Lieutenant-colonel and officers of higher rank, $30; major, $25; captain, $20; first lieutenant, $17; second lieutenant, $15; enlisted men, $8.

[NOTE—See also New United States Army Law.]

Pension at certain ages on account of service in the Civil and Mexican Wars. Act of May 11, 1912. Any person who served ninety days or more in the military or naval service of the United States during the late civil war, and who has been honorably discharged therefrom, and who has reached the age of sixty-two years or over, on making proof of such facts is entitled to receive a pension as follows: Age sixty-two years—For a service of 90 days, $13.00 per month; 6 months, $13.50; 1 year, $14.00; 1½ years, $14.50; 2 years, $15.00; 2½ years, $15.50, and 3 years and more, $16.00. Age 66 years—For a service of 90 days, $15.00 per month; 6 months, $15.50; 1 year, $16.00; 1½ years, $16.50; 2 years, $17.00; 2½ years, $18.00, and 3 years and more, $19.00. Age 70 years—For a service of 90 days, $18.00 per month; 6 months, $19.00; 1 year, $20.00; 1½ years, $21.50; 2 years, $23.00; 2½ years, $24.00, and 3 years and more $25.00. Age 75 years—For a service of 90 days, $21 per month; 6 months, $22.50; 1 year, $24.00; 1½ years, $27.00, and 2 years and more, $30.00. And such pension shall commence from the date of filing the application in the Bureau of Pensions. Any person who served sixty days or more in the war with Mexico, and who received an honorable discharge, is entitled to $30.00 per month. Any person who was wounded in battle or in line of duty in the Civil War, and is now unfit for manual labor by reason thereof, or who from disease or other causes incurred in line of duty resulting in his disability, is now unable to perform manual labor, is entitled to $30.00 per month.

AMERICAN SOCIETY OF INTERNATIONAL LAW.

President—Elihu Root. *Vice-President*—Chief Justice White, Justice William R. Day, P. C. Knox, Andrew Carnegie, Joseph H. Choate, John W. Foster, George Gray, William W. Morrow, Richard Olney, Horace Porter, Oscar S. Straus, Jacob M. Dickinson, William H. Taft, Robert Bacon, Robert Lansing, Henry Cabot Lodge, John Bassett Moore. *Recording Secretary*—James Brown Scott. *Corresponding Secretary*—Charles Henry Butler. *Treasurer*—Chandler P. Anderson. Headquarters, Washington, D. C.

PASSPORT REGULATIONS OF THE UNITED STATES.

1. AUTHORITY TO ISSUE—Section 4075 of the Revised Statutes of the United States, as amended by the Act of Congress approved June 14, 1902, provides that "the Secretary of State may grant and issue passports, and cause passports to be granted, issued, and verified in foreign countries by such diplomatic or consular officers of the United States, and by such chief or other executive officers of the insular possessions of the United States, and under such rules as the President shall designate and prescribe for and on behalf of the United States." The following rules are accordingly prescribed for the granting and issuing of passports in the United States:

2. TO WHOM PASSPORTS ARE ISSUED—Section 4076 of the Revised Statutes of the United States (U. S. Comp. Stat. 1901, 2765) provides that "no passport shall be granted or issued to, or verified for, any other persons than those owing allegiance, whether citizens or not, to the United States."

3. BY WHOM ISSUED AND REFUSAL TO ISSUE—No one but the Secretary of State may grant and issue passports in the United States (Revised Statutes, sections 4075, 4078), and he is empowered to refuse them in his discretion.

Passports are not issued by American diplomatic and consular officers abroad, except in cases of emergency; and a citizen who is abroad and desires to procure a passport must apply therefor through the nearest diplomatic or consular officer to the Secretary of State.

Applications for passports by persons in Porto Rico or the Philippines should be made to the Chief Executives of those islands. The evidence required of such applicants is similar to that required of applicants in the United States.

4. FEE—By Act of Congress approved March 23, 1888, a fee of one dollar is required to be collected for every citizen's passport. That amount in currency or postal money order should accompany each application made by a citizen of the United States. Orders should be made payable to the Disbursing Clerk of the Department of State. Drafts or checks will not be accepted.

5. APPLICATIONS—A person who is entitled to receive a passport, if within the United States, must submit a written application in duplicate, in the form of an affidavit, to the Secretary of State. The application should be made by the person to whom the passport is to be issued, and signed by him, as it is not proper for one person to apply for another.

The affidavit must be made before a clerk of a Federal court or of a State court authorized by the Act of Congress of June 29, 1906, to naturalize aliens, within the jurisdiction of which the applicant or his witness resides, and the seal of the court must be affixed; but in any place where there is a Federal court the affidavit must be made before a clerk of such court. In any place where there is an agent of the Department of State, the Secretary of State may, in his discretion, require the application to be made before such agent. The clerk of court or agent of the Department of State before whom the application is made must mail it directly to the Department of State. The applicant must state from what point he intends to leave the United States, and the date of his intended departure, and also if by a port of the United States, by what ship he intends to sail.

Each application must be in the hands of the Department of State or its agents at least five days before the applicant's departure from the United States.

If the applicant signs by mark, two attesting witnesses to his signature are required. The applicant is required to state the date and place of his birth, his occupation, the place of his permanent residence, and within what length of time he will return to the United States with the purpose of residing and performing the duties of citizenship. He is also required to state the names of the foreign countries which he expects to visit, and the objects of his visits thereto. The latter statement should be brief and general in form, thus: "Commercial business." An applicant who states that he is going abroad on commercial business must support his application with a letter from the head of the firm or firms which he represents, stating the names of the countries it is necessary for him to visit and the objects of his visits thereto. An applicant who is going abroad for any other purpose must satisfy the Department of State that it is imperative that he go and he should submit satisfactory documentary evidence substantiating his statement concerning the imperativeness of his proposed trip.

The applicant must take the oath of allegiance to the United States.

The application must be accompanied by a description of the person applying, and should state the following particulars, viz.: Age, ——; stature, —— feet —— inches (English measure); forehead, ——; eyes, ——; nose, ——; mouth, ——; chin, ——; hair, ——; complexion, ——; face, ——; special identifying marks, if any (scars, birthmarks, etc.).

The application must also be accompanied by triplicate photographs of the applicant, on thin paper, unmounted, and not larger in size than three by three inches. One must be attached to the back of each application by the clerk of court or the department's agent before whom it is made, with an impression of such officer's seal so placed as to cover part of the photograph, but not the features, and the other sent loose, to be attached to the passport by the department. The loose photograph must be signed across its face, so as not to obscure the features, by the applicant, and the signature thereon must correspond to the applicant's signature affixed to the application. Photographs on cardboard or post cards will not be accepted.

The application must be supported by an affidavit of at least one credible witness that the applicant is the person he represents himself to be, and that the facts stated in the application are true to the best of the witness' knowledge and belief. This affidavit must be made before the clerk of court or the department's agent before whom the application is executed, and the witness must be an American citizen, who resides within the jurisdiction of the court or the department's agent. The applicant or his witness must be known to the clerk of court or the department's agent before whom the application is executed, or must be able to satisfy such officer as to his identity and the *bona fides* of the applicant.

6. NATIVE CITIZENS—An application containing the information indicated by rule 5, will be sufficient evidence in the case of native citizens; except that a person born in the United States in a place where births are recorded will be required to submit a birth certificate with his application. If a birth certificate is not obtainable, the application should be supported by an affidavit of the physician who attended the birth or affidavits of parents or other reputable persons having actual knowledge of the applicant's birth in this country.

Passports issued by the Department of State or its diplomatic or consular representatives are intended for identification and protection in foreign countries, and not to facilitate entry into the United States, immigration being under the supervision of the Department of Labor.

7. A PERSON BORN ABROAD WHOSE FATHER WAS A NATIVE CITIZEN OF THE UNITED STATES—In addition to the statements required by rule 5, his application must show that his father was born in the United States, resided therein, and was a citizen at the time of the applicant's birth. In such case evidence of the father's birth in this country similar to that required in section 6 above should be submitted.

8. NATURALIZED CITIZENS—In addition to the statements required by rule 5, a naturalized citizen must transmit his certificate of naturalization, or a duly certified copy of the court record thereof, with his application. It will be returned to him after inspection. He must state in his affidavit when and from what port he emigrated to this country, and, if possible, what ship he sailed on, where he has lived since his arrival in the United States, when and before what court he was naturalized, and that he is the identical person described in the certificate of naturalization. The signature to the application should conform in orthography to the applicant's name as written in his certificate of naturalization, or an explanation of the difference should be submitted.

9. WOMAN'S APPLICATION—If she is unmarried, in addition to the statements required by rule 5,

she should state that she has never been married. If she is the wife or widow of a native citizen of the United States the fact should be made to appear in her application, which should be made according to the form prescribed for a native citizen, whether she was born in this country or abroad. If she is the wife or widow of a naturalized citizen, in addition to the statements required by rule 5, she must transmit for inspection her husband's certificate of naturalization, or a certified copy of the court record thereof, must state that she is the wife (or widow) of the person described therein, and must set forth the facts of his birth, emigration, naturalization, and residence, as required in the rules governing the application of a naturalized citizen. She should sign her own Christian name with the family name of her husband (thus: Mary Doe, not Mrs. John Doe). A married woman's citizenship follows that of her husband. It is essential, therefore, that a woman's marital relations be indicated in her application for a passport, and that in the case of a married woman her husband's citizenship be established.

10. THE CHILD OF A NATURALIZED CITIZEN CLAIMING CITIZENSHIP THROUGH THE NATURALIZATION OF THE PARENT—In addition to the statements required by rule 5, the applicant must state that he or she is the son or daughter, as the case may be, of the person described in the certificate of naturalization, which must be submitted for inspection, and must set forth the facts of emigration, naturalization, and residence, as required in the rules governing the application of a naturalized citizen.

11. A RESIDENT OF AN INSULAR POSSESSION OF THE UNITED STATES WHO OWES ALLEGIANCE TO THE UNITED STATES—In addition to the statements required by rule 5, he must state that he owes allegiance to the United States and that he does not acknowledge allegiance to any other Government; and must submit affidavits from at least two credible witnesses who are able to corroborate his statement as to birth, residence, and loyalty. No fee is required for the issuance by the Department of State of an insular passport.

12. EXPIRATION AND RENEWAL OF PASSPORT—A passport expires six months from the date of its issuance. A new one will be issued upon a new application accompanied by the old passport, and if the applicant be a naturalized citizen, the old passport will be accepted in lieu of a certificate of naturalization, provided the application upon which the old passport was issued is found to contain sufficient information as to the naturalization of the applicant.

13. RENEWAL OF PASSPORT.—Passports issued by the Department of State, which have not expired, may be renewed by it for a period of six months upon the sworn applications of the holders; provided that the holders are residing in the United States at the time they make their application for renewal, that they intend to visit only those countries named in the passports which they hold, and that they show to the satisfaction of the Department of State that it is necessary for them to do so.

An application for the renewal of a passport must be in the form of an affidavit addressed to the Secretary of State. The affidavit must be made before a clerk of a proper court within the jurisdiction of which the applicant resides, and the seal of the court must be affixed; but in any place where there is an agent of the Department of State, the Secretary of State may, in his discretion, require the application to be made before such agent. The clerk of court, or the agent of the Department of State before whom the application is made, must mail it directly to the Department of State.

The applicant must state that he is a loyal citizen of the United States, give the name of the foreign countries which he expects to visit, and explain the object and necessity of his proposed visits thereto. The same evidence as to the necessity of the applicant's going abroad will be required of a person applying for the renewal of his passport as that required by rule 5 of applicants for passports. The applicant must also state from what point he intends to leave the United States, and the date of his intended departure, and also, if by a port of the United States, by what ship he intends to sail. In addition, the applicant must submit a photograph of himself, which must correspond to the photographs attached to his passport and the application upon which it was issued. The photograph which must be on thin paper and about three by three inches in size, must be attached to the application for renewal by the clerk of court or the agent of the Department of State before whom the application is made, and the seal of such officer must be impressed thereon.

No passport shall be renewed more than twice. No fee is required by the Department of State for the renewal of a passport.

A person abroad holding a passport issued by the Department of State may have it renewed for a period of six months upon presenting it to a diplomatic or principal consular officer of the United States, when it is about to expire, with a sworn statement of the names of the countries which he expects to visit and the objects of his visits thereto.

14. WIFE, MINOR CHILDREN, AND SERVANTS—When the applicant is accompanied by his wife, minor children, and maid-servant, who is a citizen of the United States, it will be sufficient to state the fact, giving their names in full, the dates and places of their births, and the allegiance of the servant, when one passport will suffice for all. In such case, however, three photographs of each person should accompany the passport application. For a man-servant or any other person in the party a separate passport will be required. A woman's passport may include her minor children and maid-servant under the above-named conditions. (The term "maid-servant" does not include a governess, tutor, pupil, companion, or person holding like relation to the applicant for a passport.)

15. TITLES—Professional and other titles will not be inserted in passports.

16. BLANK FORMS OF APPLICATION—They will be furnished by the department free of charge to persons who desire to apply for passports. Supplies of blank applications are also furnished by the department to clerks of courts and are held by the department's agents.

17. ADDRESS—Communications should be addressed to the Department of State, Bureau of Citizenship, and each communication should give post-office address of the person to whom the answer is to be directed.

18. ADDITIONAL REGULATIONS—The Secretary of State is authorized to make regulations on the subject of issuing and granting passports additional to these rules and not inconsistent with them.

Effective May 1, 1916.

THE WHITE HOUSE, April 17, 1916.

WOODROW WILSON.

DIRECTIONS CONCERNING THE USE OF PASSPORTS.

SIGNATURE OF PASSPORT.

A person to whom a passport is issued should affix his signature thereon, in the space designated in the lower left-hand corner, immediately upon its receipt.

VISA OF PASSPORTS.

The department understands that passports should be visaed for entry into the following-named countries, by diplomatic or consular officers thereof: Austria-Hungary, British Empire, Bulgaria, France, Germany, Italy, Persia, Portugal, Roumania, Russia, Serbia, and Turkey.

SPECIAL REGULATIONS IN FOREIGN COUNTRIES.

Upon arrival in belligerent countries persons may obtain information in regard to registration, et cetera, from the local authorities directly or through the nearest American Consulate.

(The information given below is believed to be correct, yet it is not to be considered as authentic, as it relates to the regulations of a foreign country. For further and more authentic information concerning restrictions from travel in foreign countries, it is necessary to apply to diplomatic or consular representatives of those countries.)

AUSTRIA-HUNGARY—Persons going to Austria-Hungary should have their passports visaed by an Austro-Hungarian diplomatic or consular officer, preferably in the United States. Each person over nine years of age going to Austria-Hungary via Germany must bear a separate passport. (See para-

graph headed "Germany.") Native American citizens and American citizens who were naturalized before September 27, 1906, should obtain authenticated copies of their passport applications to submit with their passports to the Austro-Hungarian diplomatic or consular officers to whom they apply to have their passports visaed. Married women should also submit their marriage certificates. In order to obtain an authenticated copy of a passport application, the applicant should send to the department an exact copy, with photograph attached, of his original application. If possible, the copy for authentication should be sent to the department with the original passport application.

BRITISH EMPIRE—Persons going to British territory should have their passports visaed by a British diplomatic or consular officer, preferably in the United States. A person going to the British Empire accompanied by his wife and minor children may have his family included in his passport, but a photograph of each member of his family over fourteen years of age must be attached to his passport. Persons sailing for England from the port of New York should have their passports visaed by the British Consul-General in that city. The department has been informed that rigid restrictions have been placed upon all travel between England and the Continent of Europe, and that admission to Belgium from Holland is understood to be practically forbidden to travellers from England.

Persons over fifteen years of age desiring to visit Australia are required to produce passports visaed by British diplomatic or consular officers.

BULGARIA—Persons going to Bulgaria should haved their passports visaed by the Consul-General of Bulgaria at New York City, or by a diplomatic or consular officer of Bulgaria in some foreign country.

FRANCE—Persons going to France should have their passports visaed by a French diplomatic or consular officer, preferably in the United States. Every person going to France, unless he was naturalized since September 27, 1906, should obtain an authenticated copy of the application upon which his passport was issued and present it, with his passport, to the French diplomatic or consular officer to whom he applies to have his passport visaed, as in the case of a person going to Austria-Hungary. An application for a visa should be made at least three days before it is necessary to obtain the visa. An American citizen who does not go directly from this country to France, but sojourns in some other foreign country before visiting France, should inquire of a French diplomatic or consular representative in such foreign country concerning the special formalities which it will be necessary for him to fulfil before entering French territory. Persons who go to France by way of England are required to obtain special permits from the French Passport Bureau in London. Applications therefor must be made within three days of the date of sailing from England.

GERMANY—Persons going to Germany should have their passports visaed by a German diplomatic or consular officer, preferably in the United States. Under German regulations, each person over nine years of age entering Germany must hold a separate passport. Native American citizens and American citizens who were naturalized before September 27, 1906, should obtain authenticated copies of their passport applications to submit with their passports to the German diplomatic or consular officers to whom they apply to have their passports visaed, as in the case of persons going to Austria-Hungary. Married women should also submit their marriage certificates. A new visa of a passport by a German diplomatic or consular officer is required for each separate entry into Germany. In order to obtain a visa the bearer of a passport must apply in person to a German diplomatic or consular officer. The bearer must present two photographs, similar to the one on his passport, for the files of the German diplomatic or consular officer. A visa will not be granted unless the journey seems to be necessary, and the necessity must be shown by the bearer. If his journey is for business purposes, he must submit papers showing what business houses he intends to visit in Germany. If the journey is for the purpose of visiting friends or relations, the urgent necessity of doing so must be shown.

ITALY—Persons going to Italy should have their passports visaed by an Italian consular officer, preferably in the United States. Under Italian regulations, each person over sixteen years of age entering Italy must hold a separate passport.

PERSIA—Persons going to Persia should have their passports visaed by the Persian Minister at Washington, D. C.

PORTUGAL—Persons going to Portugal should have their passports visaed by a Portuguese diplomatic or consular officer, preferably the Portuguese Consul-General in New York City.

ROUMANIA—Persons going to Roumania should have their passports visaed by a Roumanian diplomatic or consular officer in some foreign country, there being no diplomatic or consular officers of Roumania in the United States.

RUSSIA—Persons going to Russia should have their passports visaed by a Russian consular officer, preferably in the United States, at San Francisco, Chicago or New York City. A person who desires a visa of his passport to cover a period longer than three months should make a special request to that effect. Russian regulations require that a passport must state definitely the names of the places in Russia which the holder expects to visit and the objects of his visits thereto, and must bear the photographs of all persons included therein who are over ten years of age. Native American citizens and American citizens who were naturalized before September 27, 1906, should obtain authenticated copies of their passport applications to submit with their passports to the Russian consular officers to whom they apply to have their passports visaed, as in the case of persons going to Austria-Hungary.

SERBIA—Persons going to Serbia should have their passports visaed by the Consul-General of Serbia in New York City, or by a diplomatic or consular officer of Serbia in some foreign country.

TURKEY—Persons going to Turkey should have their passports visaed by a Turkish consular officer, preferably in the United States, at San Francisco, Chicago, Boston, or New York City.

EXTRA PHOTOGRAPHS.

Persons going to belligerent countries may avoid inconvenience by carrying with them several extra unmounted photographs similar to the ones attached to their passports.

ROUTES OF TRAVEL.

The department cannot undertake to advise American citizens concerning the routes they should take in travelling abroad. It may be said, however, that it is objectionable for persons to travel through or from a belligerent country to a country which is at war therewith. Consequently the Department of State declines to issue passports for such travel.

DEPARTMENT OF STATE,
Washington, July 18, 1916.

LIABILITY FOR MILITARY SERVICE IN FOREIGN COUNTRIES OF PERSONS RESIDING IN THE UNITED STATES.

THE Department of State has recently received numerous inquiries from foreign-born persons residing in this country as to whether they may be compelled to perform military service in their native lands and as to what penalties, by way of fines, confiscation of property, or imprisonment in case of return, they will incur if they fail to report to the authorities of their countries of origin for military service. Some of the inquiries refer to persons who have obtained naturalization as citizens of the United States, others to persons who have made declarations of intention to become American citizens, and still others to persons who have taken no steps toward acquiring American citizenship. Misconception and confusion concerning this matter appear to be current.

The United States is not a party to any treaties under which persons of foreign origin residing in this country may be compelled to return to their countries of origin for military service, nor is there any way in which persons may be forced into foreign armies against their will so long as they remain in the United States.

The department cannot undertake to give authentic, official information either in general, as to the requirements of the military service laws of foreign countries and the penalties provided

therein for evasion of military service, or, in particular, as to the status and present or future liabilities of individuals under such laws. Information of this kind must be obtained from officials of the foreign countries concerned.

The department issues printed circulars concerning the status in their native lands of naturalized citizens of the United States, natives of certain European countries, and these will be furnished to interested persons upon request. It is specifically stated in these circulars that the information contained in them is not to be considered as official so far as it relates to the laws and regulations of foreign countries.

The United States has concluded treaties of naturalization with the following European countries: Austria-Hungary, Belgium, Denmark, the German States, Great Britain, Norway and Sweden. Copies of these treaties are to be found in "Treaties, Conventions, etc., between the United States of America and Other Powers" (Government Printing Office, 1910), and separate copies may be furnished by the department upon request. Under these treaties the naturalization of persons concerned as citizens of the United States and the termination of their former allegiance are recognized, with the reservation, in most of them, that such persons remain liable to trial and punishment in their native lands for offences committed prior to emigration therefrom, including offences of evasion of military duty. The United States holds that no naturalized citizen of this country can rightfully be held to account for military liability to his native land accruing subsequent to emigration therefrom, but this principle may be contested by countries with which the United States has not entered into treaties of naturalization. The latter countries may hold that naturalization of their citizens or subjects as citizens of other countries has no effect upon their original military obligation, or may deny the right of their citizens or subjects to become naturalized as citizens of other countries, in the absence of express consent or without the fulfilment of military obligations. More specific information as to the department's understanding of the laws of these countries concerning nationality and military obligations may be found in the department's circulars mentioned above.

It is important to observe that an alien who declares his intention to become a citizen of the United States does not, at the time of making such declaration, renounce allegiance to his original sovereign, but merely declares that he intends to do so. Such person does not, by his declaration of intention, acquire the status of a citizen of the United States.

DEPARTMENT OF STATE, Washington, August 14, 1914.

LINCOLN MEMORIAL.

THE Sixty-first Congress, third session, passed an act, approved February 9, 1911, "to provide a commission to secure plans and designs for a monument or memorial to the memory of Abraham Lincoln." The text of the act is as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That William H. Taft, * Shelby M. Cullom, Joseph G. Cannon, George Peabody Wetmore, Samuel Walker McCall, † H. D. Money, and Champ Clark are hereby created a commission to be known as the Lincoln Memorial Commission, to procure and determine upon a location, plan, and design for a monument or memorial in the city of Washington, District of Columbia, to the memory of Abraham Lincoln, subject to the approval of Congress.

SEC. 2. That in the discharge of its duties hereunder said commission is authorized to employ the services of such artists, sculptors, architects, and others as it shall determine to be necessary, and to avail itself of the services or advice of the Commission of Fine Arts, created by the act approved May 17, 1910.

SEC. 3. That the construction of the monument or memorial, herein and hereby authorized, shall be upon such site as shall be determined by the commission herein created, and approved by Congress, and said construction shall be entered upon as speedily as practicable after the plan and design therefor is determined upon and approved by Congress, and shall be prosecuted to completion, under the direction of said commission and the supervision of the Secretary of War, under a contract or contracts hereby authorized to be entered into by said Secretary in a total sum not exceeding two million dollars.

SEC. 4. That vacancies occurring in the membership of the commission shall be filled by appointment by the President of the United States.

By joint resolution, approved February 1, 1913, Congress approved the plan, design and location for the memorial recommended by the commission.

The memorial is being erected in Potomac Park on the axis of the United States Capitol and the Washington Monument, in accordance with plans prepared by Henry Bacon of New York City.

Work on the construction of the memorial was commenced on Lincoln's Birthday, February 12, 1914, when the first sod was turned by the Special Resident Commissioner, ex-Senator Blackburn. The foundation was completed and the cornerstone laid February 12, 1915. One million three hundred thousand dollars has been appropriated by Congress toward the construction, which is to cost $2,000,000, the memorial to be completed in four years from the commencement of work.

The foundation of the memorial, which is of reinforced concrete, rises 45 feet above the present grade, and will be surrounded by a mound of earth 1,000 feet in diameter. The exterior of the memorial proper is of white Colorado Yule marble, and the interior limestone. The only sculpture will be a colossal statue of Lincoln, designed by Daniel Chester French, flanked by two bronze panels bearing Lincoln's Gettysburg and Second Inaugural addresses.

* Joseph C. S. Blackburn, former United States Senator from Kentucky, was appointed by President Wilson on February 2, 1914, to fill the vacancy on the commission caused by the death of Mr. Cullom. † Thomas S. Martin, United States Senator from Virginia, was afterward appointed to fill the vacancy on the commission caused by the death of Senator Money. Secretary of the Memorial, Henry A. Vale, Office Building, United States Senate.

INTERNATIONAL POLAR COMMISSION.

ORGANIZED at Brussels, Belgium, May 29, 1908. *President*—————. *Vice-President*—Dr. Otto Nordenskjold, Sweden. *Secretary*—Rear-Admiral Robert E. Peary (U. S. N.).

MEMBERS—Prof. E. Bruckner, Prof. G. Trabert, Prof. E. Oberhummer and Prof. A. Grund, Austria; Baron Roland Eötvös, Rear-Admiral A. Gratzl, Prof. R. de Kövesligethy, and Dr. J. Kepes, Hungary; Capt. A. de Gomery de Gerlache, Brussels, and Prof. Georges Lecointe, Uccle, Belgium; Rear-Admiral Louis A. Goui, Chile; Capt. Holm, Capt. Koch, Capt. Amdrup, and Dr. la Cour, Denmark; Rear-Admiral Robert E. Peary, U. S. N., and Herbert L. Bridgman, United States; Admiral Umberto Cagni, R. N.; Prof. G. Cora, Capt. Marquis Giovanni Roncagli, and Cavalier Petro Molinelli, Italy; Dr. Van der Stok, Capt. J. M. Phaff, Dr. Van Everdingen, and J. L. H. Luymes, Netherlands; Prof. Mehedinti, Prof. Coculesco, and Prof. Stefan Popescu, Roumania; Prof. Rudmose Brown, Dr. William S. Bruce, Dr. Bartholomew, and Dr. Richardson, Great Britain; Gen. Lieut. Jules de Schokalsky and Dr. Knipovitch, Russia; Dr. Baron de Geer, Dr. Otto Nordenskjold, Dr. Hamberg and Dr. Andersson, Sweden; Prof. Erich Von Drygalski, Prof. Albrecht Penck, Dr. Supan and Dr. Wiechert, Germany; M. M. Maurice Zimmerman, and Ernest Gourdon, France.

NATURALIZATION LAWS.

THE following paraphrase and condensation of the naturalization laws of the United States have been revised by the Commissioner of Naturalization of the Department of Labor, and includes such minor changes in the law as were provided by the amendments embodied in the acts of Congress, approved June 25, 1910, and June 30, 1914.

The following courts alone have the power to naturalize aliens: United States District Courts now existing, or which may hereafter be established by Congress in any State, United States District Courts for the Territories of Hawaii and Alaska, also all courts of record in any State or Territory now existing, or which may hereafter be created, having a seal, a clerk and jurisdiction in actions at law or equity, or law and equity, in which the amount in controversy is unlimited.

The power to naturalize, conferred upon the above mentioned courts, is limited to persons residing within the geographical limits over which their respective jurisdiction extends.

DECLARATION OF INTENTION.

Any alien who is a white person, or of African nativity or African descent, is required, if he desires to become naturalized, to file a declaration of intention in the clerk's office of any court having jurisdiction over the place in which he lives, and such declaration may not be filed until the alien has reached the age of eighteen years. This declaration must contain information as to the name, age, occupation, time and place of arrival in the United States, and must further show that it is the declarant's *bona fide* intention to become a citizen of the United States and to renounce forever all allegiance and fidelity to any foreign prince, potentate, state or sovereignty, and particularly to the one of which he may be at the time a citizen or subject.

Aliens of the age of twenty-one years and upward, who have been honorably discharged from service in the armies of the United States, either regular or volunteer, are not required to make a declaration of intention.

Any alien, of the age of twenty-one years and upward, who has served five consecutive years in the United States Navy or one enlistment in the United States Marine Corps, may be admitted to citizenship (under the act of July 26, 1894) without any previous declaration of intention.

Under the act approved June 30, 1914, any alien of the age of twenty-one years and upward, who may under existing law become a citizen, who has served one enlistment of not less than four years in the United States Navy or Marine Corps, or who has completed four years in the United States Coast Guard, and received an honorable discharge or an ordinary discharge with recommendation for reenlistment, or has completed four years of honorable service in the naval auxiliary service, is admissible to citizenship, upon his petition, without a previous declaration of intention, and without proof of residence on shore.

The widow and children who are under age at the time that an alien who has made his declaration of intention has died, without having secured a certificate of naturalization, are also exempted from the necessity of filing a declaration of intention.

By act of June 25, 1910, any person who on May 1, 1905, was an inhabitant for five years and qualified to become a citizen of the United States and who for the five years preceding May 1, 1910, had resided in the United States continuously and who, because of misinformation in regard to his citizenship, had in good faith exercised the rights and duties of a citizen of the United States because of wrongful information and belief, may, upon proof of these facts satisfactory to a court having jurisdiction to naturalize aliens, petition for naturalization without filing the required declaration of intention upon compliance with the other requirements of the law.

PETITIONS FOR NATURALIZATION.

Not less than two years after an alien has filed his declaration of intention, and after not less than five years' continuous residence in the United States, he may file a petition for citizenship in any one of the courts above stated which has jurisdiction over the place in which he resides, provided he has lived at least one year continuously, immediately prior to the filing of such petition, in the State or Territory in which such place is located. This petition must be signed by the petitioner in his own handwriting and shall give his full name, place of residence, occupation, place of birth and the date thereof, the place from which he emigrated, and the date and place of his arrival in the United States. If such arrival occurred subsequent to the passage of the act of June 29, 1906, he must secure a certificate from the Department of Labor showing the fact of such arrival and the date and place thereof, for filing with the clerk of the court to be attached to his petition. If he is married he must state the name of his wife and, if possible, the country of her nativity and her place of residence at the time of the filing of his petition, and, if he has children, the name, date and place of birth and present place of residence of each living child. The petition must set forth that he is not a disbeliever in or opposed to organized government, or a member of or affiliated with any organization or body of persons teaching disbelief in or opposition to organized government; that he is not a polygamist or a believer in the practice of polygamy, and that he absolutely and forever renounces all allegiance and fidelity to any foreign country of which he may, at the time of filing such petition, be a citizen or subject. This petition must be verified at the time it is filed by the affidavit of two credible witnesses, who are citizens of the United States and who shall state that they have known the petitioner during his entire residence (not exceeding five years) in the State in which the petition is filed, which must be not less than one year, and that they have known him to be a resident of the United States continuously during the five years immediately preceding the filing of the petition; that during such time he acted as a man of good moral character, attached to the principles of the Constitution of the United States and well disposed to the good order and happiness of the same. If a portion of the five years has been passed by the petitioner in some other State than that in which he resides at the time of filing his petition the affidavit of the witnesses may verify so much of the petitioner's residence as has been passed in the State (not less than one year), and the portion of said five years' residence out of the State may be shown by depositions at the time of hearing on the petition.

No petition may be heard until the expiration of at least ninety days after it is filed nor within thirty days preceding a general election. At the hearing upon a petition, which shall be at a date fixed by order of the court, the witnesses are required to again attend and testify in open court so that the Judge or Judges thereof may be satisfied that the petitioner is qualified and that he has complied with all the requirements of the law.

Any alien who has borne an hereditary title or been a member of an order or nobility must renounce such title or position expressly before becoming naturalized. No alien may become naturalized, if physically capable, who does not speak the English language.

Aliens who are admitted to citizenship by order in open court will be required to take the oath of allegiance and thereafter will be entitled to a certificate of naturalization.

The law also provides as to those persons, who though not citizens owe permanent allegiance to the United States, and who may become residents of any State or organized Territory of the United States, that they may be naturalized upon compliance with all the requirements of the law, except that they will not be called upon to renounce allegiance to any foreign sovereignty.

At the time of filing his declaration of intention an alien is required to pay to the clerk of the court a fee of one dollar. At the time of filing a petition for naturalization a petitioner is required to pay to the clerk of the court a fee of four dollars. This latter fee is for the cost of recording the petition and hearing the case, as well as for the issuance, if the petition is granted, of the certificate of naturalization.

NATURALIZATION LAWS—*Continued.*

NATURALIZATION OF WOMEN.

The naturalization laws apply to unmarried alien women, and the foreign-born widows of aliens (who were not naturalized). The citizenship and allegiance of a woman married to an alien is governed by that of the husband, and it has been held by the courts that during the existence of the marriage relations with an alien, a woman can neither be naturalized upon her own petition, nor file a valid declaration of intention. A foreign-born widow of an alien may proceed upon the declaration of the deceased husband, and the alien wife of an insane alien may petition upon the declaration of the insane husband, provided the wife has made a homestead entry under the United States land laws.

CITIZENSHIP OF WOMEN.

Any woman who is now or may hereafter be married to a citizen, and who might herself be lawfully naturalized, shall be deemed a citizen. A foreign woman who acquires American citizenship by marriage retains her citizenship after the termination of the marital relation if she continues to reside in the United States, unless she makes formal renunciation thereof before a naturalization court; or, if she resides abroad, she may retain her citizenship by registering before a United States Consul within one year after the termination of the marital relation.

Loss of Citizenship by Marriage—An American woman who marries a foreigner takes the nationality of her husband. At the termination of the marital relation she may resume her American citizenship, if residing in the United States, by merely continuing to reside therein; or, if abroad, by registering before a United States Consul within one year, or by returning to reside in the United States. Under this law, the Supreme Court of the United States affirmed a decision of a California court that an American woman married to an alien cannot vote in that State.

CHINESE, JAPANESE, ETC.

The naturalization of Chinese is expressly prohibited by Section 14, Chapter 126, Laws of 1882.

Section 2169 of the United States Revised Statutes limits naturalization to aliens being free white persons and to aliens of African nativity or descent. Under this section the various courts have denied naturalization to Afghans, a Fiji Islander, Hindus (East Indians), Indians, Japanese, and other Mongolians, Malays (including a native of Burma), and members of the Asiatic races.

THE NATIONAL PURE FOOD LAW.

THE Pure Food act, approved June 30, 1906, is entitled "An act for preventing the manufacture, sale, or transportation of adulterated or misbranded or poisonous or deleterious foods, drugs, medicines and liquors, and for regulating traffic therein, and for other purposes." It took effect by its terms on January 1, 1907.

The first section of the act makes it unlawful for any person to manufacture within the District of Columbia or any Territory any article of food or drug which is adulterated or misbranded, under a penalty not to exceed $500, or one year's imprisonment, or both, at the discretion of the court, for the first offence, and not less than $1,000 or one year's imprisonment, or both, for each subsequent offence.

Sec. 2 of the act makes it applicable to food or drugs introduced into any State from any other State, and from or to any foreign country.

Sec. 3. That the Secretary of the Treasury, the Secretary of Agriculture, and the Secretary of Commerce and Labor shall make uniform rules and regulations for carrying out the provisions of this act, including the collection and examination of specimens of foods and drugs manufactured or offered for sale in the District of Columbia, or in any Territory of the United States, or which shall be offered for sale in unbroken packages in any State other than that in which they shall have been respectively manufactured or produced, or which shall be received from any foreign country, or intended for shipment to any foreign country, or which may be submitted for examination by the chief health, food, or drug officer of any State, Territory, or the District of Columbia, or at any domestic or foreign port through which such product is offered for interstate commerce, or for export or import between the United States and any foreign port or country.

Sec. 4. That the examinations of specimens of foods and drugs shall be made in the Bureau of Chemistry of the Department of Agriculture, or under the direction and supervision of such bureau, for the purpose of determining from such examinations whether such articles are adulterated or misbranded within the meaning of this act; and if it shall appear from any such examination that any of such specimens is adulterated or misbranded within the meaning of this act, the Secretary of Agriculture shall cause notice thereof to be given to the party from whom such sample was obtained. Any party so notified shall be given an opportunity to be heard, under such rules and regulations as may be prescribed as aforesaid, and if it appears that any of the provisions of this act have been violated by such party, then the Secretary of Agriculture shall at once certify the facts to the proper United States District-Attorney, with a copy of the results of the analysis or the examination of such article duly authenticated by the analyst or officer making such examination, under the oath of such officer. After judgment of the court, notice shall be given by publication in such manner as may be prescribed by the rules and regulations aforesaid.

Sec 5. That it shall be the duty of each District-Attorney to whom the Secretary of Agriculture shall report any violation of this act, or to whom any health or food or drug officer or agent of any State, Territory, or the District of Columbia shall present satisfactory evidence of any such violation, to cause appropriate proceedings to be commenced and prosecuted in the proper courts of the United States, without delay, for the enforcement of the penalties as in such case herein provided.

The sections descriptive of the articles which come within the scope of the act are as follows:

"Sec. 6. That the term 'drug,' as used in this act, shall include all medicines and preparations recognized in the United States Pharmacopoeia or National Formulary for internal or external use, and any substance or mixture of substances intended to be used for the cure, mitigation or prevention of disease of either man or other animals. The term 'food,' as used herein, shall include all articles used for food, drink, confectionery or condiment by man or other animals, whether simple, mixed or compound.

"Sec. 7. That for the purposes of this act an article shall be deemed to be adulterated:"

In case of drugs:

"First. If, when a drug is sold under or by a name recognized in the United States Pharmacopoeia or National Formulary, it differs from the standard of strength, quality or purity, as determined by the test laid down in the United States Pharmacopoeia or National Formulary official at the time of investigation: Provided, That no drug defined in the United States Pharmacopoeia or National Formulary shall be deemed to be adulterated under this provision if the standard of strength, quality or purity be plainly stated upon the bottle, box or other container thereof, although the standard may differ from that determined by the test laid down in the United States Pharmacopoeia or National Formulary.

"Second. If its strength or purity fall below the professed standard or quality under which it is sold."

In the case of confectionery:

"If it contain terra alba, barytes, talc, chrome yellow, or other mineral substance or poisonous color or flavor, or other ingredient deleterious or detrimental to health, or any vinous, malt or spirituous liquor or compound or narcotic drug."

In the case of food:

"First. If any substance has been mixed and packed with it so as to reduce, or lower, or injuriously affect its quality or strength.

"Second. If any substance has been substituted wholly or in part for the article.

"Third. If any valuable constituent of the article has been wholly or in part extracted.

"Fourth. If it be mixed, colored, powdered, coated, or stained in a manner whereby damage or inferiority is concealed.

"Fifth. If it contain any added poisonous or other added deleterious ingredient which may render such article injurious to health: Provided, That when in the preparation of food products for shipment they are preserved by any external application applied in such manner that the preservative is necessarily removed mechanically, or by maceration in water, or otherwise, and directions for the removal of said preservatives shall be printed on the covering or the package, the provisions of this act shall be construed as applying only when said products are ready for consumption.

"Sixth. If it consists in whole or in part of a filthy, decomposed, or putrid animal or vegetable substance, or any portion of an animal unfit for food, whether manufactured or not, or if it is the product of a diseased animal, or one that has died otherwise than by slaughter.

"Sec. 8. That the term 'misbranded,' as used herein, shall apply to all drugs, or articles of food, or articles which enter into the composition of food, the package or label of which shall bear any statement, design, or device regarding such article, or the ingredients or substances contained therein which shall be false or misleading in any particular, and to any food or drug product which is falsely branded as to the State, Territory, or country in which it is manufactured or produced.

"That for the purposes of this act an article shall also be deemed to be misbranded."

In case of drugs:

"First. If it be an imitation of or offered for sale under the name of another article.

"Second. If the contents of the package as originally put up shall have been removed, in whole or in part, and other contents shall have been placed in such package, or if the package fail to bear a statement on the label of the quantity or proportion of any alcohol, morphine, opium, cocaine, heroin, alpha or beta eucaine, chloroform, cannabis indica, chloral hydrate or acetanilide, or any derivative or preparation of any such substances contained therein.

"Third. If its package or label shall bear or contain any statement, design, or device regarding the curative or therapeutic effect of such article or any of the ingredients or substances contained therein, which is false and fraudulent."

In the case of food:

"First. If it be an imitation of or offered for sale under the distinctive name of another article.

"Second. If it be labelled or branded so as to deceive or mislead the purchaser, or purport to be a foreign product when not so, or if the contents of the package as originally put up shall have been removed in whole or in part and other contents shall have been placed in such package, or if it fail to bear a statement on the label of the quantity or proportion of any morphine, opium, cocaine, heroin, alpha or beta eucaine, chloroform, cannabis indica, chloral hydrate, or acetanilide, or any derivative or preparation of any such substance contained therein.

"Third. If in package form, the quantity of the contents be not plainly and conspicuously marked on the outside of the package in terms of weight, measure, or numerical count: Provided, however, That reasonable variations shall be permitted, and tolerances and also exemptions as to small packages shall be established by rules and regulations made in accordance with the provisions of Section 3 of this act. (The act of March 3, 1913, provides that no penalty of fine, imprisonment, or confiscation shall be enforced for any violation of its provisions as to domestic products prepared or foreign products imported prior to eighteen months after its passage.)

"Fourth. If the package containing it or its label shall bear any statement, design or device regarding the ingredients or the substances contained therein, which statement, design or device shall be false or misleading, in any particular: Provided, That an article of food which does not contain any added poisonous or deleterious ingredients shall not be deemed to be adulterated or misbranded in the following cases:

"First. In the case of mixtures or compounds which may be now or from time to time hereafter known as articles of food, under their own distinctive names, and not an imitation of or offered for sale under the distinctive name of another article, if the name be accompanied on the same label or brand with a statement of the place where said article has been manufactured or produced.

"Second. In the case of articles labelled, branded or tagged so as to plainly indicate that they are compounds, imitations or blends, and the word 'compound,' 'imitation' or 'blend,' as the case may be, is plainly stated on the package in which it is offered for sale: Provided, That the term 'blend' as used herein shall be construed to mean a mixture of like substances, not excluding harmless coloring or flavoring ingredients used for the purpose of coloring and flavoring only: And provided further, That nothing in this act shall be construed as requiring or compelling proprietors or

THE NATIONAL PURE FOOD LAW—*Continued.*

manufacturers of proprietary foods which contain no unwholesome added ingredients to disclose their trade formulas, except in so far as the provisions of this act may require to secure freedom from adulteration or misbranding.

"Sec. 9. That no dealer shall be prosecuted under the provisions of this act, when he can establish a guaranty signed by the wholesaler, jobber, manufacturer or other party residing in the United States, from whom he purchases such articles, to the effect that the same is not adulterated or misbranded within the meaning of this act, designating it."

The remaining provisions of the act provide the methods of prosecuting offenders and destroying goods imported or offered for import which are adulterated or falsely labelled.

SUMMARY OF RESULTS.

(Bureau of Chemistry, Carl L. Alsberg, Chief, Washington, D. C.)

During the fiscal year 1915 4,412 official samples of foods and drugs shipped in interstate commerce and 873 unofficial samples were collected and examined; 20,238 import shipments were examined at the import laboratories; 767 cases were transmitted to the Department of Justice, in 276 of which criminal proceedings and in 491 of which seizure proceedings were recommended; 501 criminal and 457 seizure cases, in all 958, were terminated in the courts.

ABOLISHING GUARANTY LEGEND AND SERIAL NUMBER ON FOOD AND DRUGS.

It has been made to appear that (1) dealers in food and drugs have on hand a great many labels and containers printed or marked prior to the date of Food Inspection Decision 153 (May 5, 1914); (2) these labels and containers bear the legend "Guaranteed by (name of guarantor) under the Food and Drugs Act, June 30, 1906," or a serial number issued by the United States Department of Agriculture, or both; (3) these labels and containers, when so printed or marked, complied with the rules and regulations for the enforcement of the Food and Drugs Act in effect at the time, and (4) great financial loss will result to such dealers, through their inability to use these labels and containers, if Regulation 9, as amended by Food Inspection Decisions 153 and 155, be enforced beginning on May 1, 1916.

Accordingly, proceedings under the Food and Drugs Act, based on the shipment in interstate or foreign commerce, or the sale in the District of Columbia or the Territories, prior to May 1, 1918, of any article of food or drugs, will not be instituted solely on account of the fact that the label thereon or the container thereof bears the legend "Guaranteed by (name of guarantor) under the Food and Drugs Act, June 30, 1906," or a serial number issued by the United States Department of Agriculture, or both, upon it being established that such label or container was so printed or marked prior to May 5, 1914.

INVENTIONS.

EPOCH-MAKING INVENTIONS BY PEOPLE OF THE UNITED STATES DURING THE LAST FIFTY YEARS, AS LISTED IN THE NATIONAL GEOGRAPHIC MAGAZINE.

Invention.	Inventor.	Date.	Invention.	Inventor.	Date.
Telephone	Bell	1876	Type-bar casting	Mergenthaler	1885
Typewriter	Sholes	1878	Chrome tanning	Schulz	1884
Cash register	Patterson	1885	Disk ploughs (modern type)	Hardy	1896
Incandescent lamp	Edison	1880	Welt machine	Goodyear	1871
Talking machine	Edison	1878	Electric lamp	Brush	1879
Electric furnace reduction	Cowles	1885	Recording adding machine	Burroughs	1888
Electrolytic alkali prod'ction	Castner	1890	Celluloid	Hyatt	1870
Transp'rent photograph film	Eastman	1888	Automatic knot-tying harvester machine	Appleby	1880
Motion-picture machine	Edison	1893	Water gas	Lowe	1875
Buttonhole-sewing machine	Reece	1881	Machine for making barbed wire	Glidden	1875
Carborundum	Acheson	1891	Rotary converter	Bradley	1887
Calcium carbide	Willson	1888	Automatic car-coupler	Janney	1873
Artificial graphite	Acheson	1896	High-speed steel	Taylor & White	1901
Split-phase induction motor	Tesla	1887	Dry-air process for blast furnace	Gayley	1894
Air brake	Westinghouse	1869	Block signals for railways	Robinson	1872
Electric welding	Thomson	1889	Trolley car	Van Depoele & Sprague	1884-87
Chain-stitch shoe-sewing machine	French & Myers	1881	Harveyized armor plate	Harvey	1891
Continuous-process match machine	Beecher	1888			
Single-type composing machine	Lanston	1887			

As compared with this list, note the following list of important inventions that have been made during the same period by foreigners, which has been compiled from information furnished by the 43 examining divisions of the Patent Office:

Invention.	Date.	Inventor.	Nationality.
Electric steel	1900	Heroult	French.
Dynamite	1867	Nobel	Swedish.
Artificial alizarene (dye)	1869	Graebe & Lieberman	German.
Siphon recorder	1874	Thompson	English.
Gas engine, Otto cycle	1877	Otto	German.
Wireless telegraphy	1900	Marconi	Italian.
Smokeless powder	1886	Vielle	French.
Diesel oil motor	1900	Diesel	German.
Centrifugal creamer	1880	De Laval	Swedish.
Manganese steel	1884	Hadfield	English.
Electric transformer	1883	Gaulard & Gibbs	English.
Cyanide process for extracting metal	1888	Arthur & De Forrest	English.
Mantle burner	1890	Welsbach	Austrian.
By-product coke oven	1893	Hoffman	Austrian.

UNITED STATES INTERNAL REVENUE RECEIPTS.

SUMMARY OF INTERNAL REVENUE RECEIPTS FROM 1907 TO 1916, INCLUSIVE.

Fiscal Years.	Spirits.	Tobacco.	Fermented Liquors.	Income Tax.	Fiscal Years.	Spirits.	Tobacco.	Fermented Liquors.	Income Tax.
1907	$156,336,902	$51,811,070	$59,567,818	.....	1912	$156,391,487	$70,590,151	$63,268,770	.....
1908	140,158,807	49,862,754	59,807,617	.....	1913	163,879,342	76,783,424	66,266,989	.....
1909	134,868,034	51,887,178	57,456,411	.....	1914	159,098,177	79,986,639	67,081,512	$71,381,274
1910	148,029,311	58,118,457	60,572,288	.....	1915	144,619,699	79,957,373	79,328,946	80,190,694
1911	155,279,858	67,005,950	64,367,777	.....	1916	158,682,429	a88,063,947	88,771,103	*124,937,252

Of the miscellaneous receipts received in 1916 (total $1,678,021), $819,654 was from playing cards, and $458,772 from penalties, etc. Receipts from oleomargarine $1,485,970. (a) Including $258,097 from sale of internal revenue stamps affixed to Philippine products, as provided for in the act of August 5, 1909. * Income tax from corporations $56,972,720, from individuals $67,943,594, from Alaska railroads $20,937.

INCOME TAX.

The receipts of income tax from individuals for year ended June 30, 1916 as classified to conform to provisions of the act, were as follows:

Income tax, normal	$23,995,777.28	$100,000 and not more than $250,000	$10,936,326.15
Income tax, additional, from net incomes exceeding:		$250,000 and not more than $500,000	6,393,858.64
$20,000 and not more than $50,000	6,091,775.71	Exceeding $500,000	12,647,862.91
$50,000 and not more than $75,000	4,071,361.94	Accepted offers in compromise	183,159.38
$75,000 and not more than $100,000	3,623,472.62	Total	$67,943,594.63

Supplemental statement showing the receipts under act of October 3, 1913, during the fiscal year ended June 30, 1916.

States, Etc.	Corporation Income Tax.	Individual Income Tax.	States, Etc.	Corporation Income Tax.	Individual Income Tax.
Alabama	$201,568.82	$109,983.51	Nebraska	$332,705.69	$160,206.31

* The collections credited to Porto Rico were returned from the following districts, viz: First district of New York, $98,995.71; second district of New York, $489,556.07; total, $588,551.78.

WITHDRAWALS FOR CONSUMPTION.

The quantities of distilled spirits, fermented liquors, manufactured tobacco, snuff, cigars, cigarettes, oleomargarine, etc., on which tax was paid are as follows:

Articles Taxed.	Fiscal Year Ended June 30. 1915.	1916.
Spirits distilled from apples, peaches, grapes, pears, pineapples, oranges, apricots, berries, prunes, figs, and cherries.....gals..	2,516,054	2,984,743
Spirits distilled from materials other than apples, peaches, grapes, pears, pineapples, oranges, apricots, berries, prunes, figs, and cherries.....gals..	121,639,124	133,241,785
Fermented liquors.....bbls..	59,746,701	58,564,508
Cigars, weighing more than 3 pounds per thousand.....number..	7,058,122,323	7,390,183,170
Cigars, weighing not more than 3 pounds per thousand.....number..	972,263,280	947,537,360
Cigarettes, weighing more than 3 pounds per thousand.....number..	15,703,061	21,560,406
Cigarettes, weighing not more than 3 pounds per thousand.....number..	16,740,476,912	21,066,196,672
Snuff.....lbs..	29,839,074	33,170,680
Tobacco, chewing and smoking.....lbs..	402,474,245	417,235,928
Oleomargarine.....lbs..	143,268,730	†150,523,725
Adulterated butter.....lbs..	19,737	192,222
Process or renovated butter.....lbs..	39,351,564	35,021,016

NOTE—The quantity of mixed flour withdrawn cannot be stated, owing to the variable number of pounds taxed.

† Includes 3,983,493 pounds (colored) at 10 cents and 146,540,232 pounds (uncolored) at one-fourth of 1 cent per pound.

Receipts of tax on Porto Rican products—spirits, cigars, and cigarettes—year ended June 30, 1916, $588,551; on cigars and cigarettes from Philippines, $258,097.

SPECIAL TAXES AND RATES—Rectifiers of less than 500 barrels a year, $100; rectifiers of 500 barrels or more a year, $200.

Wholesale liquor dealers, $100; retail liquor dealers, $25.

Wholesale dealers in malt liquors, $50; retail dealers in malt liquors, $20.

Manufacturers of stills, $50; and for stills or worms, manufactured, each, $20.

Brewers: Annual manufacture less than 500 barrels, $50; annual manufacture 500 barrels or more, $100.

Manufacturers of filled cheese, $400; wholesale dealers in filled cheese, $250; retail dealers in filled cheese, $12.

Manufacturers of oleomargarine, $600; wholesale dealers in oleomargarine artificially colored in imitation of butter, $480; wholesale dealers in oleomargarine free from artificial coloration, $200; retail dealers in oleomargarine artificially colored in imitation of butter, $48; retail dealers in oleomargarine free from artificial coloration, $6.

Manufacturers of adulterated butter, $600; wholesale dealers in adulterated butter, $480; retail dealers in adulterated butter, $48; manufacturers of process or renovated butter, $50; manufacturers, packers, or repackers of mixed flour, $12.

DISTILLED SPIRITS, ETC.—Distilled spirits, per gallon, $1.10; stamps for distilled spirits intended for export, each, 5 and 10 cents. Case stamps for spirits bottled in bond, 10 cents. Grape brandy used in the fortification of sweet wines, per taxable gallon, 55 cents.

Still wines, 2 cents per quart; champagne and other sparkling wines, including all carbonate wines, 20 cents per quart; and liqueurs, cordials, or similar compounds, 6 cents per quart—domestic and imported.

FERMENTED LIQUORS—Fermented liquors per barrel, $1 and $1.50; if stored in warehouse, 50 cents per barrel.

TOBACCO, SNUFF, CIGARS, AND CIGARETTES—Tobacco, however prepared, manufactured, and sold, or removed for consumption or sale, per lb., 8 cents; snuff, however prepared, manufactured, and sold, or removed for consumption or sale, per lb., 8 cents.

Cigars, weighing more than 3 lbs. per thousand, $3; cigars weighing not more than 3 lbs. per thousand, 75 cents; cigarettes weighing more than 3 lbs. per thousand, $3.60; cigarettes weighing not more than 3 lbs. per thousand, $1.25.

OLEOMARGARINE, ADULTERATED BUTTER, AND PROCESS OR RENOVATED BUTTER—Oleomargarine, domestic, artificially colored in imitation of butter, per lb. 10 cents; oleomargarine, free from coloration that causes it to look like butter, of any shade of yellow, per lb., ¼ of 1 cent; oleomargarine, imported from foreign countries, per lb., 15 cents.

Adulterated butter, per lb., 10 cents; process or renovated butter, per lb., ¼ of 1 cent.

FILLED CHEESE—Filled cheese, per lb., 1 cent; same, imported, per lb., 8 cents.

MIXED FLOUR—Mixed flour, per barrel of 196 lbs., or more than 98 lbs., 4 cents; half barrel of 98 lbs., or more than 49 lbs., 2 cents; quarter barrel of 49 lbs., or more than 24½ lbs., 1 cent; eighth barrel of 24½ lbs. or less, ½ cent.

MISCELLANEOUS—Playing cards, per pack, 2 cents. Opium, manufactured for smoking purposes, per lb., $300. White phosphorous matches, per hundred, 2 cents.

COST OF COLLECTION.

The cost of collecting the internal revenue for the fiscal year 1916 was approximately $14.02 per thousand dollars, or 1.40 per cent., which is the lowest annual cost of the bureau. The cost of collection the previous year, in which the largest sum was collected prior to the fiscal year 1916, was $16.37 per thousand dollars, or 1.64 per cent. The average cost of collection since the establishment of the bureau is $24.26 per thousand dollars, or 2.43 per cent.

EMERGENCY REVENUE.

Public Resolution No. 2, approved December 17, 1915 (H. J. Res. 59), extended the provisions of the act of October 22, 1914, to and including December 31, 1916. The revenue collected thereunder during the fiscal year ended June 30, 1916, and included in the total ordinary receipts was as follows:

Wines, champagne, liqueurs, cordials, etc.....	$2,631,529.98
Grape brandy used in fortification of sweet wines.....	491,202.91
Fermented liquors (additional 50 cents per barrel).....	29,311,164.50
Special taxes relating to manufacture and sale of tobacco, cigars, and cigarettes.....	2,739,853.05
Special taxes, including bankers, brokers, theatres, bowling alleys, etc.....	6,908,108.21
Schedule A (documentary stamps, etc.).....	38,110,282.49
Schedule B (perfumery, cosmetics, etc.).....	4,086,160.99
Total.....	$84,278,302.13

FEDERAL INCOME-TAX PAYERS.

AN ANALYSIS FOR CALENDAR YEAR 1914 AS SHOWN IN THE 1915 ANNUAL REPORT OF THE COMMISSIONER OF INTERNAL REVENUE.

Income taxes were paid to the Federal Government by 357,515 persons. Of this number 282,806 were married, 51,729 single men, 22,980 single women, and 3,985 married women making returns separate from those of their husbands.

INCOMES THAT PAID TAX.

174 incomes exceeding $500,000.	1,189 betw'n $100,000 and $150,000.	8,672 betw'n $20,000 and $25,000.
69 between $400,000 and $500,000.	1,501 betw'n $75,000 and $100,000.	15,790 betw'n $15,000 and $20,000.
147 between $300,000 and $400,000.	3,660 between $50,000 and $75,000.	34,141 betw'n $10,000 and $15,000.
130 between $250,000 and $300,000.	3,185 between $40,000 and $50,000.	127,448 betw'n $5,000 and $10,000.
233 between $200,000 and $250,000.	6,008 between $30,000 and $40,000.	66,525 betw'n $4,000 and $5,000.
406 between $150,000 and $200,000.	5,483 between $25,000 and $30,000.	82,754 betw'n $3,000 and $4,000.

BRITISH INCOME-TAX PAYERS.

(American Consular Report, May, 1915.)

It is probable that the total number of income-tax payers in Great Britain is somewhat under 1,000,000, many workingmen escaping payment of the tax because of the difficulty of obtaining an accurate record of individual earnings. In 1914 there were 709,356 assessments on individuals with incomes between £160 and £10,000 ($780 and $48,665) and 390 whose incomes exceeded the latter figure, the gross income of the 709,746 individuals being $1,228,226,600. Classified by incomes these tax payers numbered:

Income.	Number of Assessments.	Gross Amount of Income.	Income.	Number of Assessments.	Gross Amount of Income.
$780 to $975	257,499	$230,059,500	$4,380 to $4,865	7,445	$35,199,100
$975 to $1,460	237,434	286,987,400	$4,865 to $9,735	16,363	110,137,900
$1,460 to $1,945	85,557	147,357,500	$9,735 to $14,600	3,381	40,748,000
$1,945 to $2,435	46,063	102,762,600	$14,600 to $19,465	1,231	20,916,800
$2,435 to $2,920	23,411	63,537,800	$19,465 to $24,330	678	15,155,100
$2,920 to $3,405	13,383	42,772,100	$24,330 to $48,665	882	30,320,100
$3,405 to $3,895	10,250	37,844,200	$48,665 and over	390	40,440,400
$3,895 to $4,380	5,779	23,988,100			

The foregoing schedule does not indicate the returns made by 55,949 firms nor the returns on incomes of public companies and local authorities.

NATIONAL ASSOCIATION OF CREDIT MEN.

The National Association of Credit Men has for its object the improving and safeguarding of the conditions under which credit is extended through the co-operation of its 20,780 members. It aims to secure the enactment of laws beneficial to the honest debtor and creditor. It strives for better mercantile agency service, the prevention of commercial fraud, the bettering of credit department methods, the dissemination of literature of general interest to credit men and the education of his customers in the use of the financial statement, observance of discount terms, etc.

The work is done through a number of standing committees appointed by the national organization, which work with the co-operation of similar committees appointed by one hundred and fifteen affiliated branches. A number of the local branches operate bureaus for the exchange of credit information between their members, and bureaus for the friendly adjustment of insolvent estates.

President—Chas. D. Joyce, Philadelphia, Pa. *First Vice-President*—S. J. Whitlock, Chicago, Ill. *Second Vice-President*—Frank S. Flagg, New York City. *Secretary-Treasurer*—J. H. Tregoe, 41 Park Row, New York City.

GENERAL REVENUE LAW.

An act to increase the revenue, and for other purposes.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

TITLE I.—INCOME TAX.

PART I.—ON INDIVIDUALS.

SECTION 1. (a) That there shall be levied, assessed, collected and paid annually upon the entire net income received in the preceding calendar year from all sources by every individual, a citizen or resident of the United States, a tax of 2 p. c. upon such income; and a like tax shall be levied, assessed, collected, and paid annually upon the entire net income received in the preceding calendar year from all sources within the United States by every individual, a non-resident alien, including interest on bonds, notes, or other interest-bearing obligations of residents, corporate or otherwise.

(b) In addition to the income tax imposed by subdivision (a) of this section (herein referred to as the normal tax) there shall be levied, assessed, collected, and paid upon the total net income of every individual, or, in the case of a non-resident alien, the total net income received from all sources within the United States, an additional income tax (herein referred to as the additional tax) of 1 p. c. per annum upon the amount by which such total net income exceeds $20,000 and does not exceed $40,000, 2 p. c. per annum upon the amount by which such total net income exceeds $40,000 and does not exceed $60,000, 3 p. c. per annum upon the amount by which such total net income exceeds $60,000 and does not exceed $80,000, 4 p. c. per annum upon the amount by which such total net income exceeds $80,000 and does not exceed $100,000, 5 p. c. per annum upon the amount by which such total net income exceeds $100,000 and does not exceed $150,000, 6 p. c. per annum upon the amount by which such total net income exceeds $150,000 and does not exceed $200,000, 7 p. c. per annum upon the amount by which such total net income exceeds $200,000 and does not exceed $250,000, 8 p. c. per annum upon the amount by which such total net income exceeds $250,000 and does not exceed $300,000, 9 p. c. per annum upon the amount by which such total net income exceeds $300,000 and does not exceed $500,000, 10 p. c. per annum upon the amount by which such total net income exceeds $500,000 and does not exceed $1,000,000, 11 p. c. per annum upon the amount by which such total net income exceeds $1,000,000 and does not exceed $1,500,000, 12 p. c. per annum upon the amount by which such total net income exceeds $1,500,000 and does not exceed $2,000,000, and 13 p. c. per annum upon the amount by which such total net income exceeds $2,000,000.

For the purpose of the additional tax there shall be included as income the income derived from dividends on the capital stock or from the net earnings of any corporation, joint-stock company or association, or insurance company, except that in the case of non-resident aliens such income derived from sources without the United States shall not be included.

All the provisions of this title relating to the normal tax on individuals, so far as they are applicable and are not inconsistent with this subdivision, and section 3, shall apply to the imposition, levy, assessment, and collection of the additional tax imposed under this subdivision.

(c) The foregoing normal and additional tax rates shall apply to the entire net income, except as hereinafter provided, received by every taxable person in the calendar year 1916 and in each calendar year thereafter.

INCOME DEFINED.

SEC. 2. (a) That, subject only to such exemptions and deductions as are hereinafter allowed, the net income of a taxable person shall include gains, profits, and income derived from salaries, wages, or compensation for personal service of whatever kind and in whatever form paid, or from professions, vocations, businesses, trade, commerce, or sales, or dealings in property, whether real or personal, growing out of the ownership or use of or interest in real or personal property, also from interest, rent, dividends, securities, or the transaction of any business carried on for gain or profit, or gains or profits and income derived from any source whatever: *Provided*, That the term "dividends" as used in this title shall be held to mean any distribution made or ordered to be made by a corporation, joint-stock company, association, or insurance company, out of its earnings or profits accrued since March 1, 1913, and payable to its shareholders, whether in cash or in stock of the corporation, joint-stock company, association, or insurance company which stock dividend shall be considered income to the amount of its cash value.

(b) Income received by estates of deceased persons during the period of administration or settlement of the estate, shall be subject to the normal and additional tax and taxed to their estates, and also such income of estates or any kind of property held in trust, including such income accumulated in trust for the benefit of unborn or unascertained persons, or persons with contingent interests and income held for future distribution under the terms of the will or trust shall be likewise taxed, the tax in each instance, except when the income is returned for the purpose of the tax by the beneficiary to be assessed to the executor, administrator, or trustee as the case may be: *Provided*, That where the income is to be distributed annually or regularly between existing heirs or legatees, or beneficiaries the rate of tax and method of computing the same shall be based in each case upon the amount of the individual share to be distributed.

Such trustees, executors, administrators, and other fiduciaries are hereby indemnified against the claims or demands of every beneficiary for all payments of taxes which they shall be required to make under the provisions of this title and they shall have credit for the amount of such payments against the beneficiary or principal in any accounting which they make as such trustees or other fiduciaries.

(c) For the purpose of ascertaining the gain derived from the sale or other disposition of property real, personal or mixed, acquired before March 1, 1913, the fair market price or value of such property as of March 1, 1913, shall be the basis for determining the amount of such gain derived.

ADDITIONAL TAX INCLUDES UNDISTRIBUTED PROFITS.

SEC. 3. For the purpose of the additional tax, the taxable income of any individual shall include the share to which he would be entitled of the gains and profits, if divided or distributed, whether divided or distributed or not, of all corporations, joint-stock companies or associations, or insurance companies however created or organized, formed or fraudulently availed of for the purpose of preventing the imposition of such tax through the medium of permitting such gains and profits to accumulate instead of being divided or distributed, and the fact that any such corporation, joint-stock company or association, or insurance company, is a mere holding company, or that the gains and profits are permitted to accumulate beyond the reasonable needs of the business, shall be *prima facie* evidence of a fraudulent purpose to escape such tax; but the fact that the gains and profits are in any case permitted to accumulate and become surplus shall not be construed as evidence of a purpose to escape the said tax in such case unless the Secretary of the Treasury shall certify that in his opinion such accumulation is unreasonable for the purposes of the business. When requested by the Commissioner of Internal Revenue, or any district collector of internal revenue, such corporation, joint-stock company or association, or insurance company shall forward to him a correct statement of such gains and profits and the names and addresses of the individuals or shareholders who would be entitled to the same if divided or distributed.

INCOME EXEMPT FROM LAW

SEC. 4. The following income shall be exempt from the provisions of this title:

The proceeds of life insurance policies paid to individual beneficiaries upon the death of the insured; the amount received by the insured, as a return of

premium or premiums paid by him under life insurance, endowment, or annuity contracts, either during the term or at the maturity of the term mentioned in the contract or upon the surrender of the contract; the value of property acquired by gift, bequest, devise, or descent (but the income from such property shall be included as income); interest upon the obligations of a State or any political subdivision thereof or upon the obligations of the United States or its possessions or securities issued under the provisions of the Federal Farm Loan Act of July 17, 1916; the compensation of the present President of the United States during the term for which he has been elected, and the Judges of the Supreme and inferior courts of the United States now in office, and the compensation of all officers and employés of a State, or any political subdivision thereof, except when such compensation is paid by the United States Government.

DEDUCTIONS ALLOWED.

SEC. 5. That in computing net income in the case of a citizen or resident of the United States—

(a) For the purpose of the tax there shall be allowed as deductions—

First—The necessary expenses actually paid in carrying on any business or trade, not including personal, living, or family expenses;

Second—All interest paid within the year on his indebtedness;

Third—Taxes paid within the year imposed by the authority of the United States, or its Territories, or possessions, or any foreign country, or under the authority of any State, county, school district, or municipality, or other taxing subdivision of any State, not including those assessed against local benefits;

Fourth—Losses actually sustained during the year, incurred in his business or trade, or arising from fires, storms, shipwreck, or other casualty, and from theft, when such losses are not compensated for by insurance or otherwise: *Provided*, That for the purpose of ascertaining the loss sustained from the sale or other disposition of property, real, personal, or mixed, acquired before March 1, 1913, the fair market price or value of such property as of March 1, 1913, shall be the basis for determining the amount of such loss sustained;

Fifth—In transactions entered into for profit but not connected with his business or trade, the losses actually sustained therein during the year to an amount not exceeding the profits arising therefrom;

Sixth—Debts due to the taxpayer actually ascertained to be worthless and charged off within the year;

Seventh—A reasonable allowance for the exhaustion, wear and tear of property arising out of its use or employment in the business or trade;

Eighth—(a) In the case of oil and gas wells a reasonable allowance for actual reduction in flow and production to be ascertained not by the flush flow, but by the settled production or regular flow; (b) in the case of mines a reasonable allowance for depletion thereof not to exceed the market value in the mine of the product thereof, which has been mined and sold during the year for which the return and computation are made, such reasonable allowance to be made in the case of both (a) and (b) under rules and regulations to be prescribed by the Secretary of the Treasury: *Provided*, That when the allowances authorized in (a) and (b) shall equal the capital originally invested, or in case of purchase made prior to March 1, 1913, the fair market value as of that date, no further allowance shall be made. No deduction shall be allowed for any amount paid out for new buildings, permanent improvements, or betterments, made to increase the value of any property or estate, and no deduction shall be made for any amount of expense of restoring property or making good the exhaustion thereof for which an allowance is or has been made.

CREDITS ALLOWED.

(b) For the purpose of the normal tax only, the income embraced in a personal return shall be credited with the amount received as dividends upon the stock or from the net earnings of any corporation, joint-stock company or association, trustee, or insurance company, which is taxable upon its net income as hereinafter provided;

(c) A like credit shall be allowed as to the amount of income, the normal tax upon which has been paid or withheld for payment at the source of the income under the provisions of this title.

NON-RESIDENT ALIENS.

SEC. 6. That in computing net income in the case of a non-resident alien—

(a) For the purpose of the tax there shall be allowed as deductions—

First—The necessary expenses actually paid in carrying on any business or trade conducted by him within the United States, not including personal, living, or family expenses;

Second—The proportion of all interest paid within the year by such person on his indebtedness which the gross amount of his income for the year derived from sources within the United States bears to the gross amount of his income for the year derived from all sources within and without the United States, but this deduction shall be allowed only if such person includes in the return required by section 8 all the information necessary for its calculation;

Third—Taxes paid within the year imposed by the authority of the United States, or its Territories, or possessions, or under the authority of any State, county, school district, or municipality, or other taxing subdivision of any State, paid within the United States, not including those assessed against local benefits;

Fourth—Losses actually sustained during the year, incurred in business or trade conducted by him within the United States, and losses of property within the United States arising from fires, storms, shipwreck, or other casualty, and from theft, when such losses are not compensated for by insurance or otherwise: *Provided*, That for the purpose of ascertaining the amount of such loss or losses sustained in trade, or speculative transactions not in trade, from the same or any kind of property acquired before March 1, 1913, the fair market price or value of such property as of March 1, 1913, shall be the basis for determining the amount of such loss or losses sustained;

Fifth—In transactions entered into for profit but not connected with his business or trade, the losses actually sustained therein during the year to an amount not exceeding the profits arising therefrom in the United States;

Sixth—Debts arising in the course of business or trade conducted by him within the United States due to the taxpayer actually ascertained to be worthless and charged off within the year;

Seventh—A reasonable allowance for the exhaustion, wear and tear of property within the United States arising out of its use or employment in the business or trade; (a) in the case of oil and gas wells a reasonable allowance for actual reduction in flow and production to be ascertained not by the flush flow, but by the settled production or regular flow; (b) in the case of mines a reasonable allowance for depletion thereof not to exceed the market value in the mine of the product thereof which has been mined and sold during the year for which the return and computation are made, such reasonable allowance to be made in the case of both (a) and (b) under rules and regulations to be prescribed by the Secretary of the Treasury: *Provided*, That when the allowance authorized in (a) and (b) shall equal the capital originally invested, or in case of purchase made prior to March 1, 1913, the fair market value as to that date, no further allowance shall be made. No deduction shall be allowed for any amount paid out for new buildings, permanent improvements, or betterments, made to increase the value of any property or estate, and no deduction shall be made for any amount of expense of restoring property or making good the exhaustion thereof for which an allowance is or has been made.

(b) There shall also be allowed the credits specified by subdivisions (b) and (c) of section 5.

PERSONAL EXEMPTION.

SEC. 7. (a) That for the purpose of the normal tax only, there shall be allowed as an exemption in the nature of a deduction from the amount of the net income of each of said persons, ascertained as provided herein, the sum of $3,000, plus $1,000 additional if the person making the return be a head of a family or a married man with a wife living with him, or plus the sum of $1,000 additional if the person making the return be a married woman with a husband living with her; but in no event shall this

additional exemption of $1,000 be deducted by both a husband and a wife: *Provided*, That only one deduction of $4,000 shall be made from the aggregate income of both husband and wife when living together: *Provided further*, That guardians or trustees shall be allowed to make this personal exemption as to income derived from the property of which such guardian or trustee has charge in favor of each ward or *cestui que* trust: *Provided further*, That in no event shall a ward or *cestui que* trust be allowed a greater personal exemption than $3,000, or, if married, $4,000, as provided in this paragraph, from the amount of net income received from all sources. There shall also be allowed an exemption from the amount of the net income of estates of deceased persons during the period of administration or settlement, and of trust or other estates the income of which is not distributed annually or regularly under the provisions of paragraph (b), section 2, the sum of $3,000 including such deductions as are allowed under section 5.

(b) A non-resident alien individual may receive the benefit of the exemption provided for in this section only by filing or causing to be filed with the Collector of Internal Revenue a true and accurate return of his total income, received from all sources, corporate or otherwise, in the United States, in the manner prescribed by this title; and in case of his failure to file such return the Collector shall collect the tax on such income, and all property belonging to such non-resident alien individual shall be liable to distraint for the tax.

RETURNS.

SEC. 8. (a) The tax shall be computed upon the net income, as thus ascertained, of each person subject thereto received in each preceding calendar year ending December 31.

(b) On or before March 1, 1917, and the first day of March in each year thereafter, a true and accurate return under oath shall be made by each person of lawful age except as hereinafter provided, having a net income of $3,000 or over for the taxable year to the Collector of Internal Revenue for the district in which such person has his legal residence or principal place of business, or if there be no legal residence or place of business in the United States, then with the Collector of Internal Revenue at Baltimore, Md., in such form as the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, shall prescribe, setting forth specifically the gross amount of income from all separate sources, and from the total thereof deducting the aggregate items of allowances herein authorized: *Provided*, That the Commissioner of Internal Revenue shall have authority to grant a reasonable extension of time, in meritorious cases, for filing returns of income by persons residing or travelling abroad who are required to make and file returns of income and who are unable to file said returns on or before March 1 of each year: *Provided further*, That the aforesaid return may be made by an agent when by reason of illness, absence, or non-residence the person liable for said return is unable to make and render the same, the agent assuming the responsibility of making the return and incurring penalties provided for erroneous false, or fraudulent return.

(c) Guardians trustees, executors, administrators, receivers, conservators, and all persons, corporations, or associations acting in any fiduciary capacity, shall make and render a return of the income of the person, trust, or estate for whom or which they act, and be subject to all the provisions of this title which apply to individuals. Such fiduciary shall make oath that he has sufficient knowledge of the affairs of such person, trust, or estate to enable him to make such return and that the same is, to the best of his knowledge and belief, true and correct, and be subject to all the provisions of this title which apply to individuals: *Provided*, That a return made by one of two or more joint fiduciaries filed in the district where such fiduciary resides, under such regulations as the Secretary of the Treasury may prescribe, shall be a sufficient compliance with the requirements of this paragraph.

(d) All persons, firms, companies, co-partnerships, corporations, joint-stock companies or associations, and insurance companies, except as hereinafter provided in whatever capacity acting, having the control, receipt, disposal, or payment of fixed or determinable annual or periodical gains, profits, and income of another individual subject to tax, shall in behalf of such person deduct and withhold from the payment an amount equivalent to the normal tax upon the same and make and render a return, as aforesaid, but separate and distinct, of the portion of the income of each person from which the normal tax has been thus withheld, and containing also the name and address of such person or stating that the name and address or the address, as the case may be, are unknown: *Provided*, That the provision requiring the normal tax of individuals to be deducted and withheld at the source of the income shall not be construed to require the withholding of such tax according to the 2 p. c. normal tax rate herein prescribed until on and after January 1, 1917, and the law existing at the time of the passage of this act shall govern the amount withheld or to be withheld at the source until January 1, 1917.

That in either case mentioned in subdivisions (c) and (d) of this section no return of income not exceeding $3,000 shall be required, except as in this title provided.

(e) Persons carrying on business in partnership shall be liable for income tax only in their individual capacity, and the share of the profits of the partnership to which any taxable partner would be entitled if the same were divided, whether divided or otherwise, shall be returned for taxation and the tax paid under the provisions of this title: *Provided*, That from the net distributive interests on which the individual members shall be liable for tax, normal and additional, there shall be excluded their proportionate shares received from interest on the obligations of a State or any political or taxing subdivision thereof, and upon the obligations of the United States and its possessions, and all taxes paid to the United States or to any possession thereof, or to any State, county, or taxing subdivision of a State, and that for the purpose of computing the normal tax there shall be allowed a credit, as provided by section 5, subdivision (b), for their proportionate share of the profits derived from dividends. And such partnership, when requested by the Commissioner of Internal Revenue, or any district collector, shall render a correct return of the earnings, profits, and income of the partnership, except income exempt under section 4 of this act, setting forth the item of the gross income and the deductions and credits allowed by this title, and the names and addresses of the individuals who would be entitled to the net earnings, profits, and income, if distributed.

(f) In every return shall be included the income derived from dividends on the capital stock or from the net earnings of any corporation, joint-stock company or association, or insurance company, except that in the case of non-resident aliens such income derived from sources without the United States shall not be included.

(g) An individual keeping accounts upon any basis other than that of actual receipts and disbursements, unless such other basis does not clearly reflect his income, may, subject to regulations made by the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, make his return upon the basis upon which his accounts are kept, in which case the tax shall be computed upon his income as so returned.

ASSESSMENT AND ADMINISTRATION.

SEC. 9. (a) That all assessments shall be made by the Commissioner of Internal Revenue and all persons shall be notified of the amount for which they are respectively liable on or before the first day of June of each successive year, and said amounts shall be paid on or before the fifteenth day of June, except in cases of refusal or neglect to make such return and in cases of erroneous, false, or fraudulent returns, in which cases the Commissioner of Internal Revenue shall, upon the discovery thereof, at any time within three years after said return is due, or has been made, make a return upon information obtained as provided for in this title or by existing law, or require the necessary corrections to be made, and the assessment made by the Commissioner of Internal Revenue thereon shall be paid by such person or persons immediately upon notification of the amount of such assessment; and to any sum or sums due and unpaid after June 15 in any year, and for ten days after notice and demand thereof by the Collector, there shall be added the sum of 5 p. c. on the amount of tax unpaid, and interest at the rate of 1 p. c. per month upon said tax from the

time the same became due, except from the estates of insane, deceased, or insolvent persons.

(b) All persons, firms, co-partnerships, companies, corporations, joint-stock companies, or associations, and insurance companies, in whatever capacity acting, including lessees or mortgagors of real or personal property, trustees acting in any trust capacity, executors, administrators, receivers, conservators, employers, and all officers and employés of the United States having the control, receipt, custody, disposal, or payment of interest, rent, salaries, wages, premiums, annuities, compensation, remuneration, emoluments, or other fixed or determinable annual or periodical gains, profits, and income of another person, exceeding $3,000 for any taxable year, other than income derived from dividends on capital stock, or from the net earnings of corporations and joint-stock companies or associations, or insurance companies, the income of which is taxable under this title, who are required to make and render a return in behalf of another, as provided herein, to the Collector of his, her, or its district, are hereby authorized and required to deduct and withhold from such annual or periodical gains, profits, and income such sum as will be sufficient to pay the normal tax imposed thereon by this title, and shall pay the amount withheld to the officer of the United States Government authorized to receive the same; and they are each hereby made personally liable for such tax, and they are each hereby indemnified against every person, corporation, association, or demand whatsoever for all payments which they shall make in pursuance and by virtue of this title.

In all cases where the income tax of a person is withheld and deducted and paid or to be paid at the source, such person shall not receive the benefit of the personal exemption allowed in section 7 of this title except by an application for refund of the tax unless he shall, not less than thirty days prior to the day on which the return of his income is due, file with the person who is required to withhold and pay tax for him a signed notice in writing claiming the benefit of such exemption and thereupon no tax shall be withheld upon the amount of such exemption: *Provided*, That if any person for the purpose of obtaining any allowance or reduction by virtue of a claim for such exemption, either for himself or for any other person, knowingly makes any false statement or false or fraudulent representation, he shall be liable to a penalty of not exceeding $300.

And where the income tax is paid or to be paid at the source, no person shall be allowed the benefit of any deduction provided for in sections 5 or 6 of this title unless he shall, not less than thirty days prior to the day on which the return of his income is due, either (1) file with the person who is required to withhold and pay tax for him a true and correct return of his gains, profits, and income from all other sources, and also the deductions asked for, and the showing thus made shall then become a part of the return to be made in his behalf by the person required to withhold and pay the tax, or (2) likewise make application for deductions to the Collector of the district in which return is made or to be made for him: *Provided*, That when any amount allowable as a deduction is known at the time of receipt of fixed annual or periodical income by an individual subject to tax, he may file with the person, firm, or corporation making the payment a certificate, under penalty for false claim, and in such form as shall be prescribed by the Commissioner of Internal Revenue, stating the amount of such deduction and making a claim for an allowance of the same against the amount of tax otherwise required to be deducted and withheld at the source of the income, and such certificate shall likewise become a part of the return to be made in his behalf.

If such person is absent from the United States, or is unable owing to serious illness to make the return and application above provided for, the return and application may be made by an agent, he making oath that he has sufficient knowledge of the affairs and property of his principal to enable him to make a full and complete return, and that the return and application made by him are full and complete.

(c) The amount of the normal tax hereinbefore imposed shall be deducted and withheld from fixed or determinable annual or periodical gains, profits, and income derived from interest upon bonds and mortgages, or deeds of trust or other similar obligations of corporations, joint-stock companies, associations, and insurance companies, whether payable annually or at shorter or longer periods, although such interest does not amount to $3,000, subject to the provisions of this title requiring the tax to be withheld at the source and deducted from annual income and returned and paid to the Government.

(d) And likewise the amount of such tax shall be deducted and withheld from coupons, checks, or bills of exchange for or in payment of interest upon bonds of foreign countries and upon foreign mortgages or like obligations (not payable in the United States), and also from coupons, checks, or bills of exchange for or in payment of any dividends upon the stock or interest upon the obligations of foreign corporations, associations, and insurance companies engaged in business in foreign countries.

And the tax in such cases shall be withheld, deducted, and returned for and in behalf of any person subject to the tax hereinbefore imposed, although such interest or dividends do not exceed $3,000, by (1) any banker or person who shall sell or otherwise realize coupons, checks, or bills of exchange drawn or made in payment of any such interest or dividends (not payable in the United States), and (2) any person who shall obtain payment (not in the United States), in behalf of another of such dividends and interest by means of coupons, checks, or bills of exchange, and also (3) any dealer in such coupons who shall purchase the same for any such dividends or interest (not payable in the United States), otherwise than from a banker or another dealer in such coupons.

(e) Where the tax is withheld at the source, the benefit of the exemption and the deductions allowable under this title may be had by complying with the foregoing provisions of this section.

(f) All persons, firms, or corporations undertaking as a matter of business or for profit the collection of foreign payments of such interest or dividends by means of coupons, checks, or bills of exchange shall obtain a license from the Commissioner of Internal Revenue, and shall be subject to such regulations enabling the Government to ascertain and verify the due withholding and payment of the income tax required to be withheld and paid as the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, shall prescribe; and any person who shall knowingly undertake to collect such payments as aforesaid without having obtained a license therefor, or without complying with such regulations, shall be deemed guilty of a misdemeanor and for each offence be fined in a sum not exceeding $5,000, or imprisoned for a term not exceeding one year, or both, in the discretion of the court.

(g) The tax herein imposed upon gains, profits, and income not falling under the foregoing and not returned and paid by virtue of the foregoing shall be assessed by personal return under rules and regulations to be prescribed by the Commissioner of Internal Revenue and approved by the Secretary of the Treasury. The intent and purpose of this title is that all gains, profits, and income of a taxable class, as defined by this title, shall be charged and assessed with the corresponding tax, normal and additional, prescribed by this title, and said tax shall be paid by the owner of such income, or the proper representative having the receipt, custody, control, or disposal of the same. For the purpose of this title ownership or liability shall be determined as of the year for which a return is required to be rendered.

The provisions of this title relating to the deduction and payment of the tax at the source of income shall only apply to the normal tax hereinbefore imposed upon individuals.

PART II.—ON CORPORATIONS.

SEC. 10. That there shall be levied, assessed, collected, and paid annually upon the total net income received in the preceding calendar year from all sources by every corporation, joint-stock company or association, or insurance company, organized in the United States, no matter how created or organized but not including partnerships, a tax of 2 p. c. upon such income; and a like tax shall be levied, assessed, collected, and paid annually upon the total net income received in the preceding calendar year from all sources within the United States by every corporation, joint-stock company or association, or insurance company organized, authorized, or existing under the laws of any foreign country, including interest on bonds, notes, or other interest-

bearing obligations of residents, corporate or otherwise, and including the income derived from dividends on capital stock or from net earnings of resident corporations, joint-stock companies or associations, or insurance companies whose net income is taxable under this title: *Provided*, That the term "dividends" as used in this title shall be held to mean any distribution made or ordered to be made by a corporation, joint-stock company, association, or insurance company, out of its earnings or profits accrued since March 1, 1913, and payable to its shareholders, whether in cash or in stock of the corporation, joint-stock company, association, or insurance company, which stock dividend shall be considered income, to the amount of its cash value.

The foregoing tax rate shall apply to the total net income received by every taxable corporation, joint-stock company or association, or insurance company in the calendar year 1916 and in each year thereafter, except that if it has fixed its own fiscal year under the provisions of existing law, the foregoing rate shall apply to the proportion of the total net income returned for the fiscal year ending prior to December 31, 1916, which the period between January 1, 1916, and the end of such fiscal year bears to the whole of such fiscal year, and the rate fixed in section 2 of the act approved October 3, 1913, entitled "An act to reduce tariff duties and to provide revenue for the Government, and for other purposes," shall apply to the remaining portion of the total net income returned for such fiscal year.

For the purpose of ascertaining the gain derived or loss sustained from the sale or other disposition by a corporation, joint-stock company or association, or insurance company, of property, real, personal, or mixed, acquired before March 1, 1913, the fair market price or value of such property as of March 1, 1913, shall be the basis for determining the amount of such gain derived or loss sustained.

CONDITIONAL AND OTHER EXEMPTIONS.

SEC. 11. (a) That there shall not be taxed under this title any income received by any—

First—Labor, agricultural, or horticultural organization;

Second—Mutual savings bank not having a capital stock represented by shares;

Third—Fraternal beneficiary society, order, or association, operating under the lodge system or for the exclusive benefit of the members of a fraternity itself operating under the lodge system, and providing for the payment of life, sick, accident, or other benefits to the members of such society, order, or association or their dependents;

Fourth—Domestic building and loan association and co-operative banks without capital stock organized and operated for mutual purposes and without profit;

Fifth—Cemetery company owned and operated exclusively for the benefit of its members;

Sixth—Corporation or association organized and operated exclusively for religious, charitable, scientific, or educational purposes, no part of the net income of which inures to the benefit of any private stockholder or individual;

Seventh—Business league, Chamber of Commerce, or Board of Trade, not organized for profit and no part of the net income of which inures to the benefit of any private stockholder or individual;

Eighth—Civic league or organization not organized for profit but operated exclusively for the promotion of social welfare;

Ninth—Club organized and operated exclusively for pleasure, recreation, and other non-profitable purposes, no part of the net income of which inures to the benefit of any private stockholder or member;

Tenth—Farmers' or other mutual hail, cyclone, or fire insurance company, mutual ditch or irrigation company, mutual or co-operative telephone company, or like organization of a purely local character, the income of which consists solely of assessments, dues, and fees collected from members for the sole purpose of meeting its expenses;

Eleventh—Farmers', fruit growers', or like association, organized and operated as a sales agent for the purpose of marketing the products of its members and turning back to them the proceeds of sales, less the necessary selling expenses, on the basis of the quantity of produce furnished by them;

Twelfth—Corporation or association organized for the exclusive purpose of holding title to property, collecting income therefrom, and turning over the entire amount thereof, less expenses, to an organization which itself is exempt from the tax imposed by this title; or

Thirteenth—Federal land banks and National farm-loan associations as provided in section 26 of the act approved July 17, 1916, entitled "An act to provide capital for agricultural development, to create standard forms of investment based upon farm mortgage, to equalize rates of interest upon farm loans, to furnish a market for United States bonds, to create Government depositaries and financial agents for the United States, and for other purposes."

Fourteenth—Joint-stock land banks as to income derived from bonds or debentures of other joint-stock land banks or any Federal land bank belonging to such joint-stock land bank.

(b) There shall not be taxed under this title any income derived from any public utility or from the exercise of any essential governmental function accruing to any State, Territory, or the District of Columbia, or any political subdivision of a State or Territory, nor any income accruing to the government of the Philippine Islands or Porto Rico, or of any political subdivision of the Philippine Islands or Porto Rico: *Provided*, That whenever any State, Territory, or the District of Columbia, or any political subdivision of a State or Territory, has, prior to the passage of this title, entered in good faith into a contract with any person or corporation, the object and purpose of which is to acquire, construct, operate, or maintain a public utility, no tax shall be levied under the provisions of this title upon the income derived from the operation of such public utility, so far as the payment thereof will impose a loss or burden upon such State, Territory, or the District of Columbia, or a political subdivision of a State or Territory; but this provision is not intended to confer upon such person or corporation any financial gain or exemption or to relieve such person or corporation from the payment of a tax as provided for in this title upon the part or portion of the said income to which such person or corporation shall be entitled under such contract.

DEDUCTIONS.

SEC. 12. (a) In the case of a corporation, joint-stock company or association, or insurance company, organized in the United States, such net income shall be ascertained by deducting from the gross amount of its income received within the year from all sources—

First—All the ordinary and necessary expenses paid within the year in the maintenance and operation of its business and properties, including rentals or other payments required to be made as a condition to the continued use or possession of property to which the corporation has not taken or is not taking title, or in which it has no equity.

Second—All losses actually sustained and charged off within the year and not compensated by insurance or otherwise, including a reasonable allowance for the exhaustion, wear and tear of property arising out of its use or employment in the business or trade; (a) in the case of oil and gas wells a reasonable allowance for actual reduction in flow and production to be ascertained not by the flush flow, but by the settled production or regular flow; (b) in the case of mines a reasonable allowance for depletion thereof not to exceed the market value in the mine of the product thereof which has been mined and sold during the year for which the return and computation are made, such reasonable allowance to be made in the case of both (a) and (b) under rules and regulations to be prescribed by the Secretary of the Treasury: *Provided*, That when the allowance authorized in (a) and (b) shall equal the capital originally invested, or in case of purchase made prior to March 1, 1913, the fair market value as of that date, no further allowance shall be made; and (c) in the case of insurance companies, the net addition, if any, required by law to be made within the year to reserve funds and the sums other than dividends paid within the year on policy and annuity contracts: *Provided*, That no deduction shall be allowed for any amount paid out for new buildings, permanent improvements, or betterments made to increase the value of any property or estate, and no deduction shall be made for any amount of expense of restoring property or making good the ex-

haustion thereof for which an allowance is or has been made: *Provided further*, That mutual fire and mutual employers' liability and mutual workmen's compensation and mutual casualty insurance companies requiring their members to make premium deposits to provide for losses and expenses shall not return as income any portion of the premium deposits returned to their policyholders, but shall return as taxable income all income received by them from all other sources plus such portions of the premium deposits as are retained by the companies for purposes other than the payment of losses and expenses and reinsurance reserves: *Provided further*, That mutual marine insurance companies shall include in their return of gross income gross premiums collected and received by them less amounts paid for reinsurance, but shall be entitled to include in deductions from gross income amounts repaid to policyholders on account of premiums previously paid by them and interest paid upon such amounts between the ascertainment thereof and the payment thereof, and life insurance companies shall not include as income in any year such portion of any actual premium received from any individual policyholder as shall have been paid back or credited to such individual policyholder, or treated as an abatement of premium of such individual policyholder, within such year;

Third—The amount of interest paid within the year on its indebtedness to an amount of such indebtedness not in excess of the sum of (a) the entire amount of the paid-up capital stock outstanding at the close of the year, or, if no capital stock, the entire amount of capital employed in the business at the close of the year, and (b) one-half of its interest-bearing indebtedness then outstanding: *Provided*, That for the purpose of this title preferred capital stock shall not be considered interest-bearing indebtedness, and interest or dividends paid upon this stock shall not be deductible from gross income: *Provided further*, That in cases wherein shares of capital stock are issued without par or nominal value, the amount of paid-up capital stock, within the meaning of this section, as represented by such shares, will be the amount of cash, or its equivalent, paid or transferred to the corporation as a consideration for such shares: *Provided further*, That in the case of indebtedness wholly secured by property collateral, tangible or intangible, the subject of sale or hypothecation in the ordinary business of such corporation, joint-stock company or association as a dealer only in the property constituting such collateral, or in loaning the funds thereby procured, the total interest paid by such corporation, company, or association within the year on any such indebtedness may be deducted as a part of its expenses of doing business, but interest on such indebtedness shall only be deductible on an amount of such indebtedness not in excess of the actual value of such property collateral: *Provided further*, That in the case of bonds or other indebtedness, which have been issued with a guaranty that the interest payable thereon shall be free from taxation, no deduction for the payment of the tax herein imposed, or any other tax paid pursuant to such guaranty, shall be allowed; and in the case of a bank, banking association, loan or trust company, interest paid within the year on deposits or on moneys received for investment and secured by interest-bearing certificates of indebtedness issued by such bank, banking association, loan or trust company;

Fourth—Taxes paid within the year imposed by the authority of the United States, or its Territories, or possessions, or any foreign country, or under the authority of any State, county, school district, or municipality, or other taxing subdivision of any State, not including those assessed against local benefits.

(b) In the case of a corporation, joint-stock company or association, or insurance company organized, authorized, or existing under the laws of any foreign country, such net income shall be ascertained by deducting from the gross amount of its income received within the year from all sources within the United States—

First—All the ordinary and necessary expenses actually paid within the year out of earnings in the maintenance and operation of its business and property within the United States, including rentals or other payments required to be made as a condition to the continued use or possession of property to which the corporation has not taken or is not taking title, or in which it has no equity.

Second—All losses actually sustained within the year in business or trade conducted by it within the United States and not compensated by insurance or otherwise, including a reasonable allowance for the exhaustion, wear and tear of property arising out of its use or employment in the business or trade; (a) and in the case (a) of oil and gas wells a reasonable allowance for actual reduction in flow and production to be ascertained not by the flush flow, but by the settled production or regular flow; (b) in the case of mines a reasonable allowance for depletion thereof not to exceed the market value in the mine of the product thereof which has been mined and sold during the year for which the return and computation are made, such reasonable allowance to be made in the case of both (a) and (b) under rules and regulations to be prescribed by the Secretary of the Treasury: *Provided*, That when the allowance authorized in (a) and (b) shall equal the capital originally invested, or in case of purchase made prior to March 1, 1913, the fair market value as of that date, no further allowance shall be made; and (c) in the case of insurance companies, the net addition, if any, required by law to be made within the year to reserve funds and the sums other than dividends paid within the year on policy and annuity contracts: *Provided*, That no deduction shall be allowed for any amount paid out for new buildings, permanent improvements, or betterments, made to increase the value of any property or estate, and no deduction shall be made for any amount of expense of restoring property or making good the exhaustion thereof for which an allowance is or has been made: *Provided further*, That mutual fire and mutual employers' liability and mutual workmen's compensation and mutual casualty insurance companies requiring their members to make premium deposits to provide for losses and expenses shall not return as income any portion of the premium deposits returned to their policyholders, but shall return as taxable income all income received by them from all other sources plus such portions of the premium deposits as are retained by the companies for purposes other than the payment of losses and expenses and reinsurance reserves: *Provided further*, That mutual marine insurance companies shall include in their return of gross income gross premiums collected and received by them less amounts paid for reinsurance, but shall be entitled to include in deductions from gross income amounts repaid to policyholders on account of premiums previously paid by them, and interest paid upon such amounts between the ascertainment thereof and the payment thereof, and life insurance companies shall not include as income in any year such portion of any actual premium received from any individual policyholder as shall have been paid back or credited to such individual policyholder, or treated as an abatement of premium of such individual policyholder, within such year;

Third—The amount of interest paid within the year on its indebtedness to an amount of such indebtedness not in excess of the proportion of the sum of (a) the entire amount of the paid-up capital stock outstanding at the close of the year, or, if no capital stock, the entire amount of the capital employed in the business at the close of the year, and (b) one-half of its interest-bearing indebtedness then outstanding, which the gross amount of its income for the year from business transacted and capital invested within the United States bears to the gross amount of its income derived from all sources within and without the United States: *Provided*, That in the case of bonds or other indebtedness which have been issued with a guaranty that the interest payable thereon shall be free from taxation, no deduction for the payment of the tax herein imposed or any other tax paid pursuant to such guaranty shall be allowed; and in case of a bank, banking association, loan or trust company, or branch thereof, interest paid within the year on deposits by or on moneys received for investment from either citizens or residents of the United States and secured by interest-bearing certificates of indebtedness issued by such bank, banking association, loan or trust company, or branch thereof;

Fourth—Taxes paid within the year imposed by the authority of the United States, or its Territories, or possessions, or under the authority of any State, county, school district, or municipality, or other

taxing subdivision of any State, paid within the United States, not including those assessed against local benefits;

(c) In the case of assessment insurance companies, whether domestic or foreign, the actual deposit of sums with State or Territorial officers, pursuant to law, as additions to guarantee or reserve funds shall be treated as being payments required by law to reserve funds.

RETURNS.

SEC. 13. (a) The tax shall be computed upon the net income, as thus ascertained, received within each preceding calendar year ending December 31; *Provided*, That any corporation, joint-stock company or association, or insurance company, subject to this tax, may designate the last day of any month in the year as the day of the closing of its fiscal year and shall be entitled to have the tax payable by it computed upon the basis of the net income ascertained as herein provided for the year ending on the day so designated in the year preceding the date of assessment instead of upon the basis of the net income for the calendar year preceding the date of assessment; and it shall give notice of the day it has thus designated as the closing of its fiscal year to the Collector of the district in which its principal business office is located at any time not less than 30 days prior to March 1 of the year in which its return would be filed if made upon the basis of the calendar year;

(b) Every corporation, joint-stock company or association, or insurance company, subject to the tax herein imposed, shall, on or before March 1, 1917, and March 1 in each year thereafter, or, if it has designated a fiscal year for the computation of its tax, then within 60 days after the close of such fiscal year ending prior to December 31, 1916, and the close of each such fiscal year thereafter, render a true and accurate return of its annual net income in the manner and form to be prescribed by the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, and containing such facts, data, and information as are appropriate and in the opinion of the Commissioner necessary to determine the correctness of the net income returned and to carry out the provisions of this title. The return shall be sworn to by the President, Vice-President, or other principal officer, and by the Treasurer or Assistant Treasurer. The return shall be made to the Collector of the district in which is located the principal office of the corporation, company, or association, where are kept its books of account and other data from which the return is prepared, or in the case of a foreign corporation, company, or association, to the Collector of the district in which is located its principal place of business in the United States, or if it have no principal place of business, office, or agency in the United States, then to the Collector of Internal Revenue at Baltimore, Md. All such returns shall as received be transmitted forthwith by the Collector to the Commissioner of Internal Revenue;

(c) In cases wherein receivers, trustees in bankruptcy, or assignees are operating the property or business of corporations, joint-stock companies or associations, or insurance companies, subject to tax imposed by this title, such receivers, trustees, or assignees shall make returns of net income as and for such corporations, joint-stock companies or associations, and insurance companies, in the same manner and form as such organizations are hereinbefore required to make returns, and any income tax due on the basis of such returns made by receivers, trustees, or assignees shall be assessed and collected in the same manner as if assessed directly against the organizations of whose businesses or properties they have custody and control;

(d) A corporation, joint-stock company or association, or insurance company, keeping accounts upon any basis other than that of actual receipts and disbursements, unless such other basis does not clearly reflect its income, may, subject to regulations made by the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, make its return upon the basis upon which its accounts are kept, in which case the tax shall be computed upon its income as so returned;

(e) All the provisions of this title relating to the tax authorized and required to be deducted and withheld and paid to the officer of the United States Government authorized to receive the same from the income of non-resident alien individuals from sources within the United States shall be made applicable to incomes derived from interest upon bonds and mortgages or deeds of trust or similar obligations of domestic or other resident corporations, joint-stock companies or associations, and insurance companies by non-resident alien firms, co-partnerships, companies, corporations, joint-stock companies or associations, and insurance companies not engaged in business or trade within the United States and not having any office or place of business therein;

(f) Likewise, all the provisions of this title relating to the tax authorized and required to be deducted and withheld and paid to the officer of the United States Government authorized to receive the same from the income of non-resident alien individuals from sources within the United States shall be made applicable to income derived from dividends upon the capital stock or from the net earnings of domestic or other resident corporations, joint-stock companies or associations, and insurance companies by non-resident alien companies, corporations, joint-stock companies or associations, and insurance companies not engaged in business or trade within the United States and not having any office or place of business therein.

ASSESSMENT AND ADMINISTRATION.

SEC. 14. (a) All assessments shall be made and the several corporations, joint-stock companies or associations, and insurance companies shall be notified of the amount for which they are respectively liable on or before June 1 of each successive year, and said assessment shall be paid on or before June 15: *Provided*, That every corporation, joint-stock company or association, and insurance company, computing taxes upon the income of the fiscal year which it may designate in the manner hereinbefore provided, shall pay the taxes due under its assessment within 105 days after the date upon which it is required to file its list or return of income for assessment: except in cases of refusal or neglect to make such return, and in cases of erroneous, false or fraudulent returns, in which cases the Commissioner of Internal Revenue shall, upon the discovery thereof, at any time within three years after said return is due, make a return upon information obtained as provided for in this title or by existing law: and the assessment made by the Commissioner of Internal Revenue thereon shall be paid by such corporation, joint-stock company or association, or insurance company immediately upon notification of the amount of such assessment; and to any sum or sums due and unpaid after June 15 in any year, or after 105 days from the date on which the return of income is required to be made by the taxpayer, and after ten days' notice and demand thereof by the Collector, there shall be added the sum of 5 p. c. on the amount of tax unpaid and interest at the rate of 1 p. c. per month upon said tax from the time the same becomes due: *Provided*, That upon the examination of any return of income made pursuant to this title, the act of August 5, 1909, entitled "An act to provide revenue, equalize duties and encourage the industries of the United States, and for other purposes," and the act of October 3, 1913, entitled, "An act to reduce tariff duties and to provide revenue for the Government, and for other purposes," if it shall appear that amounts of tax have been paid in excess of those properly due, the taxpayer shall be permitted to present a claim for refund thereof notwithstanding the provisions of section 3228 of the Revised Statutes;

(b) When the assessment shall be made, as provided in this title, the returns, together with any corrections thereof, which may have been made by the Commissioner, shall be filed in the office of the Commissioner of Internal Revenue and shall constitute public records and be open to inspection as such: *Provided*, That any and all such returns shall be open to inspection only upon the order of the President, under rules and regulations to be prescribed by the Secretary of the Treasury and approved by the President: *Provided further*, That the proper officers of any State imposing a general income tax may, upon the request of the Governor thereof, have access to said returns or to an abstract thereof, showing the name and income of each such corporation, joint-stock company or association, or insurance company, at such times and in such manner as the Secretary of the Treasury may prescribe;

(c) If any of the corporations, joint-stock companies or associations, or insurance companies aforesaid shall refuse or neglect to make a return at the time or times hereinbefore specified in each year, or shall render a false or fraudulent return, such corporation, joint-stock company or association, or insurance company shall be liable to a penalty of not exceeding $10,000: *Provided*, That the Commissioner of Internal Revenue shall have authority, in the case of either corporations or individuals, to grant a reasonable extension of time in meritorious cases, as he may deem proper.

(d) That section 3225 of the Revised Statutes of the United States be, and the same is hereby, amended so as to read as follows:

"SEC. 3225. When a second assessment is made in case of any list, statement, or return, which in the opinion of the Collector or Deputy Collector was false or fraudulent, or contained any understatement or undervaluation, no tax collected under such assessment shall be recovered by any suit unless it is proved that the said list, statement, or return was not false nor fraudulent and did not contain any understatement or undervaluation; but this section shall not apply to statements or returns made or to be made in good faith under the laws of the United States regarding annual depreciation of oil or gas wells and mines."

PART III.—GENERAL ADMINISTRATIVE PROVISIONS.

SEC. 15. That the word "State" or "United States" when used in this title shall be construed to include any Territory, the District of Columbia, Porto Rico, and the Philippine Islands, when such construction is necessary to carry out its provisions.

SEC. 16. That sections 3167, 3172, 3173, and 3176 of the Revised Statutes of the United States as amended are hereby amended so as to read as follows:

"SEC. 3167. It shall be unlawful for any Collector, Deputy Collector, agent, clerk, or other officer or employé of the United States to divulge or to make known in any manner whatever not provided by law to any person the operations, style of work, or apparatus of any manufacturer or producer visited by him in the discharge of his official duties, or the amount or source of income, profits, losses, expenditures, or any particular thereof, set forth or disclosed in any income return, or to permit any income return or copy thereof or any book containing any abstract or particulars thereof to be seen or examined by any person except as provided by law; and it shall be unlawful for any person to print or publish in any manner whatever not provided by law any income return or any part thereof or source of income, profits, losses, or expenditures appearing in any income return; and any offence against the foregoing provision shall be a misdemeanor and be punished by a fine not exceeding $1,000 or by imprisonment not exceeding one year, or both, at the discretion of the court; and if the offender be an officer or employé of the United States he shall be dismissed from office or discharged from employment.

"SEC. 3172. Every Collector shall, from time to time, cause his deputies to proceed through every part of his district and inquire after and concerning all persons therein who are liable to pay any internal revenue tax, and all persons owning or having the care and management of any objects liable to pay any tax, and to make a list of such persons and enumerate said objects.

"SEC. 3173. It shall be the duty of any person, partnership, firm, association, or corporation, made liable to any duty, special tax, or other tax imposed by law, when not otherwise provided for, (1) in case of a special tax, on or before July 31 in each year, (2) in case of income tax on or before March 1 in each year, or on or before the last day of the 60-day period next following the closing date of the fiscal year for which it makes a return of its income, and (3) in other cases before the day on which the taxes accrue, to make a list or return, verified by oath, to the Collector or a Deputy Collector of the district where located, of the articles or objects, including the amount of annual income charged with a duty or tax, the quantity of goods, wares, and merchandise made or sold and charged with a tax, the several rates and aggregate amount, according to the forms and regulations to be prescribed by the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, for which such person, partnership, firm, association, or corporation is liable: *Provided*, That if any person liable to pay any duty or tax, or owning, possessing, or having the care or management of property, goods, wares, and merchandise, article or objects liable to pay any duty, tax, or license, shall fail to make and exhibit a list or return required by law, but shall consent to disclose the particulars of any and all the property, goods, wares, and merchandise, articles, and objects liable to pay any duty or tax, or any business or occupation liable to pay any tax as aforesaid, then, and in that case, it shall be the duty of the Collector or Deputy Collector to make such list or return, which, being distinctly read, consented to, and signed and verified by oath by the person so owning, possessing, or having the care and management as aforesaid, may be received as the list of such person: *Provided further*, That in case no annual list or return has been rendered by such person to the Collector or Deputy Collector as required by law, and the person shall be absent from his or her residence or place of business at the time the Collector or a Deputy Collector shall call for the annual list or return, it shall be the duty of such Collector or Deputy Collector to leave at such place of residence or business, with some one of suitable age and discretion, if such be present, otherwise to deposit in the nearest post-office a note or memorandum addressed to such person, requiring him or her to render to such Collector or Deputy Collector the list or return required by law within 10 days from the date of such note or memorandum, verified by oath. And if any person, on being notified or required as aforesaid, shall refuse or neglect to render such list or return within the time required as aforesaid, or whenever any person who is required to deliver a monthly or other return of objects subject to tax fails to do so at the time required, or delivers any return which, in the opinion of the Collector, is erroneous, false, or fraudulent, or contains any undervaluation or understatement, or refuses to allow any regularly authorized Government officer to examine the books of such person, firm, or corporation, it shall be lawful for the Collector to summon such person, or any other person having possession, custody, or care of books of account containing entries relating to the business of such person, or any other person he may deem proper, to appear before him and produce such books at a time and place named in the summons, and to give testimony or answer interrogatories, under oath, respecting any objects or income liable to tax or the returns thereof. The Collector may summon any person residing or found within the State or Territory in which his district lies; and when the person intended to be summoned does not reside and can not be found within such State or Territory, he may enter any collection district where such person may be found and there make the examination herein authorized. And to this end he may there exercise all the authority which he might lawfully exercise in the district for which he was commissioned: *Provided*, That 'person,' as used in this section, shall be construed to include any corporation, joint-stock company or association, or insurance company when such construction is necessary to carry out its provisions.

"SEC. 3176. If any person, corporation, company, or association fails to make and file a return or list at the time prescribed by law, or makes, wilfully or otherwise, a false or fraudulent return or list, the Collector or Deputy Collector shall make the return or list from his own knowledge and from such information as he can obtain through testimony or otherwise. Any return or list so made and subscribed by a Collector or Deputy Collector shall be *prima facie* good and sufficient for all legal purposes.

"If the failure to file a return or list is due to sickness or absence the Collector may allow such further time, not exceeding 30 days, for making and filing the return or list as he deems proper.

"The Commissioner of Internal Revenue shall assess all taxes, other than stamp taxes, as to which returns or lists are so made by a Collector or Deputy Collector. In case of any failure to make and file a return or list within the time prescribed by law or by the Collector, the Commissioner of Internal Revenue shall add to the tax 50 p. c. of its amount except that, when a return is voluntarily and without notice from the Collector filed after such time and

it is shown that the failure to file it was due to a reasonable cause and not to wilful neglect, no such addition shall be made to the tax. In case a false or fraudulent return or list is wilfully made, the Commissioner of Internal Revenue shall add to the tax 100 p. c. of its amount.

"The amount so added to any tax shall be collected at the same time and in the same manner and as part of the tax unless the tax has been paid before the discovery of the neglect, falsity, or fraud, in which case the amount so added shall be collected in the same manner as the tax."

SEC. 17. That it shall be the duty of every collector of internal revenue, to whom any payment of any taxes is made under the provisions of this title, to give to the person making such payment a full written or printed receipt, expressing the amount paid and the particular account for which such payment was made; and whenever such payment is made such collector shall, if required, give a separate receipt for each tax paid by any debtor, on account of payments made to or to be made by him to separate creditors in such form that such debtor can conveniently produce the same separately to his several creditors in satisfaction of their respective demands to the amounts specified in such receipts; and such receipts shall be sufficient evidence in favor of such debtor to justify him in withholding the amount therein expressed from his next payment to his creditor; but such creditor may, upon giving to his debtor a full written receipt, acknowledging the payment to him of whatever sum may be actually paid, and accepting the amount of tax paid as aforesaid (specifying the same) as a further satisfaction of the debt to that amount, require the surrender to him of such collector's receipt.

SEC. 18. That if any individual liable to make the return or pay the tax aforesaid shall refuse or neglect to make such return at the time or times hereinbefore specified in each year, he shall be liable to a penalty of not less than $20 nor more than $1,000. Any individual or any officer of any corporation, joint-stock company or association, or insurance company required by law to make, render, sign, or verify any return who makes any false or fraudulent return or statement with intent to defeat or evade the assessment required by this title to be made shall be guilty of a misdemeanor, and shall be fined not exceeding $2,000 or be imprisoned not exceeding one year, or both, in the discretion of the court, with the costs of prosecution: *Provided*, That where any tax heretofore due and payable has been duly paid by the taxpayer, it shall not be re-collected from any person or corporation required to retain it at its source, nor shall any penalty be imposed or collected in such cases from the taxpayer, or such person or corporation whose duty it was to retain it, for failure to return or pay the same, unless such failure was fraudulent and for the purpose of evading payment.

SEC. 19. The Collector or Deputy Collector shall require every return to be verified by the oath of the party rendering it. If the Collector or Deputy Collector have reason to believe that the amount of any income returned is understated, he shall give due notice to the person making the return to show cause why the amount of the return should not be increased, and upon proof of the amount understated may increase the same accordingly. Such person may furnish sworn testimony to prove any relevant facts, and, if dissatisfied with the decision of the Collector, may appeal to the Commissioner of Internal Revenue for his decision under such rules of procedure as may be prescribed by regulation.

SEC. 20. That jurisdiction is hereby conferred upon the district courts of the United States for the district within which any person summoned under this title to appear to testify or to produce books shall reside, to compel such attendance, production of books, and testimony by appropriate process.

SEC. 21. That the preparation and publication of statistics reasonably available with respect to the operation of the Income Tax Law and containing classifications of taxpayers and of income, the amounts allowed as deductions and exemptions, and any other facts deemed pertinent and valuable, shall be made annually by the Commissioner of Internal Revenue with the approval of the Secretary of the Treasury.

SEC. 22. That all administrative, special, and general provisions of law, including the laws in relation to the assessment, remission, collection, and refund of internal revenue taxes not heretofore specifically repealed and not inconsistent with the provisions of this title, are hereby extended and made applicable to all the provisions of this title and to the tax herein imposed.

SEC. 23. That the provisions of this title shall extend to Porto Rico and the Philippine Islands: *Provided*, That the administration of the law and the collection of the taxes imposed in Porto Rico and the Philippine Islands shall be by the appropriate Internal Revenue officers of those Governments, and all revenues collected in Porto Rico and the Philippine Islands thereunder shall accrue intact to the general Governments thereof, respectively: *Provided further*, That the jurisdiction in this title conferred upon the District Courts of the United States shall, so far as the Philippine Islands are concerned, be vested in the courts of the first instance of said islands: *And provided further*, That nothing in this title shall be held to exclude from the computation of the net income the compensation paid any official by the Governments of the District of Columbia, Porto Rico, and the Philippine Islands, or the political subdivisions thereof.

SEC. 24. That section 2 of the act approved October 3, 1913, entitled "An act to reduce tariff duties and to provide revenue for the Government, and for other purposes," is hereby repealed, except as herein otherwise provided, and except that it shall remain in force for the assessment and collection of all taxes which have accrued thereunder, and for the imposition and collection of all penalties or forfeitures which have accrued or may accrue in relation to any of such taxes, and except that the unexpended balance of any appropriation heretofore made and now available for the administration of such section or any provision thereof shall be available for the administration of this title or the corresponding provision thereof.

SEC. 25. That income on which has been assessed the tax imposed by section 2 of the act entitled "An act to reduce tariff duties and to provide revenue for the Government, and for other purposes," approved October 3, 1913, shall not be considered as income within the meaning of this title: *Provided*, That this section shall not conflict with that portion of section 10, of this title, under which a taxpayer has fixed its own fiscal year.

TITLE II.—ESTATE TAX.

SEC. 200. That when used in this title—

The term "person" includes partnerships, corporations, and associations;

The term "United States" means only the States, the Territories of Alaska and Hawaii, and the District of Columbia;

The term "executor" means the executor or administrator of the decedent, or, if there is no executor or administrator, any person who takes possession of any property of the decedent; and

The term "Collector" means the Collector of Internal Revenue of the district in which was the domicile of the decedent at the time of his death, or, if there was no such domicile in the United States, then the Collector of the district in which is situated the part of the gross estate of the decedent in the United States, or, if such part of the gross estate is situated in more than one district, then the Collector of Internal Revenue at Baltimore, Md.

SEC. 201. That a tax (hereinafter in this title referred to as the tax), equal to the following percentages of the value of the net estate to be determined as provided in section 203 is hereby imposed upon the transfer of the net estate of every decedent dying after the passage of this act, whether a resident or non-resident of the United States:

One per cent. of the amount of such net estate not in excess of $50,000:

$50,000 to $150,000, 2 p. c.
$150,000 to $250,000, 3 p. c.
$250,000 to $450,000, 4 p. c.
$450,000 to $1,000,000, 5 p. c.

$1,000,000 to $2,000,000, 6 p. c.
$2,000,000 to $3,000,000, 7 p. c.
$3,000,000 to $4,000,000, 8 p. c.
$4,000,000 to $5,000,000, 9 p. c.
Exceeding $5,000,000, 10 p. c.

SEC. 202. That the value of the gross estate of the decedent shall be determined by including the value at the time of his death of all property, real or personal, tangible or intangible, wherever situated:

(a) To the extent of the interest therein of the decedent at the time of his death which after his death is subject to the payment of the charges against his estate and the expenses of its administration and is subject to distribution as part of his estate.

(b) To the extent of any interest therein of which the decedent has at any time made a transfer, or with respect to which he has created a trust, in contemplation of or intended to take effect in possession or enjoyment at or after his death, except in case of a bona fide sale for a fair consideration in money or money's worth. Any transfer of a material part of his property in the nature of a final disposition or distribution thereof, made by the decedent within two years prior to his death without such a consideration, shall, unless shown to the contrary, be deemed to have been made in contemplation of death within the meaning of this title; and

(c) To the extent of the interest therein held jointly or as tenants in the entirety by the decedent and any other person, or deposited in banks or other institutions in their joint names and payable to either or the survivor, except such part thereof as may be shown to have originally belonged to such other person and never to have belonged to the decedent.

For the purpose of this title, stock in a domestic corporation owned and held by a non-resident decedent shall be deemed property within the United States, and any property of which the decedent has made a transfer or with respect to which he has created a trust, within the meaning of subdivision (b) of this section, shall be deemed to be situated in the United States, if so situated either at the time of the transfer or the creation of the trust, or at the time of the decedent's death.

SEC. 203. That for the purpose of the tax the value of the net estate shall be determined—

(a) In the case of a resident, by deducting from the value of the gross estate—

(1) Such amounts for funeral expenses, administration expenses, claims against the estate, unpaid mortgages, losses incurred during the settlement of the estate arising from fires, storms, shipwreck, or other casualty, and from theft, when such losses are not compensated for by insurance or otherwise, support during the settlement of the estate of those dependent upon the decedent, and such other charges against the estate, as are allowed by the laws of the jurisdiction, whether within or without the United States, under which the estate is being administered; and

(2) An exemption of $50,000;

(b) In the case of a non-resident, by deducting from the value of that part of his gross estate which at the time of his death is situated in the United States that proportion of the deductions specified in paragraph (1) of subdivision (a) of this section which the value of such part bears to the value of his entire gross estate, wherever situated. But no deductions shall be allowed in the case of a non-resident unless the executor includes in the return required to be filed under section 205 the value at the time of his death of that part of the gross estate of the non-resident not situated in the United States.

SEC. 204. That the tax shall be due one year after the decedent's death. If the tax is paid before it is due a discount at the rate of 5 p. c. per annum, calculated from the time payment is made to the date when the tax is due, shall be deducted. If the tax is not paid within 90 days after it is due, interest at the rate of 10 p. c. per annum from the time of the decedent's death shall be added as part of the tax, unless because of claims against the estate, necessary litigation, or other unavoidable delay the Collector finds that the tax cannot be determined, in which case the interest shall be at the rate of 6 p. c. per annum from the time of the decedent's death until the cause of such delay is removed, and thereafter at the rate of 10 p. c. per annum. Litigation to defeat the payment of the tax shall not be deemed necessary litigation.

SEC. 205. That the executor, within 30 days after qualifying as such, or after coming into possession of any property of the decedent, whichever event first occurs, shall give written notice thereof to the Collector. The executor, shall also, at such times and in such manner as may be required by the regulations made under this title file with the Collector a return under oath in duplicate, setting forth (a) the value of the gross estate of the decedent at the time of his death, or, in case of a non-resident, of that part of his gross estate situated in the United States; (b) the deductions allowed under section 203; (c) the value of the net estate of the decedent as defined in section 203; and (d) the tax paid or payable thereon; or such part of such information as may at the time be ascertainable and such supplemental data as may be necessary to establish the correct tax.

Return shall be made in all cases of estates subject to the tax or where the gross estate at the death of the decedent exceeds $60,000, and in the case of the estate of every non-resident any part of whose gross estate is situated in the United States. If the executor is unable to make a complete return as to any part of the gross estate of the decedent, he shall include in his return a description of such part and the name of every person holding a legal or beneficial interest therein, and upon notice from the Collector such person shall in like manner make a return as to such part of the gross estate. The Commissioner of Internal Revenue shall make all assessments of the tax under the authority of existing administrative special and general provisions of law relating to the assessment and collection of taxes.

SEC. 206. That if no administration is granted upon the estate of a decedent, or if no return is filed as provided in section 205, or if a return contains a false or incorrect statement of a material fact, the Collector or Deputy Collector shall make a return and the Commissioner of Internal Revenue shall assess the tax thereon.

SEC. 207. That the executor shall pay the tax to the Collector or Deputy Collector. If for any reason the amount of the tax cannot be determined, the payment of a sum of money sufficient, in the opinion of the Collector, to discharge the tax shall be deemed payment in full of the tax, except as in this section otherwise provided. If the amount so paid exceeds the amount of the tax as finally determined, the Commissioner of Internal Revenue shall refund such excess to the executor. If the amount of the tax as finally determined exceeds the amount so paid, the Commissioner shall notify the executor of the amount of such excess. From the time of such notification to the time of the final payment of such excess part of the tax, interest shall be added thereto at the rate of 10 p. c. per annum, and the amount of such excess shall be a lien upon the entire gross estate, except such part thereof as may have been sold to a bona fide purchaser for a fair consideration in money or money's worth.

The Collector shall grant to the person paying the tax duplicate receipts, either of which shall be sufficient evidence of such payment, and shall entitle the executor to be credited and allowed the amount thereof by any court having jurisdiction to audit or settle his accounts.

SEC. 208. That if the tax herein imposed is not paid within 60 days after it is due, the Collector shall, unless there is reasonable cause for further delay, commence appropriate proceedings in any court of the United States, in the name of the United States, to subject the property of the decedent to be sold under the judgment or decree of the court. From the proceeds of such sale the amount of the tax, together with the costs and expenses of every description to be allowed by the court, shall be first paid, and the balance shall be deposited according to the order of the court, to be paid under its direction to the person entitled thereto. If the tax or any part thereof is paid by, or collected out of that part of the estate passing to or in the possession of, any person other than the executor in his capacity as such, such person shall be entitled to reimbursement out of any part of the estate still undistributed or by a just and equitable contribution by the persons whose interest in the estate of the decedent would have been reduced if the tax had been paid before

the distribution of the estate or whose interest is subject to equal or prior liability for the payment of taxes, debts, or other charges against the estate, it being the purpose and intent of this title that so far as is practicable and unless otherwise directed by the will of the decedent the tax shall be paid out of the estate before its distribution.

SEC. 209. That unless the tax is sooner paid in full, it shall be a lien for 10 years upon the gross estate of the decedent, except that such part of the gross estate as is used for the payment of charges against the estate and expenses of its administration, allowed by any court having jurisdiction thereof, shall be divested of such lien.

If the decedent makes a transfer of, or creates a trust with respect to, any property in contemplation of or intended to take effect in possession or enjoyment at or after his death (except in the case of a bona fide sale for a fair consideration in money or money's worth) and if the tax in respect thereto is not paid when due, the transferee or trustee shall be personally liable for such tax, and such property to the extent of the decedent's interest therein at the time of such transfer, shall be subject to a like lien equal to the amount of such tax. Any part of such property sold by such transferee or trustee to a bona fide purchaser for a fair consideration in money or money's worth shall be divested of the lien and a like lien shall then attach to all the property of such transferee or trustee, except any part sold to a bona fide purchaser for a fair consideration in money or money's worth.

SEC. 210. That whoever knowingly makes any false statement in any notice or return required to be filed by this title shall be liable to a penalty of not exceeding $5,000, or imprisonment not exceeding one year, or both, in the discretion of the court.

Whoever fails to comply with any duty imposed upon him by section 205, or, having in his possession or control any record, file, or paper, containing or supposed to contain any information concerning the estate of the decedent, fails to exhibit the same upon request to the Commissioner of Internal Revenue or any collector or law officer of the United States, or his duly authorized deputy or agent, who desires to examine the same in the performance of his duties under this title, shall be liable to a penalty of not exceeding $500, to be recovered, with costs of suit, in a civil action in the name of the United States.

SEC. 211. That all administrative, special, and general provisions of law, including the laws in relation to the assessment and collection of taxes, not heretofore specifically repealed are hereby made to apply to this title so far as applicable and not inconsistent with its provisions.

SEC. 212. That the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, shall make such regulations, and prescribe and require the use of such books and forms, as he may deem necessary to carry out the provisions of this title.

TITLE III.—MUNITION MANUFACTURER'S TAX.

SEC. 300. That when used in this title—

The term "person" includes partnerships, corporations, and associations;

The term "taxable year" means the 12 months ending December 31. The first taxable year shall be the 12 months ending December 31, 1916; and

The term "United States" means only the States, the Territories of Alaska and Hawaii, and the District of Columbia.

SEC. 301. (1) That every person manufacturing (a) gunpowder and other explosives, excepting blasting powder and dynamite used for industrial purposes; (b) cartridges, loaded and unloaded, caps or primers, exclusive of those used for industrial purposes; (c) projectiles, shells, or torpedoes of any kind, including shrapnel, loaded or unloaded, or fuses, or complete rounds of ammunition; (d) firearms of any kind and appendages, including small arms, cannon, machine guns, rifles, and bayonets; (e) electric motor boats, submarine or submersible vessels or boats, or (f) any part of any of the articles mentioned in (b), (c), (d), or (e), shall pay for each taxable year, in addition to the income tax imposed by Title I., an excise tax of 12½ p. c. upon the entire net profits actually received or accrued for said year from the sale or disposition of such articles manufactured within the United States: *Provided, however*, That no person shall pay such tax upon net profits received during the year 1916 derived from the sale and delivery of the articles enumerated in this section under contracts executed and fully performed by such person prior to January 1, 1916.

(2) This section shall cease to be of effect at the end of one year after the termination of the present European war, which shall be evidenced by the proclamation of the President of the United States declaring such war to have ended.

SEC. 302. That in computing net profits under the provisions of this title, for the purpose of the tax there shall be allowed as deductions from the gross amount received or accrued for the taxable year from the sale or disposition of such articles manufactured within the United States, the following items:

(a) The cost of raw materials entering into the manufacture;

(b) Running expenses, including rentals, cost of repairs and maintenance, heat, power, insurance, management, salaries, and wages;

(c) Interest paid within the taxable year on debts or loans contracted to meet the needs of the business and the proceeds of which have been actually used to meet such needs;

(d) Taxes of all kinds paid during the taxable year with respect to the business or property relating to the manufacture;

(e) Losses actually sustained within the taxable year in connection with the business of manufacturing such articles, including losses from fire, flood, storm, or other casualty, and not compensated for by insurance or otherwise; and

(f) A reasonable allowance according to the conditions peculiar to each concern, for amortization of the values of buildings and machinery, account being taken of the exceptional depreciation of special plants.

SEC. 303. If any person manufactures any article specified in section 301 and, during any taxable year or part thereof, whether under any agreement, arrangement, or understanding, or otherwise, sells or disposes of any such article at less than the fair market price obtainable therefor, either (a) in such manner as directly or indirectly to benefit such person or any person directly or indirectly interested in the business of such person, or (b) with intent to cause such benefit, the gross amount received or accrued for such year or part thereof from the sale or disposition of such article shall be taken to be the amount which would have been received or accrued from the sale or disposition of such article if sold at the fair market price.

SEC. 304. On or before March 1, 1917, and March 1 in each year thereafter, a true and accurate return under oath shall be made by each person manufacturing articles specified in section 301 to the Collector of Internal Revenue for the district in which such person has his principal office or place of business, in such form as the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, shall prescribe, setting forth specifically the gross amount of income received or accrued from the sale or disposition of the articles specified in section 301, and from the total thereof deducting the aggregate items of allowance authorized in section 302, and such other particulars as to the gross receipts and items of allowance as the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, may require.

SEC. 305. All such returns shall be transmitted forthwith by the Collector to the Commissioner of Internal Revenue, who shall, as soon as practicable, assess the tax found due and notify the person making such return of the amount of tax for which such person is liable, and such person shall pay the tax to the Collector on or before 30 days from the date of such notice.

SEC. 306. If the Secretary of the Treasury or the Commissioner of Internal Revenue shall have reason to be dissatisfied with the return as made, or if no return is made, the Commissioner is authorized to make an investigation and to determine the amount of net profits and may assess the proper tax accord-

ingly. He shall notify the person making, or who should have made, such return and shall proceed to collect the tax in the same manner as provided in this title, unless the person so notified shall file a written request for a hearing with the Commissioner within 30 days after the date of such notice; and on such hearing the burden of establishing to the satisfaction of the Commissioner that the gross amount received or accrued or the amount of net profits, as determined by the Commissioner, is incorrect, shall devolve upon such person.

SEC. 307. The tax may be assessed on any person for the time being owning or carrying on the business, or on any person acting as agent for that person in carrying on the business, or where a business has ceased, on the person who owned or carried on the business, or acted as agent in carrying on the business immediately before the time at which the business ceased.

SEC. 308. For the purpose of carrying out the provisions of this title the Commissioner of Internal Revenue is authorized, personally or by his agent, to examine the books, accounts, and records of any person subject to this tax.

SEC. 309. No person employed by the United States shall communicate, or allow to be communicated to any person not legally entitled thereto, any information obtained under the provisions of this title, or allow any such person to inspect or have access to any return furnished under the provisions of this title.

SEC. 310. Whoever violates any of the provisions of this title or the regulations made thereunder, or who knowingly makes false statements in any return, or refuses to give such information as may be called for, is guilty of a misdemeanor, and upon conviction shall, in addition to paying any tax to which he is liable, be fined not more than $10,000, or imprisoned not exceeding one year, or both, in the discretion of the court.

SEC. 311. All administrative, special, and general provisions of law, relating to the assessment and collection of taxes not specifically repealed, are hereby made to apply to this title so far as applicable and not inconsistent with its provisions.

SEC. 312. The Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, shall make all necessary regulations for carrying out the provisions of this title, and may require any person subject to such provisions to furnish him with further information whenever in his judgment the same is necessary to collect the tax provided for herein.

TITLE IV.—MISCELLANEOUS TAXES.

SEC. 400. That there shall be levied, collected, and paid a tax of $1.50 on all beer, lager beer, ale, porter, and other similar fermented liquor, brewed or manufactured and sold, or stored in warehouse, or removed for consumption or sale, within the United States, by whatever name such liquors may be called, for every barrel containing not more than 31 gallons; and at a like rate for any other quantity or for the fractional parts of a barrel authorized and defined by law. And section 3339 of the Revised Statutes is hereby amended accordingly.

SEC. 401. That natural wine within the meaning of this act shall be deemed to be the product made from the normal alcoholic fermentation of the juice of sound, ripe grapes, without addition or abstraction, except such as may occur in the usual cellar treatment of clarifying and aging; *Provided, however*, That the product made from the juice of sound, ripe grapes by complete fermentation of the must under proper cellar treatment and corrected by the addition (under the supervision of a gauger or storekeeper-gauger in the capacity of gauger) of a solution of water and pure cane, beet, or dextrose sugar (containing, respectively, not less than 95 p. c. of actual sugar, calculated on a dry basis) to the must or to the wine, to correct natural deficiencies, when such addition shall not increase the volume of the resultant product more than 35 p. c., and the resultant product does not contain less than five parts per thousand of acid before fermentation and not more than 13 p. c. of alcohol after complete fermentation, shall be deemed to be wine within the meaning of this act, and may be labelled, transported, and sold as "wine," qualified by the name of the locality where produced, and may be further qualified by the name of its own particular type or variety: *And provided further*, That wine as defined in this section may be sweetened with cane sugar or beet sugar or pure condensed grape must and fortified under the provisions of this act, and wines so sweetened or fortified shall be considered sweet wine within the meaning of this act.

SEC. 402. (a) That upon all still wines, including vermuth, and upon all artificial or imitation wines or compound sold as wine hereafter produced in or imported into the United States, and upon all like wines which on the date this section takes effect shall be in the possession or under the control of the producer, holder, dealer, or compounder there shall be levied, collected, and paid taxes at rates as follows;

On wines containing not more than 14 p. c. of absolute alcohol, 4 cents per wine gallon, the per centum of alcohol taxable under this section to be reckoned by volume and not by weight.

On wines containing more than 14 p. c. and not exceeding 21 p. c. of absolute alcohol, 10 cents per wine gallon.

On wines containing more than 21 p. c. and not exceeding 24 p. c. of absolute alcohol, 25 cents per wine gallon.

All such wines containing more than 24 p. c. of absolute alcohol by volume shall be classed as distilled spirits and shall pay tax accordingly: *Provided*, That on all unsold still wines in the actual possession of the producer at the time this title takes effect, upon which the tax imposed by the act approved October 22, 1914, entitled "An act to increase the Internal Revenue and for other purposes," and the joint resolution approved December 17, 1915, entitled "Joint resolution extending the provisions of the act entitled 'An act to increase the Internal Revenue, and for other purposes,' approved October 22, 1914, to December 31, 1916," has been assessed, the tax so assessed shall be abated, or, if paid, refunded under such regulations as the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, may prescribe.

(b) That the taxes imposed by this section shall be paid by stamp on removal of the wines from the Custom House, winery, or other bonded place of storage for consumption or sale, and every person hereafter producing, or having in his possession or under his control when this section takes effect, any wines subject to the tax imposed in this section shall file such notice, describing the premises on which such wines are produced or stored; shall execute a bond in such form; shall make such inventories under oath; and shall, prior to sale or removal for consumption, affix to each cask or vessel containing such wine such marks, labels, or stamps as the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, may from time to time prescribe; and the premises described in such notice shall, for the purpose of this section, be regarded as bonded premises. But the provisions of this subdivision of this section, except as to payment of tax and the affixing of the required stamps or labels, shall not apply to wines held by retail dealers, as defined in section 3244 of the Revised Statutes of the United States, nor, subject to regulations prescribed by the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, shall the tax imposed by this section apply to wines produced for the family use of the producer thereof and not sold or otherwise removed from the place of manufacture and not exceeding in any case 200 gallons per year. The Commissioner of Internal Revenue is hereby authorized to have prepared and issue such stamps denoting payment of the tax imposed by this section as he may deem requisite and necessary; and until such stamps are provided the taxes imposed by this section shall be assessed and collected as other taxes are assessed and collected, and all provisions of law relating to assessment and collection of taxes, so far as applicable, are hereby extended to the taxes imposed by this section.

(c) That under such regulations and official supervision and upon the giving of such notices, entries, bonds, and other security as the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, may prescribe, any producer of wines defined under the provisions of this section or section 401 of this act, may withdraw from any fruit distillery or special bonded warehouse grape brandy, or wine spirits, for the fortification of such wines on the premises where actually made; *Provided*, That there shall be levied and assessed against the producer of such wines a tax of 10 cents per proof gallon of grape brandy or wine spirits so used by him in the fortification of such wines during the preceding month, which assessment shall be paid by him within six months from the date of notice thereof; *Provided further*, That nothing herein contained shall be construed as exempting any wines, cordials, liqueurs, or similar compounds from the payment of any tax provided for in this section.

That sections 42, 43 and 45 of the act of October 1, 1890, as amended by section 68 of the act of August 27, 1894, are further amended to read as follows:

"SEC. 42. That any producer of pure sweet wines may use in the preparation of such sweet wines, under such regulations and after the filing of such notices and bonds, together with the keeping of such records and the rendition of such reports as to materials and products as the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, may prescribe, wine spirits produced by any duly authorized distiller, and the Commissioner of Internal Revenue, in determining the liability of any distiller of wine spirits to assessment under section 3309 of the Revised Statutes, is authorized to allow such distiller credit in his computations for the wine spirits withdrawn to be used in fortifying sweet wines under this act.

"SEC. 43. That the wine spirits mentioned in section 42 herein mentioned is the product resulting from the distillation of fermented grape juice, to which water may have been added prior to, during, or after fermentation, for the sole purpose of facilitating the fermentation and economical distillation thereof, and shall be held to include the product from grapes or their residues commonly known as grape brandy, and shall include commercial grape brandy which may have been colored with burnt sugar or caramel; and the pure sweet wine which may be fortified with wine spirits under the provisions of this act is fermented or partially fermented grape juice only, with the usual cellar treatment, and shall contain no other substance whatever introduced before, at the time of, or after fermentation, except as herein expressly provided; *Provided*, That the addition of pure boiled or condensed grape must or pure crystallized cane or beet sugar, or pure dextrose sugar containing, respectively, not less than 95 p. c. of actual sugar calculated on a dry basis, or water, or any or all of them, to the pure grape juice before fermentation, or to the fermented product of such grape juice, or to both, prior to the fortification herein provided for, either for the purpose of perfecting sweet wines according to commercial standards or for mechanical purposes, shall not be excluded by the definition of pure sweet wine aforesaid; *Provided, however*, That the cane or beet sugar, or pure dextrose sugar added for sweetening purposes shall not be in excess of 11 p. c. of the weight of the wine to be fortified; *And provided further*, That the addition of water herein authorized shall be under such regulations as the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, may from time to time prescribe; *Provided, however*, That records kept in accordance with such regulations as to the percentage of saccharine, acid, alcoholic, and added water content of the wine offered for fortification shall be open to inspection by any official of the Department of Agriculture thereto duly authorized by the Secretary of Agriculture; but in no case shall such wines to which water has been added be eligible for fortification under the provisions of this act, where the same, after fermentation and before fortification, have an alcoholic strength of less than 5 p. c. of their volume.

"SEC. 45. That under such regulations and official supervision, and upon the execution of such entries and the giving of such bonds, bills of lading, and other security as the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, shall prescribe any producer of pure sweet wines as defined by this act may withdraw wine spirits from any special bonded warehouse in original packages or from any registered distillery in any quantity not less than eighty wine gallons, and may use so much of the same as may be required by him under such regulations, and after the filing of such notices and bonds and the keeping of such records and the rendition of such reports as to materials and products and the disposition of the same as the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, shall prescribe, in fortifying the pure sweet wines made by him, and for no other purpose, in accordance with the foregoing limitations and provisions; and the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, is authorized whenever he shall deem it to be necessary for the prevention of violations of this law to prescribe that wine spirits withdrawn under this section shall not be used to fortify wines except at a certain distance prescribed by him from any distillery, rectifying house, winery, or other establishment used for producing or storing distilled spirits, or for making or storing wines other than wines which are so fortified, and that in the building in which such fortification of wines is practised no wines or spirits other than those permitted by this regulation shall be stored in any room or part of the building in which fortification of wines is practised. The use of wine spirits for the fortification of sweet wines under this act shall be under the immediate supervision of an officer of Internal Revenue, who shall make returns describing the kinds and quantities of wine so fortified, and shall affix such stamps and seals to the packages containing such wines as may be prescribed by the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury; and the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, shall provide by regulations the time within which wines so fortified with the wine spirits so withdrawn may be subject to inspection, and for final accounting for the use of such wine spirits and for rewarehousing or for payment of the tax on any portion of such wine spirits which remain not used in fortifying pure sweet wines."

(d) That under such regulations and upon the execution of such notices, entries, bonds and other security as the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, may prescribe, domestic wines subject to the tax imposed by this section may be removed from the winery where produced, free of tax, for storage on other bonded premises or from said premises to other bonded premises; *Provided*, That not more than one such additional removal shall be allowed, or for exportation from the United States or for use as distilling material at any regularly registered distillery; *Provided, however*, That the distiller using any such wine as material shall, subject to the provisions of section 3309 of the Revised Statutes of the United States, as amended, be held to pay the tax on the product of such wines as will include both the alcoholic strength therein produced by fermentation and that obtained from the brandy or wine spirits added to such wines at the time of fortification.

(e) That upon all domestic and imported sparkling wines, liqueurs, cordials, and similar compounds remaining in the hands of dealers when this section takes effect, or thereafter removed from the place of manufacture or storage for sale or consumption, there shall be levied and paid, by stamp, taxes as follows:

On each bottle or other container of champagne or sparkling wine, 3 cents on each one-half pint or fraction thereof.

On each bottle or other container of artificially carbonated wine, 1½ cents on each one-half pint or fraction thereof.

On each bottle or other container of liqueurs, cordials, or similar compounds, by whatever name sold or offered for sale, containing sweet wine, fortified with grape brandy under the provisions of paragraph (c) of this section, 1½ cents on each one-half pint or fraction thereof.

The taxes imposed by this section shall not apply to wines, liqueurs, or cordials on which the

tax imposed by the act approved October 22, 1914, entitled "An act to increase the Internal Revenue, and for other purposes," and the joint resolution approved December 17, 1915, entitled "Joint resolution extending the provisions of the act entitled 'An act to increase the Internal Revenue, and for other purposes,' approved October 22, 1914, to December 31, 1916," has been paid by stamp.

The Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, is hereby authorized to have prepared suitable revenue stamps denoting the payment of the taxes imposed by this section; and all provisions of law relating to Internal Revenue stamps, so far as applicable, are hereby extended to the taxes imposed by this section; *Provided*, That the collection of the tax herein prescribed on imported still wines, including vermuth, and sparkling wines, including champagne, and on imported liqueurs, cordials, and similar compounds, may be made within the discretion of the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, by assessment instead of by stamps.

(f) That any person who shall evade or attempt to evade the tax imposed by this section, or any requirement of this section or regulation issued pursuant thereof, or who shall, otherwise than provided in this section, recover or attempt to recover any spirits from domestic or imported wine, or who shall rectify, mix, or compound with distilled spirits any domestic wines, other than in the manufacture of liqueurs, cordials, or similar compounds taxable under the provisions of this section, shall, on conviction, be punished for each such offence by a fine of not exceeding $5,000, or imprisonment for not more than five years, or both, and all wines, spirits, liqueurs, cordials, or similar compounds as to which such violation occurs shall be forfeited to the United States. But the provision of this subdivision of this section and the provision of section 3244 of the Revised Statutes of the United States, as amended, relating to rectification, or other Internal Revenue Laws of the United States, shall not be held to apply to or prohibit the mixing or blending of wines subject to tax under the provisions of this section with each other or with other wines for the sole purpose of perfecting such wines according to commercial standards; *Provided*, That nothing herein contained shall be construed as prohibiting the use of tax-paid grain or other ethyl alcohol in the fortification of sweet wines as defined in section 53 of this act.

(g) That the Commissioner of Internal Revenue, by regulations to be approved by the Secretary of the Treasury, may require the use at each fruit distillery of such spirit meters, and such locks and seals to be affixed to fermenters, tanks, or other vessels and to such pipe connections as may in his judgment be necessary or expedient; and the said Commissioner is hereby authorized to assign to any such distillery and to each winery where wines are to be fortified such number of gaugers or storekeeper-gaugers in the capacity of gaugers as may be necessary for the proper supervision of the manufacture of brandy or the making or fortifying of wines subject to tax imposed by this section; and the compensation of such officers shall not exceed $5 per diem while so assigned, together with their actual and necessary travelling expenses, and also a reasonable allowance for their board bills, to be fixed by the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, but not to exceed $2.50 per diem for said board bills.

(h) That the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, is hereby authorized to make such allowances for unavoidable loss of wines while on storage or during cellar treatment as in his judgment may be just and proper, and to prepare all necessary regulations for carrying into effect the provisions of this section.

(i) That the second paragraph of section 3264, Revised Statutes of the United States of America, as amended by section 5 of the act of March 1, 1879, and as further amended by the Act of Congress approved June 22, 1910, be amended so as to read as follows;

"In all surveys 45 gallons of mash or beer brewed or fermented from grain shall represent not less than one bushel of grain, and seven gallons of mash or beer brewed or fermented from molasses shall represent not less than one gallon of molasses, except in distilleries operated on the sour-mash principle, in which distilleries 60 gallons of beer brewed or fermented from grain shall represent not less than one bushel of grain, and except that in distilleries where the filtration-aeration process is used, with the approval of the Commissioner of Internal Revenue; that is, where the mash after it leaves the mash tub is passed through a filtering machine before it is run into the fermenting tub, and only the filtered liquor passes into the fermenting tub, there shall hereafter be no limitation upon the number of gallons of water which may be used in the process of mashing or filtration for fermentation; but the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, in order to protect the revenue, shall be authorized to prescribe by regulation, to be made by him, such character of survey as he may find suitable for distilleries using such filtration-aeration process. The provisions hereof relating to filtration-aeration process shall apply only to sweet-mash distilleries."

SEC. 403. That under such regulations as the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, may prescribe, alcohol or other distilled spirits of a proof strength of not less than 180 degrees intended for export free of tax may be drawn from receiving cisterns at any distillery, or from storage tanks in any distillery warehouse, for transfer to tanks or tank cars for export from the United States and all provisions of existing law relating to the exportation of distilled spirits not inconsistent herewith shall apply to spirits removed for export under the provisions of this act.

SEC. 404. That section 3255 of the Revised Statutes as amended by act of June 3, 1896, and as further amended by act of March 2, 1911, be further amended so as to read as follows;

"SEC. 3255. The Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, may exempt distillers of brandy made exclusively from apples, peaches, grapes, pears, pineapples, oranges, apricots, berries, plums, pawpaws, persimmons, prunes, figs, or cherries from any provision of this title relating to the manufacture of spirits, except as to the tax thereon, when in his judgment it may seem expedient to do so; *Provided*, That where, in manufacture of wine, artificial sweetening has been used the wine or the fruit pomace residuum may be used in the distillation of brandy, as such use shall not prevent the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, from exempting such distiller from any provision of this title relating to the manufacture of spirits, except as to the tax thereon, when in his judgment it may seem expedient to do so; *And provided further*, That the distillers mentioned in this section may add to not less than 500 gallons (or 10 barrels) of grape cheese not more than 500 gallons of a sugar solution made from cane, beet, starch, or corn sugar, 95 p. c. pure, such solution to have a saccharine strength of not to exceed 10 p. c., and may ferment the resultant mixture on a winery or distillery premises, and such fermented product shall be regarded as distilling material."

SEC. 405. That distilled spirits known commercially as gin of not less than 80 p. c. proof may at any time within eight years after entry in bond at any distillery be bottled in bond at such distillery for export without the payment of tax, under such rules and regulations as the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, may prescribe.

SEC. 406. That section 3354 of the Revised Statutes of the United States as amended by the act approved June 18, 1890, be, and is hereby, amended to read as follows;

"SEC. 3354. Every person who withdraws any fermented liquor from any hogshead, barrel, keg, or other vessel upon which the proper stamp has not been affixed for the purpose of bottling the same, or who carries on or attempts to carry on the business of bottling fermented liquor in any brewery or other place in which fermented liquor is made, or upon any premises having communication with such brewery, or any warehouse, shall be liable to a fine of $500, and the property used in such bottling or business shall be liable to forfeiture; *Provided, however*, That this section shall

not be construed to prevent the withdrawal and transfer of unfermented, partially fermented, or fermented liquors from any of the vats in any brewery by way of a pipe line or other conduit to another building or place for the sole purpose of bottling the same, such pipe line or conduit to be constructed and operated in such manner and with such cisterns, vats, tanks, valves, cocks, faucets, and gauges, or other utensils or apparatus, either on the premises of the brewery or the bottling house, and with such changes of or additions thereto, and such locks, seals, or other fastenings, and under such rules and regulations as shall be from time to time prescribed by the Commissioner of Internal Revenue, subject to the approval of the Secretary of the Treasury, and all locks and seals prescribed shall be provided by the Commissioner of Internal Revenue at the expense of the United States: *Provided further*, That the tax imposed in section 3339 of the Revised Statutes of the United States shall be paid on all fermented liquor removed from a brewery to a bottling house by means of a pipe or conduit, at the time of such removal by the cancellation and defacement, by the Collector of the district or his deputy, in the presence of the brewer, of the number of stamps denoting the tax on the fermented liquor thus removed. The stamps thus cancelled and defaced shall be disposed of and accounted for in the manner directed by the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury. And any violation of the rules and regulations hereafter prescribed by the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, in pursuance of these provisions, shall be subject to the penalties above provided by this section. Every owner, agent, or superintendent of any brewery or bottling house who removes, or connives at the removal of, any fermented liquor through a pipe line or conduit, without payment of the tax thereon, or who attempts in any manner to defraud the revenue as above, shall forfeit all the liquors made by and for him, and all the vessels, utensils, and apparatus used in making the same."

SPECIAL TAXES.

SEC. 407. That on and after January 1, 1917, special taxes shall be, and hereby are, imposed annually as follows, that is to say:

Every corporation, joint-stock company or association, now or hereafter organized in the United States for profit and having a capital stock represented by shares, and every insurance company, now or hereafter organized under the laws of the United States, or any State or Territory of the United States, shall pay annually a special excise tax with respect to the carrying on or doing business by such corporation, joint-stock company or association, or insurance company, equivalent to 50 cents for each $1,000 of the fair value of its capital stock and in estimating the value of capital stock the surplus and undivided profits shall be included: *Provided*, That in the case of insurance companies such deposits and reserve funds as they are required by law or contract to maintain or hold for the protection of or payment to or apportionment among policyholders shall not be included. The amount of such annual tax shall in all cases be computed on the basis of the fair average value of the capital stock for the preceding year: *Provided*, That for the purpose of this tax an exemption of $99,000 shall be allowed from the capital stock as defined in this paragraph of each corporation, joint-stock company or association, or insurance company: *Provided further*, That a corporation, joint-stock company or association, or insurance company, actually paying the tax imposed by section 301 of Title III. of this act shall be entitled to a credit as against the tax imposed by this paragraph equal to the amount of the tax so actually paid: *And provided further*, That this tax shall not be imposed upon any corporation, joint-stock company or association, or insurance company not engaged in business during the preceding taxable year, or which is exempt under the provisions of section 11, Title I., of this act.

Every corporation, joint-stock company or association, or insurance company, now or hereafter organized for profit under the laws of any foreign country and engaged in business in the United States shall pay annually a special excise tax with respect to the carrying on or doing business in the United States by such corporation, joint-stock company or association, or insurance company, equivalent to 50 cents for each $1,000 of the capital actually invested in the transaction of its business in the United States: *Provided*, That in the case of insurance companies such deposits or reserve funds as they are required by law or contract to maintain or hold in the United States for the protection of or payment to or apportionment among policyholders, shall not be included. The amount of such annual tax shall in all cases be computed on the basis of the average amount of capital so invested during the preceding year: *Provided*, That for the purpose of this tax an exemption from the amount of capital so invested shall be allowed equal to such proportion of $99,000 as the amount so invested bears to the total amount invested in the transaction of business in the United States or elsewhere: *Provided further*, That this exemption shall be allowed only if such corporation, joint-stock company or association, or insurance company makes return to the Commissioner of Internal Revenue, under regulations prescribed by him, with the approval of the Secretary of the Treasury, of the amount of capital invested in the transaction of business outside the United States: *And provided further*, That a corporation, joint-stock company or association, or insurance company actually paying the tax imposed by section 301 of Title III of this act, shall be entitled to a credit as against the tax imposed by this paragraph equal to the amount of the tax so actually paid: *And provided further*, That this tax shall not be imposed upon any corporation, joint-stock company or association, or insurance company not engaged in business during the preceding taxable year, or which is exempt under the provisions of section 11, Title I., of this act.

Second—Brokers shall pay $30. Every person, firm, or company, whose business it is to negotiate purchases or sales of stocks, bonds, exchange, bullion, coined money, bank notes, promissory notes, or other securities, for others, shall be regarded as a broker.

Third—Pawnbrokers shall pay $50. Every person, firm, or company whose business or occupation it is to take or receive, by way of pledge, pawn, or exchange, any goods, wares, or merchandise, or any kind of personal property whatever, as security for the repayment of money loaned thereon, shall be deemed a pawnbroker.

Fourth—Ship brokers shall pay $20. Every person, firm, or company whose business it is as a broker to negotiate freights and other business for the owners of vessels, or for the shippers or consignors or consignees of freight carried by vessels, shall be regarded as a ship broker under this section.

Fifth—Custom House brokers shall pay $10. Every person, firm, or company whose occupation it is, as the agent of others, to arrange entries and other Custom House papers, or transact business at any port of entry relating to the importation or exportation of goods, wares, or merchandise, shall be regarded as a Custom House broker.

Sixth—Proprietors of theatres, museums, and concert halls, where a charge for admission is made, having a seating capacity of not more than 250, shall pay $25; having a seating capacity of more than 250 and not exceeding 500, shall pay $50; having a seating capacity exceeding 500 and not exceeding 800, shall pay $75; having a seating capacity of more than 800, shall pay $100. Every edifice used for the purpose of dramatic or operatic or other representations, plays, or performances, for admission to which entrance money is received, not including halls or armories rented or used occasionally for concerts or theatrical representations, shall be regarded as a theatre: *Provided*, That in cities, towns, or villages of 5,000 inhabitants or less the amount of such payment shall be one-half of that above stated: *Provided further*, That whenever any such edifice is under lease at the passage of this act, the tax shall be paid by the lessee, unless otherwise stipulated between the parties to said lease.

Seventh—The proprietor or proprietors of circuses shall pay $100. Every building, space, tent, or area where feats of horsemanship or acrobatic sports or theatrical performances not otherwise provided for in this section are exhibited shall be regarded as a circus: *Provided*, That no special tax paid in one State, Territory, or the District of

Columbia shall exempt exhibitions from the tax in another State, Territory, or the District of Columbia, and but one special tax shall be imposed for exhibitions within any one State, Territory, or District.

Eighth—Proprietors or agents of all other public exhibitions or shows for money not enumerated in this section shall pay $10: *Provided*, That a special tax paid in one State, Territory, or the District of Columbia shall not exempt exhibitions from the tax in another State, Territory, or the District of Columbia, and but one special tax shall be required for exhibitions within any one State, Territory, or the District of Columbia: *Provided further*, That this paragraph shall not apply to Chautauquas, lecture lyceums, agricultural or industrial fairs, or exhibitions held under the auspices of religious or charitable associations: *Provided further*, That an aggregation of entertainments, known as a street fair, shall not pay a larger tax than $100 in any State, Territory, or in the District of Columbia.

Ninth—Proprietors of bowling alleys and billiard rooms shall pay $5 for each alley or table. Every building or place where bowls are thrown or where games of billiards or pool are played, except in private homes, shall be regarded as a bowling alley or a billiard room, respectively.

SEC. 408. That on and after January 1, 1917, special taxes on tobacco, cigar, and cigarette manufacturers shall be, and hereby are, imposed annually as follows, the amount of such annual taxes to be computed in all cases on the basis of the annual sales for the preceding fiscal year:

Manufacturers of tobacco whose annual sales do not exceed 50,000 lbs. shall each pay $3;

Manufacturers of tobacco whose annual sales exceed 50,000 and do not exceed 100,000 lbs. shall each pay $6;

Manufacturers of tobacco whose annual sales exceed 100,000 and do not exceed 200,000 lbs. shall each pay $12;

Manufacturers of tobacco whose annual sales exceed 200,000 lbs. shall each pay at the rate of 8 cents per 1,000 lbs., or fraction thereof;

Manufacturers of cigars whose annual sales do not exceed 50,000 cigars shall each pay $2;

Manufacturers of cigars whose annual sales exceed 50,000 and do not exceed 100,000 cigars shall each pay $3;

Manufacturers of cigars whose annual sales exceed 100,000 and do not exceed 200,000 cigars shall each pay $6;

Manufacturers of cigars whose annual sales exceed 200,000 and do not exceed 400,000 cigars shall each pay $12;

Manufacturers of cigars whose annual sales exceed 400,000 cigars shall each pay at the rate of 5 cents per 1,000 cigars, or fraction thereof;

Manufacturers of cigarettes, including small cigars weighing not more than 3 lbs. per 1,000, shall each pay at the rate of 3 cents for every 10,000 cigarettes, or fraction thereof.

In arriving at the amount of special tax to be paid under this section, and in the levy and collection of such tax, each person, firm, or corporation engaged in the manufacture of more than one of the classes of articles specified in this section shall be considered and deemed a manufacturer of each class separately.

Every person who carries on any business or occupation for which special taxes are imposed by this title, without having paid the special tax therein provided, shall, besides being liable to the payment of such special tax, be deemed guilty of a misdemeanor, and upon conviction thereof shall pay a fine of not more than $500, or be imprisoned not more than six months, or both, in the discretion of the court.

SEC. 409. That all administrative or special provisions of law, including the law relating to the assessment of taxes, so far as applicable, are hereby extended to and made a part of this title, and every person, firm, company, corporation, or association liable to any tax imposed by this title, shall keep such records and render, under oath, such statements and returns, and shall comply with such regulations as the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, may from time to time prescribe.

SEC. 410. That the act approved October 22, 1914, entitled "An act to increase the Internal Revenue, and for other purposes," and the joint resolution approved December 17, 1915, entitled "Joint resolution extending the provisions of the act entitled 'An act to increase the Internal Revenue, and for other purposes,' approved October 22, 1914, to December 31, 1916," are hereby repealed, except sections 3 and 4 of such act as so extended, which sections shall remain in force till January 1, 1917, and except that the provisions of the said act shall remain in force for the assessment and collection of all special taxes imposed by sections 3 and 4 thereof, or by such sections as extended by said joint resolution, for any year or part thereof ending prior to January 1, 1917, and of all other taxes imposed by such act, or by such act as so extended, accrued prior to the taking effect of this title, and for the imposition and collection of all penalties or forfeitures which have accrued or may accrue in relation to any of such taxes.

SEC. 411. That the Commissioner of Internal Revenue, subject to regulation prescribed by the Secretary of the Treasury, may make allowance for or redeem stamps, issued, under authority of the act approved October 22, 1914, entitled "An act to increase the Internal Revenue, and for other purposes," and the joint resolution approved December 17, 1915, entitled "Joint resolution extending the provisions of the act entitled 'An act to increase the Internal Revenue, and for other purposes,' approved October 22, 1914, to December 31, 1916," to denote the payment of Internal Revenue tax, and which have not been used, if presented within two years after the purchase of such stamps.

SEC. 412. That the provisions of this title shall take effect on the day following the passage of this act, except where otherwise in this title provided.

SEC. 413. That all Internal Revenue agents and inspectors be granted leave of absence with pay, which shall not be cumulative, not to exceed 30 days in any calendar year, under such regulations as the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, may prescribe.

TITLE V.—DYESTUFFS.

SEC. 500. That on and after the day following the passage of this act, except as otherwise specially provided for in this title, there shall be levied, collected, and paid upon the articles named in this section when imported from any foreign country into the United States or into any of its possessions, except the Philippine Islands and the islands of Guam and Tutuila, the rates of duties which are prescribed in this title, namely:

FREE LIST.

Group I. Acenaphthene, anthracene having a purity of less than 25 p. c., benzol, carbazol having a purity of less than 25 p. c., cresol, cumol, fluorene, metacresol having a purity of less than 90 p. c., methylanthracene, methylnaphthalene, naphthalene having a solidifying point less than 79° centigrade, orthocresol having a purity of less than 90 p. c., paracresol having a purity of less than 90 p. c., pyridin, quinolin, toluol, xylol, crude coal tar, pitch of coal tar, dead or creosote oil, anthracene oil, all other distillates which on being subjected to distillation yield in the portion distilling below 200 degrees centigrade a quantity of tar acids less than 5 p. c. of the original distillate, and all other products that are found naturally in coal tar, whether produced or obtained from coal tar or other source, and not otherwise specially provided for in this title, shall be exempt from duty.

DUTIABLE LIST.

Group II. Amidonaphthol, amidophenol, amidosalicylic acid, anilin oil, anilin salts, anthracene having a purity of 25 p. c. or more, anthraquinone, benzoic acid, benzaldehyde, benzylchloride, benzidin, binitrobenzol, binitrochlorobenzol, binitronaphthalene, binitrotoluol, carbazol having a purity of 25 p. c. or more, chlorophthalic acid, cumidin, dimethylanilin, dianisidin, dioxynaphthalene, diphenylamin, metacresol having a purity of 90 p. c. or more, methylanthraquinone, metanilic

acid, naphthalene having a solidifying point of 79° centigrade or above, naphthylamin, naphthol, naphthylenediamin nitrobenzol, nitrotoluol, nitronaphthalene, nitranilin, nitrophenylenediamin, nitrotoluylenediamin, orthocresol having a purity of 90 p. c. or more paracresol having a purity of 90 p c or more, phenol, phthalic acid, phthalic anhydride phenylenediamin phenylnaphthylamin, resorcin, salicylic acid sulphanilic acid, toluidin, tolidin toluylenediamin xylidin, or any sulphoacid or sulphoacid salt of any of the foregoing, all similar products obtained derived, or manufactured in whole or in part from the products provided for in Group I., and all distillates which on being subjected to distillation yield in the portion distilling below 200° centigrade a quantity of tar acids equal to or more than 5 p. c of the original distillate, all the foregoing not colors, dyes, or stains, photographic chemicals, medicinals, flavors, or explosives, and not otherwise provided for in this title, and provided for in the paragraphs of the act of October 3, 1913, which are hereinafter specifically repealed by section 502, 15 p. c *ad valorem*.

Group III. All colors, dyes, or stains, whether soluble or not in water, color acids, color bases, color lakes, photographic chemicals, medicinals, flavors, synthetic phenolic resin, or explosives, not otherwise specially provided for in this title, when obtained, derived, or manufactured in whole or in part from any of the products provided for in Groups I. and II., natural alizarin and indigo, and colors, dyes, or color lakes obtained, derived, or manufactured therefrom, 30 p. c. *ad valorem*.

SEC. 501. That on and after the day following the passage of this act, in addition to the duties provided in section 500, there shall be levied, collected, and paid upon all articles contained in Group II. a special duty of 2½ cents per pound, and upon all articles contained in Group III. (except natural and synthetic alizarin, and dyes obtained from alizarin, anthracene, and carbazol; natural and synthetic indigo and all indigoids, whether or not obtained from indigo; and medicinals and flavors), a special duty of 5 cents per pound.

During the period of five years beginning five years after the passage of this act such special duties shall be annually reduced by 20 p. c. of the rate imposed by this section, so that at the end of such period such special duties shall no longer be assessed, levied, or collected; but if, at the expiration of five years from the date of the passage of this act the President finds that there is not being manufactured or produced within the United States as much as 60 p. c. in value of the domestic consumption of the articles mentioned in Groups II and III. of section 500, he shall by proclamation so declare, whereupon the special duties imposed by this section on such articles shall no longer be assessed, levied, or collected.

SEC. 502. That paragraphs 20, 21, 22, and 23 and the words "salicylic acid" in paragraph 1 of Schedule A of section 1 of an act entitled "An act to reduce tariff duties and to provide revenue for the Government, and for other purposes," approved October 3, 1913, and paragraphs 394, 452, and 514, and the words "carbolic" and "phthalic," in paragraph 387 of the "free list" of section 1 of said act, and so much of said act or any existing law or parts of law as may be inconsistent with this title are hereby repealed.

TITLE VI.—PRINTING PAPER.

SEC. 600. That paragraph 322, Schedule M, and paragraph 567 of the free list of the act entitled "An act to reduce tariff duties and to provide revenue for the Government, and for other purposes," approved October 3, 1913, be amended so that the same shall read as follows:

"322. Printing paper (other than paper commercially known as hand-made or machine hand-made paper, japan paper, and imitation japan paper by whatever name known), unsized, sized, or glued, suitable for the printing of books and newspapers, but not for covers or bindings, not specially provided for in this section, valued above 5 cents per pound, 12 p. c. *ad valorem*. *Provided, however*, That if any country, dependency, province, or other subdivision of government shall impose any export duty, export license fee, or other charge of any kind whatsoever (whether in the form of additional charge or license fee or otherwise) upon printing paper, wood pulp, or wood for use in the manufacture of wood pulp, there shall be imposed upon printing paper, values above 5 cents per pound, when imported either directly or indirectly from such country, dependency, province, or other subdivision of government, an additional duty equal to the amount of the highest export duty or other export charge imposed by such country, dependency, province, or other subdivision of government, upon either printing paper or upon an amount of wood pulp, or wood for use in the manufacture of wood pulp necessary to manuiacture such printing paper.

"567. Printing paper (other than paper commercially known as hand-made or machine hand-made paper, japan paper, and imitation japan paper by whatever name known), unsized, sized, or glued, suitable for the printing of books and newspapers, but not for covers or bindings, not specially provided for in this section, valued at not above 5 cents per pound, decalcomania paper not printed."

TITLE VII.—TARIFF COMMISSION.

SEC. 700. That a commission is hereby created and established, to be known as the United States Tariff Commission (hereinafter in this title referred to as the commission), which shall be composed of six members, who shall be appointed by the President, by and with the advice and consent of the Senate, not more than three of whom shall be members of the same political party. In making said appointments members of different political parties shall alternate as nearly as may be practicable. The first members appointed shall continue in office for terms of two, four, six, eight, ten and twelve years, respectively, from the date of the passage of this act, the term of each to be designated by the President, but their successors shall be appointed for terms of twelve years, except that any person chosen to fill a vacancy shall be appointed only for the unexpired term of the member whom he shall succeed. The President shall designate annually the Chairman and Vice-Chairman of the commission. No member shall engage actively in any other business, function, or employment. Any member may be removed by the President for inefficiency, neglect of duty, or malfeasance in office. A vacancy shall not impair the right of the remaining members to exercise all the powers of the commission, but no vacancy shall extend beyond any session of Congress.

SEC. 701. That each Commissioner shall receive a salary of $7,500 per year, payable monthly. The commission shall appoint a secretary, who shall receive a salary of $5,000 per year, payable in like manner, and it shall have authority to employ and fix the compensations of such special experts, examiners, clerks, and other employés as the commission may from time to time find necessary for the proper performance of its duties.

With the exception of the secretary, a clerk to each Commissioner, and such special experts as the commission may from time to time find necessary for the conduct of its work, all employés of the commission shall be appointed from lists of eligibles to be supplied by the Civil Service Commission and in accordance with the Civil Service Law.

The principal office of the commission shall be in the City of Washington, but it may meet and exercise all its powers at any other place. The commission may, by one or more of its members, or by such agents as it may designate, prosecute any inquiry necessary to its duties in any part of the United States or in any foreign country.

SEC. 702. That it shall be the duty of said commission to investigate the administration and fiscal and industrial effects of the customs laws of this country now in force or which may be hereafter enacted, the relations between the rates of duty on raw materials and finished or partly finished products, the effects of *ad valorem* and specific duties and of compound specific and *ad valorem* duties, all questions relative to the arrangement of schedules and

classification of articles in the several schedules of the customs law, and, in general, to investigate the operation of customs laws, including their relation to the Federal revenues, their effect upon the industries and labor of the country, and to submit reports of its investigations as hereafter provided.

SEC. 703. That the commission shall put at the disposal of the President of the United States, the Committee on Ways and Means of the House of Representatives, and the Committee on Finance of the Senate, whenever requested, all information at its command, and shall make such investigations and reports as may be requested by the President or by either of said committees or by either branch of the Congress, and shall report to Congress on the first Monday of December of each year hereafter a statement of the methods adopted and all expenses incurred, and a summary of all reports made during the year.

SEC. 704. That the commission shall have power to investigate the tariff relations between the United States and foreign countries, commercial treaties, preferential provisions, economic alliances, the effect of export bounties and preferential transportation rates, the volume of importations compared with domestic production and consumption, and conditions, causes, and effects relating to competition of foreign industries with those of the United States, including dumping and cost of production.

SEC. 705. That upon the organization of the commission, the Cost of Production Division in the Bureau of Foreign and Domestic Commerce in the Department of Commerce shall be transferred to said commission, and the clerks and employés of said division shall be transferred to and become clerks and employés of the commission, and all records, papers, and property of the said division and of the former Tariff Board shall be transferred to and become the records, papers, and property of the commission.

SEC. 706. That for the purposes of carrying this title into effect the commission or its duly authorized agent or agents shall have access to and the right to copy any document, paper, or record, pertinent to the subject matter under investigation, in the possession of any person, firm, co-partnership, corporation, or association engaged in the production, importation, or distribution of any article under investigation, and shall have power to summon witnesses, take testimony, administer oaths, and to require any person, firm, co-partnership, corporation, or association to produce books or papers relating to any matter pertaining to such investigation. Any member of the commission may sign subpoenas, and members and agents of the commission, when authorized by the commission, may administer oaths and affirmations, examine witnesses, take testimony, and receive evidence.

Such attendance of witnesses and the production of such documentary evidence may be required from any place in the United States at any designated place of hearing. And in case of disobedience to a subpoena the commission may invoke the aid of any district court of the United States in requiring the attendance and testimony of witnesses and the production of documentary evidence, and such court within the jurisdiction of which such inquiry is carried on may, in case of contumacy or refusal to obey a subpoena issued to any corporation or other person, issue an order requiring such corporation or other person to appear before the commission, or to produce documentary evidence if so ordered, or to give evidence touching the matter in question; and any failure to obey such order of the court may be punished by such court as a contempt thereof.

Upon the application of the Attorney-General of the United States at the request of the commission, any such court shall have jurisdiction to issue writs of mandamus commanding compliance with the provisions of this title or any order of the commission made in pursuance thereof.

The commission may order testimony to be taken by deposition in any proceeding or investigation pending under this title at any stage of such proceeding or investigation. Such depositions may be taken before any person designated by the commission and having power to administer oaths. Such testimony shall be reduced to writing by the person taking the deposition, or under his direction, and shall then be subscribed by the deponent. Any person, firm, co-partnership, corporation, or association, may be compelled to appear and depose and to produce documentary evidence in the same manner as witnesses may be compelled to appear and testify and produce documentary evidence before the commission, as hereinbefore provided.

Witnesses summoned before the commission shall be paid the same fees and mileage that are paid witnesses in the courts of the United States, and witnesses whose depositions are taken and the persons taking the same, except employés of the commission, shall severally be entitled to the same fees and mileage as are paid for like services in the courts of the United States: *Provided*, That no person shall be excused, on the ground that it may tend to incriminate him or subject him to a penalty or forfeiture, from attending and testifying, or producing books, papers, documents, and other evidence, in obedience to the subpoena of the commission; but no natural person shall be prosecuted or subjected to any penalty or forfeiture for or on account of any transaction, matter, or thing as to which, in obedience to a subpoena and under oath, he may so testify or produce evidence, except that no person shall be exempt from prosecution and punishment for perjury committed in so testifying.

SEC. 707. That the said commission shall in appropriate matters act in conjunction and co-operation with the Treasury Department, the Department of Commerce, the Federal Trade Commission, or any other departments, or independent establishments of the Government, and such departments and independent establishments of the Government shall co-operate fully with the commission for the purposes of aiding and assisting in its work, and, when directed by the President, shall furnish to the commission, on its request, all records, papers, and information in their possession relating to any of the subjects of investigation by said commission and shall detail, from time to time, such officials and employés to said commission as he may direct.

SEC. 708. It shall be unlawful for any member of the United States Tariff Commission, or for any employé, agent, or clerk of said commission, or any other officer or employé of the United States, to divulge, or to make known in any manner whatever not provided for by law, to any person, the trade secrets or processes of any person, firm, co-partnership, corporation, or association embraced in any examination or investigation conducted by said commission, or by order of said commission, or by order of any member thereof. Any offence against the provisions of this section shall be a misdemeanor and be punished by a fine not exceeding $1,000, or by imprisonment not exceeding one year, or both, in the discretion of the court, and such offender shall also be dismissed from office or discharged from employment. The commission shall have power to investigate the Paris Economy Pact and similar organizations and arrangements in Europe.

SEC. 709. That there is hereby appropriated, for the purpose of defraying the expense of the establishment and maintenance of the commission, including the payment of salaries herein authorized, out of any money in the Treasury of the United States not otherwise appropriated, the sum of $300,000 for the fiscal year ending June 30, 1917, and for each fiscal year thereafter a like sum is authorized to be appropriated.

TITLE VIII.—UNFAIR COMPETITION.

SEC. 800. That when used in this title the term "person" includes partnerships, corporations, and associations.

SEC. 801. That it shall be unlawful for any person importing or assisting in importing any articles from any foreign country into the United States, commonly and systematically to import, sell or cause to be imported or sold such articles within the United States at a price substantially less than the actual market value or wholesale price of such articles, at the time of exportation to the United States, in the principal markets of

the country of their production, or of other foreign countries to which they are commonly exported, after adding to such market value or wholesale price, freight, duty, and other charges and expenses necessarily incident to the importation and sale thereof in the United States; *Provided*, That such act or acts be done with the intent of destroying or injuring an industry in the United States, or of preventing the establishment of an industry in the United States, or of restraining or monopolizing any part of trade and commerce in such articles in the United States.

Any person who violates or combines or conspires with any other person to violate this section is guilty of a misdemeanor, and, on conviction thereof, shall be punished by a fine not exceeding $5,000, or imprisonment not exceeding one year, or both, in the discretion of the court.

Any person injured in his business or property by reason of any violation of, or combination or conspiracy to violate, this section, may sue therefor in the district court of the United States for the district in which the defendant resides or is found or has an agent, without respect to the amount in controversy, and shall recover threefold the damages sustained, and the cost of the suit, including a reasonable attorney's fee.

The foregoing provisions shall not be construed to deprive the proper State courts of jurisdiction in actions for damages thereunder.

SEC. 802. That if any article produced in a foreign country is imported into the United States under any agreement, understanding, or condition that the importer thereof or any other person in the United States shall not use, purchase, or deal in, or shall be restricted in his using, purchasing, or dealing in, the articles of any other person, there shall be levied, collected, and paid thereon, in addition to the duty otherwise imposed by law, a special duty equal to double the amount of such duty: *Provided*, That the above shall not be interpreted to prevent the establishing in this country on the part of a foreign producer of an exclusive agency for the sale in the United States of the products of said foreign producer or merchant, nor to prevent such exclusive agent from agreeing not to use, purchase, or deal in the article of any other person, but this proviso shall not be construed to exempt from the provisions of this section any article imported by such exclusive agent if such agent is required by the foreign producer or if it is agreed between such agent and such foreign producer that any agreement, understanding or condition set out in this section shall be imposed by such agent upon the sale or other disposition of such article to any person in the United States.

SEC. 803. That the Secretary of the Treasury shall make such rules and regulations as are necessary for the carrying out of the provisions of section 802.

SEC. 804. That whenever any country, dependency, or colony shall prohibit the importation of any article the product of the soil or industry of the United States and not injurious to health or morals, the President shall have power to prohibit, during the period such prohibition is in force, the importation into the United States of similar articles, or in case the United States does not import similar articles from that country, then other articles, the products of such country, dependency, or colony.

And the Secretary of the Treasury, with the approval of the President, shall make such rules and regulations as are necessary for the execution of the provisions of this section.

SEC. 805. That whenever during the existence of a war in which the United States is not engaged, the President shall be satisfied that there is reasonable ground to believe that under the laws, regulations, or practices of any country, colony, or dependency contrary to the law and practice of nations, the importation into their own or any other country, dependency, or colony of any article the product of the soil or industry of the United States and not injurious to health or morals is prevented or restricted, the President is authorized and empowered to prohibit or restrict during the period such prohibition or restriction is in force, the importation into the United States of similar or other articles, products of such country, dependency, or colony as in his opinion the public interest may require; and in such case he shall make proclamation stating the article or articles which are prohibited from importation into the United States; and any person or persons who shall import, or attempt or conspire to import, or be concerned in importing, such article or articles into the United States contrary to the prohibition in such proclamation, shall be liable to a fine of not less than $2,000 nor more than $50,000, or to imprisonment not to exceed two years, or both, in the discretion of the court. The President may change, modify, revoke, or renew such proclamation in his discretion.

SEC. 806. That whenever, during the existence of a war in which the United States is not engaged, the President shall be satisfied that there is reasonable ground to believe that any vessel, American or foreign, is, on account of the laws, regulations, or practices of a belligerent Government, making or giving any undue or unreasonable preference or advantage in any respect whatsoever to any particular person, company, firm, or corporation, or any particular description of traffic in the United States or its possessions or to any citizens of the United States residing in neutral countries abroad, or is subjecting any particular person, company, firm, or corporation or any particular description of traffic in the United States or its possessions, or any citizens of the United States residing in neutral countries abroad to any undue or unreasonable prejudice, disadvantage, injury, or discrimination in regard to accepting, receiving, transporting, or delivering, or refusing to accept, receive, transfer, or deliver any cargo, freight or passengers, or in any other respect whatsoever, he is hereby authorized and empowered to direct the detention of such vessels by withholding clearance or by formal notice forbidding departure, and to revoke, modify, or renew any such direction.

That whenever, during the existence of a war in which the United States is not engaged, the President shall be satisfied that there is reasonable ground to believe that under the laws, regulations, or practices of any belligerent country or government, American ships or American citizens are not accorded any of the facilities of commerce which the vessels or citizens of that belligerent country enjoy in the United States or its possessions, or are not accorded by such belligerent equal privileges or facilities of trade with vessels or citizens of any nationality other than that of such belligerent, the President is hereby authorized and empowered to withhold clearance from one or more vessels of such belligerent country until such belligerent shall restore to such American vessels and American citizens reciprocal liberty of commerce and equal facilities of trade; or the President may direct that similar privileges and facilities, if any, enjoyed by vessels or citizens of such belligerent in the United States or its possessions be refused to vessels or citizens of such belligerent; and in such case he shall make proclamation of his direction, stating the facilities and privileges which shall be refused, and the belligerent to whose vessels or citizens they are to be refused, and thereafter the furnishing of such prohibited privileges and facilities to any vessel or citizen of the belligerent named in such proclamation shall be unlawful; and he may change, modify, revoke, or renew such proclamation; and any person or persons who shall furnish or attempt or conspire to furnish or be concerned in furnishing or in the concealment of furnishing facilities or privileges to ships or persons contrary to the prohibition in such proclamation shall be liable to a fine of not less than $2,000 nor more than $50,000 or to imprisonment not to exceed two years, or both, in the discretion of the court.

In case any vessel which is detained by virtue of this act shall depart or attempt to depart from the jurisdiction of the United States without clearance or other lawful authority, the owner or master or person or persons having charge or command of such vessel shall be severally liable to a fine of not less than $2,000 nor more than $10,000, or to imprisonment not to exceed two years, or both, and in addition such vessel shall be forfeited to the United States.

That the President of the United States is hereby authorized and empowered to employ such part of the land or naval forces of the United States as shall be necessary to carry out the purposes of this act.

TITLE IX.

SEC. 900. That if any clause, sentence, paragraph, or part of this act shall for any reason be adjudged by any court of competent jurisdiction to be invalid, such judgment shall not affect, impair, or invalidate the remainder of said act, but shall be confined in its operation to the clause, sentence, paragraph, or part thereof directly involved in the controversy in which such judgment shall have been rendered.

SEC. 901. The act approved August 29, 1916, being an act makinga ppropriations for the support of the army for the fiscal year ending June 30, 1917, and for other purposes, is hereby amended as follows:

"The sum of $2,000,000, therein appropriated to be expended under the direction of the Secretary of War for the support of the family of each enlisted man of the organized militia or National Guard, or of the regular army, as therein provided, shall be available to be paid on the basis of and for time subsequent to June 18, 1916, the date of the call by the President, and the time for which such payment shall be made shall correspond with the time of service of the enlisted men, and payment shall be made without reference to the enlisted man having enlisted before or after the call by the President."

SEC. 902. That unless otherwise herein specially provided, this act shall take effect on the day following its passage, and all provisions of any act or acts inconsistent with the provisions of this act are hereby repealed.

Approved. September 8, 1916.

FEDERAL TRADE COMMISSION.

Edward N. Hurley, *Chairman;* William J. Harris, *Vice-Chairman;* Joseph E. Davies, Will H. Parry, George Rublee; Leonidas L. Bracken, *Secretary.*

The Federal Trade Commission is composed of five Commissioners appointed by the President. Not more than three of the Commissioners can be members of the same political party. The first Commissioners appointed continue in office for terms of three, four, five, six, and seven years respectively, the term of each to be designated by the President, but their successors will be appointed for terms of seven years, except that any person chosen to fill a vacancy shall be appointed only for the unexpired term of the Commissioner whom he shall succeed, and no Commissioner shall engage in any other business, vocation, or employment. A vacancy in the commission does not impair the right of the remaining Commissioners to exercise all the powers of the commission. The Commissioners receive a salary of $10,000 a year, and the Secretary $5,000.

SEC. 3 provides: That upon the organization of the commission and election of its Chairman, the Bureau of Corporations and the offices of Commissioner and Deputy Commissioner of Corporations cease to exist; and all pending investigations and proceedings of the Bureau of Corporations are continued by the commission.

The principal office of the commission is in Washington, but it may meet and exercise all its powers at any other place. The commission may, by one or more of its members, or by such examiners as it may designate, prosecute any inquiry necessary to its duties in any part of the United States.

SEC. 5 provides: That unfair methods of competition in commerce are declared unlawful. The commission is empowered and directed to prevent persons, partnerships, or corporations, except banks, and common carriers subject to the acts to regulate commerce, from using unfair methods of competition in commerce.

Whenever the commission shall have reason to believe that any such person, partnership, or corporation has been or is using any unfair method of competition in commerce, and if it shall appear to the commission that a proceeding by it in respect thereof would be to the interest of the public, it shall issue and serve upon such person, partnership, or corporation a complaint stating its charges in that respect, and containing a notice of a hearing upon a day and at a place therein fixed at least thirty days after the service of said complaint. The person, partnership, or corporation so complained of shall have the right to appear at the place and time so fixed and show cause why an order should not be entered by the commission requiring such person, partnership, or corporation to cease and desist from the violation of the law so charged in said complaint. Any person, partnership, or corporation may make application, and upon good cause shown may be allowed by the commission, to intervene and appear in said proceeding by counsel or in person. The testimony in any such proceeding shall be reduced to writing and filed in the office of the commission. If upon such hearing the commission shall be of the opinion that the method of competition in question is prohibited by this act, it shall make a report in writing in which it shall state its findings as to the facts and shall issue and cause to be served on such person, partnership, or corporation an order requiring such person, partnership, or corporation to cease and desist from using such method of competition. Until a transcript of the record in such hearing shall have been filed in a Circuit Court of Appeals of the United States, as hereinafter provided, the commission may at any time, upon such notice and in such manner as it shall deem proper, modify or set aside, in whole or in part, any report or any order made or issued by it under this section.

If such person, partnership, or corporation fails or neglects to obey such order of the commission while the same is in effect, the commission may apply to the Circuit Court of Appeals of the United States, within any circuit where the method of competition in question was used or where such person, partnership, or corporation resides or carries on business, for the enforcement of its order, and shall certify and file with its application a transcript of the entire record in the proceeding, including all the testimony taken and the report and order of the commission. Upon such filing of the application and transcript the court shall cause notice thereof to be served upon such person, partnership, or corporation and thereupon shall have jurisdiction of the proceeding and of the question determined therein, and shall have power to make and enter upon the pleadings, testimony, and proceedings set forth in such transcript a decree affirming, modifying, or setting aside the order of the commission. The findings of the commission as to the facts, if supported by testimony, shall be conclusive.

SEC. 6 provides: To investigate, from time to time, trade conditions in and with foreign countries where associations, combinations, or practices of manufacturers, merchants, or traders, or other conditions, may affect the foreign trade of the United States, and to report to Congress thereon, with such recommendations as it deems advisable.

SEC. 10. Any person who shall neglect or refuse to attend and testify, or to answer any lawful inquiry or to produce documentary evidence, if in his power to do so, in obedience to the subpoena or lawful requirement of the commission, shall be guilty of an offence and upon conviction thereof by a court of competent jurisdiction shall be punished by a fine of not less than $1,000 nor more than $5,000, or by imprisonment for not more than one year, or by both such fine and imprisonment.

SEC. 11. Nothing in this act, approved September 26, 1914, shall be construed to prevent or interfere with the enforcement of the provisions of the Anti-Trust acts or the acts to regulate commerce, nor shall anything contained in the act be construed to alter, modify, or repeal the said Anti-Trust acts or the acts to regulate commerce or any part or parts thereof.

The commission is authorized to enforce compliance with sections 2, 3, 7, and 8 of the act approved October 15, 1914 (the Clayton act, as printed in vol. 1915 of THE WORLD ALMANAC), by persons and corporations respectively subject thereto, except common carriers, banks, banking associations, and trust companies.

PATENT OFFICE PROCEDURE.

THE following statement has been revised by the Patent Office for THE WORLD ALMANAC:

Patents are issued in the name of the United States, and under the seal of the Patent Office, to any person who has invented or discovered any new and useful art, machine, manufacture, or composition of matter or any new and useful improvement thereof, or any new, original and ornamental design for an article of manufacture, not known or used by others in this country before his invention or discovery thereof, and not patented or described in any printed publication in this or any foreign country, before his invention or discovery thereof or more than two years prior to his application, and not in public use or on sale in the United States for more than two years prior to his application, unless the same is proved to have been abandoned; upon payment of the fees required by law and other due proceedings had.

Every patent contains a grant to the patentee, his heirs or assigns, for the term of seventeen years, except in the case of design patents, of the exclusive right to make, use, and vend the invention or discovery throughout the United States and the Territories, referring to the specification for the particulars thereof.

If it appear that the inventor, at the time of making his application, believed himself to be the first inventor or discoverer, a patent will not be refused on account of the invention or discovery, or any part thereof, having been known or used in any foreign country before his invention or discovery thereof, if it had not been before patented or described in any printed publication.

Joint inventors are entitled to a joint patent; neither can claim one separately. Independent inventors of distinct and independent improvements in the same machine cannot obtain a joint patent for their separate inventions; nor does the fact that one furnishes the capital and another makes the invention entitle them to make application as joint inventors; but in such case they may become joint patentees by means of a deed of assignment.

No person otherwise entitled thereto will be debarred from receiving a patent for his invention or discovery, by reason of its having been first patented or caused to be patented by the inventor or his legal representatives or assigns in a foreign country, unless the application for said foreign patent was filed more than twelve months prior to the filing of the application in this country, and four months in cases of designs, in which case no patent shall be granted in this country.

APPLICATIONS.

If an inventor wishes to file an application for patent, a copy of the Rules of Practice, containing forms and instructions, will be sent upon request. It is advisable, however, in every case, that the services of a competent registered patent attorney be secured, as the value of patents depends largely upon the skilful preparation of the specification and claims. The Patent Office cannot recommend any particular attorney or firm, but advises applicants to avoid doing business with those who advertise the possession of unusual facilities for obtaining patents.

Applications for patents must be made in writing to the Commissioner of Patents. The applicant must file in the Patent Office a written description of the invention or discovery, and of the manner and process of making, constructing, compounding, and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art or science to which it appertains, or with which it is most nearly connected, to make, construct, compound, and use the same; and in case of a machine, he must explain the principle thereof, and the best mode in which he has contemplated applying that principle, so as to distinguish it from other inventions, and particularly point out and distinctly claim the part, improvement, or combination which he claims as his invention or discovery. The specification and claim must be signed by the inventor.

When the nature of the invention admits of drawings, the applicant must furnish a drawing of the required size, signed by the inventor or his attorney in fact. The applicant, if required by the Patent Office, shall furnish a model of convenient size to exhibit advantageously the several parts of his invention or discovery, but a model should not be sent unless first called for by the Patent Office.

The applicant shall make oath that he verily believes himself to be the original and first inventor or discoverer of the art, machine, manufacture, composition, or improvement for which he solicits a patent; that he does not know and does not believe that the same was ever before known or used, and shall state of what country he is a citizen and where he resides, and whether he is the sole or joint inventor of the invention claimed in his application. In every original application the applicant must distinctly state under oath that the invention has not been patented to himself or to others with his knowledge or consent in this or any foreign country for more than two years prior to his application, or on an application for a patent filed in any foreign country by himself or his legal representatives or assigns more than twelve months prior to his application in this country, or four months in cases of designs. If any application for patent has been filed in any foreign country by the applicant in this country or by his legal representatives or assigns, prior to his application in this country, he shall state the country or countries in which such application has been filed, giving the date of such application, and shall also state that no application has been filed in any other country or countries than those mentioned; that to the best of his knowledge and belief the invention has not been in public use or on sale in the United States nor described in any printed publication or patent in this or any foreign country for more than two years prior to his application in this country. Such oath may be made before any person within the United States authorized by law to administer oaths, or, when the applicant resides in a foreign country, before any Minister, Chargé d'Affaires, Consul, or commercial agent holding commission under the Government of the United States, or before any notary public, Judge or Magistrate having an official seal and authorized to administer oaths in that country whose authority shall be proved by a certificate of a diplomatic or consular officer of the United States, except that no acknowledgment may be taken by any attorney appearing in the case.

On the filing of such application and the payment of the fees required by law, if, on examination, it appears that the applicant is justly entitled to a patent under the law, and that the invention is sufficiently useful and important, the Commissioner will issue a patent therefor.

Every patent or any interest therein shall be assignable in law by an instrument in writing; and the patentee or his assigns or legal representatives may, in like manner, grant and convey an exclusive right under his patent to the whole or any specified part of the United States.

REISSUES.

A reissue is granted to the original patentee, his legal representatives, or the assignees of the entire interest when, by reason of a defective or insufficient specification, or by reason of the patentee claiming as his invention or discovery more than he had a right to claim as new, the original patent is inoperative or invalid, provided the error has arisen from inadvertence, accident, or mistake, and without

any fraudulent or deceptive intention. Reissue applications must be made and the specifications sworn to by the inventors, if they be living.

FEES.

Fees must be paid in advance, and are as follows: On filing each original application for a patent, $15. On issuing each original patent, $20. In design cases: For three years and six months, $10; for seven years, $15; for fourteen years, $30. On every application for the reissue of a patent, $30. On filing each disclaimer, $10. For certified copies of patents and other papers in manuscript, ten cents per hundred words and twenty-five cents for the certificate; for certified copies of printed patents, eighty cents. For uncertified printed copies of specifications and drawings of patents, five cents each. For recording every assignment, agreement, power of attorney, or other paper, of three hundred words or under, $1; of over three hundred and under one thousand words, $2; for each additional thousand words, or fraction thereof, $1. For copies of drawings, the reasonable cost of making them. The Patent Office is prepared to furnish positive photographic copies of the drawings of pending, patented or abandoned cases, in sizes and at rates as follows: Large size, 10x15 inches, twenty-five cents; medium size, 8x12½ inches, fifteen cents. Negative photographic copies of specifications and drawings of foreign patents, or of any page or part of page of any printed publication in the possession of the office, will be furnished on paper 7x11 inches, for fifteen cents per sheet. Stamps cannot be accepted by the Patent Office in payment of fees. Stamps and stamped envelopes should not be sent to the office for replies to letters, as stamps are not required on mail matter emanating from the Patent Office.

PATENT OFFICE STATISTICS.

The receipts of the Patent Office during the year ended December 31, 1915, were $2,290,773.47, and expenditures $2,053,442.15. Receipts over expenditures, $237,331.32. Total net surplus to December 31, 1915, $7,785,506.48.

The following is a statement of the business of the office for the year ended December 31, 1915:

Applications for patents for inventions	67,138
Applications for patents for designs	2,734
Applications for reissues of patents	197
Total	70,069
Applications for registration of trade-marks	8,432
Applications for registration of labels	982
Applications for registration of prints	486
Disclaimers filed	25
Appeals on the merits	2,021
Total	11,946
Patents issued, excluding designs	43,207
Design patents issued	1,545
Patents reissued	182
Total	44,934
Trade-marks registered	6,262
Labels registered	803
Prints registered	371
Total	7,436
Patents expired during the year	20,404
Applications forfeited for non-payment of final fees	11,331
Applications allowed, awaiting final fees	18,943
Trade-mark applications passed for publication	6,247

There is now no law permitting the filing of a caveat, the old law having been repealed July 1, 1910. Patent No. 1,000,000 was granted August 8, 1911, to F. H. Holton, of Akron, Ohio, for an automobile tire.

The following is a statement of patents and designs issued in 1915 according to residence of patentees: Alabama, 203; Alaska, 8; Arizona, 77; Arkansas, 135; California, 1,943; Canal Zone, 6; Colorado, 475; Connecticut, 1,129; Delaware, 74; District of Columbia, 300; Florida, 141; Georgia, 234; Hawaii, 24; Idaho, 104; Illinois, 4,517; Indiana, 955; Iowa, 714; Kansas, 449; Kentucky, 293; Louisiana, 191; Maine, 166; Maryland, 379; Massachusetts, 2,693; Michigan, 1,585; Minnesota, 779; Mississippi, 103; Missouri, 1,180; Montana, 189; Nebraska, 346; Nevada, 41; New Hampshire, 153; New Jersey, 2,129; New Mexico, 50; New York, 6,575; North Carolina, 177; North Dakota, 161; Ohio, 2,999; Oklahoma, 286; Oregon, 315; Pennsylvania, 3,941; Philippine Islands, 14; Porto Rico, 4; Rhode Island, 301; South Carolina, 90; South Dakota, 163; Tennessee, 240; Texas, 630; Utah, 146; Vermont, 98; Virginia, 334; Washington, 663; West Virginia, 266; Wisconsin, 1,084; Wyoming, 48; U. S. Army, 2; U. S. Navy, 18; U. S. Cutter Service, 1. Total, †40,321.

Foreign countries: Austria-Hungary, 136; Belgium, 46; Canada, 706; Cuba, 18; Denmark, 36; England, 1,069; France, 340; Germany, 1,209; Ireland, 20; Italy, 83; Japan, 10; Mexico, 17; Norway, 38; Russia, 22; Scotland, 81; Sweden, 93; Switzerland, 129; other countries, 287. Total foreign, 4,334.

GENERAL PATENT STATISTICS.

The following table is compiled from the report of the Commissioner of Patents for 1916. It exhibits the number of patents issued by foreign countries to December 31, 1914, and the United States from the earliest records to December 31, 1915:

Countries.	To 1870, Inclusive.	1871 to 1914.	Total.	Countries.	To 1870, Inclusive.	1871 to 1914.	Total.
Austria	.....	86,392	86,392	Spain	.....	54,390	54,390
Austria-Hungary	15,350	67,583	82,933	Sweden	1,629	39,789	41,418
Belgium	35,044	236,000	271,044	Switzerland	.....	68,682	68,682
Canada	4,081	159,167	163,248	All other foreign countries	8,363	206,979	215,342
France	103,934	399,458	503,392				
Germany	9,996	288,324	298,320				
Great Britain	53,408	440,099	493,507	Total foreign	238,437	2,305,659	2,544,096
Hungary	.....	61,688	61,688	United States	*120,573	1,012,595	1,133,168
India	445	13,210	13,655				
Italy and Sardinia	4,723	126,038	130,761	Grand total	359,010	3,318,254	3,677,264
Japan	.....	27,016	27,016	United States, 1915	.....	.....	43,207
Russia	1,464	30,844	32,308				

* Including 9,957 patents issued prior to July 1, 1836, on which date the present series began. † Not including 182 reissues, 1 patent without residence, and 96 patents withdrawn.

DELAYS OCCASIONED BY THE WAR.

The act of August 17, 1916, extended by nine months the time for filing applications, paying fees, and taking necessary action in cases in the Patent Office where the war in Europe prevented filing within the time heretofore allowed. This act operates to relieve default occurring between August 1, 1914, and January 1, 1918, and is reciprocal with citizens or subjects of countries extending similar privileges to citizens of the United States.

REGISTRATION OF TRADE-MARKS
IN THE UNITED STATES.

THE following are extracts from the new "Act to authorize the registration of trade-marks used in commerce with foreign nations, or among the several States or Indian tribes, and to protect the same," approved February 20, 1905, and later amendatory acts.

"The owner of a trade-mark used in commerce with foreign nations, or among the several States, or with Indian tribes, provided such owner shall be domiciled within the territory of the United States, or resides in or is located in any foreign country, which, by treaty, convention, or law, affords similar privileges to the citizens of the United States, may obtain registration for such trade-mark by complying with the following requirements: First, by filing in the Patent Office an application therefor, in writing, addressed to the Commissioner of Patents, signed by the applicant, specifying his name, domicile, location, and citizenship; the class of merchandise and the particular description of goods comprised in such class to which the trade-mark is appropriated; a statement of the mode in which the same is applied and affixed to goods and the length of time during which the trade-mark has been used; a description of the trade-mark itself shall be included, if desired by the applicant or required by the Commissioner, provided such description is of a character to meet the approval of the Commissioner. With this statement shall be filed a drawing of the trade-mark, signed by the applicant, or his attorney, and such number of specimens of the trade-mark, as actually used, as may be required by the Commissioner of Patents. Second, by paying into the Treasury of the United States the sum of ten dollars, and otherwise complying with the requirements of this act and such regulations as may be prescribed by the Commissioner of Patents.

"A certificate of registration shall remain in force for twenty years, except that in the case of trade-marks previously registered in a foreign country such certificates shall cease to be in force on the day on which the trade-mark ceases to be protected in such foreign country, and shall in no case remain in force more than twenty years, unless renewed. Certificates of registration may be, from time to time, renewed for like periods on payments of the renewal fees required by this act, upon request by the registrant, his legal representatives, or transferees of record in the Patent Office, and such request may be made at any time not more than six months prior to the expiration of the period for which the certificates of registration were issued or renewed. Certificates of registration in force at the date at which this act takes effect shall remain in force for the period for which they were issued, but shall be renewable on the same conditions and for the same periods as certificates issued under the provisions of this act, and when so renewed shall have the same force and effect as certificates issued under this act.

"The registration of a trade-mark under the provisions of this act shall be prima facie evidence of ownership. Any person who shall, without the consent of the owner thereof, reproduce, counterfeit, copy, or colorably imitate any such trade-mark and affix the same to merchandise of substantially the same descriptive properties as those set forth in the registration or to labels, signs, prints, packages, wrappers, or receptacles intended to be used upon or in connection with the sale of merchandise of substantially the same descriptive properties as those set forth in such registration, and shall use, or shall have used, such reproduction, counterfeit, copy, or colorable imitation in commerce among the several States, or with a foreign nation, or with the Indian tribes, shall be liable to an action for damages therefor at the suit of the owner thereof; and whenever in any such action a verdict is rendered for the plaintiff, the court may enter judgment therein for any sum above the amount found by the verdict as the actual damages, according to the circumstances of the case, not exceeding three times the amount of such verdict, together with the costs."

No trade-mark will be registered which consists of or comprises immoral or scandalous matter, or which consists of or comprises the flag or coat of arms or other insignia of the United States, or any simulation thereof, or of any State or municipality, or of any foreign nation, or which consists of or comprises any design or picture that has been adopted by any fraternal society as its emblem, or of any name, distinguishing mark, character, emblem, colors, flag, or banner adopted by any institution, organization, club, or society which was incorporated in any State in the United States prior to the date of the adoption and use by the applicant: Provided, That said name, distinguishing mark, character, emblem, colors, flag, or banner was adopted and publicly used by said institution, organization, club, or society prior to the date of adoption and use by the applicant; unless it shall be shown to the satisfaction of the Commissioner of Patents that the mark was adopted and used as a trade-mark by the applicant or applicant's predecessors, from whom title is derived, at a date prior to the date of its adoption by such fraternal society as its emblem, or which trade-mark is identical with a registered or known trade-mark owned and in use by another, and appropriated to merchandise of the same descriptive properties, or which so nearly resembles a registered or known trade-mark owned and in use by another, and appropriated to merchandise of the same descriptive properties as to be likely to cause confusion or mistake in the minds of the public, or to deceive purchasers; or which consists merely in the name of an individual, firm, corporation, or association, not written, printed, impressed, or woven in some particular or distinctive manner or in association with a portrait of the individual, or merely in words or devices which are descriptive of the goods with which they are used, or of the character or quality of such goods, or merely a geographical name or term; no portrait of a living individual will be registered as a trade-mark, except by the consent of such individual evidenced by an instrument in writing; and no trade-mark will be registered which is used in unlawful business, or upon any article injurious in itself, or which has been used with the design of deceiving the public in the purchase of merchandise, or which has been abandoned.

Any mark, used in commerce with foreign nations or among the several States or with Indian tribes, may be registered if it has been in actual and exclusive use as a trade-mark of the applicant, or his predecessors from whom he derived title, for ten years next preceding the passage of the act of February 20, 1905.

By Act of Congress approved February 18, 1909, the second section of the trades-mark act was amended so as to read as follows:

"The application prescribed in the foregoing section, in order to create any right whatever in favor of the party filing it, must be accompanied by a written declaration verified by the applicant, or by a member of the firm or an officer of the corporation or association applying, to the effect that the applicant believes himself or the firm, corporation, or association in whose behalf he makes the application to be the owner of the trade-mark sought to be registered, and that no other person, firm, corporation, or association, to the best of the applicant's knowledge and belief, has the right to use such trade-mark in the United States, either in the identical form or in such near resemblance thereto as might be calculated to deceive; that such trade-mark is used in commerce among the several States, or with foreign nations, or with Indian tribes, and that the description and drawing presented truly represent the trade-mark sought to be registered. If the applicant resides or is located in a foreign country, the statement required shall, in addition to the foregoing, set forth that the trade-mark has been registered by the applicant, or that an application for the registration thereof has been filed by him in the foreign country in which he resides or is located, and shall give the date of such registration, or the application therefor, as the case may be, except that in the application in such cases it shall not be necessary to state that the mark has been used in commerce with the United States or among the States thereof. The verification required by this section may be made before any person within the United States authorized by law to administer oaths, or, when the applicant resides in a foreign country, before any Minister, Charge d'Affaires, Consul, or commercial agent holding commission under the Government of the United States, or before any notary public, Judge, or Magistrate having an official seal and authorized to administer oaths in the foreign country in which the

REGISTRATION OF TRADE-MARKS—*Continued.*

applicant may be whose authority shall be proved by a certificate of a diplomatic or consular officer of the United States."

A fee of $10.00 is required by law to be paid with each application for the registration of a trade-mark, and this fee will include the certificate of registration, if the trade-mark be determined to be registrable.

TRADE-MARK TREATIES WITH FOREIGN NATIONS.

The following is a list of the Governments with which conventions for the reciprocal registration and protection of trade-marks have been entered into by the United States—Austria-Hungary, Belgium, Denmark, France, Germany, Great Britain (including colonies), Italy, Japan (including China and Korea), Luxemburg, Mexico, Roumania, Serbia, Spain. The laws of Switzerland and the Netherlands being so framed as to afford reciprocal privileges to the citizens or subjects of any Government which affords similar privileges to the people of those countries, the mere exchange of diplomatic notes, giving notice of the fact, accomplishes all the purposes of a formal convention.

ELLEN WILSON MEMORIAL HOMES.

By an Act of Congress, approved March 3, 1915, George Foster Peabody, Hugh C. Wallace Arthur Jeffrey Parsons, Walter S. Ufford, Archibald Hopkins, Julia C. Lathrop, Grace V. Bicknell, and Charlotte Everett Hopkins, their associates and successors, were created a body corporate and politic in the District of Columbia, by the name, title, and style of the Ellen Wilson Memorial Homes, to acquire, hold, improve, rent, mortgage, sell, and convey real estate within the District of Columbia for building, in memory of the late Mrs. Woodrow Wilson, one or more blocks of sanitary houses for the working classes, and renting the same at a rental sufficiently low to cause the abandonment of dilapidated and insan[illegible] houses, as an object lesson in the housing of the working classes under good conditions and at reason[illegible] rates: *Provided*, That the value of any and all property so acquired shall not exceed the sum of $500,000: *Provided further*, That no land shall be acquired or house built thereon except of the character hereinbefore described.

SEC. 2. That the capital stock of said corporation shall be $25,000, divided into two hundred and fifty shares of the par value of $100 each, and when said amount shall have been subscribed the said corporation shall be fully authorized and empowered to commence business: *Provided*, That said capital stock may be increased by the sale of additional stock from time to time, but the total issue thereof shall not exceed the sum of $500,000: *Provided further*, That it shall be unlawful for the officers or directors of said corporation to declare any greater dividend to the stockholders than five per centum per annum upon the capital stock outstanding at the time of such dividend.

SEC. 3. That the affairs of the corporation shall be managed by a Board of Directors consisting of fifteen persons, who shall for the first year be elected by the incorporators, hereinbefore named, and thereafter said board shall be elected annually in such manner as may be provided by the by-laws of the corporation, and such Board of Directors shall have power to ordain, establish, and put into execution such rules, regulations, ordinances, and by-laws as they may deem essential for the good government of the corporation, not contrary to the laws and the Constitution of the United States or of this act, and generally to do and perform all acts, matters, and things which a corporation may or can lawfully do.

SEC. 4. That Congress reserves the right to repeal, alter, or amend this act.

Secretary, John Ihlder, Washington, D. C.

ONE HUNDRED YEARS AGO.
1817.

JAMES MONROE SUCCEEDED JAMES MADISON AS PRESIDENT OF THE UNITED STATES; GEORGE III., KING OF ENGLAND (THE PRINCE OF WALES, REGENT); LOUIS XVIII., KING OF FRANCE; FRANCIS I., EMPEROR OF AUSTRIA; FREDERICK WILLIAM III., KING OF PRUSSIA; ALEXANDER I., EMPEROR OF RUSSIA; FERDINAND VII., KING OF SPAIN; CHARLES XIII., KING OF SWEDEN AND NORWAY; PIUS VII., POPE.

January 5—English and Irish exchequers consolidated.
January 8—Earthquake shocks felt at Charleston, S. C., and Savannah, Ga.
January 11—Timothy Dwight, President of Yale College, died.
January 16—Alexander Dale Dallas, American statesman, died.
January 19—Student rebellion and riots broke out at Princeton College.
January 28—A branch of the United States Bank opened at Cincinnati, Ohio.
March 2—Janos Arany, Hungarian poet, born.
March 3—Territory of Alabama organized.
March 4—James Monroe inaugurated as President of the United States.
March 5—Sir Austen Henry Layard, British author and diplomatist, excavator of Nineveh, born.
March 10—The Blanketeers met at Manchester to march to London; the leaders were seized and arrested.
March 17—The Marine Bible Society was organized in New York. Count Antal Apponyi, Hungarian statesman, died.
March 22—Confederate General Braxton Bragg born.
April 4—André Masséna, Duke of Rivoli, Marshal of France, died.
April 7—An institution for deaf mutes opened at Hartford, Ct.

August 22—John B. Gough, Anglo-American temperance orator, born.
August 31—Sir John Thomas Duckworth, British Admiral, died.
September 6—Sir Alexander Galt, statesman, born.
September 13—John McAuley Palmer, soldier, Senator, and Governor of Illinois, born.
September 18—Olof Swartz, Swedish botanist, died.
September 22—Specie payments resumed in England.
September 24—The foundation of a university laid at Hamilton, N. Y.
October 14—John Philpot Curran, Irish orator, died.
October 15—Thaddeus Kosciusko, Polish patriot, died.
November 7—Jean André Deluc, Swiss geologist and naturalist, died.
November 25—John Bigelow, American author and diplomat, born.
December 10—Mississippi admitted to the Union.
December 23—Congress abolished internal taxes, which were not again levied until 1861.
December 28—The American Colonization Society formed for the purpose of sending negroes to Africa.

THE CHAMBER OF COMMERCE OF THE UNITED STATES OF AMERICA.

A FEDERATION OF COMMERCIAL ORGANIZATIONS. NATIONAL HEADQUARTERS, WASHINGTON, D. C.

ORGANIZED at the National Commercial Conference called by the President of the United States and held at Washington, D. C., April 22 and 23, 1912.

President—R. G. Rhett, Charleston, S. C. *Vice-Presidents*—Henry L. Corbett, Portland, Ore., for Western States; Robert F. Maddox, Atlanta, Ga., for Southern Central States; Samuel MacRoberts, New York, N. Y., for Eastern States, and Joseph H. Defrees, Chicago, Ill., for Northern Central States. *Treasurer*—John Joy Edson, Washington, D. C. *Chairman Executive Committee*—Joseph H. Defrees, Chicago, Ill. *General Secretary*—Elliot H. Goodwin, Washington, D. C. *Assistant Secretary*—D. A. Skinner, Washington, D. C.

PURPOSES—To encourage and promote the organization of associations of business in all parts of the country. To study the work of existing organizations and their value to their respective trades and communities, and to clear the information thus acquired for the benefit of all organizations desiring to increase their efficiency. To advocate the standardization of association methods and of association effort and to urge the adoption of those standards which have been found most effective in so far as they may be applicable to local or trade conditions.

To study the work performed by all Government Bureaus in any way related to the commerce of the country, to encourage and support appropriation measures for their further development, and to utilize the data which they gather by directing it into the channels to which it is immediately applicable.

To analyze carefully all statistics with regard to the production and distribution of our manufactures at home and abroad; to be watchful of every influence calculated to retard our commercial development, and to become a source of information with respect to new opportunities for trade expansion, especially in foreign markets.

When debatable policies affecting our National commerce are advocated by the Federal authorities, there should be a recognized organization capable of expressing the business opinion of the entire country available for conference, alike to the executive and legislative branches of the Government. It is the purpose of the Chamber of Commerce of the United States of America to act in this capacity—not to originate legislation, nor to be unnecessarily critical of legislation proposed by others, but rather to assume that the National Government desires to act in harmony with the commercial interests of the country and will accept our co-operation in an endeavor to make all business legislation constructive.

There are three great wealth-producing factors in our National life—Commerce, labor, and agriculture. Labor, through its State and National organizations, strives for legislation in its own interest and presents its demands with the united voice of two million union workers. Agriculture likewise presents its demands through its National organization, and these are heeded in both State and National Legislatures. Commerce has been organized into local and trade groups, but not as an effective National unit, and it is to provide such a unit, as powerful as those enjoyed by labor and agriculture, that the Chamber of Commerce of the United States of America is now organized. These three great factors, through their National organizations, may find a means for co-operation on many subjects in which there is a vital joint interest.

ORGANIZATION MEMBERSHIP—Every commercial or manufacturers' association not organized for private purposes shall be eligible for membership in the chamber. Such associations shall be of two classes:

First—Local or State commercial or business organizations whose chief purpose is the development of the commercial and industrial interests of a single State, city or locality.

Second—Local, State, interstate or National organizations whose membership is confined to one trade or group of trades.

REPRESENTATION—Each member of the Chamber of Commerce of the United States of America shall be entitled to one delegate and one vote for the first twenty-five members, and one delegate and one vote for each additional two hundred members in excess of twenty-five, but no member shall be entitled to more than ten delegates and ten votes. Organizations having less than twenty-five members may be admitted to membership if in the judgment of the Board of Directors their importance would justify their admission, and these shall be entitled to one delegate and one vote.

The organization membership at the present time consists of over 800 commercial and trade organizations representing over 330,000 corporations, firms, and individuals, among which every State in the Union is represented, as well as Hawaii, Alaska, Porto Rico, the Philippines, and the American Chambers of Commerce in foreign countries.

INDIVIDUAL MEMBERSHIP—Persons, firms, and corporations who are members in good standing of any organization admitted to the chamber are eligible for election as individual members. Individual members receive the regular publications of the chamber and they may avail themselves of the facilities of the National headquarters; may attend all regular and special meetings of the chamber and, subject to the rules of such meetings, may have the privilege of the floor, but they are not entitled to vote except as duly accredited delegates of organization members. Individual membership is limited to 5,000, and at the present time consists of more than 4,300 individuals, firms, or corporations representing merchants, manufacturers, lawyers, bankers, engineers, railroad officials, and other business men in all parts of the country.

SERVICE—The Legislative Bulletin, issued weekly during the sessions of Congress, constitutes a thorough digest of current and National legislation published for business men.

The Business Bulletins give members prompt and accurate notice of all Government activities affecting the business of the country, announcements regarding the Federal Reserve Board, the Federal Trade Commission, the Income Tax, the Interstate Commerce Commission, moratoria, contraband, embargo, etc.

The Nation's Business, published monthly, contains up-to-date facts in regard to National questions affecting commerce and industry.

The Research Division is maintained under the direction of business and legal experts. Through this division members are furnished direct with advice or data from official or other first-hand sources available in the Government departments, the Library of Congress, or elsewhere in Washington.

The Organization Service Bureau is a clearing house of information as to the activities of trade and commercial organizations throughout the country.

NATIONAL ASSEMBLY OF CIVIL SERVICE COMMISSIONS.

President—William Foran, Ottawa, Canada. *Vice-Presidents*—Harvey N. Shephard, Boston, Mass. M. G. Holding, Chicago, Ill.; Charles G. Morris, New Haven, Ct. *Secretary-Treasurer*—John T. Doyle, 1724 F Street N. W., Washington, D. C.

The assembly was organized in 1906. The objects are to enable all those charged with the administration of civil service laws to become acquainted and exchange ideas. To promote co-operation, uniformity and perfection of methods of the different commissions. To enable the commissions to profit by exchange of ideas with officers who are directing departments and to give such officers broader opportunity to inform themselves on the methods of the merit system.

UNITED STATES EXECUTIVE CIVIL SERVICE.

(Revised for this issue of THE WORLD ALMANAC by the Secretary of the Civil Service Commission.)

The purpose of the Civil Service act, as declared in its title, is "to regulate and improve the Civil Service of the United States." It provides for the appointment of three Commissioners, a chief Examiner, a Secretary, and other employés, and makes it the duty of the Commissioners to aid the President as he may request in preparing suitable rules for carrying the act into effect; to make regulations to govern all examinations held under the provisions of the act, and to make investigations and report upon all matters touching the enforcement and effect of the rules and regulations. The address of the commission is Washington, D. C.

PROVISIONS OF THE RULES.

The act requires the rules to provide, as nearly as the conditions of good administration will warrant, for open competitive practical examinations for testing the fitness of applicants for the classified service; for the filling of all vacancies by selections from among those graded highest; for the apportionment of appointments at Washington among the States upon the basis of population, for a period of probation before absolute appointment; that no person in the public service shall be obliged to contribute service or money for political purposes; that persons in the competitive service, while retaining the right to vote as they please or to express privately their political opinions, shall take no active part in political campaigns, and that no person in said service has any right to use his official authority or influence to coerce the political action of any person or body.

EXTENT OF THE SERVICE.

There were on June 30, 1915, 476,363 positions in the Executive Civil Service, 61 per cent. of which, or about 292,296, were subject to competitive examination. The expenditure for salaries in the Executive Civil Service is over $200,000,000 a year. The Civil Service act does not require the classification of persons appointed by the President and confirmed by the Senate or of persons employed merely as laborers or workmen. Many positions are excepted in part from the provisions of the rules for various reasons.

APPLICATIONS.

Persons seeking to be examined must file an application blank. The blank for the Departmental Service at Washington, Railway Mail Service, the Indian School Service, and the Government Printing Service should be requested directly of the Civil Service Commission at Washington. The blank for the Customs, Postal, or Internal Revenue Service should be requested of the Civil Service Board of Examiners at the office where service is sought.

Applicants for examination must be citizens of the United States and of the proper age. No person using intoxicating liquors to excess may be appointed. No discrimination is made on account of sex, color, or political or religious opinions. The limitations of age vary with the different services, but do not apply to any person honorably discharged from the military or naval service of the United States by reason of disability resulting from wounds or sickness incurred in the line of duty.

EXAMINATIONS.

The examinations are open to all persons qualified in respect to age, citizenship, legal residence, character, and health. During the fiscal year ended June 30, 1915, 35,841 persons were appointed. Of those appointed, 2,431 were rural letter-carriers, 9,617 were mechanics and workmen at navy yards appointed on registration tests of fitness given by a board of labor employment at each yard. Several hundred different kinds of examinations were held, each one of which involved different tests. Four hundred and thirty-six of these examinations contained educational tests, the others being for mechanical trades or skilled occupations and consisting of certificates of employers or fellow-workmen. Examinations are held twice a year in each State and Territory, the places and dates being publicly announced.

APPOINTMENTS.

In case of a vacancy not filled by promotion, reduction, transfer, or reinstatement, the highest three of the sex called for on the appropriate register are certified for appointment, the apportionment being considered in appointments at Washington. In the absence of eligibles, or when the work is of short duration, temporary appointments, without examination, are permitted. The number of women applying for ordinary clerical places is greatly in excess of the calls of appointing officers. The chances of appointment are good for teachers, matrons, seamstresses, and physicians in the Indian Service, for male stenographers and typewriters, draughtsmen, patent examiners, civil, mechanical, and electrical engineers, and for technical and scientific experts.

PREFERENCE CLAIMANTS.

Persons who served in the military or naval service of the United States, and were discharged by reason of disabilities resulting from wounds or sickness incurred in the line of duty, are, under the Civil Service rules, given certain preferences. They are released from all maximum age limitations, are eligible for appointment at a grade of 65, while all others are obliged to obtain a grade of 70, and are certified to appointing officers before all others. Subject to the other conditions of the rules, a veteran of the rebellion or of the war with Spain, or the widow of any such person, or any army nurse of either war, may be reinstated without regard to the length of time he or she has been separated from the service.

INSULAR POSSESSIONS.

Examinations are also held for positions in the Philippines, Porto Rico, and Hawaii, and also for the Panama Canal service.

THE UNCLASSIFIED SERVICE.

Under an executive order unclassified laborers are appointed after open, competitive examination upon their physical condition. This action is outside the Civil Service act.

PUBLICATIONS OF THE COMMISSION.

Among the publications of the commission for free distribution are the following:

Manual of Examinations, giving places and dates of examinations, rules by which papers are rated, descriptions of examinations, specimen questions, and general information.

The Civil Service act and rules.

The Annual Reports of the commission, showing its work. These annual reports may be consulted at public libraries.

NATIONAL ASSOCIATION OF PATRIOTIC INSTRUCTORS.

President—Charles F. Sherman. *Secretary*—Theodore C. Cazeau, Rochester, N. Y. *Treasurer*—Mrs. Nellie D. Orchard, New London, Ct. Objects—The objects of this association shall be to afford all persons interested in the promotion of patriotism and good citizenship an opportunity for acquaintance and interchange of ideas and experiences; to study systematically the best methods for the advancement of patriotic work; by unity of effort to secure the enactment and enforcement of such laws as will safeguard our American institutions and protect our flag from insult or desecration, or displacement by any other banner, also of laws in every State for the flying of the flag over public buildings and schoolhouses. Eligibility—Members of all hereditary and other patriotic societies, and all desirable persons over 15 years of age, who are interested in the objects of this association may become members. The association is represented in forty-two States and the District of Columbia. Annual meetings at the same time and place as the Grand Army of the Republic. Headquarters, 46 South Fourth Avenue, Mount Vernon, N. Y.

Grand total						476,363

* It has not been found practicable to separate the employés in the Department of Labor from those in the Department of Commerce. † An act to create the Coast Guard by combining therein the existing Life-Saving Service and Revenue-Cutter Service declared that the employés should constitute a part of the military forces of the United States. Two hundred and forty-two Presidential appointments heretofore carried under "Treasury, Miscellaneous," are revenue-cutter officers and omitted from this table, being a part of the military service. ‡ On June 30, 1915, the total force on the Isthmus was 21,677, of which number 1,003 is carried in the table as classified and excepted, leaving an unclassified working force of 20,674.

CIVIL SERVICE RULES IN THE CITY OF NEW YORK.

SYNOPSIS of regulations governing the admission of persons into the Civil Service of the City of New York. Information may also be had by applying to the Secretary of the Municipal Civil Service Commission, Municipal Building, 14th floor.

Under the White Civil Service Law, Chapter 370, Laws of 1899, April 19, the rules apply to all positions in the service of the City of New York except officers elected by the people, all legislative officers and employés, heads of any department, or superintendents, principals, or teachers in a public school, academy, or college. This requires "examinations, wherever practicable, to ascertain the fitness of applicants for appointment to the Civil Service of said city." The Constitution requires that these examinations shall be competitive, "so far as practicable."

The entire Administration of the City of New York is divided into two general services, namely: The Unclassified Service and the Classified Service. The Unclassified Service includes all elective officers; the officers and employés of the Board of Aldermen; members of the Board of Elections; the head, or heads, of any department of the City Government; or any person appointed by name in any statute.

The Classified Service includes all positions not in the Unclassified Service.

The Classified Service is divided into four classes, namely:

EXEMPT CLASS—The Exempt Class includes the deputies of principal executive officers authorized by law to act generally for and in place of their principals; one secretary of each officer, board, and commission authorized by law to appoint a secretary; one clerk and one deputy clerk, if authorized by law, of each court, and one clerk of each elective judicial officer. In addition thereto there may be included in the Exempt Class all other subordinate offices for the filling of which competitive or non-competitive examination may be found to be not practicable.

NON-COMPETITIVE CLASS—Includes all those positions of a minor nature, in the city institutions or elsewhere, that it is not practicable to fill through competitive examination.

LABOR CLASS—Includes all unskilled laborers and such skilled laborers as are not included in the competitive or non-competitive classes.

COMPETITIVE CLASS—Includes all positions in the Classified Service (excepting those in the Exempt, Non-Competitive or the Labor Class) for which it is practicable to determine the merit and fitness of the applicant by competitive examination.

Vacancies in the Exempt Class may be filled without examination, appointments being made by the Mayor or other official having jurisdiction over the department where the vacancy exists.

Positions in the Non-Competitive Class are filled as a result of the examinations held by the department where the person is to be employed.

FILING APPLICATIONS FOR POSITIONS IN COMPETITIVE CLASS—Applications for positions in the Competitive Class will be issued and received only for the position or positions advertised, and only during the period specified by the commission in such advertisement. Advertisements for the various examinations appear in the prominent daily papers and in the *City Record*. The *City Record* is on file in the reading room of any of the city libraries.

All applications for an examination must be on a prescribed form addressed to the "Secretary of the Municipal Civil Service Commission." When an examination is advertised application blanks may be obtained at the office of the commission, Room 1400.

Application blanks will be mailed upon request provided a self-addressed stamped envelope or sufficient postage is enclosed to cover the mailing. The commission will not guarantee the delivery of the same. Postage on applications forwarded by mail must be fully prepaid.

Applicants must be citizens of the United States and residents of the State of New York. The requirement as to residence may be waived by the commission, but only with the proviso that applicants become residents of the State of New York prior to the date of their appointment.

Applicants for patrolmen must have resided within the State of New York at least one (1) year prior to the date of appointment.

The prescribed application form filled out in the applicant's handwriting sets forth the following:

The applicant's name, age, residence, statement regarding citizenship or naturalization, statement regarding arrests or previous service in a City Department, if any, and also the certificate for citizens whose residences or places of business are within the City of New York.

In examinations for positions requiring previous experience, applicants must fill in and file with their application an experience paper. In some examinations where experience is a qualifying subject, applicants receiving less than the minimum passing mark in this paper are barred from the remainder of the examination.

Applications for positions in the Labor Class are issued and received continually.

Applicants for all positions in the Competitive and the Labor Classes are required to take a medical and physical examination.

Applicants for Labor Class positions that require previous training or experience must take an oral or practical test; no written examination is given to applicants.

CONDUCT OF EXAMINATIONS.

Applicants shall be admitted to examination upon the production of the official notification to appear for that purpose.

All paper upon which examinations are to be written shall be furnished to the applicants by the examining board and shall bear some suitable official indorsement, stamp, or mark, for the purpose of identifying the same.

All examinations shall be in writing, except such as refer to expertness or physical qualities, and except as herein otherwise provided.

The sheets of questions shall be numbered and shall be given out in the order of their numbers each, after the first, being given only when the competitor has returned to the examiners the last sheet given to him. In general, no examination shall extend beyond five hours without intermission; and no questions given out at any session, to any candidate, shall be allowed to be answered at another session.

Each examiner shall exercise all due diligence to secure fairness and prevent all collusion and fraud in the examinations.

The time allowed for completing the examination shall be announced before the first paper is given out.

The following municipal departments and offices come under jurisdiction of Civil Service rules:

Accounts, Com. of.
Armory, Board of.
Assessors, Board of.
Bellevue and Allied Hospitals.
Board of Ambulance Service.
Board of Inebriety.
Board of Water Supply.
Borough President in each Borough, Office of the.
Buildings, Bureau of.
Charities, Dept. of Public.
City Record, Supervisor of the.
Civil Service Commission.
College of the City of New York.
Coroners.
Correction, Dept. of.
Court, City.
Court, City Magistrate.
Court House Board.
Court, Municipal.
Court of Special Sessions.
Docks and Ferries, Dept. of.
Education, Dept. of.
Elections, Board of.
Estimate and Apportionment, Board of.
Finance Dept.
Fire Dept.
Health Dept.
Law Dept.
Licenses, Dept. of.
Mayor's Office.
Normal College.
Parks, Dept. of.
Plant and Structures.
Police Dept.
Public Works Bureau.
Sinking Fund Commission.
Street Cleaning, Dept. of.
Taxes and Assessm'ts, Dept. of.
Tenement House Dept.
Water Supply, Gas, and Electricity, Dept. of.

Inspectors of Elections and Poll Clerks are not subject to competitive examination.

PROSECUTION OF TRUSTS BY THE UNITED STATES.

THE following is the status on October 1, 1916, of the cases brought by the United States under the terms of the Sherman Anti-Trust Act:

United States vs. Great Lakes Towing Company et al.—Petition filed June 19, 1910, in the Circuit Court, Northern District of Ohio, against an alleged combination of towing facilities on the Great Lakes. A decision in favor of the Government was handed down February 11, 1913, and after much consideration as to how to dissolve the combination, the Court entered a final decree in February, 1915. Believing that this decree would not afford adequate relief the Government has appealed to the Supreme Court.

United States vs. American Sugar Refining Company et al.—Petition filed November 28, 1910, in the Circuit Court, Southern District of New York, alleging a combination in restraint of trade and praying for its dissolution. Demurrer was overruled December 11, 1911. The taking of testimony has been concluded, and the case was ready for trial when the Court ordered that the hearing be postponed, awaiting the decisions of the Supreme Court in the Harvester and Steel cases.

United States vs. Hamburg-Amerikanische Packetfahrt Actien Gesellschaft and others—Petition filed January 4, 1911, in the Circuit Court for the Southern District of New York, to dissolve a combination of steamship lines regulating steerage traffic on the Atlantic Ocean. Demurrers were overruled December 20, 1911. The case was argued in April, 1914, and a decision adverse to the Government was handed down on October 13, 1914. On appeal, the Supreme Court, while reversing the decree below, refused to decide the questions in issue, on the ground that the European war had rendered them moot.

United States vs. Edward E. Hartwick et al.—Petition filed August 31, 1911, in the Circuit Court, Eastern District of Michigan, alleging conspiracy and unlawful restraint of trade on the part of members of the Michigan Retail Lumber Dealers' Association, The Scout Publishing Company, and the Lumber Secretaries Bureau of Information. Issues joined and taking of testimony completed. Trial deferred, awaiting decision in similar case in Minnesota.

United States vs. The Colorado and Wyoming Lumber Dealers' Association and The Lumber Secretaries' Bureau of Information—Petition filed September 25, 1911, in the Circuit Court, District of Colorado, for injunction against defendants for conspiracy to restrain trade in lumber and its products. The taking of testimony has been completed. Trial deferred, awaiting decision in similar case pending in Minnesota.

United States vs. Willard G. Hollis et al.—Petition in equity filed October, 1911, in the Circuit Court, District of Minnesota, against the Lumber Secretaries' Bureau of Information, the Lumberman Publishing Company and certain individuals, alleging conspiracy and combination in the lumber trade. The taking of testimony has been completed. Case argued in December, 1914, and decision of Supreme Court awaited.

United States vs. United States Steel Corporation and others—Petition filed October 27, 1911, in District Court for District of New Jersey, alleging a combination in restraint of interstate commerce in iron and steel and their products and an attempt to monopolize the same. Taking of testimony completed. Case argued before the Circuit Judges in October, 1914. Decision adverse to Government handed down June 3, 1915. Decree dismissing petition entered September 10, 1915, from which the Government appealed to the Supreme Court. Pending.

United States vs. National Cash Register Company et al.—Petition filed December 4, 1911, in Circuit Court, Southern District of Ohio, alleging conspiracy and monopoly in the manufacture, sale and shipment of cash registers and other registering devices. A decree granting the relief sought by the Government was entered on February 1, 1916.

United States vs. United Shoe Machinery Company et al.—Petition in equity filed December 12, 1911, in Circuit Court, District of Massachusetts, alleging combinations and conspiracies in restraint of interstate and foreign trade in shoe machinery, and praying for perpetual restraining order, dissolution of company and restoration of normal conditions. Taking of testimony completed. Case argued in June, 1914. Decision adverse to the Government and dismissing petition handed down March 18, 1915. Case appealed to Supreme Court. Pending.

United States vs. The Keystone Watch Case Company et al.—Petition filed December 20, 1911, in the Circuit Court, Eastern District of Pennsylvania, alleging unlawful contracts, combinations, and conspiracies to monopolize trade in filled watch cases and watches, and praying for a permanent decree ordering the dissolution of the company and enjoining defendants from further committing the unlawful acts complained of. Argued in June, 1914, and on January 2, 1915, a decision partly favorable and partly adverse to the contentions of the Government was handed down. A decree was entered in conformity therewith, from which both the Government and the defendants have appealed to the Supreme Court.

United States vs. John H. Patterson et al.—Indictment returned February 22, 1912, in the Southern District of Ohio, against John H. Patterson, President, and 29 other officials and employés of the National Cash Register Company, alleging a conspiracy in restraint of interstate trade and commerce in cash registers, resulting in an unlawful monopoly of the industry. Demurrer overruled June 26, 1912. Trial resulted in a verdict of guilty as to 29 of the 30 defendants and fines aggregating $135,000 and jail sentences ranging from nine months to one year were imposed, from which the defendants appealed. In a decision handed down March 13, 1915, the Court of Appeals reversed the judgment of the lower court. The Government applied to the Supreme Court for a writ of certiorari, which was denied. A nolle prosequi was entered on February 1, 1916. See civil case against substantially same defendants.

United States vs. American-Asiatic Steamship Company et al.—Petition in equity filed March 30, 1912, in Southern District of New York, charging defendants with combining and conspiring, entering into unlawful contracts and pooling agreements, and allowing rebates, for the purpose of securing a monopoly of the business of transporting freight between ports on the Atlantic Coast of the United States and ports in the Philippine Islands, Japan, China, and the Far East. Issue joined. Taking of testimony completed. A decision in the main adverse to the contentions of the Government was handed down on February 3, 1915. The Government has appealed to the Supreme Court.

United States vs. International Harvester Company et al.—Petition filed April 30, 1912, in the District Court, District of Minnesota, alleging the acquisition and maintenance of a monopoly in harvesting and agricultural machinery and implements and twine. Testimony taken, expediting certificate filed, and case argued before three Circuit Judges at St. Paul during November, 1913. Decision favorable to the Government filed August 12, 1914. The defendants appealed to the Supreme Court, where the case was argued in April, 1915. On June 2 the Court ordered the case restored to the docket for reargument in October term, 1916.

United States vs. Prince Line (Limited) et al.—Petition filed June 5, 1912, in the District Court, Southern District of New York, charging defendants, as common carriers of freight and passengers, between ports of the United States and ports in the Republic of Brazil, with acquiring and maintaining a substantial monopoly by means of contracts, rebates, and other unlawful acts, and praying for an annulment of said contracts and agreements. Issue joined and taking of testimony completed. A decision in the main adverse to the contentions of the Government was handed down on February 3, 1915. The Government has appealed to the Supreme Court.

United States vs. Associated Billposters and Distributors of the United States and Canada et al.—Petition filed August 3, 1912, in the District Court, Northern District of Illinois, charging defendants with engaging in a combination and conspiracy to place unlawful restraints upon interstate and foreign trade and commerce in posters. After demurrers had been overruled the testimony was taken in open court, and a decision favorable to the Government was handed down on March 14, 1916. The form of decree to be entered is now under consideration by the Court.

United States vs. Motion Picture Patents Company et al.—Petition filed August 15, 1912, in the District Court, Eastern District of Pennsylvania, to remove the restraints which defendants have imposed upon interstate and foreign trade and commerce in machines, appliances, and apparatus relating to the motion-picture art, and upon persons engaged in such trade and commerce. A decision favorable to the Government was handed down on October 1, 1915, and a decree in conformity therewith was entered on January 24, 1916. The defendants have appealed to the Supreme Court.

United States vs. United Shoe Machinery Company of New Jersey et al.—Petition filed February 8, 1913, in the District Court at Trenton, N. J., seeking to have annulled an alleged unlawful contract involving "inseam trimming machines." Pending.

United States vs Board of Trade of the City of Chicago et al.—Petition filed February 11, 1913, in the District Court at Chicago, Ill., attacking rule 33 of the Chicago Board of Trade, by virtue of which it is alleged the price of all corn, oats, wheat, and rye arriving in Chicago at times when the Board of Trade is not in session is arbitrarily determined. Motion to strike out certain portions of defendants' answer was granted. The case having been decided in favor of the Government, a final decree was entered on December 28, 1915, from which the defendants have appealed to the Supreme Court.

United States vs. The Cleveland Stone Company et al.—Petition filed February 12, 1913, in the District Court at Cleveland, Northern District of Ohio, charging defendants with establishing and maintaining a practical monopoly of the stone business. A final decree granting the relief sought by the Government was entered without contest on February 11, 1916.

United States vs. Corn Products Refining Company et al.—Petition filed March 1, 1913, in the District Court at New York City, charging defendants with monopolizing interstate trade and commerce in corn products, and praying for the dissolution of the combination. The case was argued in March, 1916, and a decision favorable to the Government and ordering the dissolution of the combination was handed down on June 24, 1916.

PRESIDENT WILSON'S ADMINISTRATION, MARCH 4, 1913.

United States vs. Eastman Kodak Company et al.—Petition filed June 9, 1913, in the District Court at Buffalo, Western District of New York, alleging that defendants have acquired a monopoly of the business of manufacturing, selling, and distributing photographic supplies. Decision favorable to the Government handed down August 24, 1915, and a final decree in conformity therewith was entered on January 20, 1916. The defendants have appealed to the Supreme Court.

United States vs. The Quaker Oats Company et al.—Petition filed June 11, 1913, in the District Court at Chicago, Ill., alleging combination to restrain and monopolize interstate trade and commerce in oatmeal products and by-products. Argued before the Circuit Judges in March, 1916, and decided adversely to the Government. An appeal has been taken to the Supreme Court.

United States vs. Reading Company et al. (anthracite coal combination)—Petition in equity filed September 2, 1913, in the District Court at Philadelphia, Pa., against a combination consisting of Reading Company and affiliated corporations, charging it with restraining and monopolizing trade in anthracite coal. The decision of the District Court was favorable to the Government in substantial part, i. e., it was held that the union, through a holding company of the Philadelphia and Reading Coal and Iron Company and the Lehigh and Wilkes-Barre Coal Company, two of the great anthracite coal-producing companies, is a combination in restraint of trade. In some important respects, however, the decision was adverse to the Government. Cross appeals have been taken to the Supreme Court for hearing during the October term, 1916.

United States vs. Southern Pacific Company, Central Pacific Railway Company et al.—Petition in equity filed February 11, 1914, in the District Court at Salt Lake City, Utah, to compel the Southern Pacific to relinquish its control of the Central Pacific. This case was argued before the Circuit Judges at St. Louis in December, 1915, and a decision is awaited.

United States vs. Lehigh Valley Railroad Company et al.—Petition filed March 18, 1914, in the District Court at New York City, charging the defendants with having monopolized the production, transportation, and sale of anthracite coal from mines tributary to Lehigh Valley Railroad Company in violation of the Anti-Trust Act, and charging the said railroad company with transporting in interstate commerce coal in which it has an interest, in violation of the commodity clause of the act to regulate commerce. Argued in November, 1914. Opinion adverse to Government and dismissing petition handed down December 21, 1914, principally on the authority of the case of United States vs. Delaware, Lackawanna and Western Railroad Company et al., decided by the Circuit Judges for the Third Circuit. However, the latter case has since been reversed by the Supreme Court, and the Lehigh Valley case was set for trial in the October term, 1916.

United States vs. Knauer et al.—Indictment returned June 4, 1914, at Des Moines, Southern District of Iowa, charging defendants with having entered into a combination in restraint of trade in plumbing supplies. Motion to quash and demurrer overruled November 25, 1914. Trial commenced February 10, 1915, and verdict of guilty returned February 24, 1915. Four defendants fined amounts aggregating $3,000, and writ of error granted as to them. Case to stand on motion for new trial as to thirty-one defendants pending decision on writ of error by Court of Appeals. Argued in Court of Appeals in January, 1916, and a decision is awaited.

United States vs. Booth Fisheries Company et al.—Indictment returned July 20, 1914, in the District Court at Seattle, Wash., charging defendants with entering into a combination and conspiracy in restraint of interstate trade and commerce in fresh fish. Pending.

United States vs. Western Cantaloupe Exchange et al.—Indictment returned August 7, 1914, in the District Court at Chicago, Northern District of Illinois, charging defendants with having entered into a combination to restrain and monopolize interstate trade in cantaloupes. Pending.

United States vs. McCoach et al.—Indictment returned October 5, 1914, in the District Court at Pittsburgh, Western District of Pennsylvania, against thirty-three individuals, each a master plumber and retail dealer in plumbing supplies, charging them with entering into a combination to secure monopoly of the business of selling and installing plumbing supplies. Awaiting final decision.

United States vs. Irving et al.—Indictment returned October 31, 1914, in the District Court at Salt Lake City, District of Utah, against fourteen individuals, each a master plumber and retail dealer in plumbing supplies, charging them with entering into a combination to secure a monopoly of the business of selling and installing plumbing supplies. Argued on demurrer in January, 1915. Demurrer overruled and motion to quash denied January 25, 1915. Awaiting final decision.

United States vs. William Rockefeller et al.—Indictment returned November 2, 1914, in the District Court at New York, Southern District of New York, against twenty-one individuals, each at some time a director or officer, or both, of the New York, New Haven and Hartford Railroad Company, charging them with conspiring to monopolize the transportation facilities of New England. Numerous demurrers and pleas in abatement argued. Superseding indictment returned February 26, 1915. After disposing of numerous demurrers, pleas in abatement, and other dilatory defences, the trial of eleven of the principal

PROSECUTION OF TRUSTS BY THE UNITED STATES—*Continued*

defendants was begun in October, 1915. On January 9, 1916, the jury acquitted six of the defendants and reported a disagreement as to the other five.

United States vs. Carl C. King et al.—Indictment returned March 4, 1915, in the District Court at Boston, Mass., charging defendants (Aroostook Potato Shippers' Association) with entering into a conspiracy in restraint of trade in potatoes. Superseding indictment returned December 15, 1915. Demurrer overruled. Awaiting trial.

United States vs. American Can Company et al.—Petition filed November 29, 1913, in the District Court, District of Maryland, charging defendants with having monopolized the manufacture and sale of tin cans. A decision was handed down on February 23, 1916, and the form of decree to be entered is now under consideration by the Court.

United States vs. Michael Artery et al.—Eight indictments returned in January and April, 1915, in the District Court, Northern District of Illinois, against certain so-called business agents of Chicago labor unions, charging them with combining and conspiring to prevent the unloading in Chicago of goods shipped from other States. Demurrers to the indictments have been overruled and the cases are awaiting trial.

United States vs. Michael Boyle et al.—Two indictments returned April 27, 1915, in the District Court, Northern District of Illinois, charging a conspiracy amongst labor unions and certain manufacturers in Chicago to prevent the installation in Chicago of electrical appliances and lighting fixtures manufactured elsewhere. Demurrers to the indictments have been overruled and the cases are awaiting trial.

United States vs. United Shoe Machinery Company et al.—Petition filed October 18, 1915, in the District Court, Eastern District of Missouri charging that the so-called tying clauses in the series of leases used by the defendants in the conduct of their business are violative of section 3 of the Clayton act. The defendants filed a motion to dismiss the petition. This motion was argued in April, 1916, and was overruled in an opinion handed down on June 7, 1916.

United States vs. Rintelen, Buchanan, and others—Indictment returned December 28, 1915, in the District Court, Southern District of New York, against Rintelen and seven others, charging them with conspiring to restrain, prevent and hinder the foreign commerce of the United States in munitions of war and military and naval stores. Motion to quash overruled June 29, 1916.

United States vs. Franz Bopp et al.—Indictment returned February 11, 1916, in the District Court, Northern District of California, against Bopp and six others, charging them with conspiring to restrain, injure, and destroy the interstate and foreign commerce of the United States in munitions of war, etc. Demurrers and motions to quash were overruled on March 30, 1916.

THE SHERMAN LAW.

THE following is the text of the Sherman law concerning Trusts:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled:

SEC. 1. Every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is hereby declared to be illegal. Every person who shall make any such contract, or engage in any such combination or conspiracy, shall be deemed guilty of a misdemeanor, and, on conviction thereof, shall be punished by a fine not exceeding $5,000, or by imprisonment not exceeding one year, or by both said punishments in the discretion of the Court.

SEC. 2. Every person who shall monopolize, or attempt to monopolize, or combine or conspire with any other person or persons to monopolize any part of the trade or commerce among the several States, or with foreign nations, shall be deemed guilty of a misdemeanor, and on conviction thereof, shall be punished by fine not exceeding $5,000, or by imprisonment not exceeding one year, or by both said punishments, in the discretion of the Court.

SEC. 3. Every contract, combination in form or trust or otherwise, or conspiracy, in restraint of trade or commerce in any Territory of the United States, or the District of Columbia, or in restraint of trade or commerce between any such Territory and another, or between any such Territory or Territories and State or States or the District of Columbia, or with foreign nations, or between the District of Columbia and any State or States or foreign nations, is hereby declared illegal. Every person who shall make any such contract, or engage in any such combination or conspiracy, shall be deemed guilty of a misdemeanor, and on conviction thereof, shall be punished by fine not exceeding $5,000, or by imprisonment not exceeding one year, or by both said punishments in the discretion of the Court.

SEC. 4. The several Circuit Courts of the United States are hereby invested with jurisdiction to prevent and restrain violations of this act; and it shall be the duty of the several District-Attorneys of the United States, in their respective districts, under the direction of the Attorney-General, to institute proceedings in equity to prevent and restrain such violations. Such proceedings may be by way of petition setting forth the case and praying that such violation shall be enjoined or otherwise prohibited. When the parties complained of shall have been duly notified of such petition the Court shall proceed, as soon as may be, to the hearing and determination of the case; and pending such petition and before final decree, the Court may at any time make such temporary restraining order or prohibition as shall be deemed just in the premises.

SEC. 5. Whenever it shall appear to the Court before which any proceeding under sec. 4 of this act may be pending, that the ends of justice require that other parties should be brought before the Court, the Court may cause them to be summoned, whether they reside in the district in which the Court is held or not; and subpoenas to that end may be served in any district by the marshal thereof.

SEC. 6. Any property owned under any contract or by any combination, or pursuant to any conspiracy (and being the subject thereof) mentioned in sec. 1 of this act, and being in the course of transportation from one State to another, or to a foreign country, shall be forfeited to the United States, and may be seized and condemned by like proceedings as those provided by law for the forfeiture, seizure and condemnation of property imported into the United States contrary to law.

SEC. 7. Any person who shall be injured in his business or property by any other person or corporation by reason of anything forbidden or declared to be unlawful by this act may sue therefor in any Circuit Court of the United States in the district in which the defendant resides or is found, without respect to the amount in controversy, and shall recover threefold the damages by him sustained, and the costs of suit, including a reasonable attorney's fee.

SEC. 8. That the word "person" or "persons" wherever used in this act shall be deemed to include corporations and associations existing under or authorized by the laws of either the United States, the laws of any of the Territories, the laws of any State or the laws of any foreign country.

Approved July 2, 1890.

NOTE—Two or more sections of the Clayton Trust bill (of 1914) amend the Sherman law; the other sections of the bill, as well as sec. 5 of the Federal Trade Commission law, are supplemental to the Sherman act.

FISHERIES OF THE UNITED STATES.

(Compiled by the Bureau of the Census, Department of Commerce.)

Sections.	Vessels Employed. No.	Vessels Employed. Tons.	Persons Employed. (1)	Capital Invested. (2)	Value of Products.
South Atlantic States (1908)	534	5,029	17,961	$2,324,000	$4,034,000

José Canalejas, Prime Minister of Spain, November 12, 1912.
Nazim Pasha, Turkish Minister of War, January 23, 1913.
Manuel E. Araujo, Premier of Salvador, February 4, 1913.
Francisco I. Madero, President of Mexico, February 23, 1913.
José Pino Suarez, Vice-President of Mexico, February 23, 1913.
George, King of Greece, March 18, 1913.
Archduke Francis Ferdinand of Austria-Hungary and his wife, Countess Sophie Chotek, Duchess of Hohenberg, June 28, 1914.
Jean L. Jaures, French Socialist leader, July 31, 1914.
Guillaume Sam, President of Hayti, July 28, 1915.
General Chen Chi-Nei, of Chinese revolutionary party, May 19.

NATIONAL SECURITY LEAGUE.

CONVINCED that something should be done to arouse the public to a realization of our unpreparedness a group of prominent citizens of New York decided to call a public meeting for the purpose of devising the best means of placing before the people the facts concerning the condition of our defences.

The meeting was held in New York, December 1, 1914, in response to a call issued by S. Stanwood Menken, Herbert Barry, George Haven Putnam, Lawrence F. Abbott, J. Mayhew Wainwright, Charles E. Lydecker, and Franklin Q. Brown. Ways and means of bringing home to the people the lessons of the European war and a realization of our own defencelessness were discussed, and it was decided to organize a new league on grounds broad enough to embrace all branches of our military establishment and on strictly non-political and non-partisan lines. Officers were elected and resolutions were adopted defining the purpose of the league as follows:

"*Whereas*, It has been the general policy of our Government to avoid entering into entangling alliances or international relations that would be likely to involve war responsibilities; and, with a natural reliance upon our geographical position and the well tested courage and public spirit of our citizens to rest the defence of the country upon a minimum of military and naval forces and upon the calculation that it should prove possible in an emergency to bring into organization with sufficient promptness a citizens' defensive force; and

"*Whereas*, It is the opinion of the citizens here assembled that, under the changed conditions of international relations, it may not be wise to continue to intrust our National defence to hurried emergency measures;

"*Now*, To the end that popular sentiment may be aroused and public opinion may be organized throughout the entire breadth of the land for the purpose of insuring the enactment by Congress and by other legislative bodies of the measures required for National security, and as the first step toward such general action, to procure a proper inquiry on the part of the Administration and of Congress, and to make preparations for whatever action the results of such inquiry may seem to render essential;

"*Resolved*. I. That we now constitute an association which shall be called "The National Security League."

"II. That a Committee of Fifty be appointed by the Chairman, with power to add to its members; to create an Executive Committee and such other committees as may be found advisable; to adopt suitable by-laws for the governance and for the extension of the league; to take steps to secure the creation of branch leagues or associated leagues throughout the United States, with a central body which shall have the general control of the business of the league; and to take all measures that may be found desirable for the purpose of maintaining the security of the Nation and for developing the opinion of our citizens in regard to the conditions on which National security must be based; and to secure such legislation as may be required for those patriotic purposes.

"III. To enroll in its membership, with such conditions as may be found advisable, all citizens who are in accord with the purposes and the work of this league."

The following principles were adopted: 1. There is no assurance that we will not again become involved in war. 2. That a peaceful policy, even when supported by treaties, is not a sufficient guarantee against war, and that the United States cannot safely intrust the maintenance of its institutions and nationality to them. 3. That until a workable plan for a world alliance has been evolved and agreed to by the principal nations with proper guarantees of good faith, the United States must maintain adequate military preparations for its defence. 4. That we are not adequately prepared to maintain our National policies. 5. That the present defenceless condition is due not only to the failure to follow the carefully considered plans of our naval and military advisers, but also to provide any reasonable measure for gradually putting such plans into practice.

Originally created for the purpose of awakening public sentiment to the necessity of National defence and urging the enactment by Congress of defence legislation, the league has developed into an organization of 100,000 members in all States of the Union, with nearly 200 branches in cities and towns, and with seventy-four citizens' committees appointed by Mayors and seventeen State committees appointed by Governors to co-operate with the league in securing adequate preparedness. The latest declaration of the principles of the league was made by its Executive Committee on June 29, 1916, and is as follows: The National Security League holds with our military and naval specialists that our present relative military and naval weakness would render us an easy victim to the aggression of any first class power and that the cardinal requirements for such a state of preparedness as will obviate the dangers to which we are exposed are as follows: First—compulsory military training and service, wholly under national control, for all physically fit male citizens. Second—a navy of such strength as to make the United States the second naval power in the Atlantic and concurrently the first in the Pacific. Third—that Congress should immediately make provision whereby the industrial and transportation facilities of the Nation may be effectively mobilized in case of need. The league will continue to strive for these objects and for such conditions as are necessary to fully achieve them.

Under the auspices of the league the following congresses and conferences have been held: Peace and Preparation Conference, New York City, June 14-15, 1915; National Defence Conference, Chicago, November, 27, 1915; National Security Congress, Washington, D. C., January 20-22, 1916; National Defence Conference of Mayors and Mayors' representatives, St. Louis, Mo., March 3-4, 1916; National Defence Conference, Charleston, S. C., April 28-29, 1916; National Defence Conference, Knoxville, Tenn., May 27, 1916.

The league has been incorporated under the laws of the State of New York, and the following officers chosen: *Honorary President*—Joseph H. Choate. *Honorary Vice-President*—Alton B. Parker. *President*—Robert Bacon. *Chairman Executive Committee*, S. Stanwood Menken. *Secretary*—Herbert Barry. *Treasurer*—E. H. Clark. *Executive Secretary*—Henry L. West. Headquarters, 31 Pine Street, New York City.

NATIONAL SOCIETY OF NEW ENGLAND WOMEN.

The object of the society shall be to promote intellectual and social intercourse among its members, to bring together and assist women who were born and brought up in New England or are descended from New Englanders.

Every member admitted by the National Board of Directors shall be a member of the national society.

Eligibility—a. Any woman of American parentage over 18 years of age who was born in New England and both of whose parents were born in New England is eligible for membership in this society.

b. If not of New England birth, she must represent through both parents at least two generations of New England ancestry, or she must represent through one parent at least three generations of New England ancestry.

c. New England birth on the part of an applicant shall count as one generation.

d. An applicant descended from a pioneer, who became a permanent settler in New England prior to 1645, shall have the privilege of counting said pioneer as representing one generation.

President-General—Mrs. Henry Clarke Coe, 50 Central Park West, New York City. *Corresponding, Secretary-General*—Mrs. Theophilus Nichols Glover, Lincoln Park, N. J. *Treasurer-General*—Dr. J. McNutt Albany, N. Y.

THE PILGRIMS.

THE Pilgrims was organized in London during coronation year, 1902. It was born of a desire on the part of a few Anglo-Americans, who foregathered in London at that time, to have a society that would stand for the promotion of good fellowship and friendship between Britons and Americans as individuals.

The British Pilgrims has a membership of 400. The American Pilgrims was organized in 1903 and has a membership of 600, which is the limit specified in the rules. There is a long waiting list of applicants.

The society takes no part in politics or affairs of state or church, but simply and solely the cementing of friendship between citizens of the United States and its dependencies and the subjects of the British Empire. It exists for the one purpose of fostering by social means a friendly understanding between the people of the United States and those of Great Britain, and to bring distinguished visitors from Great Britain into contact with leading citizens of New York and the most eminent men of the country.

The citizens of the United States and its dependencies and subjects of the British Empire, and others prominent for their sympathy with the objects of the society, are eligible for membership, and membership in one society *ipso facto* constitutes membership in the other.

The officers and Executive Committee of the Pilgrims of Great Britain are as follows:

President—The Rt. Hon. Viscount Bryce, O. M.

Vice-Presidents—The Archbishop of Canterbury; Field-Marshal Lord Grenfell, G. C. M. G.; Admiral the Hon. Sir Hedworth Meux, G. C. B., K. C. V. O.

Honorary Treasurer—J. Wilson Taylor.

Secretary—M. E. Welsh-Lee.

Executive Committee—Harry E. V. Brittain, M. A., Chairman.

J. Arthur Barratt.
Edward Price Bell.
Admiral Lord Beresford of Metemmeh and Curraghmore, G. C. B., G. C. V. O.
The Rt. Hon. Viscount Bryce, O. M.
Harry E. V. Brittain.
The Archbishop of Canterbury.
Robert M. Collins.
Viscount Deerhurst.
Rt. Hon. Sir Henry Mortimer Durand, G. C., M. G.
Lord Fairfax of Cameron.
Clarence L. Graff.
Col. Sir Hamar Greenwood, Bart., M. P.
Field-Marshal Lord Grenfell, G. C. M. G.
Col. Millard Hunsicker.
Hon. Kenneth Kinnaird.
Irwin Boyle Laughlin
H. C. Levis.
Admiral the Hon. Sir Hedworth Meux, G. C. B., K. C. V. O.
The Ven. Archdeacon, W. W. Sinclair, D. D.
J. Wilson Taylor.
Joseph Temperley.

The officers and Executive Committee of the Pilgrims of the United States are as follows:

President—Joseph H. Choate.

Vice-Presidents—Chauncey M. Depew; Admiral Lord Beresford, G. C. B., G. C. V. O.; Nicholas Murray Butler; F. Cunliffe-Owen; George T. Wilson.

Treasurer—Wm. Curtis Demorest, 60 Liberty Street, New York.

Secretary—George W. Burleigh, 52 Wall Street, New York.

Executive Committee—George T. Wilson, Chairman, 120 Broadway, New York.

Admiral Lord Beresford, G. C., B., G. C. V. O.
George W. Burleigh.
Nicholas Murray Butler.
William Allen Butler.
Joseph H. Choate.
F. Cunliffe-Owen.
E. F. Darrell.
Wm. Curtis Demorest.
Chauncey M. Depew.
R. H. Ewart.
Samuel W. Fairchild.
Lawrence L. Gillespie.
Rt. Rev. David H. Greer, D. D.
John W. Griggs.
Louis C. Hay.
Job E. Hedges.
A. Barton Hepburn.
Rev. W. T. Manning, D. D.
Herbert Noble.
Alton B. Parker.
Herbert L. Satterlee.
R. A. C. Smith.
Cornelius Vanderbilt.
George Gray Ward.
Frederic W. Whitridge.
Frank S. Witherbee.
Hunter Wykes.

LOWER WALL STREET BUSINESS MEN'S ASSOCIATION.

ORGANIZED in 1883 to encourage patriotism and philanthropy among the business men of New York. *President*—William Bayne, Jr. *Treasurer*—Frank C. Lowry, 91 Wall Street, New York City. *Secretary*—A. Wakeman, 96 Water Street, New York City.

UNITED STATES STEAMBOAT INSPECTION SERVICE.

THE Steamboat Inspection Service, by act of Congress approved February 14, 1903, was transferred from the Treasury Department to the Department of Commerce. The transfer went into effect July 1, 1903. The Supervising Inspector-General of the Steamboat Inspection Service, George Uhler, reported to the Secretary of Commerce for the fiscal year ended June 30, 1916: Number of annual certificates of inspection issued to domestic steam, motor vessels, and barges, 7,109; number of certificates issued to foreign steamers, 240; total number of annual certificates of inspection issued to domestic and foreign, 7,349. Decrease in number of certificates to domestic vessels from previous year, 123; decrease in number of certificates to foreign vessels from previous year, 81; decrease in number of certificates of all kinds of vessels from previous year, 204. Gross tonnage of domestic vessels, all kinds, inspected, 5,838,275; increase over previous year, 226,244. Gross tonnage of foreign steamers inspected, 1,536,530; decrease from previous year, 574,478. Number of officers' licenses issued, 18,102. Decrease in number of officers' licenses issued from previous year, 310. Number of certificates of service issued to able seamen, 24,425. Number of certificates of efficiency issued to lifeboat men, 29,323. Number of new life preservers inspected, 203,017, of which number 5,074 were rejected. Increase in number of new life preservers inspected over previous year, 41,682. Increase in number of life preservers rejected over previous year, 4,857. Number of marine boiler plates inspected at the mills by assistant inspectors, 4,553.

CAUSES.	Lives Lost.	CAUSES.	Lives Lost.
Fire	7	Accidental drowning	130
Collision	33	Suicides	42
Explosions and escape of steam	18	Miscellaneous	20
Wrecks	38		
Foundered in storm	138	Total	1,276
Sinking	850		

Number of accidents resulting in loss of life, 247, an increase of 57 over previous year. Increase in number of lives lost over previous year, 908. During the year 317,066,553 passengers were carried on steam vessels that are required by law to report the number of passengers carried. Dividing this number by 917, the total number of passengers lost shows that 345,765 passengers were carried for each passenger lost.

FEDERAL CHILD LABOR LAW.

AN act to prevent interstate commerce in the products of child labor, and for other purposes.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That no producer, manufacturer, or dealer shall ship or deliver for shipment in interstate or foreign commerce any article or commodity the product of any mine or quarry, situated in the United States, in which within thirty days prior to the time of the removal of such product therefrom children under the age of sixteen years have been employed or permitted to work, or any article or commodity the product of any mill, cannery, workshop, factory, or manufacturing establishment, situated in the United States, in which within thirty days prior to the removal of such product therefrom children under the age of fourteen years have been employed or permitted to work, or children between the ages of fourteen years and sixteen years have been employed or permitted to work more than eight hours in any day, or more than six days in any week, or after the hour of 7 o'clock postmeridian, or before the hour of 6 o'clock antemeridian: *Provided*, That a prosecution and conviction of a defendant for the shipment or delivery for shipment of any article or commodity under the conditions herein prohibited shall be a bar to any further prosecution against the same defendant for shipments or deliveries for shipment of any such article or commodity before the beginning of said prosecution.

SEC. 2. That the Attorney-General, the Secretary of Commerce, and the Secretary of Labor shall constitute a board to make and publish from time to time uniform rules and regulations for carrying out the provisions of this act.

SEC. 3 That for the purpose of securing proper enforcement of this act the Secretary of Labor, or any person duly authorized by him, shall have authority to enter and inspect at any time mines, quarries, mills, canneries, workshops, factories, manufacturing establishments, and other places in which goods are produced or held for interstate commerce; and the Secretary of Labor shall have authority to employ such assistance for the purposes of this act as may from time to time be authorized by appropriation or other law.

SEC. 4. That it shall be the duty of each District-Attorney to whom the Secretary of Labor shall report any violation of this act, or to whom any State factory or mining or quarry inspector, commissioner of labor, State medical inspector, or school-attendance officer, or any other person shall present satisfactory evidence of any such violation to cause appropriate proceedings to be commenced and prosecuted in the proper courts of the United States without delay for the enforcement of the penalties in such cases herein provided: *Provided*, That nothing in this act shall be construed to apply to *bona fide* boys' and girls' canning clubs recognized by the Agricultural Department of the several States and of the United States.

SEC. 5. That any person who violates any of the provisions of section 1 of this act, or who refuses or obstructs entry or inspection authorized by section 3 of this act, shall for each offence prior to the first conviction of such person under the provisions of this act, be punished by a fine of not more than $200, and shall for each offence subsequent to such conviction be punished by a fine of not more than $1,000 nor less than $100, or by imprisonment for not more than three months, or by both such fine and imprisonment, in the discretion of the court: *Provided*, That no dealer shall be prosecuted under the provisions of this act for a shipment, delivery for shipment, or transportation who establishes a guaranty issued by the person by whom the goods shipped or delivered for shipment or transportation were manufactured or produced, resident in the United States, to the effect that such goods were produced or manufactured in a mine or quarry in which within thirty days prior to their removal therefrom no children under the age of sixteen years were employed or permitted to work, or in a mill, cannery, workshop, factory, or manufacturing establishment, in which within thirty days prior to the removal of such goods therefrom no children under the age of fourteen years were employed or permitted to work, nor children between the ages of fourteen years and sixteen years employed or permitted to work more than eight hours in any day or more than six days in any week or after the hour of 7 o'clock postmeridian or before the hour of 6 o'clock antemeridian; and in such event, if the guaranty contains any false statement of material fact, the guarantor shall be amenable to prosecution and to the fine or imprisonment provided by this section for violation of the provisions of this act. Said guaranty, to afford the protection above provided, shall contain the name and address of the person giving the same: *And provided further*, That no producer, manufacturer, or dealer shall be prosecuted under this act for the shipment, delivery for shipment, or transportation of a product of any mine, quarry, mill, cannery, workshop, factory, or manufacturing establishment, if the only employment therein, within thirty days prior to the removal of such product therefrom, of a child under the age of sixteen years has been that of a child as to whom the producer or manufacturer has in good faith procured, at the time of employing such child, and has since in good faith relied upon and kept on file a certificate, issued in such form, under such conditions, and by such persons as may be prescribed by the board, showing the child to be of such age that the shipment, delivery for shipment, or transportation was not prohibited by this act. Any person who knowingly makes a false statement or presents false evidence in or in relation to any such certificate or application therefor shall be amenable to prosecution and to the fine or imprisonment provided by this section for violations of this act. In any State designated by the board, an employment certificate or other similar paper as to the age of the child, issued under the laws of that State and not inconsistent with the provisions of this act, shall have the same force and effect as a certificate herein provided for.

SEC. 6. That the word "person" as used in this act shall be construed to include any individual or corporation or the members of any partnership or other unincorporated association. The term "ship or deliver for shipment in interstate or foreign commerce" as used in this act means to transport or to ship or deliver for shipment from any State or Territory or the District of Columbia to or through any other State or Territory or the District of Columbia or to any foreign country; and in the case of a dealer means only to transport or to ship or deliver for shipment from the State, Territory, or district of manufacture or production.

SEC. 7. That this act shall take effect from and after one year from the date of its passage.

Approved, September 1, 1916.

NATIONAL ASSOCIATION FOR CONSTITUTIONAL GOVERNMENT.

This association is a purely patriotic and in no sense a partisan society. It has been formed in the conviction that the opposition recently manifested in so many ways to the institutions of representative government established by the Constitution of the United States is the result in part of ignorance of the significance and value of the constitutional guarantees, and in the equally firm conviction that unlimited experiment in social legislation is a menace not only to these institutions and these guarantees, but to the permanent existence of real self-government. The primary aim of the association is to preserve these institutions and these guarantees, first, by explaining their meaning, and, second, by demanding a sufficiently deliberate consideration of proposals of change in the National Constitution to warrant a reasoned acceptance of them before their adoption. *President*—David Jayne Hill. *Treasurer*—John Joy Edson. *Secretary*—Charles Ray Dean. Headquarters, Colorado Building, Washington, D. C.

PASSING OF THE SAILING SHIP.

The London *Economist* supplies the following table, showing the net tonnage of steamships and sailing vessels on the register of Great Britain and Ireland from 1840 to 1912, and *Lloyd's Register* for subsequent years:

Year.	Steam.	Sail.	Total.	Year.	Steam.	Sail.	Total.
1840	87,930	2,680,330	2,768,260	1909	10,284,810	1,301,060	11,585,870
1860	454,330	4,204,360	4,658,690	1910	10,442,719	1,112,944	11,555,663
1880	2,723,470	3,851,040	6,574,510	1911	10,717,511	980,997	11,698,508
1900	7,207,610	2,096,490	9,304,100	1912	10,992,073	902,718	11,894,791

Year.	Steamers. Number.	Steamers. Net Tonnage.	Sailing Ships. Number.	Sailing Ships. Net Tonnage.
1913	8,514	11,109,560	700	422,293
1914	8,587	11,545,746	653	364,677
1915	8,675	11,760,277	610	305,663

FASTEST ATLANTIC OCEAN PASSAGES.

Route.	*Steamer.*	*Line.*	*Date.*	*D.*	*H.*	*M.*
Queenstown to New York	Mauretania	Cunard	Sept. 11-15, 1910	4	10	41
New York to Queenstown	Mauretania	Cunard	Sept. 15-20, 1909	4	13	41
Cherbourg to New York	Kronprinz. Cecilie	No. Germ. Lloyd.	Aug. 19-25, 1908	5	11	9
New York to Southampton	Kaiser Wilh. d. Gr'se	No. Germ. Lloyd.	Nov. 23-29, 1897	5	17	8
New York to Havre	France	French	Aug. 22-28, 1912	5	17	..
New York to Cherbourg	Kaiser Wilh. d. Gr'se.	No. Germ. Lloyd.	Jan. 4-10, 1900	5	16	..
New York to Plymouth	Kronprinz. Cecilie	No. Germ. Lloyd.	Sept. 14-20, 1909	5	7	25
New York to Naples	Deutschland	Hamburg-Am.	Jan. 20-28, 1904	7	16	44

The fastest day's run was made by the Mauretania of the Cunard Line, January, 1911—676 knots, or 27.04 knots per hour.

United States battleship speed record made by the Wyoming, July 19, 1912. On the twenty-first standardization run she made a speed of 22.045 knots. The torpedo boat destroyer McDougal broke all mile speed records for her type in standardization trials off Rockland, Me., in May, 1914. She ploughed the water at the rate of 32.07 knots an hour on her fastest mile. The average of her five full speed runs was 31.516 knots.

1905 record.—Allon Line's turbine Steamer Virginian passed Cape Race June 13, 11 A. M., inward bound, having left Moville on the afternoon of June 9, thus crossing in less than four days

On March 19, 1914, the freighter Santa Cruz (oil burner) steamed into San Francisco from New York via the Straits of Magellan. The distance is approximately 13 000 miles and the time consumed was 47 days and 4 hours.

Steamship development as shown in the relative proportions, speed, etc., of the Great Eastern and Vaterland:

Great Eastern.		Vaterland.	
Length	692 ft.	Length	950 ft.
Breadth	80 ft.	Breadth	100 ft.
Displacement	27,000 tons.	Displacement	65,000 tons.
Paddle, Screw and Sail: Speed	13 to 14 knots.	Quadruple Screws	24 knots.

THE RECORD-BREAKERS BETWEEN NEW YORK AND QUEENSTOWN—EAST OR WEST.

SEAMEN'S ACT.

An act to promote the welfare of American seamen in the merchant marine of the United States; to abolish arrest and imprisonment as a penalty for desertion and to secure the abrogation of treaty provisions in relation thereto; and to promote safety at sea. (Approved March 4, 1915.)

Copies of the act and circulars concerning its several sections, with regulations, will be issued from time to time by Department of Commerce in Washington, D. C., and may be had on application.

SHIP REGISTRY.

An act to provide for the admission of foreign-built ships to American registry for the foreign trade, and for other purposes.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the words "not more than five years old at the time they apply for registry" in section 5 of the act entitled "An act to provide for the opening, maintenance, protection, and operation of the Panama Canal and the sanitation and government of the Canal Zone," are hereby repealed.

Sec. 2. That the President of the United States is hereby authorized, whenever in his discretion the needs of foreign commerce may require, to suspend by order, so far and for such length of time as he may deem desirable, the provisions of law prescribing that all the watch officers of vessels of the United States registered for foreign trade shall be citizens of the United States.

Under like conditions, in like manner, and to like extent the President of the United States is also hereby authorized to suspend the provisions of the law requiring survey, inspection, and measurement by officers of the United States of foreign-built vessels admitted to American registry under this act.

Sec. 3. This act shall take effect immediately.

Approved, August 18, 1914.

IMMIGRATION INTO THE UNITED STATES

FOR FISCAL YEARS ENDED JUNE 30.

YEAR.	Total Immigrants.	YEAR.	Total Immigrants.	YEAR.	Total Immigrants.	YEAR.	Total Immigrants.
1901	487,918	1905	1,026,499	1909	751,786	1913	1,197,892
1902	648,743	1906	1,100,735	1910	1,041,570	1914	1,218,480
1903	857,046	1907	1,285,349	1911	878,587	1915	326,700
1904	812,870	1908	782,870	1912	838,172	1916	298,826

Total from 1820 to 1916, inclusive, 32,652,950 (for yearly totals from 1824 to 1899 see 1913 ALMANAC, page 185). From 1789 to 1822, estimated, 266,038.

Of the whole number of immigrants in the fiscal year ended June 30, 1916, 141,390 came through the customs district of New York, 124 through Baltimore, 12,428 through Boston, 229 through Philadelphia, 7,955 through San Francisco, 101,452 through Canadian ports and Canadian border, 16,520 through Mexican border, and the balance through other ports.

The reported occupations of immigrants arriving during the fiscal year 1916 were as follows: Laborers, 55,816; servants, 29,258; farm laborers, 26,250; tailors, 2,799; merchants and dealers, 7,017; carpenters and joiners, 4,824; shoemakers, 1,280; clerks and accountants, 8,369; mariners, 3,088; miners, 2,407. The number of professional immigrants (including 632 actors, 1,808 engineers, 695 musicians, and 1,640 teachers) was 9,795; of skilled laborers, 45,528; other miscellaneous (including unskilled), 10,055; no occupation (including women and children), 104,766.

IMMIGRATION BY COUNTRIES IN FISCAL YEARS 1915 AND 1916.

EMIGRATION FROM UNITED STATES.

For fiscal year ended June 30, 1908, emigrant aliens, 395,073; non-emigrant aliens, 319,755; total, 714,828. In 1909, emigrant aliens, 225,802; non-emigrant aliens, 174,590; total, 400,392. In 1910, emigrant aliens, 202,436; non-emigrant aliens, 177,982; total, 380,418. In 1911, emigrant aliens, 295,666; non-emigrant aliens, 222,549; total, 518,215. In 1912, emigrant aliens, 333,262; non-emigrant aliens, 282,030; total, 615,292. In 1913, emigrant aliens, 308,190; non-emigrant aliens, 303,734; total, 611,924. In 1914, emigrant aliens, 303,338; non-emigrant aliens, 330,467; total, 633,805. In 1915, emigrant aliens, 204,074; non-emigrant aliens, 180,100; total, 384,174. In 1916, emigrant aliens, 129,765; non-emigrant aliens, 111,042; total 240,807.

NOTE—Arriving aliens whose permanent residence has been outside the United States, who intend to reside permanently in the United States, are classed as immigrant aliens. Departing aliens whose permanent residence has been in the United States, who intend to reside permanently outside, are classed as emigrant aliens. All alien residents of the United States making a temporary trip abroad, and all aliens residing abroad making a temporary trip to the United States, are classed as non-immigrant aliens on the inward journey and non-emigrant on the outward.

UNITED STATES COAST GUARD.

HEADQUARTERS, TREASURY DEPARTMENT, WASHINGTON, D. C.

THE United States Coast Guard was created by the act of January 28, 1915, which provided that "There is hereby established in lieu of the existing Revenue Cutter Service and the Life-Saving Service, to be composed of those two existing organizations, the Coast Guard, which shall constitute a part of the military forces of the United States and which shall operate under the Treasury Department in time of peace, and operate as a part of the Navy, subject to the orders of the Secretary of the Navy, in time of war or when the President shall so direct." The original Revenue Cutter Service was organized by act of Congress approved August 4, 1790. The Life-Saving Service was originally operated under the Revenue Cutter Service, but on June 20, 1874, Congress created it a separate service to operate under the Treasury Department. The officers of the Coast Guard are on the same footing in rank and pay as officers of the Army and Navy. Appointments to cadetships are made after competitive examinations conducted by boards of commissioned officers of the Coast Guard. The cadets are educated at the Coast Guard Academy at New London, Ct. The course covers three years and embraces professional and academic subjects. Candidates for cadetships must not be less than 18 nor more than 24 years old, citizens of the United States, and unmarried. A class of cadets is appointed each year. Appointments as Cadet Engineers are made after competitive examinations conducted by boards of engineer officers of the Coast Guard. Candidates for Cadet Engineers must not be less than 20½ years of age and serve a probationary term of not less than one year before being commissioned Third Lieutenants of Engineers. No person can be commissioned Third Lieutenant of Engineers who is less than 21 or more than 26 years of age.

This branch of the Government is under the charge of Captain Commandant E. P. Bertholf; Senior Captain D. P. Foley is the Chief Inspector; Senior Captain Howard Emery is the Superintendent of Construction and Repair; Charles A. McAllister is Engineer-in-Chief; G. H. Slaybaugh, Chief of Division of Materiel, and O. M. Maxam, Chief of Division of Operations.

Seminole	860	Wilmington, N. C.	4	Ossipee	908	Portland, Me.	4
Seneca	1,445	Tompkinsville, N. Y.	4				

The authorized personnel is 270 commissioned officers and 3,931 warrant officers, petty officers, and enlisted men.

The Coast Guard stations are divided into thirteen districts, embracing the Atlantic, Gulf, Great Lakes, and Pacific Coasts, including Alaska. There are 281 Coast Guard stations and houses of refuge. One station is at the Falls of the Ohio, near Louisville, Ky.

OPERATIONS OF THE COAST GUARD FOR THE FISCAL YEAR ENDED JUNE 30, 1916.

The beneficial work performed by the Coast Guard in the interests of the public covers a wide and diversified scope. Its principal functions are the saving of life and property from destruction on the seas, but there are many other lines of endeavor where its potentiality and activities are exerted which benefit mankind and which cannot be expressed statistically. The following tabulated statement of appraisable work performed during the past year will, however, give an idea of the accomplishments of this humanitarian branch of the Federal service:

Lives saved or persons rescued from peril	1,216	Instances of miscellaneous assistance	2,021
Persons on board vessels assisted	15,742	Value of vessels assisted (including cargoes)	$10,609,655
Persons in distress cared for	443	Derelicts and obstructions to navigation removed or destroyed	29
Vessels boarded and documents examined	30,510	Value of derelicts recovered and delivered to owners	$28,900
Regattas and marine parades patrolled in accordance with law	36	Total expenditure for maintenance of Coast Guard	$5,215,711
Vessels to which assistance was rendered	1,453		

UNITED STATES VOLUNTEER LIFE-SAVING CORPS.

Office, Municipal Building, New York City.

NATIONAL WOMEN'S LIFE-SAVING LEAGUE.

ORGANIZED for work among women and children. Its purposes are: To encourage swimming by women and children; to co-operate with other organizations, whenever advisable, in the dissemination of knowledge on life saving from drowning and "first aid" to the injured; to encourage interest and promote efficiency in swimming and life saving by the holding of annual competitions for medals, prizes and the like; to encourage and advocate simplicity and rationalism in bathing and swimming costumes; to establish an athletic branch for the supervision of athletics, for women by women, in order to raise the dignity of such branch of outdoor sports so that all women may participate in the healthful and instructive exercises of swimming and life saving; to advocate the general adoption of swimming and life saving—rescue and resuscitation—as a branch of elementary education.

It conducts free classes of instruction in swimming, free competitions for the entertainment and benefit of its members, and public exhibition drills for the purpose of public instruction. The dues of the league are 50 cents a year, to cover postage and incidentals, bringing membership in the organization within the reach of all working women.

President—Katherine F. Mehrtens Thorman. *Vice-President*—E. Wemsper Burns. *Treasurer*—Sarah L. Marrin. *Secretary*—Bessie Simms. Headquarters, 25 Clinton Street, Brooklyn, N. Y.

THE UNITED STATES LIGHTHOUSE SERVICE.

BUREAU of Lighthouses. Commissioner, George R. Putnam; Deputy Commissioner, John S. Conway; Chief Constructing Engineer, Horatio B Bowerman; Superintendent of Naval Construction, Edward C. Gillette, Chief Clerk, T S. Clark.

The Lighthouse Service is charged with the establishment and maintenance of lighthouses, light-vessels, buoys, and other aids to navigation on the coasts and rivers of the United States, as authorized by Congress, and with the direction of the offices, depots and tenders required in this work.

The field work of the service is divided into nineteen districts, each in charge of an inspector.

AMERICAN TRUTH SOCIETY.

THIS society was organized January 18, 1912, in New York City and incorporated February 9, 1912, under the laws of the State of New York.

The object of this society is: "To propagate a spirit of pure Americanism; to preserve the traditions of the United States inviolate; to oppose and resist by truth all attempts of corporations, societies and individuals to dominate the public opinion of the United States for the purpose of discriminating in the interests of any one race by means of legislation, literature, education or organized propaganda; to propagate the History of the United States and the States comprising the United States amongst the people of the United States, and to combat with truth all attempts to garble, falsify, misrepresent or suppress the History of the United States or the States comprising the United States, anywhere within the State of New York and the United States."

Headquarters, 210 Fifth Avenue, New York City. *Prestaent*—Jeremiah A. O'Leary. *Secretary*—George W. Mead.

REPORT OF THE COLORADO COAL COMMISSION

AS PRINTED IN THE MONTHLY REVIEW OF THE UNITED STATES BUREAU OF LABOR STATISTICS.

IN 1914 the President appointed a commission to report upon the labor difficulties in the coal fields of Colorado during the years 1914 and 1915. The commission consisted of Seth Low, of New York City; Charles W. Mills, of Philadelphia; and Patrick Gilday, of Clearfield, Pa. This commission submitted its final report under date of February 23, 1916.

The report is very brief, containing merely a summary of findings, based for the most part upon a personal visit of the commission to the Colorado coal fields. In scope it is concerned primarily with conditions in the coal fields as they existed after the strike disturbances.

In its survey of conditions growing out of the strike, the commission emphasizes two factors as of particular importance: The creation of the Colorado Industrial Commission, with extensive authority in industrial disputes, and the plan of the Colorado Fuel and Iron Company for regulating the relations between the corporation and its employés. The Colorado Industrial Commission, under its creative act, is given the power of compulsory investigation of labor disputes, and for a period of 30 days during which the investigation is pending, strikes or lockouts are forbidden under penalty.

Particular attention was devoted by the commission to the operation of the industrial representation plan of the Colorado Fuel and Iron Company. Its conclusion is that the plan was adopted by the company "in entire good faith and is being operated with a single-hearted desire to make it successful." The opposition of organized labor to the plan is noted and commented upon as follows:

It must be said that there is no effort being made on the part of the organization to ascertain whether the company is acting in good faith or not. Their contention that the miners are not free under the industrial plan to express their real opinions and that they dare not avow their membership in the union could readily be tested if one of their representatives would express his real opinion and any action were taken by the company against such individual. Your commission, upon hearing the complaints to the effect that a member of their organization would be promptly discharged if he made his membership known to the foreman or his associates, endeavored to have some individual follow this course in order that your commission might discover if there was any real discrimination on account of membership in the organization, but we were unsuccessful in getting any of the leaders with whom we conferred to agree to such a course unless we would guarantee that any one doing so would not lose his place. That, evidently, was not our province, neither was it in our power to do.

The charge of discrimination against former strikers is not regarded as well founded by the commission. Its conclusion is that such discrimination exists in some degree in the northern field, but little if at all in the southern field. Referring to the fear of discrimination on the part of miners in the southern field the report says: "Your commission is under the impression that the fear said to be entertained by the miners, so far as the companies are concerned, is probably exaggerated and is an imaginary fear rather than a real fear."

The commission speaks very favorably of the general living conditions of the miners:

The housing conditions for the miners are exceptionally well provided, and every camp that we saw appeared to be doing much for the comfort and welfare of its employés. Bathing houses are provided in some instances free and in some instances operated for a charge of $1 per month. If there is any charge, the attendant looks after washing out the clothes and hanging them up to dry and keeping the place in order. Many of the camps have clubhouses with pool tables a reading-room, and various games for the enjoyment of the members, and all of the clubs are free for the use of the employés.

Schools are maintained for the benefit of the children of the miners. In some instances these schools are provided by the company, at least to the extent of furnishing the building for the same, though the instruction is paid for by the county. In every instance, however, the school is within easy walking distance, if not in the centre of the town or camp.

As regards the indictment and imprisonment of striking miners, the report comments as follows:

Your commission became aware of only one disturbing element in the industrial situation. About 400 indictments were found after the strike, and all of these were of strikers. Some of the citizens of Colorado believe that many illegal acts were committed on the part of the operators, and the justice which finds all of the indictments on one side does not seem to them even-handed. Your commission naturally expresses no opinion as to the correctness of this belief. It simply calls attention to the existence of this feeling.

Again, it is believed by some, even among the operators, that in many of these cases the State has not sufficient evidence to convict. In such cases—and your commission believes that there are such—the men affected are suffering from great injustice, in that they are either confined in jails, unable to get bond, or if out on bond they are refused employment in Colorado on account of the indictment against them, and are prevented from leaving Colorado or the jurisdiction of the court by their bondsmen. As long as this condition of affairs exists the industrial health of Colorado will be weakened by this festering sore. It is not the business of your commission to weigh the rights and wrongs of the case, but we should fall short of our duty if we did not call attention to this feature of the situation and emphasize the importance to the State of providing a prompt remedy.

SUBMARINE CABLES OF THE WORLD.

(From report issued by the Bureau International de l'Union Telegraphique.)

THE following table sets forth the entire system of submarine cables of the world, including those along the shores and in the bays, gulfs, and estuaries of rivers, but excepting those in lakes and the interior watercourses of continents. The list includes all cables operated by private companies, and in addition thereto under the name of each nation is given the list of cables operated by the government of that nation.

COMPANIES.	Number of Cables.	Length of Cables in Nautical Miles.
Commercial Cable Co.	15	16,595
Transatlantic System—Waterville (Ireland) to Canso (Nova Scotia). Canso, N. S., to New York. Canso, N. S., to Rockport, Mass.		
Commercial Pacific Cable Co.	6	10,010
San Francisco to Manila. Manila to Shanghai. De l'ile de Peel (Bonins) à Guam.		
Commercial Cable Co. of Cuba.	1	1,285
New York to Havana, Cuba.

TELEGRAPH RATES FROM NEW YORK CITY.

WESTERN UNION TELEGRAPH COMPANY RATES. SEE ALSO POSTAL TELEGRAPH-CABLE COMPANY RATES ON FOLLOWING PAGE.

DAY TELEGRAMS of 10 words or less, address and signature free, are transmitted immediately upon reception.

NIGHT TELEGRAMS of 10 words or less, address and signature free, are sent during the night at the convenience of the company.

Words over 10 in Day Telegrams and Night Telegrams are 2 cents each where rate is 25, 30, or 35 cents; 3 cents each where rate is 40 or 50 cents; 4 cents where rate is 60 cents; 5 cents where rate is 75 cents; 7 cents where rate is $1.00, and 8 cents where rate is $1.25.

NIGHT LETTERS of 50 words or less, address and signature free, filed up to 2 o'clock A. M., are delivered the next morning at the same rate as that shown for "Day Telegrams of 10 words."

DAY LETTERS of 50 words or less, address and signature free, filed at any hour during the day, are transmitted and delivered subject to the priority of Day Telegrams. Rates for Day Letters are one-half higher than rates for Night Letters.

Words above 50 in Night Letters or Day Letters are one-fifth the 50-word rate for each additional 10 or fraction of 10 words.

TELEGRAPH RATES—*Continued.*

On January 1st, 1912, a reduced rate on cable messages in plain language, taken on a delay basis, was inaugurated, and is now in effect between most countries. Deferred cable messages must be written in plain language of the country of origin or destination, must bear the declaration LCO (language country of origin), LCD (language country of destination), or LCF (language country French, as an international language), and are subordinated to full-rate messages in the order of transmission until an accumulated delay of 19 hours has occurred, when they take their turn with fully paid traffic. The tariff is generally one-half the regular rate, but on deferred messages between the United States or Canada and the United Kingdom of Great Britain and Ireland the tarrif is 3 cents less than half rates.

In December, 1911, the Western Union Telegraph Company inaugurated two new forms of cable service. These new services, known as cable letters and week-end letters, are the cable equivalent of night letters in the domestic telegraph service, in that they are predicated on the the use of facilities that otherwise would be idle at night, and on delivery the following day. Unlike all other forms of cable service, the tolls on which invariably are charged on a word basis, cable and week-end letters are charged on a message basis. The minimum charge on cable letters is, for 13 words (including a necessary prefix), and in week-end letters for 25 words (including a necessary prefix). The tariff varies according to distance, but between New York City and London is 75 cents and $1.15 for cable and week-end letters respectively.

THE WESTERN UNION TELEGRAPH COMPANY.

Newcomb Carlton, President; Executive Offices, 195 Broadway, New York.

Capital stock outstanding, $99,786,726.66. Funded debt, $31,994,000. Capital stock in subsidiary companies not owned by Western Union, $3,794,145. Total capital liabilities, $135,574,871.66.

Annual report for fiscal year ended December 31, 1915: Gross income, $51,171,795.47; operating expenses and taxes, $40,972,541.42; net profits, $10,199,254.05; interest on bonds, $1,335,588.19; dividend (5%), $4,986,364.25; balance to surplus, $10,167,591.63; number of offices, 25,142; miles of wire, 1,610,709; ocean cables, 26,120.

* Partly estimated. † Estimated where necessary.

The independent telephone companies of the United States, which are owned and operated entirely apart from the Bell organization, are represented in the United States Independent Telephone Association, with headquarters in Washington, D. C., and Chicago, Ill. According to the United States Census of 1912, there were 1,740 independent telephone companies with over $5,000 annual income, and 2,239,721 stations. Many of these companies connect with the Bell system. The capital invested is approximately $300,824,000 and the income is about $48,950,000 per annum. The independent companies, which are for the most part financed in the territories which they cover, are particularly strong throughout the Middle and Far West. They are established in nearly every large city in the United States except those on the Atlantic Coast.

TELEPHONE DEVELOPMENT OF PRINCIPAL CITIES OF THE WORLD.
(From latest records, but subject to modification because of war.)

ELECTRICAL PROGRESS.

A REVIEW of the industry during 1915–1916 specially prepared for THE WORLD ALMANAC by Theodore Dwight of the Engineering Department of the Society for Electrical Development, Inc.

THE ELECTRICAL INDUSTRY.

Recent figures compiled on the electrical industry show what a high place it takes in the resources of the country.

Including the central stations, known isolated electric plants, electric street railways, electrified steam railroads, telephone, telegraph, electrical machinery manufacturers and money invested by electrical dealers, contractors and jobbers in their business, the total foots up to a figure exceeding $12,000,000,000.

The number of persons employed in the industry, 1,023,000, and the annual earnings or sales, $2,324,700,000.

The aggregate number of those employed in the electrical industry is 10 per cent. of all those engaged in manufacturing industries in the country.

The position of the electrical industry itself is most impressive, but when it is realized what the application of electricity has meant in the development and increased output of other industries of the country it takes a still higher rank.

Its position as the foundation of our national defence is acknowledged, and through the further centralization of its development it will have a vast influence in the conservation of the fuel resources of the country by the development of our enormous water power.

A prominent banking house has tabulated the net earnings of over fifty lighting companies for the period from August, 1913, to April, 1916, as representing a twelve months prior to the European war, for comparison with a period in war time when so many industries have been adversely affected. This group of utilities shows a consistent rise in net earnings amounting to a total of 33 1-3 p. c. increase.

The steady improvement in the financial condition of public utilities, particularly in the electric central station field, is attracting general interest to the securities of these companies and they are being sought, not only by the investing public but by the more conservative bank and trust company.

At the time of writing this report, estimates based on the business of the electrical manufacturers show a 70 p. c. increase over similar period for 1915.

This means that the business of the electrical manufacturers will exceed half a billion dollars.

The growth of the Electric Central Station is shown by the following figures: $2,098,613,122 is invested in privately-owned plants in the United States. The gross earnings for the first six months of 1916 amounted to $203,500,000, or at the rate of $407,000,000 for the year. This amount will doubtless be largely exceeded by the final figures, including the other six months. This is a gain of about 16 p. c. over 1915.

The amount of energy sold during the first six months of 1916 was 10,875,000,000 kilowatt hours, a gain of 24 p. c. over the previous year's figure. This shows that the average price of current to the consumer has been materially lowered.

Of this immense yearly total of nearly 22,000,000,000 kilowatt hours for the whole United States, 5½ p. c., or about 1-18th, is supplied by a single company, the Commonwealth Edison Company of Chicago.

In the City of Chicago 500 kilowatt hours per capita is generated yearly as against 74 kilowatt hours for the County of London, or for a better comparison in Greater London, including electric railways, only 150 kilowatt hours. If the railroads of the Chicago district were electrified—a plan that is under consideration—125,000 kilowatts would be added to the present load, and the lines and yards with 3,500 miles of track, would be operated electrically, but through the operation of overlapping peaks the existing power company could handle it with a saving of 150,000 kilowatts of generating capacity over the amount the railroads would have to install if operating their own generating plants. This represents a capital saving of $30,000,000 and a yearly saving in fuel consumption of nearly 6,000,000 tons.

Group systems of electric power generation in our great centres of population to supply current for such use would mean the annual saving of hundreds of millions of dollars of fuel consumption and conserve by that much our coal resources that are being so rapidly depleted.

Nearly 15,000,000,000 kilowatt hours of electrical energy out of a total of 22,000,000,000 generated in the United States in 1916 was supplied by 37 central stations. This means that these 37 companies furnished 68.2 p. c. of the current generated in the total of 5,038 plants of the country.

The Minneapolis General Electric Company shows a rate of growth that is indicative of the development of the central station industry:

Number of customers, 1910, 14,799; 1915, 38,660; total kilowatt lighting connected, 1910, 21,957; 1915, 58,014.42; total kilowatt power connected 1910, 14,969; 1915, 37,755.92; gas lights displaced in *year* 1915, 42,133; appliances sold in *year* 1915, 11,178.

Electric exports for 1915 amounted to $24,308,510, as against $19,963,115 the previous year.

There are 9,151,221 Bell Telephones in use in 70,000 cities and communities, with over 8,600,000,000 messages on these lines annually.

IMPROVED LIGHTING.

A large percentage of industrial accidents are recognized to be due to poor lighting, that is, not necessarily to too little light, but often to its bad distribution.

Good light may be secured at about the same cost as poor. Proper lighting is estimated to cost an amount generally less than 1 p. c. of the wages paid, or equal to only two or three minutes of a laborer's time a day. The time-saving due to efficient lighting sometimes runs as high as two or three hours on certain days, and the higher production secured will pay for any added cost many times over.

Engineering societies, educational institutions, and Health Departments are giving considerable attention to this subject both in the education of factory managements and by the passing of stringent regulations. Pennsylvania, through its Department of Labor and Industry, has succeeded in passing a Code of Lighting which became operative June 1, 1916.

Proper lighting in office buildings and the home has been often more neglected than in industries, and is the cause of much suffering due to eye strain.

Recent interesting contributions to this subject have been "A Code of Lighting for Factories, Mills and Other Work Places," by the Illuminating Engineering Society, headquarters in the Engineering Societies Building, New York, by the series of lectures in which this society has co-operated with other institutions, among them the University of Pennsylvania, where a series of twenty lectures has been given, and the recent studies of Dr. M. McMillan of the Department of Health, New York City.

The average candlepower of incandescent lamps used ten years ago was 18—it is now over 42.

Of the 20,500,000 homes in the United States over 27 p. c. are electrically lighted.

A comparison of the cost of various forms of light available to the public is interesting:

Using the following sources of light 10c. will buy—

Candles at 20c. per lb.....	48 candlepower hours.
Kerosene at 15c. per gal.....	465 candlepower hours.
Gasoline—87 grav.—at 25c. per gal.....	647 candlepower hours.
Acetylene at $60.00 per ton, yielding 45 cu. ft. per lb...	746 candlepower hours.
City gas at $1.50 per 1,000 cu. ft.	
Open flame.....	293 candlepower hours.
Best mantle.....	1,143 candlepower hours.
Electricity at 8c. per kw. hr.	
Obsolete carbon filam't.	390 candlepower hours.
Tungsten filament.....	1,062 candlepower hours.
Nitrogen filled.....	2,080 candlepower hours.
Flaming arc.....	5,000 candlepower hours.

TURBO GENERATOR DEVELOPMENT.

The past year has been marked by further increase in the capacities of turbo generator units. Single units of 30,000 to 35,000 K. V. A. have

become quite numerous, while much larger units of the compound type have been contracted for. The largest of the latter, so far, is the one for the Interborough Rapid Transit Company, with a nominal rating of 60,000 K. V. A. and a two-hour rating of 70,000. However, as these large artificially-cooled units reach their ultimate temperatures in practically two hours, the above really constitutes a continuous rating for these units. A number of similar type units of practically 50,000 K. V. A. have been sold to various plants. The Interborough unit consists of a high pressure turbine connected to a turbo generator, the high pressure turbine supplying steam to two lower pressure turbines in parallel, each driving a generator. The three generators are tied together electrically, practically as a single unit.

One of the notable conditions of the past year has been the increase in central station turbo generator capacities in the moderate size cities. Many of the stations in such cities have been buying turoo generator units of relatively large capacity compared with their preceding installations, indicating an enormous growth in central station service.

In small turbo generator units there has been a very considerable growth in the gear-driven sets, for both A. C. and D. C. machines. In fact in the D. C. sets the gear drive has forced the direct coupled units out of business, so that practically none are sold at present.

The volume of orders handled since the beginning of the year is in excess of 2,000,000 kilowatts of turbine rating.

CENTRAL STATION PRACTICE, ETC.

As mentioned before, there has been a very considerable growth in central station service. The field covered by central stations is increasing rapidly, and such stations have been reaching out for loads not heretofore considered very satisfactory, such as electric railway service. With the old-time smaller stations the railway loads undoubtedly were objectionable from the central station standpoint, but with the later larger stations, with much larger and better regulated power units, the railway loads have become less and less objectionable until, at present, many central stations are endeavoring to reach them, with the consequence that more and more railway power stations are being shut down, and power is being purchased from the large central stations. Formerly, the 60-cycle stations did not consider themselves in a position to handle large railway loads, due partly to shortcomings of the rotary converters, but through gradual improvements in the 60-cycle rotaries such service can now be handled in a very satisfactory manner. Coincident with this there has been an enormous growth in 60-cycle work compared with 25-cycle, which was used very extensively in former years. In some of the larger cities the growth in 60-cycle service has been twice as fast as the 25-cycle growth, thus clearly indicating the tendency.

Coincident with this growth there has been a strong tendency toward larger capacity rotary converters. In 25-cycle rotaries the 4,000-kilowatt size has become quite common (both Westinghouse and General Electric). In 60-cycle, 3,500-kilowatt 250-volt units of the synchronous booster type for voltage regulation have been contracted for (Westinghouse); also 5,800 kilowatts, 580 volts for copper refining in a Western plant (G. E.). Thus the 60-cycle rotary is now practically on the same footing as the 25-cycle as regards capacities which can be furnished by the manufacturers.

WATER-WHEEL DEVELOPMENT.

While no especially notable installations of recent date can be pointed out, yet there has been a great increase in water-power development, but the electric machinery has been along well established lines.

Franklin K. Lane, in a recent report, stated that an amount of hydro-electric energy was running to waste in this country to equal the daily labor of 1,800,000,000 men, or thirty times our adult population.

ELECTRIC RAILWAYS.

The past year has shown no important contracts for heavy railway work, although plans have been made by several roads to extend very considerably their present electrification.

The Norfolk and Western electrification at Bluefield (a. c.) has passed through the heaviest year of service by far that the Norfolk and Western has encountered.

The Philadelphia-Paoli suburban electrification of the Pennsylvania Railroad (11,000 volts single phase) has extended its operation up to its full contemplated service, and the Chestnut Hill branch of this system is progressing actively toward completion. This Pennsylvania suburban electrification out of Philadelphia is interesting, in that it takes power from the main station of the Philadelphia Electric Company and has no power station of its own. This is a further important stage in the extension of central station service.

In connection with electric street railways the decrease in competing "jitney" service is of considerable interest. However, the competition of the "jitney" has indicated certain possibilities of smaller and lighter electric cars and more frequent service in the cities, and one consequence of this is that there is a certain tendency at present toward smaller sizes in the popular railway motors.

The electrification of 440 miles of the St. Paul Railroad between Harlowton, Mont., and Avery, Idaho, has in every way exceeded the expectation of both railroad officials and the manufacturers of the equipment.

The novel features of this electrification are the development of a direct current voltage of 3,000 volts, the development of the method of receiving this current from the overhead wires, and the regenerative braking.

D. A. Goodnow, assistant to the President and in charge of the electrification, reports that on the division which has been electrified the work formerly done by 24 heavy Mallet steam locomotives is now being done more quickly and with greater economy by nine electric locomotives.

The regenerative method of braking is of especial interest and importance on this electrification. There are many long, steep grades on this railroad which crosses two mountain ranges. Where formerly the tremendous energy stored in a heavy train at the summit of these grades had to be dissipated in heat in the brake shoes and wheels during the descent, and caused the brake shoes to become red-hot with overheating of the wheel rims, this energy is now transmitted back to the lines by the dynamic action of the motors and goes to haul other trains up grades. A large saving in power is thus effected, as well as the more important saving of wear and tear on rolling stock.

MILL WORK.

Possibly the most notable progress in steel mill work in the last year has been in the electric operation of large reversing mills. While a number of these have been sold and put in operation in the past seven or eight years, yet the sale of such apparatus for driving reversing mills has practically trebled during the past year. No doubt the great boom in the steel business has exaggerated this tendency. Many of these reversing mill sets are of very large capacity, some of them reaching 15,000 H. P. maximum. In general, they are all of one type, each set consisting of a large motor-generator coupled to a large fly wheel. The driving motor, as a rule, is an induction motor with automatic speed control for the purpose of shifting the peak load to the fly wheel. The generator is of the direct current type, with means for varying and reversing its voltage from zero to a maximum in either direction. The roll motors are of the direct current type and have their speed varied by voltage variation at the generators.

ELECTRIC DRIVE FOR BATTLESHIPS.

Last year was marked by the extension of the policy of the Navy to use electric drive for battleships. Two additional battleships, of the dreadnought type, have been contracted for with electric drive. This method of propulsion has worked out so satisfactorily that doubtless the Navy Department will continue this policy to a certain extent on the new vessels authorized in the recent Navy Bill. In the recent contracts for electric drive of battleships, the installations in general will consist of four induction motors, each direct coupled to a propeller shaft. Each motor will have a normal capacity of about 7,000 H. P. The generating plant will consist of two turbo generator sets, each of

approximately 15,000 K. V. A. capacity. Each motor can give two operating speeds by pole changing.

The electric power that can be generated on the Tennessee will be equal to the power consumed by the central stations at New Orleans and Washington, D. C., with their suburbs, which serve a combined population of almost 700,000 souls, or 70 p. c. of the size of the entire electrical development in the State of New Hampshire.

SMALLER APPARATUS.

There has been considerable growth in the small generator business for arc welding.

There has been notable advancement in the selective protection of feeders and systems, through relays, etc., thus improving the continuity of service.

There has been marked activity in industrial heating apparatus, as distinguished from household heating. There has been great growth in the heating business as a whole, and in some cities the heating load is rapidly approaching the total lighting load.

The subject of rates in general, and more particularly measuring devices that take into account the demand feature, has received much attention during the past year.

RESEARCH WORK.

Owing to the tremendous boom in the electrical business much of the facilities of the research departments of the various electrical manufacturing companies have been turned toward the engineering and application side of the work, to meet the many problems arising. While very great progress has been made along the various lines, yet, in many cases, this forms part of the general engineering result and does not stand out prominently. Owing to the great growth of the electrical work the research facilities of all the manufacturing companies have had to be very greatly increased during the past year In fact one of the great tendencies during the past year has been toward increase in research work and research laboratories by industrial interests as a whole The electrical business has, in general, led other industries in this respect, due probably to the more complex nature of the problems which are encountered in the electric field.

ELECTRIC REFINING OF STEEL.

The unprecedented demand during the last year for high-grade steel has been a great stimulus to the development of the electric furnace for the refining of steel.

Steel refined in an electric furnace can be made to conform to any specifications, since from the nature of the fuel no physical impurities or impurities from oxidization are introduced with the fuel and the temperature of the furnace is easily controlled by the operator.

Moreover, castings made of electrically refined steel are better able to withstand the stress of a sudden shock, have a higher tensile strength and are less liable to a change in internal structure due to crystallization when intermittent load is applied than steel refined in any other type of furnace

Another point of superiority of an electric furnace is the fact that the capacity of a single furnace may be greatly increased.

The crucible used in the open hearth method of refining steel holds only 100 to 160 pounds, and it was a great tribute to German machine-like training and commercial efficiency that the Krupps were able to pour very large castings with crucible steel. This was accomplished by having an army of workmen working together, so that the steel in a large number of crucibles (often many hundreds) was ready at the proper time, and then pouring the casting from these crucibles.

The ingenuity of the engineer has substituted the electric furnace with its capacity at present of 25 tons. The usual capacity of the electric furnace for refining steel is from 1½ to 2½ tons, though the average capacity of the furnaces installed in the United States is above this, and there has been installed at Ugine, France, a furnace of 25 tons' capacity.

As an example of the progress made, the *Iron Age* in a recent article says:

"In 1910 there were 10 electric furnaces in the United States and 104 elsewhere in the world. In 1913 there were 19 in the United States against 121 elsewhere. In 1915 there were 41 against 172 elsewhere. On January 1, 1916, there were 73 against 230 elsewhere, while at the present time there are no less than 100 in the United States against 250 elsewhere."

This indicates that the United States has taken a decided lead in the production of high-grade steel since the war began.

The furnaces installed in this country are of larger average size than those installed in Europe, and so the relative production of electrically refined steel in this country and elsewhere is even greater than would be indicated by the number of furnaces.

The furnaces in operation in the United States represent the utilization of 135,000 H. P. and give a tonnage output of over 1,100,000 each year.

A Western copper refining company which refines 330,000,000 pounds of copper annually has been able to effect a saving of one cent per pound of copper refined by the complete electrification of its mine and refining plant. This company uses annually 700,000,000 kilowatt hours of electric energy, or over 2 kilowatt hours per pound of copper refined.

FIXATION OF NITROGEN.

One item of the more than $600,000,000 appropriated for defence by the last Congress, and an important item from its bearing on the preparedness issue, was that of $20,000,000 for a hydro-electric plant for the manufacture of nitrates from the free nitrogen of the air.

The nitrogen of the atmosphere is "fixed" or changed into a useful form by passing a current of air through a continuous electrical discharge.

The nitrogen and oxygen of the air combine under the action of this electrical discharge to form the oxides of nitrogen used to make nitric acid, which is so necessary in the manufacture of high explosives.

Since Chile furnishes almost the entire supply of nitrates at present, our country would be in a serious dilemma were this supply shut off in time of war.

These nitrates with which Chile furnishes the world come from very large natural deposits along the Chilean coast. They are very important as fertilizers in times of peace and are vitally necessary in the manufacture of high explosives. The export duty on them is one of the great sources of income to the Chilean Government.

The cost of making nitrates by the electric method is just a little more than that paid for Chile nitrates. The normal price of sodium nitrate ($Na\ NO_3$) delivered at west coast points is $30 per ton. At $9 per H. P. year for electric power the cost of producing sodium nitrate by the electric fixation of nitrogen would be $32 per ton.

However, there is included in the $30 price of the natural product from South America, an export duty of $11 per ton levied by the Chilean Government, and this would probably be reduced if the electrical product were offered in competition, which fact makes necessary the assistance of our Government if we are to have a domestic supply.

Another method of "fixing" the nitrogen of the atmosphere is accomplished by reason of the fact that at moderately high temperatures this nitrogen of the air combines with calcium carbide to form cyanamid. Though this action is not brought about in an electrical furnace, yet it requires in calcium carbide a product of the electric furnace. The power consumption in the manufacture of cyanamid is much less per unit of combined nitrogen than in the direct oxidation method. However, other cost factors bring the total cost of each product to about the same total. The cost of cyanamid being about $35 a ton.

ELECTRIC HEATING.

During the past year there has been a remarkable development in the use of electricity for heating purposes, both domestic and industrial

There has been a general impression that the cost of electric energy was entirely too high to permit of its use for this purpose except in such small quantities as that necessary to operate an electric iron, coffee percolator, chafing dish, toaster or such small devices.

That this impression is a wrong one is most conclusively shown by the fact that in the rate files of the Society for Electrical Development there are listed 3,335 communities which have special rates for electricity for cooking and heating purposes of 5 cents or less per kilowatt hour. Of these 70 p. c. are 4 cents or less and 32 p. c. 3 cents or less. This is also shown by the fact that over $2,000,000 worth of electric ranges have been sold during the year.

At the Montana State Hospital, Warm Springs, Mont., there is an electric range installed to cook

for 1,500 persons, or 4,500 meals per day. The largest installation for electric cooking at present is at Siemerstadt, near Berlin, Germany. This electric kitchen has a capacity for serving 3,000 persons or 9,000 meals per day. The electrical dish-washing apparatus in this kitchen is also most complete

Applications of industrial electric heating are innumerable, ranging from an electric steel refining furnace of 25 tons' capacity to the electrically heated gloves used by the British aviators.

There has been a wide application of electric heating to glue pots, wax pots, and embossing heads for bookbinding machines

The greatest single advance in the industrial heating field was made in the development of an electric heater for japanning ovens. The explanation of the marked superiority of electric heat in such ovens is this: the two important reactions in baking japan are driving out the volatile oils and oxidizing the japan films. In a gas oven one of the products of combustion is water vapor, the presence of which retards the drying process. This means a slower bake and less lustre to the finish. The oxygen of the furnace is also used up by the burning gas and oxidization of the film requires more time.

Temperature is another important factor and the electric oven gives a much more positive control by a thermostat. The capacity of a japanning oven is increased at least 25 p. c., due to the decreased time required. and another saving is effected by arranging an automatic control whereby both sides of a rotary oven are filled and electric time and thermostatic switches control the baking operation during the night. The first charge is held at a predetermined temperature for a definite time. The oven is then rotated and this charge cools while the other charge is kept at the proper temperature for the proper time The operation of the oven may be thus made practically continuous.

The price of high-speed tool steel has increased over 700 p. c. since the beginning of the war. The greater quantity of this steel is receiving the heat treatment in electric furnaces. In the old style gas furnace expert care was necessary, and even then much material was spoiled through the difficulty of regulating the furnace temperature. This has been entirely eliminated by the use of the electric furnace with its perfect control.

Electric furnaces are also used where accurate and clean heat treatment is necessary, as is the case in tempering finished tools or machine parts. Tempering is no longer a matter entirely of experience and personal judgment. The electric furnace can be easily adjusted to any required temperature and maintained at that temperature, thus dispensing with the judgment necessary in the use of a gas furnace.

Another application of electric heating which is becoming more and more important is that of welding. This is accomplished by the electric resistance or electric arc method. In the former a heavy current of electricity is caused to pass across the joint to be welded so that the resistance of the joint to the flow of current causes the metal near the joint to be brought up to the welding temperature. The pieces are then pressed together, completing the weld. This method is very economical and quick, and results in an excellent weld, since the heat is applied without introducing impurities into the material. Usually no flux is required. There are two methods of welding with the electric arc. One in which a carbon electrode is used and the other in which a metal electrode is used. For ordinary purposes the metal electrode is most suited for welding, and the carbon electrode is generally used only for cutting metals.

The intense heat of the electric arc, when properly applied, affords a very effective method of cutting metals and is being frequently used for this purpose.

Another use of the electric arc with metal electrode is the depositing of a layer of metal on the worn surface of large castings, switch plates, and for filling up cracks and blow holes. When castings have slight imperfections, or when a large machine part becomes too much worn for further use, instead of being thrown in the scrap heap it is sent to the electric welder, has a new wearing surface deposited on it and is as good as new.

TELEGRAPHY.

An American, Col. George O. Squier, Military Attaché at London, has invented a notable improvement in transmission of cable messages, the most radical since the installation of the first transatlantic cable.

The result is accomplished by substituting a low frequency single-phase sine-wave alternator in place of the make and break battery current transmitter. The alternating current is not broken. By the use of a single time element for the different durations of dot, dash and space he effects economies that are startling. In the record received a dot is a single stroke, the dash a triple one, but of the same length as the dot and space. Special skill is not required in reading the record making a highly paid operator unnecessary.

The saving in paper alone will run into many thousands of dollars a year. The new alphabet also permits direct relay from cable to land wires.

The substitution of the sine-wave for the old square-topped wave permits higher power being used with more certain results and without danger of puncturing of cable insulation due to high voltage produced by the higher harmonics of the square-topped wave.

Twice as many letters can be transmitted by the new method in a given time as compared with the old, and there is a further saving of time of six hours a day, due to its not being necessary in the Squier system, to ground the current after each signal to clear the circuit of the excess charge which has to be used in the older method.

To analyze the saving, each transatlantic cable costs about $2,500,000; with the Squier system two cables can now do the work of three.

These economies are figured on the use of only 4 to 10 cycles per second. It is believed that higher frequencies up to 50 per second can be used with corresponding speed and resultant economies.

When it is realized that the same principal is applicable to long distance land lines the value of Col. Squier's method can be appreciated.

Though there has been no advance in wireless during the year 1916 as notable as the achievement of simultaneous communication with Hawaii and Paris from New Jersey by wireless telephone, which took place in 1915, yet during 1916 the range of wireless communication has constantly broadened.

The increased range of communication between land stations and ships at sea has been remarkable. Messages sent out by the station at Tuckerton, N. J., using a 60-kilowatt Federal-Poulsen arc transmitter, have been read in the early evening by the S. S. Ventura when 530 miles southwest of Samoa, approximately 8,000 miles from Tuckerton.

Constant communication between San Francisco and the Sierra, a vessel of the Ocean Steamship Company, which is equipped with a 5-kilowatt Federal-Poulsen arc transmitter, has been maintained more than 4,870 miles.

Wireless operators near New York have recently been surprised at the clearness with which they have been able to hear music played by a phonograph and transmitted by experimenters at Tufts College. The wireless transmission of speech and music is no longer unusual, but the distinctness and clearness with which this music can be heard is surprising.

A De Forest oscillion bulb is used to provide the high frequency current necessary. The improvement in the method of introducing the voice to the high frequency circuit results in increased clearness. Further improvements may be expected from experiments being conducted along this line.

One peculiarity in the transmission of phonograph music by wireless is the elimination of the scratching noise, which is such an objectionable feature of musical reproduction, and which is caused by the friction of the needle on the surface of the record. This is a sound of too high frequency to affect the wireless circuit, and is not transmitted. The music which is received by the wireless outfit always surprises one hearing it for the first time because of the absence of this mechanical scratching noise.

Mr. Lee De Forest, who invented and developed the audion lamp amplifier, has brought the attention of musicians to the wonderful musical tones and effects which may be produced by the audion lamp. By varying the elements of the circuit peculiar drum notes may be produced as well as notes imitating the flute, violin, and other instruments.

Wire communication from New York to San

Francisco has been established on a commercial basis and no longer excites wonder. The American Institute of Electrical Engineers held meetings simultaneously in six cities interconnected by telephones. The members present at this meeting were each provided with a telephone receiver enabling them to hear what was going on in the other cities. The roll was called with 500 present at Atlanta, Ga., 700 present at San Francisco, at Boston 900, at Philadelphia 850, at Chicago 1,000, and at New York 1,100. Members at Denver and Salt Lake City listened to the proceedings, but were not connected so as to take part.

During the closing months of the Panama-Pacific Exposition there was installed a piece of electrical apparatus which attracted much attention and comment from both the public and from engineers.

This was an electric transformer rated 1,000 K. V. A., 60 cycles—2,200 to 1,000,000 volts. In the design of such a transformer radical departures had to be made in the methods of insulating the coils. The commercial transformers in use at present depend for their insulation on specially treated cotton tape, with which the wire is covered, supplemented by the oil in which they are immersed. In this case the wires were not wrapped and oil is depended upon altogether as the insulating medium.

The high voltage winding is made up of 190 coils, rated at 5,300 volts, each connected in series, giving a rated voltage of 1,007,000 volts.

Each of these coils is wound with 212 turns of *aluminum foil*, 8 mils. by 135 mils., separated by three thicknesses of paper 6 mils. thick. Each coil is 3' 7" inside diameter and 4' 3" outside diameter.

The assembled high tension coil is 5' 11" long.

The transformer weighs 30,000 lbs., and contains 26,000 separate pieces. More than 400 miles of paper, aluminum and copper are used in its construction.

When completed it was placed in a concrete tank, pyramidal in shape, open at the top and with a rim measuring 16' x 18'"; 7,312½ gallons of oil are required to fill the tank and completely cover the transformer.

Many interesting experiments were conducted with this apparatus. When it was operating at 400,000 volts pressure the air was so charged that a person alighting from an automobile at a distance of 50 feet would receive a shock as his feet touched the ground. Sparks could be drawn from any insulated piece of metal and hair pins and metal parts of clothing became distinctly uncomfortable within this distance.

The apparatus will be used to investigate many high voltage phenomena and to test the insulating properties of material used for insulating high tension currents.

ELECTROTHERAPEUTICS.

Increased use is being made of electricity by the medical profession, notably in replacing the laborious and slow massage treatment in building up shrunken muscular tissue of soldiers wounded in the war. In peaceful America the same apparatus is being utilized to build up the tissue of victims of infantile paralysis.

Stimulation for the affected limbs is accomplished by the application of static, galvanic, and sinusoidal current, and by electrically driven vibrators and exercising machines.

Among the interesting applications of electricity in new roles in the service of mankind the motor-driven gyroscope takes a leading place. The gyro-compass has reached a high state of development, and has been adopted by the leading navies of the world for their capital ships, and all submarines. The gyroscope of the compass is driven by a small electric motor and rotates at 8,600 R. P. M. The complete apparatus is inclosed in a vacuum, so that only .234 H. P. is required for its operation.

The advantage of the gyrocompass is that it is not affected by magnetic disturbances—the motion of magnetic bodies about it—and that it always indicates the true north.

Moreover, any number of auxiliary compasses may be operated from the master compass, which permits the installation of accurate compasses in all the important parts of a ship, as Captain's cabin, fire control room, bridge, and other places. As many as seventeen auxiliary compasses have been placed on one English battleship.

It has been applied to a dead reckoning instrument by means of which a submarine may take the bearings of a vessel at a great distance—submerge and run by dead reckoning to a point close enough to the vessel to make the torpedo effective.

The motor-driven gyroscope is also being successfully applied to the stabilizing of vessels—that is, to prevent them from pitching and rolling. This is of great importance to the Navy and several installations have been made on vessels of the Navy.

The importance of stabilizing a war vessel is apparent when the difference of the effectiveness of fire from a steady platform and from a moving platform is considered.

If the number of hits made by a navy can be doubled this is equivalent to doubling the size of the navy. The ships on which the stabilizer has been placed range from the smallest submarine chaser to an 11,000-ton battleship.

The outfit on the submarine chaser consists of a gyroscope 24" in diameter revolving at 4,000 R. P. M. This outfit will change a roll of 45° when the boat is making 40 miles per hour to less than 4°. The outfit weighs less than 1 p. c. of the total tonnage of the vessel for which it is designed. The largest installation that has been made at present has two gyroscopes 9' in diameter and weighing 50,000 lbs. each.

The stabilizer can be used either to prevent a ship's rolling or to cause it to roll. This peculiar property is taken advantage of in rolling a ship which is stuck on a mud bank or a sand bank. The outfit has been placed on ice breakers to roll them and prevent their packing in the ice after striking a blow and before they can be withdrawn.

An apparatus called the gyroscope roll and pitch recorder has been developed and is being used in the Navy acceptance tests to record the roll and pitch of vessels.

The stabilizer has also been developed for use on the aeroplane. This outfit weighs only 40 lbs. An aeroplane equipped with such a control recently flew for 30 minutes with pilot and passenger without the hand controls being touched.

In conjunction with this stabilizer there has been developed an instrument called the anemometer, and the two greatly reduce the hazards of flying. Many accidents have occurred because the pilot, when climbing with an aeroplane, has no means of judging his relative velocity. If he attempts to climb too rapidly his machine will fall backward to earth. This instrument operates electric controls and takes the control out of the hands of the pilot when the relative velocity of the machine and the air reaches the critical point—whether this is due to an attempt to climb too rapidly or to engine failure. The controls change the planes so that the aeroplane volplanes until the safe relative velocity has again been regained and then the control is again turned over to the pilot.

The most powerful searchlight in the world is installed on the roof of a Brooklyn building.

The beam of this searchlight has been seen from a distance of 60 miles, and experiments are being made to use the beam of light to signal Philadelphia, a distance of 91 miles.

The extraordinary power of this searchlight results from the use of small carbon electrodes and the confining of the arc crater or light source to a very small area. The positive electrode is only ⅝" in diameter, and has a core which is filled with light-producing material of a secret composition. The mechanism of the lamp is cooled without cooling the crater of the arc. The result is a deep and narrow crater of enormous intrinsic brilliancy, giving about 500 candlepower per square millimeter, or three and one-half times the brilliancy of the standard carbon arc. The source of light of a searchlight must be as small as possible, and it must be maintained at the exact focus of the mirror. In the case of this searchlight this is effected by a thermostatic control which will maintain the arc within 1.5 millimeters of the exact focus.

An observer standing near this searchlight would be dazzled by its powerful beam, so the searchlight is equipped with an electric control which permits it to be operated at any distance. The observer should be stationed at least a mile from the searchlight.

It may be remarked that the beam from this searchlight will quickly "sunburn" any part of the body exposed to its effects.

INTERSTATE COMMERCE COMMISSION.

THE original act to regulate commerce, approved February 4, 1887, provided for a commission consisting of five members. By various amendatory and supplementary enactments the powers of the commission have been increased and the scope of the regulating statute materially widened. Among the more important of these enactments are the acts of March 2, 1889; the Elkins act, approved February 19, 1903; the Hepburn act, approved February 29, 1906; the Mann-Elkins act of June 18, 1910; and the act of August 24, 1912. Under the act of June 29, 1906, the commission is now composed of seven members.

The act to regulate commerce applies to all common carriers engaged in the transportation of oil or other commodities, except water, and except natural or artificial gas, by means of pipe lines, or partly by pipe lines and partly by railroad, or partly by pipe lines and partly by water, and to telegraph, telephone, and cable companies (whether wire or wireless) engaged in sending messages from one State, Territory, or District of the United States to any other State, Territory, or District of the United States, or to any foreign country, and to common carriers engaged in interstate transportation of passengers or property wholly by railroad (or partly by railroad and partly by water when both are used under a common control, management, or arrangement for a continuous carriage or shipment); also to express companies and sleeping-car companies, and to bridges or ferries used or operated in connection with any railroad engaged in interstate transportation.

The act to regulate commerce requires all rates to be reasonable and just; prohibits preferential rates for transportation service performed under like circumstances and conditions; prohibits undue or unreasonable preferences or advantages in rates or facilities and the charging of a higher rate for a shorter than for a longer haul, over the same line, in the same direction, the shorter being included within the longer haul. It is provided, however, that the commission may, in special cases, after investigation, authorize carriers to charge less for longer than for shorter distances. The commission is authorized to require carriers to establish through routes and joint rates. The commission is also authorized to require carriers subject to the act to construct switch connections with lateral branch lines of railroads and private sidetracks. The act provides that where two or more through routes and through rates shall have been established, shippers shall have the right to designate in writing via which of such through routes the property shall be transported to destination.

The commission has jurisdiction, upon complaint or in a proceeding instituted upon its own initiative, and after full hearing, to determine and prescribe reasonable rates, regulations, and practices; to award reparation to injured shippers, and to require carriers to cease and desist from unjust discrimination or undue or unreasonable preferences.

Carriers are required to publish and file all rates, rules, and regulations applying to interstate traffic, and are prohibited from engaging in interstate transportation unless such rates, rules, and regulations are published and filed. Severe penalties are provided in the statute for failure to observe the rates and regulations shown in the published tariffs.

The commission may inquire into the management of the business of all common carriers subject to the provisions of the act to regulate commerce, and may prescribe the accounts, records, and memoranda which shall be kept by the carriers, which shall be open to examination by the commission through its authorized agents or examiners. Carriers are required to file annual reports with the commission, and such other reports as may from time to time be required.

The commission appoints a secretary, who is its chief administrative and executive officer, an assistant secretary, and such attorneys, examiners, special agents, and clerks as are necessary to the proper performance of its duties.

By the act of June 18, 1910 (Mann-Elkins law), the jurisdiction of the commission was increased as to through routes and joint rates, freight classification, switch connections, long and short hauls, filing or rejection of rate schedules, investigations on own motion, determining reasonable rates, suspension of proposed rates, and other matters. This act also authorized the President to appoint a special commission to investigate questions pertaining to the issuance of railroad stocks and bonds.

By act approved August 24, 1912 (section 11), a new paragraph was added to section 5 of the act to regulate commerce, by which it is made unlawful after July 1, 1914, for any common carrier subject to the act to regulate commerce to own, lease, operate, control, or have any interest in any competing carrier by water. Jurisdiction is conferred upon the commission to determine questions of fact as to competition, after full hearing, on the application of any railroad company or other carrier, and to extend beyond July 1, 1914, the time during which such ownership or operation of vessels plying elsewhere than through the Panama Canal may continue, when it is found to be in the interest of the public and is of advantage to the convenience and commerce of the people, and not in restraint of competition.

At the same time section 6 of the act was amended by adding a new paragraph conferring upon the commission jurisdiction over transportation of property from point to point in the United States by rail and water, whether through the Panama Canal or otherwise, and not entirely within the limits of a single State, this jurisdiction, under certain conditions, including power to establish physical connection between lines of the rail carrier and the dock of the water carrier by directing the rail carrier to make such connection; to establish through routes and maximum joint rates over such rail and water lines, and to determine the conditions thereof; to establish proportional rates by rail to and from ports, and to determine to what traffic and in connection with what vessels and upon what terms and conditions such rates shall apply; and to require rail carriers entering into through routing arrangements with any water carrier to extend the privileges of such arrangements to other water carriers.

By the act approved March 1, 1913, amending the act to regulate commerce, the commission is directed to investigate, ascertain, and report the value of all the property owned or used by every common carrier subject to the provisions of the act.

Jurisdiction is conferred upon the commission to enforce certain provisions of the act approved October 15, 1914, to supplement existing laws against unlawful restraints and monopolies in so far as such provisions relate to carriers subject to the act to regulate commerce. The act prohibits, with certain exceptions, carriers from discriminating between purchasers in sales of commodities, and from making leases or sales of commodities and from acquiring stock or capital of other corporations engaged in commerce tending to substantially lessen competition or create a monopoly; makes it a felony for a President or other specified officers to misappropriate a carrier's funds; and provides that after two years from the approval of the act no carrier shall have dealings in securities or supplies, or contract for construction or maintenance to the amount of more than $50,000 in the aggregate in any one year, with another corporation or organization when, by reason of common officers or otherwise, there exists a community of interest between the carrier and such other corporation or organization, except as a result of free competitive bidding under regulations to be prescribed by the commission. The commission is further authorized to investigate violations of the act by carriers and to require the guilty parties to cease therefrom, and its findings of fact in such investigations shall be conclusive when supported by testimony.

The urgent deficiency appropriation act approved October 22, 1913, provided that the Commerce Court should be abolished from and after December 31, 1913, and that the jurisdiction theretofore vested in the Commerce Court under act approved June 18, 1910, be transferred to and vested in the several District Courts of the United States.

The act approved March 4, 1915, which became effective June 2, 1915, makes common carriers liable for all damage to property caused by them, and forbids, with certain exceptions, limitations of liability.

INTERSTATE COMMERCE COMMISSION—*Continued.*

The act of February 11, 1903, provides that suits in equity brought under the act to regulate commerce, wherein the United States is complainant, may be expedited and given precedence over other suits, and that appeals from the Circuit Court lie only to the Supreme Court. The act of February 19, 1903, commonly called the Elkins law, prohibits rebating, allows proceedings in the courts by injunction to restrain departures from published rates, and provides that cases prosecuted under the direction of the Attorney-General in the name of the commission shall be included within the expediting act of February 11, 1903.

Under the act of August 7, 1888, all Government-aided railroad and telegraph companies are required to file certain reports and contracts with the commission, and it is the commission's duty to decide questions relating to the interchange of business between such Government-aided telegraph company and any connecting telegraph company. The act provides penalties for failure to comply with the act or the orders of the commission.

The act of March 2, 1893, known as the safety-appliance act, provides that railroad cars used in interstate commerce must be equipped with automatic couplers, and drawbars of a standard height for freight cars, and have grab irons or handholds in the ends and sides of each car; and that locomotive engines used in moving interstate traffic shall be equipped with a power driving-wheel brake and appliances for operating the train-brake system. The act directs the commission to lodge with the proper District-Attorneys information of such violations as may come to its knowledge. The act of March 2, 1903, amended this act so as to make its provisions apply to Territories and the District of Columbia, to all cases when couplers of whatever design are brought together, and to all locomotives, cars, and other equipment of any railroad engaged in interstate traffic, except logging cars and cars used upon street railways, and provides for a minimum number of air-braked cars in trains.

By act of April 14, 1910, the safety-appliance acts were supplemented so as to require railroads to equip their cars with sill steps, hand brakes, ladders, running boards, and roof handholds, and the commission was authorized to designate the number, dimensions, location, and manner of application of appliances.

By act of May 6, 1910, the prior accident-reports law was repealed and a new statute passed giving more power to the commission as to investigating accidents, and is more comprehensive than the former law.

The act of March 4, 1907, makes it the duty of the Interstate Commerce Commission to enforce the provisions of the act wherein it is made unlawful to require or permit employés engaged in or connected with the movement of trains to be on duty more than a specified number of hours in any 24.

The act of May 30, 1908, directs the Interstate Commerce Commission to make regulations for the safe transportation of explosives by common carriers engaged in interstate commerce. A penalty is provided for violations of such regulations.

The act of May 30, 1908, makes it the duty of the Interstate Commerce Commission to enforce the provisions of the act wherein it is provided that after a certain date no locomotive shall be used in moving interstate or foreign traffic, etc., not equipped with an ash pan which can be emptied without requiring a man to go under such locomotive. A penalty is provided for violations of this act.

The act of February 17, 1911, confers jurisdiction upon the commission to enforce certain provisions compelling railroad companies to equip their locomotives with safe and suitable boilers and appurtenances thereto.

By an amendatory act approved March 4, 1915, the powers of the commission to inspect and to prescribe standards of safety for locomotive boilers and appurtenances thereto was extended to include "all parts and appurtenances of the locomotive and tender."

The urgent deficiency appropriation act approved October 22, 1913, contains an appropriation of $25,000 to enable the commission to investigate and test block signals and appliances for the automatic control of railway trains, and appliances or systems intended to promote the safety of railway operation, including experimental tests of such systems and appliances as shall be furnished, in completed shape, to the commission for investigation and test, free of cost to the Government, in accordance with the provisions of joint resolution approved June 30, 1906, and sundry civil appropriation act approved May 27, 1908. Provision was made in the sundry civil appropriation acts approved August 1, 1914, and March 3, 1915, for continuing the investigation and testing of these systems and appliances.

MILITARY ORDER OF THE CARABAO.

A military organization composed of those officers of the United States Volunteer or Regular Army, Navy, Marine Corps, Philippine Scouts, or as a Naval cadet or midshipman, or as acting assistant surgeon, contract surgeon, contract dental surgeon, or any person who served as an enlisted man in the United States Army, Navy or Marine Corps and subsequently received a commission for appointment in any of the above named classes, and accredited war correspondents who served in the Philippine Islands between May 1, 1898 and July 4, 1902. Members of the order are known as Carabao. The oldest lineal male descendant of a Carabao is eligible for membership. The order is composed of a main body at Washington, known as the Main Corral, and branches in Manila, P. I.; San Francisco, Cal.; San Antonio, Tex., and Fort Monroe, Va.

The order was created for the purpose of fostering a high standard of military and social duty and to perpetuate the memories and associations of military service in the Philippines during the early days of American occupation. The origin of the order grew out of an idea conceived at a dinner at the Officers Club in Manila shortly after the return of troops from China in 1900. The name was suggested by Major George L. Byram, United States Army, in recognition of the services rendered to the American forces by the faithful carabao, the principal beast of burden in the Philippines. The emblem of the order is a carabao's head on a pendant. The officers of the Main Corral are elected each year.

Officers of the Main Corral: *Grand Paramount Carabao* (*National Commander*)—Admiral Thomas B. Howard, U. S. N. *Grand Patriarch of the Herd* (*National Vice-President*)—Major-Gen. James B. Aleshire, U. S. A. *Grand Lead and Wheel Carabao* (*National Secretary and Treasurer*)—Major Joseph M. Heller, U. S. V., the Marlborough, Washington, D. C.

THE NATIONAL FIRST AID ASSOCIATION OF AMERICA.

The association was organized by the late Miss Clara Barton, chartered under the laws of the District of Columbia, April 18, 1905, and has distributed its vital knowledge throughout many sections of almost every State in the Union It is a practical philanthropy and is paying tribute to its founder by holding the presidency in her name. *Acting President*—Mrs. J. Sewall Reed, Dorchester, Mass. *Vice-President and Treasurer*—Roscoe G. Wells. *Secretary*—Mrs. Mary Kensel Wells. Executive office, Arlington, Mass.

LAKE CHAMPLAIN ASSOCIATION.

President—John G. Clark. *Historian*—James A. Holden. *Treasurer*—Edmund Seymour, 45 Wall Street, New York City. *Secretary*—Percival Wilds, 2 Rector Street, New York City.

The purpose of this association is: "To assemble in social gatherings; to renew and extend affiliations; to perpetuate the historical traditions, and to promote the welfare of the Lake Champlain Valley."

RAILROAD COMMISSIONS.

INTERSTATE COMMERCE COMMISSION, WASHINGTON, D. C.

Balthasar H. Meyer, of Wisconsin, Chairman; Judson C. Clements, of Georgia; Henry C. Hall, of Colorado; Edgar E. Clark, of Iowa; James S. Harlan, of Illinois; Charles C. McChord, of Kentucky; Winthrop M. Daniels, of New Jersey; George B. McGinty, of Georgia, Secretary.

ALABAMA PUBLIC SERVICE COMMISSION, Montgomery—S. P. Kennedy, President; B. H. Cooper, S. P. Gaillard; A. Mullin, Secretary.

ARIZONA CORPORATION COMMISSION, Phoenix—F. A. Jones, Chairman; A. W. Cole, W. P. Geary; W. N. Sangster, Secretary-Auditor.

RAILROAD COMMISSION OF ARKANSAS, Little Rock—Thomas E. Wood, Chairman; W. F. McKnight, J. Sam Rowland; Herbert R. Wilson, Secretary.

RAILROAD COMMISSION OF CALIFORNIA, San Francisco—Max Thelen, President; H. D. Loveland, Alex. Gordon, E. O. Edgerton, Frank R. Devlin; Charles R. Detrick, Secretary.

PUBLIC UTILITIES COMMISSION OF COLORADO, Denver—M. H. Aylesworth, Chairman; George T. Bradley, Sheridan S. Kendall; George F. Oxley, Secretary.

CONNECTICUT PUBLIC UTILITIES COMMISSION, Hartford—Richard T. Higgins, Chairman; C. C. Elwell, John H. Hale; Henry F. Billings, Secretary.

PUBLIC UTILITIES COMMISSION OF THE DISTRICT OF COLUMBIA, Washington, D. C.—

RAILROAD COMMISSIONERS OF FLORIDA, Tallahassee—R. Hudson Burr, Chairman; N. A. Blitch, Royal C. Dunn; J. Will Yon, Secretary.

RAILROAD COMMISSION OF GEORGIA, Atlanta—Charles M. Candler, Chairman; George Hillyer, Joseph F. Gray, Paul B. Trammell, James A. Perry; Albert Collier, Secretary.

PUBLIC UTILITIES COMMISSION OF HAWAII, Honolulu.

PUBLIC UTILITIES COMMISSION OF IDAHO, Boisé—A. P. Ramstedt, President; John W. Graham, A. L. Freehafer; E. G. Gallet, Secretary.

PUBLIC UTILITIES COMMISSION OF ILLINOIS, Springfield—William L. O'Connell, Chairman; O. P. Thompson, Walter A. Shaw, Richard Yates, Frank H. Funk; R. V. Prather, Secretary.

PUBLIC SERVICE COMMISSION OF INDIANA, Indianapolis—Thomas C. Duncan, Chairman; John F. McClure, Charles A. Edwards, James L. Clark; J. L. Reiley, Secretary.

IOWA BOARD OF RAILROAD COMMISSIONERS, Des Moines—Clifford Thorne, Chairman; J. H. Wilson, John A. Guiher; George L. McCaughan, Secretary.

KANSAS PUBLIC UTILITIES COMMISSION, Topeka—Joseph L. Bristow, Chairman; John M. Kinkel, C. F. Foley; Carl W. Moore, Secretary.

KENTUCKY RAILROAD COMMISSION, Frankfort—Laurence B. Finn, Chairman; S. T. Douthitt, H. Green Garrett; Richard Tobin, Secretary.

RAILROAD COMMISSION OF LOUISIANA, Baton Rouge—Shelby Taylor, Chairman; B. A. Bridges, John T. Michel; Henry Jastremski, Secretary.

PUBLIC UTILITIES COMMISSION OF MAINE, Augusta—Benjamin F. Cleaves, Chairman; William B. Skelton, Charles W. Mullen; George F. Giddings, Clerk.

MARYLAND PUBLIC SERVICE COMMISSION, Baltimore—Albert G. Towers, Chairman; E. Clay Timanus, Philip D. Laird; Benjamin T. Fendall, Secretary.

PUBLIC SERVICE COMMISSION OF MASSACHUSETTS, Boston—Frederick J. MacLeod, Chairman; Everett E. Stone, Joseph B. Eastman, John F. Meaney; Andrew A. Highlands, Secretary.

MICHIGAN RAILROAD COMMISSION, Lansing—Lawton T. Hemans, Chairman; Casslus L. Glasgow, C. S. Cunningham; Willard N. Sweeney, Secretary.

MINNESOTA RAILROAD AND WAREHOUSE COMMISSIONERS, St. Paul—Ira B. Mills, Chairman; Charles E. Elmquist, O. P. B. Jacobson; A. C. Clausen, Secretary.

MISSISSIPPI RAILROAD COMMISSION, Jackson—F. M. Sheppard, President; George R. Edwards, W. B. Wilson; James Galceran, Secretary.

PUBLIC SERVICE COMMISSION OF MISSOURI, Jefferson City—William G. Busby, Chairman; Edwin J. Bean, John Kennish, Howard B. Shaw, Eugene McQuillin; T. M. Bradbury, Secretary.

RAILROAD AND PUBLIC SERVICE COMMISSION OF MONTANA, Helena—J. H. Hall, Chairman; E. A. Morley, J. E. McCormick; W. B. Rhoades, Secretary.

NEBRASKA STATE RAILWAY COMMISSION, Lincoln—H. T. Clarke, Jr., Chairman; Thomas L. Hall, H. G. Taylor; T. A. Browne, Secretary.

RAILROAD COMMISSION OF NEVADA, Carson City—H. F. Bartine, Chief Commissioner; J. F. Shaughnessy, W. H. Simmons; E. H. Walker, Secretary.

PUBLIC SERVICE COMMISSION OF NEW HAMPSHIRE, Concord—Edward C. Niles, Chairman; Thomas W. D. Worthen, William T. Gunnison; Walter H Timm, Clerk.

NEW JERSEY BOARD OF PUBLIC UTILITY COMMISSIONERS, Trenton—Ralph W. E. Donges, President; John J. Treacy, John W. Slocum; Alfred N. Barber, Secretary.

STATE CORPORATION COMMISSION OF NEW MEXICO, Santa Fé—M. S. Groves, Chairman; Hugh H. Williams, O. L. Owen; Edwin F. Coard, Clerk.

NEW YORK PUBLIC SERVICE COMMISSIONS, FIRST DISTRICT (Greater New York), New York City—Oscar S. Straus, Chairman; William Hayward, Henry W. Hodge, Travis H. Whitney, Charles S Hervey; James B. Walker, Secretary. SECOND DISTRICT (all of the State outside Greater New York), Albany—Seymour Van Santvoord, Chairman; Devoe P. Hodson, Wm. Temple Emmet, Frank Irvine, James O. Carr; Francis X. Disney, Secretary

NORTH CAROLINA CORPORATION COMMISSION, Raleigh—Edward L. Travis, Chairman; William T Lee, George P. Pell; A. J. Maxwell, Clerk.

NORTH DAKOTA BOARD OF RAILROAD COMMISSIONERS, Bismarck—W. H. Stutsman, President; O. P. N. Anderson, W. H. Mann; Walter F Cushing, Secretary.

PUBLIC UTILITIES COMMISSION OF OHIO, Columbus—Beecher W. Waltermire, Chairman; Louis M. Day, Lawrence K. Langdon; D. H. Armstrong, Secretary.

CORPORATION COMMISSION OF OKLAHOMA, Oklahoma City—J. E. Love, Chairman; George A. Henshaw, W. D. Humphrey; J. H. Hyde, Secretary.

RAILROAD COMMISSION OF OREGON, Salem—Thomas K. Campbell, Chairman; Frank J. Miller, Hylen H. Corey; Edward Ostrander, Secretary.

PUBLIC SERVICE COMMISSION OF THE COMMONWEALTH OF PENNSYLVANIA, Harrisburg—W. D. B. Ainey, Chairman; John S. Rilling, William A. Magee, Milton R. Brecht, Michael J. Ryan, James Alcorn; Archibald B. Millar, Secretary.

PUBLIC UTILITIES COMMISSION OF PHILIPPINE ISLANDS, Manila.

PUBLIC UTILITIES COMMISSION OF THE STATE OF RHODE ISLAND, Providence—William C. Bliss, Chairman; Samuel E. Hudson, Robert F. Rodman; John W. Rowe, Secretary.

SOUTH CAROLINA RAILROAD COMMISSION, Columbia—G. McD. Hampton, Chairman; John G. Richards, Frank W. Shealy; J. P. Darby, Secretary.

SOUTH DAKOTA RAILROAD COMMISSIONERS, Pierre—J. J. Murphy, Chairman; P. W. Dougherty, W. G. Smith; H. A. Ustrud, Secretary.

TENNESSEE RAILROAD COMMISSIONERS, Nashville—B. A. Enloe, Chairman; H. H. Hannah, George N. Welch; Miss Willie Fields, Secretary.

RAILROAD COMMISSION OF TEXAS, Austin—Allison Mayfield, Chairman; William D. Williams, Earle B. Mayfield; E. R. McLean, Secretary.

VERMONT PUBLIC SERVICE COMMISSION—Brattleboro—Robert C. Bacon, Chairman; William R. Warner, Walter A. Dutton; Neil D. Clawson, Clerk.

STATE CORPORATION COMMISSION, VIRGINIA; Richmond—Robert R. Prentis, Chairman; William F. Rhea, J. Richard Wingfield; R. T. Wilson, Clerk.

PUBLIC SERVICE COMMISSION OF WASHINGTON, Olympia—E. F. Blaine, Chairman; Arthur A. Lewis, Frank R. Spinning; J. H. Brown, Secretary.

PUBLIC SERVICE COMMISSION OF WEST VIRGINIA, Charleston—E. F. Morgan, Chairman; Elliott Northcott, E. G. Rider; R. B. Bernheim, Secretary.

RAILROAD COMMISSION OF WISCONSIN, Madison—Carl D. Jackson, Walter Alexander, Henry R. Trumbower; Harold L. Geisse, Secretary.

WYOMING PUBLIC SERVICE COMMISSION, Cheyenne

QUEBEC PUBLIC UTILITIES COMMISSION, Quebec, Canada

RAILROAD STATISTICS.

(From Report of Interstate Commerce Commission for fiscal year ended June 30, 1915.)

On June 30, 1915, the roads covered by this report represented 257,569.32 miles of line operated, including 11,279.64 miles used under trackage rights. The aggregate mileage of railway tracks of all kinds covered by these roads was 391,141.51 miles.

Equipment—It appears from the annual reports submitted to the commission by the roads that there were 65,099 locomotives in their service on June 30, 1915, as shown by the following statement: Steam, 64,835; other, 264; total, 65,099. The total number of cars of all classes in service was 2,507,977, assigned as follows: Passenger service, 55,705 cars; freight service, 2,356,338; company service, 95,934. These figures do not include so-called private cars of commercial firms or corporations. Of the cars in freight service, exclusive of cabcose cars, 2,327,562 were classified as follows: Box cars, 1,041,030, 36,978,004 tons; flat cars, 145,191, 5,225,995 tons; stock cars, 86,312, 2,759,536 tons; coal cars, 900,780, 41,287,823 tons; tank cars, 9,512, 379,415 tons; refrigerator cars, 52,443, 1,681,212 tons; other freight-train cars, 92,294, 3,913,556 tons; total 2,327,562, 92,225,541 tons.

Employés—Class I and Class II roads, operating 224,858.89 miles of line, reported 1,409,342 as the average number of employés in their service during the year ended June 30, 1915. The total amount of compensation reported as paid to railway employés during the year by roads of the same classes, operating 224,371.01 miles of line, was $1,164,844,430. The foregoing figures for average number of employés are not comparable with similar items for prior years. In 1915 the Interstate Commerce Commission for the first time prescribed rules to govern the railway companies in the classification of steam railway employés and their compensation for the annual reports required to be made by such companies to the Commission. These rules, which became formally effective on July 1, 1915, divide employés with respect to occupation into 68 classes, and though, in anticipation of the rules, provision was made in report forms for the year ended June 30, 1915, for returns covering the same classes of railway employés, the returns in some cases were insufficient for satisfactory compilation. In reports for years prior to 1915, railway employés were assigned among 18 classes, which were not defined in any rules issued by the Commission.

Investment in road and equipment—The figures include returns for investment in road and equipment shown by operating roads of Class I and Class II, as well as by their subsidiary non-operating roads (leased, operated under contract, etc.). The expenditures for additions and betterments, as well as the expenditures for new lines and extensions, during the fiscal year 1915, are analyzed in the following statement: Investment to June 30, 1915 (237,272 11 miles of line represented), $17,247,101,881; investment to June 30, 1914 (236,556.42 miles of line represented), $16,983,946,107; increase, 1915 over 1914, $263,155,774; investment during the year in new lines and extensions, $9,117,141; in additions and betterments on owned lines $243,970,427 on leased lines $10,641,528—total $254,611,955; total investment during the year, $263,729,096; adjustments, $4,115,776; difference between record value of grantor and purchase price of grantee in cases of roads sold, merged, consolidated, etc., $3,542,454; total during the year, $573,322; net increase during the year, $268,155,774.

Passengers carried, 976,303,602; passengers carried one mile, 32,384,247,563; tons of freight moved, 1,802,018,177; tons carried one mile, 276,830,302,723.

Traffic earnings—Passengers, $646,475,045; freight, $2,037,925,560, and, including revenue from miscellaneous sources, making total operating revenues $2,956,193,202.

Operating expenses—Maintenance of way and structures, $381,532,488; maintenance of equipment, $509,818,744; traffic expenses, $60,962,687; transportation expenses, $1,032,442,821; general expenses, $79,043,173; total operating expenses, $2,088,682,956.

CAPITALIZATION OF RAILWAY PROPERTY

On June 30, 1915, according to the annual reports submitted to the Interstate Commerce Commission by roads, the par value of the amount of railway capital outstanding was $21,127,959,078. This amount includes capital securities held by the railway companies concerned, as well as by the public. Of the total amount there existed as stock $8,994,894,721, and as funded debt $12,133,064 357.

Of the total capital stock outstanding for the roads under consideration, $3,415,472,806, or 39.55 per cent., paid no dividends. The amount of dividends declared during the year (by both operating and non-operating companies represented in this statement) was $328,477,938, being equivalent to 6.29 per cent on dividend-paying stock. The average rate of dividends paid on all stocks outstanding pertaining to the roads under consideration was 3.80 per cent.

Figures for the year 1915 cover only industrial accidents to employés not involving train operation. The corresponding figures for the fiscal year 1916 are 398 employés killed and 116,699 injured for steam railways and 15 employés killed and 974 injured for electric railways.

The number of passengers carried by roads having annual operating revenues above $100,000 during the year ended June 30, 1915, was 976,303,602; 1914, 1,053,138,718; 1913, 1,033,679,680. The passenger mileage or the number of passengers carried one mile in 1915 was 32,384,247,563; in 1914, 35,258,497,509.

RAILWAY MILEAGE IN THE UNITED STATES.*

(From Statistical Report of the Interstate Commerce Commission for year ended June 30, 1915.)

Total miles of railway in each State as follows: Alabama 5,424, Alaska (see foot note), Arizona 2,360, Arkansas 5,407, California 8,451, Colorado 5,724, Connecticut 999, Delaware 335, Florida 5,252, Georgia 7,427, Hawaii (see foot note), Idaho 2,792, Illinois 12,157, Indiana 7,479, Iowa 9,978, Kansas 9,261, Kentucky 3,802, Louisiana 5,729, Maine 2,276, Maryland 1,434, Massachusetts 2,131, Michigan 8,862, Minnesota 9,060, Mississippi 4,470, Missouri 8,275, Montana 4,844, Nebraska 6,171, Nevada 2,332, New Hampshire 1,256, New Jersey 2,315, New Mexico 3,038, New York 8,534, North Carolina 5,565, North Dakota 5,226, Ohio 9,159, Oklahoma 6,405, Oregon 3,115, Pennsylvania 11,693, Rhode Island 203, South Carolina 3,690, South Dakota 4,278, Tennessee 4,101, Texas 15,831, Utah 2,111, Vermont 1,073, Virginia 4,729, Washington 5,560, West Virginia 3,910, Wisconsin 7,638, Wyoming 1,891, District of Columbia 36.

Grand total mileage in U. S. in 1906, 224,363; in 1907, 229,951; in 1908, 233,467; in 1909, 236,834; in 1910, 240,293; in 1911, 243,979; in 1912, 246,776; in 1913, 249,776; in 1914, 252,230; in 1915, 253,789.

* Does not include mileage of switching and terminal companies. Mileage: In Alaska, 462 miles; in Hawaii, 250 miles.

RAILWAYS OF AMERICA "GROUPED" BY CAPITALISTS.

The great railroad systems of the United States have been reduced to a few "groups" by means of consolidation and reconsolidation. The following is a list of these groups, which comprise three-quarters of all the railroad lines of the country:

Groups.	Mileage.	Stocks.	Bonds.
Vanderbilt	26,318	$629,114,000	$765,443,700
Pennsylvania	21,526	786,119,000	581,229,000
Harriman	22,863	758,220,000	1,115,731,410
Hill	14,196	419,224,000	434,812,000
Morgan	14,126	575,221,000	547,119,000
Gould	22,322	542,221,000	824,117,000
Moore-Reid	14,321	152,906,000	142,623,500
Rockefeller's	18,196	262,117,000	321,204,000
Walters	11,923	152,127,000	206,120,000
Independents	*62,176	1,299,114,000	1,033,837,000
Total	†227,867	$5,577,383,000	$5,972,286,610

* Increase in mileage, etc., of independent lines, due to change in both the Moore-Reid and Erb syndicate holdings, during past year. † October 1, 1916, one-seventh of the total railroad mileage of this country, on which is over one-ninth of the total capitalization, was in the hands of receivers. Total mileage of such roads is 37,530, with a total bonded debt of $1,488,137,616 and capital stock of $653,929,551. This compares with a total of eighty-two railways operating 41,988 miles of line and with a total capitalization of $2,264,000,000 in hands of receivers on October 1, 1915.

OPERATIONS OF BRITISH RAILWAYS.

(Report of U. S. Vice-Consul-General, London.)

Government returns show that during 1913 the railways of the United Kingdom carried 1,228,316,000 passengers and 371,571,000 tons of freight. The passengers were divided into classes as follows: First, 26,025,000; second, 12,088,000; third, 933,498,000, and workmen, 256,705,000. The number of season-ticket holders is estimated to have been about 595,000.

The length of the lines, reduced to single track, was 55,438 miles. The gross receipts of the companies were $677,674,724, of which $277,044,978 was derived from passenger traffic, $324,191,630 from freight traffic, and $76,438,115 from other sources, mainly subsidiary businesses. The gross expenditure was $424,563,193, of which $383,494,799 was devoted to operating expenses, leaving a net income of $253,111,531.

The gross revenue and trading profit of the minor businesses are a matter of much interest and they are also shown:

Items.	Gross Revenue.	Trading Profit.	Items.	Gross Revenue.	Trading Profit.
Passenger road vehicles	$608,313	$14,599	Hotels and refreshment rooms and cars	$15,548,468	$2,705,774
Steamboats	12,550,703	705,642	Other businesses	554,781	379,587
Canals	5,358,016	1,708,142			
Docks, harbors and wharves	18,171,511	6,209,654	Total	$52,791,792	$11,723,398

Sir Edgar Speyer, presiding at a meeting September 19, 1914, of the underground electric railways in London, said 900,000,000 passengers had been carried without a single fatality since the opening of the tube and the electrification of the district railway.

AMERICA'S TWENTY BEST CUSTOMERS.

(From Report of Bureau of Foreign and Domestic Commerce.)

The following table is arranged to show the twenty heaviest buyers of American goods, as indicated by the value of exports from the United States during the fiscal years 1915 and 1916.

	1915.			1915.			1916.	
	Country.	Value.		Country.	Value.		Country.	Value.
1	England	$835,585,779	16	Argentina	$32,549,606	6	Russia (Asia)	$130,255,759
2	France	369,397,170	17	Germany	28,863,354	7	Cuba	127,040,067

FASTEST RECORDED RUNS FOR SHORT DISTANCES.

Date.	Railroad.	Terminals.	Distance, Miles.	Time, M. S.	Miles Per Hour.
May, 1893	N. Y. Central & H. R.	Crittenden—"Empire State Exp."	1	0.32	112.5
Aug., 1895	Pennsylvania	Landover—Anacosta	5.1	3.00	102
Jan., 1899	Burlington Route	Siding—Arlon	2.4	1.20	108
Mar., 1901	Plant System	Run from Fleming to Jacksonville	5	2.30	120
Jan., 1903	N. Y. Central & H. R.	Palmyra—Macedon	7.29	4.00	109.35
April, 1904	Michigan Central	Crisman—Lake	3.73	2.00	111.90
July, 1904	Philadelphia & Reading	Egg Harbor—Brigantine Junction	4.8	2.30	115.20
Oct., 1904	N. Y. Central & H. R.	Croton—Ossining	3.51	2.00	105

The fastest time on record for a distance of over 440 miles was made by the Lake Shore & Michigan Southern R. R. from Buffalo to Chicago, in June, 1905, noted above. The fastest long distance run less than 440 miles was on the New York Central R. R., September 11, 1895, from New York to Buffalo, 436½ miles, in 407 minutes actual time. Average speed, 64 1-3 miles an hour, with two stops and 28 slow-ups, and on January 1, 1903, from Albany to Buffalo, 302 miles, in 295 minutes.

Among the fastest regular trains in the United States, for a shorter distance, are believed to be the New York Central "Empire State Express," between New York and Albany, 143 miles in 175 minutes, and the "Congressional Limited," on the Pennsylvania Railroad, which makes the run from Jersey City to Washington in 4 hours 46 minutes, a distance of 227 miles. The "Pennsylvania Special" over P. R. R., which runs from Jersey City to North Philadelphia, 84 miles in 83 minutes; from Jersey City to Harrisburg, Pa., 194 miles in 196 minutes. The "Royal Blue Line" from New York to Philadelphia (Reading Terminal), 91.1 miles in 1 hour 50 minutes. On November 25, 1913, a special train, consisting of a locomotive and two cars, ran from Washington, D. C., to Jersey City, 227 miles, in 4 hours, the fastest trip ever made between the two cities.

On August 15, 1898, on P. & R. and C. R. R. of N. J., "Royal Blue Line," between Elizabeth, N. J., and Jenkintown, a distance of 69 miles, in 61 minutes, including 2 slow-ups, some of the miles being traversed in 38 seconds.

On October 7, 1913, a special train on the Baltimore & Ohio, occupied by a party of baseball writers en route to report the World's Series, ran from Pittsburgh to Cumberland, Md., 147 miles, in 3 hours and 37 minutes, without stops, and from Cumberland to Baltimore, 190 miles, without stops, in 3 hours and 55 minutes, an average of 48.7 miles per hour. Both of these runs were made without taking water.

The Jarrett and Palmer special theatrical train, Jersey City to Oakland (San Francisco), 3,311 miles, June, 1876, 83 hours 45 minutes; average speed, 39.53 miles per hour.

In October, 1905, the "Harriman Special" made the run from Oakland to Jersey City (3,239 miles) in 73 hours 12 minutes, or 44.30 miles per hour. In May, 1906, the "Harriman Special" made the run from Oakland, Cal., to New York City in 71 hours 27 minutes.

The "Scott Special" left Los Angeles, Cal., July 9, 1905, and arrived in Chicago (2,415.5 miles), July 11, having made the run in 44 hours 54 minutes, maintaining an average speed while in motion of 51 miles an hour.

On November 15, 1907, at Clayton, N. J., in a trial test on Pennsylvania R. R. between steam and electric locomotives, the steam engine made 93.6 miles an hour on a specially built seven mile curved track, while the electric locomotive made but 90 miles an hour.

A special train of an engine and two cars, which was run in January, 1911, to carry J. P. Morgan from Washington to New York over the Pennsylvania Railroad, made the trip of 226.8 miles in 3 hours 55 minutes and 30 seconds, or at the rate of 57.8 miles an hour. The speed over the New York Division, West Philadelphia to New York, 90.5 miles, averaged 67 miles an hour.

RAILROAD SPEED—*Continued.*

In February, 1911, the "Gates Special," from Yuma, Ariz., to New York, 2,787 miles, made the run in 74 hours 19 minutes, or an average of 40.41 miles per hour, including stops. From Albany to New York the trip, 143 miles, was made in 143 minutes.

A remarkable record was made in the run of a silk train between Seattle and New York in October, 1911. The distance is 3,178 miles, and the time made 82¼ hours. The average speed all the way across the continent, including stops and a delay of more than two hours in switching at Chicago, was 38½ miles per hour.

SOME FOREIGN RAILWAY RUNS.

The Northern Railway runs a day express from Berlin to Paris, which covers the distance from Paris to St. Quentin (96¼ miles) in 93 minutes. The Eastern Railway Company has an afternoon express from Paris to Basel, which runs the first 104.37 miles in 107 minutes. The fastest train in Germany is the so-called "D-Zug 20" between Berlin and Hamburg, which maintains an average speed of 55.177 miles per hour. (U. S. Consular Report.)

* Includes Bronx, Brooklyn, Manhattan, Queens, and Richmond Boroughs.

CORPORATION PENSIONS IN THE UNITED STATES.

THE following table shows the estimated number of employés on the following roads now having pension systems in force. In general all the roads here shown base their pensions on a percentage of the employé's wages, multiplied by the number of years that he has been in service For example, the rate on the Pennsylvania is 1 per cent. A man having worked 40 years received a pension equal to 40 per cent. of his average salary for the 10 years preceding retirement Most companies include in their rules a reservation of the right to vary the rate of pensions if the total requirements of any one year shall demand more than a predetermined gross amount. All of the companies in counting time include years of service under other companies bought by or consolidated with the present one. Short breaks in the service not due to any fault of the employé, or due to a minor fault involving suspensions, are generally overlooked.

* Report for year 1914. † 25 for service, 15 for total disability. ‡ When permanently disabled, any age. ¶ 65 for service, any age for disability. (a) 10, age limit; 20, disability. (b) When permanently incapacitated. (c) 61–70, 20 years; under 61, 25 years. (d) 65–69, if incapacitated. (e) 61–70, if incapacitated. (f) After 25 years' service, if incapacitated.

American Telephone and Telegraph Company (entire Bell system), under its plan for employés' pensions and sick benefits, during 1914 paid out $1,481,402 to 20,915 employés who were ill and $228,296 to relatives of 231 employés who died.

The U. S. Steel Corporation dedicated $8,000,000 for a fund with which to pension superannuated and disabled employés. This fund has been consolidated with the $4,000,000 fund created by Andrew Carnegie after he sold out his holdings in the Carnegie Steel Company to the U S Steel Corporation. The fund is known as "The United States Steel and Carnegie Pension Fund." Its fifth annual report was made public January 26, 1916. The report shows that since January 1, 1911, when the fund was established, there has been a total distribution to retired employés of the Steel Corporation, in pensions, of $2,234,410.75. For 1915 the distribution amounted to $659,389.42, an increase of $147,421 52 over the distribution for 1914, and a gain of $377,932.05 over the first year. There were 3,002 beneficiaries of the pension fund on January 1, 1915, and 697 pensioners were added, and 316 discontinued in the year. The average monthly pensions added for the year amounted to $20.85, this being a 40 per cent. advance over the average for 1914.

Announcement of a pension system, affecting more than 15,000 employés, was made by Wells Fargo & Co. on June 1, 1916. It makes provision for contingencies ranging from sudden death to disability and old age.

A pension system was inaugurated by the Interborough Company on January 2, 1916, embracing all employés who have attained the age of 70 years and who have been in the service not less than twenty-five years, as well as those who have been in the service for twenty-five years or more and have become physically and permanently disabled. The allowance is computed on the time of service, with a minimum of $20 per month. At the present time there are twenty-six employés carried on the pension roll.

Two million dollars, with an addition of $400,000 each year, has been set aside by Swift & Co. as a pension fund for its 30,000 employés. Hereafter any employé who has been with the concern twenty-five years and reached the age of sixty, in the case of a man, or fifty, if a woman, may retire and receive a good part of the salary earned at the time of retirement.

The Western Union Telegraph Company, on January 1, 1913, established a Plan for Employés' Pensions, Disability Benefits and Insurance, setting aside a fund of $1,000,000 for the purpose,

RAILROAD EQUIPMENT.

WEIGHT and horse-power of different types of locomotives, including the modern electric tractor, and also the weight, size and cost of freight cars, ordinary coaches, parlor and sleeping cars.

*This is the largest and most powerful locomotive ever built and is the so-called Triplex Compound, which was built by the Baldwin Locomotive Works for the Erie Railroad and was completed in April, 1914. The Baldwin Locomotive Works were building two additional locomotives of substantially the same type for the Erie Railroad at the time ALMANAC went to press. It is 105 feet long, weighs 853,050 pounds, and has actually hauled 251 fifty-ton fully loaded gondola cars, with a total train load weight of 35,824,000 pounds. It is capable of hauling a train of 640 freight cars of a total length of four and three-quarter miles and weighing 90,000,000 pounds. It is a new type of articulated locomotive and goes beyond the Mallet articulated type by the addition of another pair of cylinders and another group of driving wheels, making three complete engines in one locomotive unit. Each engine has four driving wheels on each side, the complete locomotive, therefore, having twelve driving wheels on each side, eight of which are under the locomotive itself and four under the tender. This Triplex locomotive has 89 per cent. of the total weight of the engine and tender on drivers. The large Mallet locomotives have but about 65 per cent. of the total weight on drivers. This locomotive is used for pusher service on the eight-mile grade of the Erie east of Susquehanna, Pa., which is a grade of 56 feet to a mile and the new locomotive handles the same weight of train up this grade that was formerly handled by two Consolidation and one Mallet engines.

† This is the heaviest non-articulated locomotive ever built. (Built in 1915.)

‡ This is the most powerful class of Pacific type of locomotive built. They are in service on the Blue Ridge Mountains and haul trains of ten steel passenger cars, weighing a total of 674 tons, up a grade of 80-foot rise to the mile at a schedule speed of 25½ miles per hour.

§ These are now considered the standard locomotives for heavy freight and passenger service under ordinary conditions. The Mikado is replacing the old Consolidation locomotive in freight service. The Pacific type is for heavy fast passenger business.

¶ This is the largest passenger locomotive in Europe.

(a) Tractive Effort—This is the effort exerted by a locomotive in turning its wheels by the action of the steam against the pistons which, through the media of the crossheads, rods, etc., causes them to revolve and the locomotive to move along the rails. The drawbar pull which a locomotive actually exerts at any given time depends upon its speed upon grades and other things. The formula for a simple locomotive for the tractive effort is

$$T \frac{0.85\,P \times C^2 \times S}{D}$$

where T = tractive effort in pounds, P = boiler pressure in pounds per square inch, C = diameter of cylinders in inches, S = stroke of piston in inches, D = diameter of driving wheels in inches.

EXPRESS RATES.

(Statement of Interstate Commerce Commission.)

The United States is divided into 950 blocks, each formed by one degree of latitude and longitude embracing approximately 3,500 square miles. Each block is designated by number. Rates are stated from one block to all others, and apply from all express stations within the initial block to all stations in the destination block. A directory of express stations shows the number of the block in which the station is located, also indicates those stations at which collection and delivery service is performed.

Express traffic is divided into three classes: First class includes all merchandise other than articles of food and drink, which, with few exceptions, fall within the second class, and certain printed matter, such as books, pamphlets and advertising matter, falling within the third class. Second-class rates are 75% of the first class, and third class are one-half cent per ounce; minimum charge, 15 cents.

When perishable shipments contain ice, an allowance of 25% from the gross weight is made, except during December, January and February, when 15% is allowed.

The express classification, containing rules with which the shipping public should be familiar, also the tariffs, are posted in express offices and depots and may be inspected at any time during business hours.

Express rates are dependent upon the value of the property. When the value as stated by the shipper is greater than $50, or 50 cents per pound if the weight exceeds 100 pounds, the rate increases 10 cents for each $100 or fraction thereof in excess of the above.

The express receipt, which is uniform with all express companies subject to the provisions of the act to regulate commerce, contains the following: Company will not pay over $50 in case of loss, or 50 cents per pound on shipments in excess of 100 pounds, unless a greater value is declared and higher rates paid.

NATIONAL WOMEN'S TRADE UNION LEAGUE OF AMERICA.

The object of the league is to promote among women wage-earners organization into the trade unions of the American Federation of Labor.

President—Mrs. Raymond Robins. *Secretary-Treasurer*—Miss Emma Steghagen. Headquarters, 166 West Washington Street, Chicago, Ill.

The officers of the New York society are: *President*—Melinda Scott. *Treasurer*—Florence Wise. *Secretary*—Mrs. Maud Swartz. Headquarters, 43 East Twenty-second Street, New York City.

IMPORTANT TUNNELS OF THE WORLD.

Alberg—Under the Alps at the Arl Mountain, and extends from Langen to St. Anton, 6¾ miles; opened 1884.

Andes Mountains—See "Trans-Andine."

Big Bend—Drains the Feather River in California, 2 miles; opened 1886.

Bitter Root Mountains (Montana and Idaho)—10,100 feet long.

Blackwell—Under River Thames, England, 1½ miles; opened 1897.

Cascade Mountain—Through the Cascade Mountains in Washington, 3 miles.

Connaught—Through Selkirk Mountains, Canada; on Canadian Pacific Railroad, double track, about 5 miles long; completed 1916.

Continental Divide, for the Denver and Salt Lake R. R., 6.4 miles long (under construction).

Cumberland—Under Cumberland Mountains, Tennessee, 8,000 feet long.

Detroit (Michigan Central Ry.)—Under Detroit River.

Gunnison—Southwestern Colorado, 6 miles; opened 1909.

Hoosac—Through Hoosac Mountains, Mass., 4¾ miles; opened 1873.

Khojak Pass—India, from Quetta to Kandahar, 2 miles.

Loetschberg—Through the Alps, in Oberland, Switzerland, 9¼ miles; opened June 26, 1913, costing nearly $10,000,000.

Mt. Roberts—From the shore of Gastineau Channel at Juneau, Alaska, into Silver Bow Basin, 1 1-3 miles.

Mont d'Or—Between France and Switzerland, was bored through October 2, 1913. The tunnel pierces the Jura Mountains from Fresne to Vallorbe, and is 3¾ miles long.

Mont Cenis—Italy to France, under the Col de Frejus, 8 miles; opened 1871.

New Croton—Supplies water to New York City, 33 1-8 miles; opened 1888.

Otira—In New Zealand, 5 1-3 miles.

Rove—Northwest from l'Estaque, France, part of canal connecting Marseilles with Rhone River; 4 1-2 miles long, 72 feet wide, 47 feet high; opened in 1916.

Rothschonberg—Drains the Felberg mines Saxony, 31½ miles; opened 1877.

St. Clair—Under St. Clair River from Sarnia, Ont., to Port Huron, Mich., 2 miles; opened 1891.

St. Gothard—Through the Alps, connects Goschenen with Airolo, in Switzerland, 9 1-3 miles; opened 1881.

Severn—From Monmouthshire to Gloucestershire, England, 4½ miles; opened 1886.

Simplon—Through the Alps, 12½ miles; opened 1905.

Strawberry—Through the Wasatch Mountains.

Sutro—Drains the Comstock Lode in Nevada, 4½ miles; opened 1879.

Trans-Andine Ry. tunnel—5 miles long, 12,000 feet above sea level and affords direct communication between Valparaiso and Buenos Ayres; opened April 5, 1910.

Wasserfluh—In the Alps, between Bunnadern and Lichtensteig, Switzerland, 2 miles; opened 1909.

Woodhead—Between Manchester and Sheffield, England, 3 miles.

TUNNELS IN AND ABOUT NEW YORK CITY.

(For Subways in and about New York City, see Index).

PENNSYLVANIA RAILROAD SYSTEM—Tunnels under Hudson River extend from Pennsylvania Railroad Station, New York, to Weehawken, N. J. There is no station at Weehawken, the electric trains from the Pennsylvania Station run to Manhattan Transfer, near Newark, N. J., without a stop. Work started April 1, 1904; completed in 1910. Two tubes of cast iron rings, 23 feet outside diameter and 21 feet 2 inches inside diameter; subaqueous portion 6,118 feet long.

Manhattan cross-town tunnels from the Pennsylvania Railroad Station, mentioned above, across New York under 32d and 33d Sts. to First Ave. Started July, 1905, completed in 1910. There are two tunnels, each with two tracks. The tunnels are built of concrete with the crown about 60 feet below the surface of the street.

East River Tunnels connect with the cross-town tunnels and extend under the East River to Long Island City. Started September, 1904; completed in 1910. Four separate tubes with rings 23 feet outside diameter, each tube from the Manhattan shaft to the Long Island City shaft, 3,900 feet long

HUDSON AND MANHATTAN RAILROAD SYSTEM—North tunnels under the Hudson River from Jersey City to Morton St., New York. Started November, 1874; the first in New York, officially opened February 25, 1908. Two single track tubes, with a minimum inside diameter of 15 feet 3 inches, and approximately 5,700 feet long.

Up-town tunnels connect with north tunnels at Morton St. and extend to Christopher St. thence to Sixth Ave. and up Sixth Ave. to 33d St. Started March, 1904, completed in 1910. Section from Morton to 12th St. shield construction, remainder cut and cover.

South tunnels under Hudson River from Jersey City to the Church St. Terminal Buildings (Cortlandt, Church and Fulton Sts.), New York. Started May, 1905; opened for traffic July, 1909. Two tubes about 5,950 feet long with cast iron rings, 16 feet 7 inches outside diameter and 15 feet 3 inches inside diameter.

Tunnels from Whitehall St., Manhattan, to Montague St., Brooklyn, from Old Slip, Manhattan, to Clark St., Brooklyn, and from 14th St., Manhattan, to North 7th St., Brooklyn, are under construction, all of which are part of the new subway system in New York.

Tunnels (consisting of two single track tubes) extend from the Hoboken terminal of the Lackawanna Railroad to Washington St., Jersey City, with connections to the north tunnels and to the Erie Railroad Station. At Washington St. a branch runs to the Pennsylvania Railroad Station at Jersey City, where connections are made with the south tunnels. West from Washington St. to a point east of Summit Ave. is a double track concrete tunnel with a centre wall dividing the tracks. Work started March, 1906; completed in July, 1911.

BELMONT TUNNEL under the East River from 42d St., New York, to Long Island City. Subaqueous portion two single track tubes with cast-iron rings 16 feet 10 inches outside diameter, and a clear inside diameter of 15 feet 6 inches. Through rock a horseshoe shaped concrete section is used and in other places a rectangular double track cross section with reinforced concrete lining. Construction started by New York and Long Island Railroad, July 12, 1905; practically completed January 1, 1908. (Commonly known as the Steinway Tunnel).

RAPID TRANSIT TUNNEL under the East River from the Battery, New York, to Joralemon St., Brooklyn, connecting the New York and Brooklyn subways. Started April, 1903; trains running January 9, 1908. Two tubes, 6,784 feet long, with a finished inside diameter of 15 feet 6 inches.

BERGEN CUT of Erie Railroad through Bergen Hill, Jersey City, parallel to the present tunnel, which is 4,700 feet long. The Bergen cut was started March, 1906, and completed July 1, 1910. It has five four-track tunnels, with open cuts between the tunnels, making a total length of 4,300 feet. Tunnel sections 58 feet wide at the bottom and 21 feet high.

LACKAWANNA RAILROAD TUNNEL through Bergen Hill, Jersey City. Started February 28, 1906; completed February 14, 1909. Parallel to and 24 feet away from old tunnel and of the same length, viz., 4,283 feet. New tunnel is double tracked, lined with concrete, having inside dimensions 23 feet high by 30 feet wide. Bush track construction used.

ALASKA RAILROAD.

On April 10, 1915; President Wilson announced the selection of the route for the Alaska railroad to be built by the Government.

The route adopted is known as the Susitna route, and extends from Seward, on Resurrection Bay, to Fairbanks, on the Tanana River, a distance of 471 miles. This route includes the existing Alaska Northern Railway, which runs from Seward through the Kenai Peninsula for a distance of 71 miles to Turnagain Arm, and it is to be bought from its present owners by the Government for $1,150,000. The contract for the purchase of this road was signed by Secretary Lane of the Interior Department.

From Turnagain Arm the route is to be extended through the Susitna Valley and across Broad Pass to the Tanana River, and from there on to Fairbanks. It is to be a standard-gauge road. A side line is to run from Matanuska Junction into the Matanuska coal field, a distance of 38 miles. The road is to be built with its present base at Ship Creek, on Cook Inlet. The grade from the Matanuska field to Ship Creek is four-tenths of 1 per cent.

The Alaska Northern is to be put into operative condition and will be used as a base for extending the line along Turnagain Arm. Under the contract approved by the President the road is taken over free from all debt or obligation of any kind.

The estimated cost of construction of this line from Seward to Fairbanks, including the Matanuska Branch, is $26,800,000. The President has made an order directing that the work be carried on by the Alaskan Engineering Commission.

During the year 1916 grading has been completed on the 38-mile branch to the Matanuska coal field from Matanuska Junction, a point 36 miles northeasterly from Anchorage, a tidewater point on Cook Inlet, Alaska, where construction began a year ago, and the rails are now being laid on this branch line. It is anticipated that the line will be completed before the end of the open season. At Moose Creek, a point on the branch line about 12 miles from Matanuska Junction, a coal mine has been opened and coal is now being taken out for the use of the railroad and the town of Anchorage. Clearing and grading are under way on other portions of the line, particularly at points northward from Matanuska Junction, southerly from Anchorage toward Turnagain Arm of Cook Inlet and in the vicinity of Talkeetna (the junction of the Talkeetna and Susitna Rivers about 100 miles north of Anchorage). The heaviest work to be encountered on the line is the hard rock cliffs along Turnagain Arm. Blasting and excavation for the line here will be actively pursued during the Winter. The Alaska Northern Railway, extending from Seward to Kern Creek, a distance of 71 miles, is being rehabilitated throughout, and put into condition to haul construction material for the work along Turnagain Arm between Kern Creek and Anchorage. Clearing and grading are under way on the northern end of the main line in the vicinity of the crossing of the Tanana River at a point known as Nenana—the aim being to connect the Fairbanks mining region with the Nenana coal fields (a distance of 110 miles) as early as possible. By the end of the present working season it is anticipated that at least 85 miles of new construction will have been completed.

Trains are being operated regularly for freight and passenger service between Anchorage and Matanuska Junction, also on the Alaska Northern Railway.

FOREIGN CARRYING TRADE OF THE UNITED STATES.

TOTAL UNITED STATES IMPORTS AND EXPORTS.

In the year 1865 merchandise carried in American vessels was 27.7 per cent. of total; in 1875, 26.2 per cent.; in 1885, 15.3 per cent.; in 1895, 11.7 per cent. Merchandise and specie to 1879, inclusive; merchandise only after 1879.

THE UNITED STATES LEADS WORLD IN EXPORTS.

(Report of Bureau of Foreign and Domestic Commerce.)

For the second time in its history the United States leads the world as an exporter. Occasionally we have surpassed the United Kingdom in the exportation of domestic products, but it was only in the fiscal years ended June 30, 1915 and 1916, that our total exports, domestic and foreign, exceeded those of the United Kingdom. Our total exports in the fiscal year 1916, according to an official statement of the Bureau of Foreign and Domestic Commerce, Department of Commerce, aggregated $4,333,659,000, as against $2,651,823,000 for the United Kingdom, the figures representing in the case of the United States an increase of 57 per cent. and in the case of the United Kingdom an increase of 22 per cent. when compared with preceding year.

American exports in the fiscal year 1916 included domestic products to the value of $4,272,398,000, against $2,716,178,000 in 1915; and foreign products, $61,261,000, against $52,411,000 in the preceding year. British exports in the same periods included British and Irish produce, $2,156,120,000 in 1916, against $1,746,522,000 in 1915; and foreign and colonial produce $495,703,000 in 1916, compared with $425,920,000 in 1915.

Years.	American Exports.	*British Exports.	Years.	American Exports.	*British Exports.
1815	$50,000,000	$285,300,000	1895	$807,500,000	$1,391,000,000
1835	115,000,000	443,600,000	1915	2,768,600,000	2,172,442,000
1855	218,900,000	567,900,000	1916	4,333,659,000	2,651,823,000
1875	513,400,000	1,370,500,000			

* Years ended December 31, except 1916, which relates to the year ended June 30.

The great industrial development of the United States during the century is illustrated by the increase in exports of manufactures. In 1821, the earliest year for which figures are available, exports of manufactures were valued at $8,000,000; in 1916 they aggregated $2,658,917,000 exclusive of foodstuffs.

FOREIGN TRADE OF THE UNITED STATES.

(Report of the Bureau of Foreign and Domestic Commerce of the Department of Commerce.)

Grain embraces wheat flour reduced to equivalent in wheat, corn, rye, oats, barley, malt and peas. Receipts at New York, Portland, Boston, Philadelphia and Baltimore include shipments from the West to foreign countries through these ports on through bills of lading. Receipts at Portland via Montreal are duplications of receipts reported at Montreal. Receipts at Baltimore include flour ground by city millers, and therefore duplicate an equivalent quantity of wheat received in grain.

COUNTRIES EXCELLING IN PRODUCTION

UNITED STATES BUREAU OF MINES.

Director—Van H. Manning, Washington, D. C. ($6,000).

THE general purpose of the Bureau of Mines of the Department of the Interior is to conduct, in behalf of the public welfare, fundamental inquiries and investigations into the mining industry. Two phases of the industry of greatest National concern are safety and efficiency—safeguarding the lives of our miners and insuring the most efficient and least wasteful development and use of our mineral resources.

These inquiries and investigations are National in scope; they do not contemplate the safeguarding of the life of the individual miner nor the promotion of the interests of the individual mine owner or operator, but seek the development of methods that will increase the safety of all miners and will promote the upbuilding and permanence of the whole mineral industry. Yet, although the advancement of the public welfare is the primary purpose of this work, it is obvious that broad fundamental inquiries and researches cannot fail to confer benefits on the individual miner and the individual mine owner. Hence, the function of the Bureau of Mines may be defined as the conducting of inquiries and investigations that have for their purpose the improvement of health conditions, and the increase of safety, efficiency, and economic development in the mining, quarrying, metallurgical and miscellaneous mineral industries of the country.

NUMBER OF MEN EMPLOYED AND NUMBER OF MEN KILLED AND INJURED IN THE MINERAL INDUSTRIES OF THE UNITED STATES DURING THE CALENDAR YEAR 1915 (EXCLUDING THE IRON BLAST FURNACES AND STEEL PLANTS).

Industry.	Men Employed.		Killed.		Injured.	
	Actual Number.	Equivalent in 300-Day Workers (Calculated).	Total.	Per 1,000 300-Day Workers.	Total.	Per 1,000 300-Day Workers.
Coal mines	734,008	511,598	2,269	4.44	(*a*)	(*a*)
Metal mines	152,118	141,997	553	3.89	35,295	248.56

(*a*) Not available. (*b*) Excluding iron blast furnaces.

In 1914 number employed in coal mines. 763,185; killed, 2,454; employed in metal mines, 158,115; killed, 559.

During the first six months of 1915, fatalities in and about coal mines were 1,067; for corresponding period in 1916, 990.

During the calendar year 1915 there were 2,269 men killed in and about the coal mines of the United States. Based on an output of 531,619,487 short tons of coal produced by 734,008 men, the number of men killed for every 1,000,000 tons of coal mined was 4.27, and the death rate per 1,000 employed was 3.09. In 1915 the number of men killed was 185 less than in 1914, representing a decrease of about 7 1-2 per cent. There were 234,297 tons of coal mined for each man killed in 1915, as compared with 209,261 in 1914.

During 1915 there were 11 mine disasters in which 5 or more men were killed, representing a total of 262 fatalities, as compared with 11 similar disasters in 1914, wherein 316 men were killed.

NUMBER OF MEN KILLED IN AND ABOUT THE COAL MINES IN THE UNITED STATES IN THE CALENDAR YEARS 1910 TO 1915, INCLUSIVE, WITH DEATH RATES.

Years.	Number Killed.			Production per Death, Short Tons.	Years.	Number Killed.			Production per Death, Short Tons.
	Total.	Per 1,000 Employed.	Per 1,000,000 Short Tons Mined.			Total.	Per 1,000 Employed.	Per 1,000,000 Short Tons Mined.

For 1916, automobiles and parts of automobiles exported were $120,000,866; paraffin and paraffin wax, $12,873,250; manufactures of tobacco, $6,944,147; manufactures of wool, $53,983,655.

MANUFACTURES IN THE UNITED STATES.

(From Census Bureau's Summary for 1914.)

SUMMARY FOR THE UNITED STATES FOR 1914 AND 1909.*

	CENSUS. 1914.	CENSUS. 1909.	Per Cent. of Increase 1909–1914.†
Number of establishments	275,793	268,491	2.7
Persons engaged in manufactures	8,265,426	7,678,578	7.6
Proprietors and firm members	264,872	273,265	—3.1
Salaried employés	964,217	790,267	22.0
Wage-earners (average number employed during year)	7,036,337	6,615,046	6.4
Wage-earners, by months:			
January	7,075,682	6,210,063	.....
February	7,141,594	6,297,627	.....
March	7,242,752	6,423,517	.....
April	7,217,320	6,437,633	.....
May	7,148,650	6,457,279	.....
June	7,100,368	6,517,469	.....
July	7,018,867	6,486,676	.....
August	7,020,682	6,656,933	.....
September	7,086,804	6,898,765	.....
October	7,006,342	6,997,090	.....
November	6,736,699	7,006,853	.....
December	6,640,284	6,990,652	.....
Primary horse-power	22,537,129	18,675,376	20.7
Capital	$22,790,880,000	$18,428,270,000	23.7
Services	$5,367,249,000	$4,365,613,000	22.9
Salaries	$1,287,917,000	$938,575,000	37.2
Wages	$4,079,332,000	$3,427,038,000	19.0
Materials	$14,368,089,000	$12,142,791,000	18.3
Value of Products	$24,246,323,000	$20,672,052,000	17.3
Value added by manufacture (value of products less cost of materials)	$9,878,234,000	$8,529,261,000	15.8

*Not including Alaska, Hawaii or Porto Rico. †A minus sign (—) denotes decrease.

CENSUS OF MANUFACTURES, 1914.

TOTALS FOR LEADING INDUSTRIES.

INDUSTRY.	Wage-Earners (Average Number).	Materials.	Value of Products.	Value Added by Manufacture.
All industries	7,036,337	$14,368,088,831	$24,246,434,724	$9,878,345,893
Slaughtering and meat packing	98,832	$1,441,662,658	$1,651,965,424	$210,302,766
Iron and steel, steel works and rolling mills	248,716	590,825,692	918,664,565	327,838,873
Flour-mill and grist-mill products	39,718	752,270,021	877,679,709	125,409,688
Foundry and machine-shop products	362,471	358,121,781	866,544,677	508,422,896
Lumber and timber products	479,786	281,951,873	715,310,333	433,358,460
Cotton goods	379,366	431,602,540	676,569,115	244,966,575
Cars and general shop construction and repairs by steam railroad companies	339,518	243,828,607	514,041,225	270,212,618
Automobiles	79,307	292,597,565	503,230,137	210,632,572
Boots and shoes, not including rubber boots and shoes	191,555	310,356,586	501,760,458	191,403,872

In the above table the industries are arranged in the order of their gross value of products. Some of the industries which hold a very high rank in gross value of products rank comparatively low in the average number of wage-earners employed and in the value added by manufacture. Where this is the case it indicates that the cost of materials represents a large proportion of the total value of products, and that therefore the value added by manufacture, of which wages constitute usually the largest item, is not commensurate with the total value of products.

CENSUS OF MANUFACTURES.

OCCUPATIONS—NEW YORK CITY SUMMARY.

(Bureau of Census Report of September, 1914.)

According to the Report on Occupations issued by the Director of the Bureau of the Census there were 2,152,433 persons ten years of age and over in New York City engaged in gainful occupations in 1910. The gainful workers thus formed 45.2 per cent. of the total population of the city (4,766,883) and 56.3 per cent. of the population ten years of age and over (3,821,540). In 1900 the 1,469,908 gainful workers of the city formed 42.8 per cent. of the total population and 54.7 per cent. of the population ten years of age and over.

The male gainful workers in 1910 numbered 1,566,240, or 82.1 per cent. of all males ten years of age and over, as compared with 1,102,471, or 83 per cent., in 1900. The female gainful workers in 1910 numbered 586,193, or 30.6 per cent. of all females ten years of age and over, as compared with 367,437, or 27.1 per cent., in 1900.

DISTRIBUTION OF WORKERS.

The 2,152,433 gainful workers in 1910 were distributed among the main branches of occupations as follows: Agriculture, forestry, and animal husbandry, 9,950, or 0.5 per cent.; extraction of minerals, 886, or less than one-tenth of 1 per cent.; manufacturing and mechanical industries, 873,497, or 40.6 per cent.; transportation, 169,834, or 7.9 per cent.; trade, 361,053, or 16.8 per cent.; public service, 41,004, or 1.9 per cent.; professional service, 127,395, or 5.9 per cent.; domestic and personal service, 333,954, or 15.5 per cent.; and clerical occupations, 234,860, or 10.9 per cent.

SEX OF WORKERS.

Of the gainful workers in 1910, 1,566,240, or 72.8 per cent., were males and 586,193, or 27.2 per cent., females. In agriculture, forestry, and animal husbandry the males numbered 9,455, or 95 per cent., and the females 495, or 5 per cent. Nearly all—848, or 95.7 per cent.—of the persons engaged in the extraction of minerals were males. In manufacturing and mechanical industries 665,538, or 76.2 per cent., of the workers were males and 207,959, or 23.8 per cent., females. Males constituted 94.8 per cent. of the 169,834 persons engaged in transportation, 85.9 per cent. of the 361,053 persons engaged in trade, and 99.2 per cent. of the 41,004 persons engaged in public service. In professional service 78,972, or 62 per cent., of the workers were males and 48,423, or 38 per cent., females, a large proportion of the females being school teachers. Domestic and personal service was the only large field of occupations in which the females outnumbered the males. Here females numbered 191,152, or 57.2 per cent., and males 142,802, or 42.8 per cent., of the workers. Of the persons pursuing clerical occupations, 156,836, or 66.8 per cent., were males and 78,024, or 33.2 per cent., females.

COLOR OR RACE OF WORKERS.

Of the 1,566,240 gainfully occupied males in 1910, 255,393 were native whites of native parentage, 415,926 native whites of foreign or mixed parentage, 856,650 foreign-born whites, 33,110 negroes, and 5,161 other colored. The proportion which the gainfully occupied males formed of all the males ten years of age and over in each principal class of the population was: For native whites of native parentage, 75.5 per cent.; for native whites of foreign or mixed parentage, 72.2 per cent.; for foreign-born whites, 90 per cent.; and for negroes, 90.7 per cent.

Of the 586,193 gainfully occupied females in 1910, 93,266 were native whites of native parentage 189,739 native whites of foreign or mixed parentage, 276,648 foreign-born whites, 26,352 negroes and 188 other colored. The proportion which the gainfully occupied females formed of all the females ten years of age and over in each principal class of the population was: For native whites of native parentage, 26.8 per cent.; for native whites of foreign or mixed parentage, 30.7 per cent.; for foreign-born whites, 30.6 per cent.; and for negroes, 60.7 per cent.

AGE OF WORKERS.

The gainfully occupied males in 1910 were distributed according to age periods as follows: Ten to thirteen years, 712; fourteen to fifteen years, 20,696; sixteen to twenty years, 189,497; twenty-one to forty-four years and age unknown, 1,012,631; and forty-five years and over, 342,704. The proportion which the gainfully occupied males formed of all males in each age period was: For those ten to thirteen years of age, 0.4 per cent.; for those fourteen to fifteen years of age, 25.9 per cent.; for those sixteen to twenty years of age, 84.2 per cent.; for those twenty-one to forty-four years of age, 97.3 per cent.—that is, all but three men in every 100 had gainful occupations—and for those forty-five years of age and over, 87.1 per cent.

The gainfully occupied females in 1910 were distributed according to age periods as follows: Ten to thirteen years, 622; fourteen to fifteen years, 16,539; sixteen to twenty years, 171,780; twenty-one to forty-four years and age unknown, 330,738; and forty-five years and over, 66,514. The proportion which the gainfully occupied females formed of all females in each age period was: For those ten to thirteen years of age, 0.4 per cent.; for those fourteen to fifteen years of age, 20.2 per cent.; for those sixteen to twenty years of age, 65.8 per cent.; for those twenty-one to forty-four years of age, 32.9 per cent.; and for those forty-five years of age and over, 16.8 per cent.

NUMBER OF CHILDREN AT WORK.

In New York City in 1910 there were 21,408 males and 17,161 females ten to fifteen years of age engaged in gainful occupations; or, stated otherwise, 8.6 per cent. of the males and 6.8 per cent. of the females ten to fifteen years of age were gainful workers. In 1900 there were 29,871 males and 22,868 females ten to fifteen years of age engaged in gainful occupations.

PRINCIPAL OCCUPATIONS IN NEW YORK CITY.

The principal occupations followed by the males and the females, respectively, in New York City in 1910 were as follows:

MALES.

Actors	4,207	Draymen, teamsters, and expressmen	39,776
Agents, canvassers, and collectors	8,099	Electricians and electrical engineers	15,512

Bakers	13,312	Firemen (except locomotive & Fire Dept.)	7,320
Barbers, hairdressers, and manicures	16,210	Firemen (Fire Department)	4,447
Bartenders	12,519	Foremen and overseers (manufacturing)	7,924
Blacksmiths	7,922	Guards, watchmen, and doorkeepers	8,522
Bookkeepers, cashiers, and accountants	33,795	Hostlers and stable hands	5,342
Brick and stone masons	15,804	Insurance agents and officials	8,004
Builders and building contractors	15,000	Janitors and sextons	9,039
Carpenters	41,442	Laborers:	
Chauffeurs	9,255	General and not specified	35,501
Clerks (except clerks in stores)	87,813	Helpers in building and hand trades	5,752
Clerks in stores	34,629	Road and street building and repairing	16,618
Commercial travellers	10,915	Public service	4,788
Compositors, linotypers, and typesetters	16,826	Steam railroad	7,453
Conductors (street railroad)	5,216	Laborers, porters, and helpers in stores	11,873
Deliverymen	22,127	Laundry operatives	4,143

OCCUPATIONS—NEW YORK CITY SUMMARY—*Continued.*

MALES—*Continued.*

Lawyers, Judges, and Justices	10,563	Sailors and deck hands	4,743
Longshoremen and stevedores	17,165	Salesmen (stores)	66,445
Machinists and millwrights	24,709	Saloonkeepers	4,204
Mail carriers	4,267	Semi-skilled operatives:	
Managers and superintendents (manufg.)	7,664	Cigar and tobacco factories	9,995
Manufacturers and officials	35,806	Furniture, piano, and organ factories	6,368
Messenger, bundle, and office boys	20,787	Printing and publishing	7,689
Motormen	6,118	Shoe factories	5,408
Musicians and teachers of music	9,342	Suit, coat, cloak, and overall factories	19,116
Painters, glaziers, and varnishers (buildg.)	27,133	Servants	26,578
Painters, glaziers, and varnishers (factory)	4,797	Sewers & sewing machine operators (fact'y)	38,003
Physicians and surgeons	8,241	Shoemakers and cobblers (not in factory)	8,108
Plasterers	6,388	Soldiers, sailors, and marines	4,573
Plumbers and gas and steam fitters	19,564	Stenographers and typewriters	6,342
Policemen	10,689	Tailors	49,276
Porters (except in stores)	13,834	Teachers (school)	5,641
Real estate agents and officials	12,811	Tinsmiths	5,388
Restaurant, café, and lunchroom keepers	5,583	Waiters	20,659
Retail dealers	107,329	Wholesale dealers, importers, & exporters	7,762

FEMALES.

Actresses	3,759	Musicians and teachers of music	5,804
Barbers, bairdressers, and manicurists	3,864	Retail dealers	7,799
Boarding and lodging house keepers	6,707	Saleswomen (stores)	27,761
Bookkeepers, cashiers, and accountants	21,613	Semi-skilled operatives:	
Charwomen and cleaners	4,692	Cigar and tobacco factories	8,751
Clerks (except clerks in stores)	19,409	Paper box factories	3,011
Clerks in stores	9,947	Printing and publishing	6,889
Dressmakers & seamstresses (not in fact'y)	38,850	Silk mills	3,303
Forewomen & overseers (manufacturing)	3,302	Servants	113,409
Housekeepers and stewardesses	7,522	Sewers & sewing machine operators (fact'y)	65,042
Janitors and sextons	10,454	Stenographers and typewriters	33,769
Laundresses (not in laundry)	17,823	Tailoresses	6,002
Laundry operatives	5,874	Teachers (school)	21,683
Messenger, bundle, and office girls	2,664	Telephone operators	7,362
Midwives and nurses (not trained)	9,709	Trained nurses	7,504
Milliners and millinery dealers	12,096	Waitresses	8,958

For table of Occupations in the United States see 1915 Almanac, pages 242-245.

WORKERS IN THE UNITED STATES, BY AGE AND COLOR OR RACE.

(From a report of the Bureau of Census, July 9, 1914.)
